Dear Bidder,

Welcome to Heritage's U.S. Coins Signature Auction in Dallas! After two successful West Coast events (the Anaheim ANA and last month's Long Beach Expo), we are excited to return to Heritage's World Headquarters for a rousing home-turf event. The floor sessions are kicked off by a high-value Premier Session on Monday evening, followed by two floor sessions on Tuesday. An opportunity-filled online session concludes the Dallas auction on Wednesday, October 5.

We are grateful to more than 130 consignors for their participation in what promises to be an entertaining and rewarding auction for all. Three Featured Collections lead the way:

THE TWELVE OAKS COLLECTION, PART II

U.S. gold takes center stage in this second installment from one of the most extensive holdings of federal gold coinage we have ever offered, assembled by a Midwest numismatist over a number of decades. **Collectors and dealers alike will find it of interest that this very same numismatist also assembled The Highland Collection, which was sold by another auction firm in 2015.** A dedicated catalog was needed for the first part of this massive collection, which was one of the headline offerings at Long Beach. An additional 900+ lots are part of the Dallas auction, and Part III will appear in November's New York event.

THE WALTER FREEMAN COLLECTION, PART I

The Premier Session will be highlighted by a number of coins from this fine collection, including a 1794 silver dollar graded VF25 PCGS as lot 3185. Other noteworthy lots include:

- 1793 Liberty Cap cent Fine 12 PCGS (lot 3011)
- 1792 half disme Fine 12 PCGS (lot 3059)
- 1797 Draped Bust half dollar Fine 15 PCGS (lot 3118)
- 1796 No Stars Obverse quarter eagle XF45 PCGS (lot 3264)
- 1879 Flowing Hair stella PR50 PCGS (lot 3296)
- 1795 Small Eagle five dollar AU50 PCGS (lot 3297)
- 1795 13 Leaves eagle XF45 PCGS (lot 3320)
- 1797 Large Eagle ten MS62 NGC (lot 3321)
- 1871-CC twenty AU55 NGC (lot 3354)
- 1915-S \$50 Pan-Pac Octagonal AU55 PCGS (lot 3387)

More coins will be featured in the mid-November New York event, so please mark your calendar.

THE HAMILTON COLLECTION, PART III

We presented Parts I and II of this exceptional collection in the recent ANA and Long Beach events. Many bidders filled holes in their variety sets with high-end Bust halves and other early type that included Condition Census coins plus many lots in collector-friendly grades. Most of the coins were assembled between two and three decades ago, remaining in their original holders from the early days of third-party certification. We are pleased to present another 70 Hamilton Collection selections in this Dallas event, so watch for the pedigree in the Premier Session, as well as in floor session 2. Still more of the Hamilton-pedigreed coins will draw attention in Wednesday's online auction.

Other notable Dallas lots include an impressive collection of patterns, including several off-metal and silver examples – high-rarity, key representatives of America's pattern coinage, all housed in first-generation PCGS holders.

We look forward to welcoming all of our friends, clients, and dealer associates to Dallas. This is our opportunity to meet and serve you, and we look forward to personally assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!®.

Sincerely,

Greg Rohan
President

SESSION ONE

COLONIALS

1722 Hibernia Pattern Halfpenny, AU58+
Rocks Right of Hibernia, W-12650

- 3001** 1722 Hibernia Pattern Halfpenny, Rocks AU58+ PCGS. CAC. M. 1.1-A.1, W-12650, R.7. Miller 1.1-A.1 is the sole die marriage in the Hibernia series with rocks to the right of Hibernia. Given its rarity and unique design, the Rocks at Right variety is regarded as a pattern for the series, even though most survivors grade VF to XF. Ford VII:19 is the sole confirmed Uncirculated example, but the present piece comes close. Hibernia's knees and the harp statue show minor high-point blending. Traces of mint red linger in protected areas, and the mahogany-brown surfaces are minimally abraded. The king's cheek has a few small spots, and a loupe reveals occasional minor retained laminations, as made. Listed on page 46 of the 2017 *Guide Book*. NGC ID# 2AT9, PCGS# 164

1776 Continental Dollar, Fine 12
Pewter, CURENCY, Newman 1-C

- 3002** 1776 Continental Dollar, CURENCY, Pewter Fine 12 PCGS. Newman 1-C, W-8445, R.3. Many numismatists, such as Eric P. Newman, believe that the Continental dollar was intended to supplant the dollar denomination of paper Continental currency in circulation during the Revolutionary War. The earliest known publication to depict the type was *Historisch-genealogischer Calender*, published in Berlin in 1783. The present example is an early variety with the blundered legend CURENCY. Wear is appropriate for the Fine grade, and no marks are of any importance. This Continental dollar is free from the corrosion seen on many pewter pieces, although worn areas display deeper shades of gray. Listed on page 87 of the 2017 *Guide Book*.
From The Walter Freeman Collection, Part I. NGC ID# 2AYN, PCGS# 791

Washington Funeral Medal, VF Details
Rare Skull & Crossbones Type
Silver, Baker-165A

- 3003** (1800) Washington Funeral Medal, Skull & Crossbones, Silver — Graffiti — PCGS Genuine. VF Details. Baker-165A, Die Variety 1-A1. The Skull and Crossbones type is much rarer than its Funeral Urn counterpart. It was made for Washington's Masonic funeral procession in Boston on February 11, 1800, while the Funeral Urn medals were worn at Washington's February 22, 1800 civic funeral procession. Both designs are credited to Massachusetts engraver Jacob Perkins, and all examples seen exhibit a small hole near 12 o'clock, as issued. This example displays even wear except for weakness on the central reverse, affecting portions of OB.D.15. '99. The graffiti noted by PCGS is minor, and consists of a small, faint letter T on the obverse at 6 o'clock. PCGS# 412255

HALF CENTS

1793 C-4, B-4 Half Cent, VF20
Usual Late Die State

- 3004** 1793 C-4, B-4, Low R.3, VF20 PCGS. CAC. Manley Die State 2.0 with a die defect on top of the 7 in the date. This example shows normal coin-turn die alignment, despite Manley's comment in *The Die State Book* that the variety is known only with 15° rotation. Housed in a first-generation PCGS holder, this piece has attractive tan and olive-brown surfaces that any collector would love. Scattered circulation marks are consistent with the grade. The impression is nicely centered, although only partial border detail is evident. Our EAC grade Fine 15. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

1800 C-1 Half Cent, MS64 Brown

- 3005** 1800 C-1, B-1, R.1, MS64 Brown PCGS. Manley Die State 4.0. A coruscating chocolate-brown near-Gem with olive-green and rose-red undertones. The strike is nice, although the F in OF is soft since it is opposite the bust tip. Surface imperfections are confined to a narrow and intermittent field depression below the hair ribbon. Our EAC grade MS60.
From The Walter Freeman Collection, Part I. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

1835 Half Cent, C-1, MS65 Red
Top-Grade Red Coin at NGC

- 3006** 1835 C-1, B-1, R.1, MS65 Red NGC. Manley Die State 1. This sharp, lustrous Gem is tied for the finest in Red condition at NGC, a distinction that is not surpassed at PCGS, where the finest Red coins are also MS65s. The stars, wreath, and portrait are intricately detailed, and a lack of abrasions further boosts the eye appeal. A loupe reveals a few pale flecks, none particularly noteworthy. Our EAC grade MS64. Census: 4 in 65 Red, 0 finer (8/16). PCGS# 35290 Base PCGS# 1170

LARGE CENTS

1793 S-2, B-2 Chain Cent, VF Details
Bold Reverse Design Elements

- 3007** 1793 Chain, AMERICA, S-2, B-2, High R.4 — Tooled — NGC Details. VF. Two old brownish gouges on the obverse blend into the surrounding dark steel-brown surfaces of this nicely detailed Chain cent. The actual chain on the reverse is especially bold. Both sides exhibit slight surface roughness with a semi-glossy appearance, the result of burnishing. This is one of those early coppers that is actually nicer than the description suggests. Our EAC grade VG10. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

1793 S-3, B-4 Chain Cent, Fine Details

- 3008** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Environmental Damage — NGC Details. Fine. The portrait, date, LIBERTY, chain, and all lettering are prominently visible on this nicely defined Chain cent, with the sharpness stronger than NGC reports, in our opinion. Both sides have dark chocolate surfaces with porosity and raised corrosion that should keep the price at an affordable level for many collectors. Our EAC grade VG7. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 Chain Cent, Fine 12
S-3, AMERICA

- 3009** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fine 12 PCGS. Breen Die State III. An attractive walnut-brown representative of the introductory cent design type. All legends are fully readable and the portrait is well outlined. Liberty's eye is clear and the surface show only moderate granularity. The rims are in excellent shape for the designated grade, with only one slight knock on the reverse at 1 o'clock. We note a few brief thin diagonal obverse marks on the cheekbone and near the bust tip. The high R in LIBERTY is a pick-up point for Sheldon-3, although others look for the narrow bust tip pointing at 5 o'clock. Our EAC grade VG7. *From The Walter Freeman Collection, Part I.* NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-8 Wreath Cent, VF25
Vine and Bars Edge

- 3010** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF25 PCGS. Breen Die State II. A lavender-brown example with pleasing sharpness. All legends are crisp, and portions of Liberty's inner hair detail are apparent. The lightly granular surfaces are relatively unabraded, though we note a small rim knock at 5:30 on the reverse. The diagonal crack across the central reverse is an identifier for S-8, as is its large, triangular bow. Our EAC grade Fine 12. *From The Walter Freeman Collection, Part I.* NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1793 S-13, B-20 Cent, Fine 12
Liberty Cap Design

3011 1793 Liberty Cap, S-13, B-20, Low R.4, Fine 12 PCGS. Housed in a green-label PCGS holder, this pleasing 1793 Liberty Cap cent exhibits faint bluish-steel toning on light brown surfaces. Both sides exhibit the usual minor handling marks that are consistent with the grade. A line of planchet lamination crosses the bust and lower hair curls from 5 o'clock to 8 o'clock. A nicely centered impression, this piece exhibits full border beads, those on the obverse tight against the edge. Attractive middle-grade 1793 Liberty Cap cents are elusive, and this example will be a nice addition to a type, date, or variety collection. Our EAC grade VG8.

From The Walter Freeman Collection, Part I. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

1794 Head of 1794 Cent, Choice AU
S-30, Exceptional Surfaces

3012 1794 Head of 1794, S-30, B-12, R.1, AU55 PCGS. Breen Die State IV. A well struck and exemplary chocolate-brown cent. Refreshingly unabraded, and carbon is also virtually absent. The "First Marred Field" variety, named after the short, narrow, vertical break below Liberty's cap. The radial crack through the R in AMERICA also provides an identifier, as do the multiple sets of bold clash marks above the portrait. Certified in a green label holder. Our EAC grade VF30.

From The Walter Freeman Collection, Part I. NGC ID# 223P, PCGS# 35555 Base PCGS# 901374

1794 Large Cent, S-67, B-59, MS64+ Brown
Condition Census, Head of 1795

3013 1794 Head of 1795, S-67, B-59, R.3, MS64+ Brown PCGS. Breen Die State III with clash marks and a faint crack through the tops or RTY. Another crack crosses the cheek, temple, and hair but there is no evidence of the late die state crack through 794. Although S-67 is considered reasonably plentiful with an R.3 rating, higher grade examples are elusive.

This piece represents the "Head of 1795" or "Gardner's First Head," the latter Breen's usage. He attributed the design to assistant Mint engraver John Smith Gardner. Sheldon's varieties 67 through 72 are considered Head of 1795 varieties. For *Guide Book* collectors, variety 67 is the most plentiful in high grades, although the Noyes Census only lists 20 examples in AU or better for the six Sheldon numbers, combined. On this well-preserved piece, recorded as sixth finest in the Noyes Census, both the chips out of the hair and the diagnostic die clashes before the profile are clearly visible. Del Bland grades this specimen AU50, and it appears with three others in a fifth place tie in his Condition Census.

Lustrous surfaces are medium-brown with considerable violet overtones and the faintest hints of cinnamon-orange at the right obverse and reverse. A trivial obverse rim bruise at 9:30 confirms the provenance. Though a handful of tiny nicks and wispy flaws preclude a finer grade, this coin offers great all-around visual appeal. Our EAC grade AU50. NGC ID# 223R, PCGS# 35684 Base PCGS# 1365

1795 Sheldon-75 Cent, XF40 CAC
Lettered Edge, In an Old Holder

- 3014** 1795 Lettered Edge, S-75, B-3, R.3, XF40 NGC. CAC. Breen Die State III, although the crack above the AME in AMERICA is faint. This coin showcases an even, well-centered strike with delightfully smooth, problem free surfaces and medium reddish-brown coloration. Wear is light, and there are no distracting marks. The coin is CAC-endorsed and housed in a prior generation holder. Our EAC grade VF25. NGC ID# 223S, PCGS# 35717 Base PCGS# 1377

1812 Small Date Cent, MS61 Brown
S-290, Condition Rarity

- 3015** 1812 Small Date, S-290, B-2, R.1, MS61 Brown PCGS. Breen Die State III. Most of the left-hand stars remain sharp at their centers despite the late state of the dies, while the right-hand stars are less so, particularly stars 8 to 10. The surfaces are smooth and lustrous, although diagnostically flowlined on the reverse at the margins where STATES climbs the rim to merge with a raised rim. Faint reddish-tan shades emerge from the chocolate-brown toning with blue overtones. Some faint planchet striations near star 6 are visible with a loupe. Our EAC grade AU55. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

1824 N-2 Cent, MS64 Red and Brown
Rare Partially Red Example
Probably the Finest Known N-2

- 3016** 1824 N-2, R.2, MS64 Red and Brown PCGS. CAC. Noyes Die State B; this is the later die state, showing light flowlines towards the peripheries and fading dentils on the reverse, but lacking the faint die crack between star 9 and Liberty's hair. The surfaces are free of bothersome abrasions, save for slight deepening of the patina on Liberty's cheek. The fields show significant coppery-red luster penetrating subtle auburn-brown overtones. Several stars are weak, but the interior motifs are sharp. A few scattered specks do not detract. As a date, the 1824 large cent is elusive at the Mint State level. Pieces retaining enough original luster to grade in the Red and Brown or Red categories are rare. This is a highly important offering for the large cent specialist. Our EAC grade MS63. Population: 1 in 64 (1 in 64+) Red and Brown, 1 finer (8/16). NGC ID# 225D, PCGS# 36770 Base PCGS# 1637

1851/81 N-3 Large Cent, MS66 Brown
Popular Early Die State

- 3017 1851/81 N-3, R.1, MS66 Brown PCGS. CAC.** Grellman Die State a. A desirable early state of the dies, with heavy, horizontal lines beneath the date and the repunched underdigits crisply visible. The surfaces are smooth, glossy, and lustrous with sharply defined central elements. The peripheral dentils and stars are a bit less well-struck at the upper obverse but still pleasing. Traces of mint red are fleeting beneath the rich, bluish-brown patina. Our EAC grade MS62. Population: 4 in 66 (1 in 66+) Brown, 0 finer. CAC: 3 in 66, 0 finer (8/16). NGC ID# 226H, PCGS# 400138 Base PCGS# 1895

1853 Braided Hair Cent, N-25, MS66 Red
Impeccably Preserved and Lustrous

- 3018 1853 MS66 Red PCGS. N-25, R.1.** Grellman Die State b. The 1853 Braided Hair cent claims a substantial mintage of 6.6 million pieces. This delightful Premium Gem exhibits well-detailed design elements, with just a touch of softness on the stars. The original red surfaces are impeccably preserved and radiate vibrant mint luster on both sides. Our EAC grade MS65. Population: 15 in 66 Red, 1 finer (8/16). NGC ID# 226K, PCGS# 1903

PROOF LARGE CENT

1831 N-11 Cent, PR64 Brown
Ex: Stickney-Starr
Extremely Rare in Proof

- 3019 1831 Medium Letters, N-11, R.8 as Proof, PR64 Brown PCGS. CAC.** This piece is the finer of just two proofs known from the 1831 Newcomb-11 die pair. Although the strike is a trifle blunt at the upper obverse and lower reverse, this is a lovely and unmistakable proof with pristine surfaces. Lovely light brown surfaces exhibit delicate blue overtones, and traces of original orange mint color. According to Denis Loring's proof large cent census, there are only two known proofs of N-11. Among the 1831 large cents records 12 examples of N-3, two one-sided proof examples of N-6, one proof of N-9 and a one-sided proof of the same variety, three one-sided proofs of N-10, and the two aforementioned examples of N-11. The total count of 22 proof 1831 large cents has to suffice for type and date collections, as well as advanced variety specialists. Our EAC grade PR63.
Ex: Stickney Collection (Henry Chapman, 6/1907), lot 1596; Floyd Starr (Stack's, 6/1984), lot 256; Robinson S. Brown, Jr. (Superior, 9/1986), lot 713; RARCOA (8/1991), lot 15; Superior (8/1992), lot 16; Denis W. Loring; Twin Leaf Collection (Stack's-Bowers, 7/2015), lot 2211. PCGS# 533818 Base PCGS# 1796

INDIAN CENTS

1859 Indian Cent, MS66
Excellent First-Year Type Coin

- 3020 1859 MS66 PCGS.** This delightful Premium Gem represents the first year of the Indian cent design and the only year of the Laurel Wreath reverse type. The design elements are sharp on the obverse, but a touch of softness shows on the denomination and ribbon bow. The well-preserved original red surfaces radiate vibrant mint luster on both sides. Population: 32 in 66 (3 in 66+), 0 finer (8/16). NGC ID# 227E, PCGS# 2052

1859 Indian Head Cent, MS66
A Top One-Year Type Example

- 3021 1859 MS66 PCGS. CAC.** The Flying Eagle design presented Mint officials with striking difficulties and was replaced with an Indian Head motif in 1859. The laurel wreath introduced in that year was substituted with an oak wreath and shield design in 1860, creating a popular one-year type in 1859. This Premium Gem cent boasts crisp feather and ribbon detail. Golden-amber surfaces show a handful of scattered ticks, but they are relatively insignificant, as this piece is among the finest survivors from a mintage of 36.4 million coins. Population: 32 in 66 (3 in 66+), 0 finer. CAC: 9 in 66, 0 finer (8/16). NGC ID# 227E, PCGS# 2052

PROOF INDIAN CENT

1859 Indian Cent, PR65+ Cameo
Laurel Wreath Proof Type Coin

- 3022 1859 PR65+ Cameo NGC.** Cameo examples of the one-year Laurel Wreath type are rare. This high-end Gem displays full detail throughout and deeply reflective fields that provide appreciable contrast on each side. There are no distracting marks, and a single fleck of toning is seen above the TE in UNITED. Census: 7 in 65 Cameo (1 in 65+), 6 finer (8/16). NGC ID# 2299, PCGS# 82247

LINCOLN CENTS

1909-S VDB Lincoln Cent, MS66 Red
Famous First-Year Key

- 3023 1909-S VDB MS66 Red PCGS.** Examples of this sought-after first-year key are always in demand, especially in high grade, with original red surfaces like the present coin. The design elements are sharply detailed throughout and the all-important designer's initials are bold. No mentionable distractions are evident and vibrant mint luster adds to the exceptional eye appeal. PCGS has graded 15 numerically finer examples (8/16). NGC ID# 22B2, PCGS# 2428

1912-D Lincoln Cent, MS66 Red
Sharply Detailed and Well-Preserved

- 3024 1912-D MS66 Red PCGS.** This early series Lincoln cent displays razor-sharp definition on all design elements and the lustrous original surfaces show mellow red patina with no mentionable distractions. Overall eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. Population: 27 in 66 (2 in 66+) Red, 0 finer (8/16). NGC ID# 22BB, PCGS# 2455

1914-D Cent, MS65 Brown
Key Denver Issue, Scarce This Fine

- 3025 1914-D MS65 Brown NGC.** Struck from a late state of the dies, showing some blurring of the device edges as the die surface is worn — a thin rim cud is also discernible with a loupe above the IBUS in PLURIBUS. This Gem Brown 1914-D cent displays well-defined motifs and satiny surfaces. Brassy-gold undertones illuminate chestnut-brown toning. Census: 16 in 65 Brown, 3 finer (8/16). NGC ID# 84BX, PCGS# 2471

1914-D Cent, MS65 Red
Seldom Available This Fine

3026 1914-D MS65 Red PCGS. In Gem Red condition, the 1914-D easily surpasses its more famous key-date counterpart, the 1909-S VDB, in terms of conditional rarity. The '14-D was not nearly the novelty as was the S-VDB in the early years following its coinage. Significantly fewer Mint State pieces were set aside, and the number of coins stored in such a way that their original mint luster was preserved was paltry in the context of the Lincoln cent series.

The present Gem displays luminous golden-orange luster without distracting abrasions, although a scattering of tiny pepper specks is seen on the obverse along with a few stray flecks on the reverse. Over the years, we have seen extremely few Red 1914-D cents in this and comparable grades without at least some carbon spots — most of the pieces that do not have them have been cleaned. This coin is sharply struck and attractive. Technically finer representatives are exceedingly rare. Population: 69 in 65 (7 in 65+) Red, 7 finer (8/16). NGC ID# 22BH, PCGS# 2473

1916-D Lincoln Cent, MS66 Red
Lustrous and Sharply Detailed

3027 1916-D MS66 Red PCGS. The design elements of this remarkable Premium Gem are sharply detailed throughout and the impeccably preserved original red surfaces radiate vibrant mint luster on both sides. Overall eye appeal is tremendous. We expect intense competition from advanced collectors and Registry Set enthusiasts when this lot is called. Population: 17 in 66 (4 in 66+) Red, 2 finer (8/16). NGC ID# 22BP, PCGS# 2491

1919-D Cent, MS66 Red
Rarely Encountered in This Grade

3028 1919-D MS66 Red PCGS. Shimmering satin luster delivers warm golden-orange and coppery-red hues throughout the well-preserved surfaces of this high-end 1919-D Lincoln cent. Only a few trivial flecks are discernible, and there are no severe abrasions. The coin is well-struck, although metal flowlines are beginning to appear in the peripheral fields. The 1919-D is rare this fine at PCGS and unknown at NGC above MS65 Red. Population: 16 in 66 (3 in 66+) Red, 1 finer (8/16). NGC ID# 22BZ, PCGS# 2518

1957 Lincoln Cent, MS67 Red
None Finer at PCGS

3029 1957 MS67 Red PCGS. The impeccably preserved original red surfaces of this spectacular Superb Gem radiate vibrant mint luster on both sides, with well-detailed design elements and outstanding eye appeal. This coin should find a home in the finest collection or Registry Set of Lincoln cents. Population: 17 in 67 Red, 0 finer (8/16). NGC ID# 22FM, PCGS# 2842

PROOF LINCOLN CENTS

1916 Cent, PR65 Red and Brown, Mostly Red in Color

- 3030 1916 PR65 Red and Brown PCGS.** A collectible yet high-end Red and Brown example of this final matte proof Lincoln cent issue, showing fully defined motifs and squared rims. Both sides display luminous coppery-red luster with a dusting of auburn-brown toning. There are no mentionable marks or specks. The 1916 matte proof had a small mintage of 1,050 pieces, reflecting the reduced collector interest that led to the discontinuance of the matter proof series. Population: 53 in 65 (1 in 65+) Red and Brown, 24 finer (8/16). NGC ID# 22KZ, PCGS# 3325

**1941 Cent, PR67 Red
Tied for Finest Certified
Registry Set Essential**

- 3031 1941 PR67 Red PCGS.** The 1941 proof Lincoln cent is plentiful in most grades but becomes rare at the Superb Gem Red level. PCGS lists only six pieces in PR67 Red and none finer, while NGC contributes just eight more in this grade, also with none finer (8/16). No Cameos are known. These rare top-tier coins are actively sought-after by Registry collectors. This piece is fully struck from highly polished dies, delivering watery copper-orange fields that display unsurpassed preservation. A couple of tiny flecks appear near the T in TRUST, but there are no other mentionable imperfections. Eye appeal is outstanding. NGC ID# 3H34, PCGS# 3350

**1942 Cent, PR67 Red Cameo
None Graded Finer**

- 3032 1942 PR67 Red Cameo NGC.** Seven consecutive years of proof production came to an end after 1942 as resources like copper were directed toward the war effort. The Mint struck 32,600 proofs in that final year. Cameo representatives are very scarce across all grade levels and are extremely rare in PR67 Red Cameo. Light pumpkin-gold surfaces display marked contrast on each side with smooth, reflective fields. A pristine example that ranks among the finest certified at both services. Census: 3 in 67 Red Cameo, 0 finer (8/16). NGC ID# 22L9, PCGS# 83353

**1971-S Lincoln Cent, PR69 Red Cameo
Doubled Die Obverse, Tied for Finest Certified**

- 3033 1971-S Doubled Die Obverse, FS-101, PR69 Red Cameo PCGS.** A popular *Guide Book* and *Cherrypickers* variety, the doubling on this piece is easily seen on LIBERTY, but less dramatic on the date. The design elements of this incredible specimen are sharply detailed throughout and the fields are deeply mirrored to create intense cameo contrast. The original red surfaces are just one tick away from perfection. Population: 1 in 69 Red Cameo, 0 finer (8/16). NGC ID# 22M3, PCGS# 83533 Base PCGS# 83548

1990 No S Cent, PR69 Red Deep Cameo
None Known Finer

- 3034** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. As of yet, not a single 1990 No S Deep Cameo proof cent has achieved the PR70 Red grade, and PR69 Red representatives are rare. This example displays picture-perfect contrast and seemingly flawless preservation. The devices are fully rendered. The 1990 No S proof cent is one of the keys to the proof Registry Set, particularly in this exalted grade. Population: 40 in 69 Deep Cameo, 0 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

THREE CENT SILVER

1869 Three Cent Silver, MS65
Elusive, Low-Mintage Issue

- 3035** 1869 MS65 PCGS. There was little economic demand for the silver three cent piece by 1869 and only 4,500 business-strike examples were struck that year. This impressive Gem exhibits sharply detailed design elements throughout, with much prooflike reflectivity in the fields. The well-preserved surfaces are visited by attractive shades of greenish-gold and lavender-gray toning. Population: 4 in 65, 8 finer (8/16). NGC ID# 22ZK, PCGS# 3689

PROOF THREE CENT SILVER

1871 Three Cent Silver, PR67 Cameo
Exceptional Opportunity for a Date Set

- 3036** 1871 PR67 Cameo PCGS. In 1871, the Mint produced 960 proof three cent silver pieces and 3,400 circulation strikes. As many coins of both formats were melted, high-grade proofs are an important substitute for specialists attempting to complete a date set. The present Superb Gem is the finest likely to be encountered, an exceptional opportunity for the three cent silver collector. Cobalt-blue, lavender, and reddish-gold gravitate to the margins, ceding to soft greenish-blue in the central areas. The central devices are light silver-gray and stand out against the fields, especially on the obverse. Sharply struck design elements and impeccably preserved surfaces round out the outstanding eye appeal of this piece. We mention a minuscule strike-through on the lower parts of the first two stands in the denomination solely to help future catalogers and researchers identify the coin. Population: 1 in 67 Cameo, 1 finer (8/16). NGC ID# 27CG, PCGS# 83722

THREE CENT NICKEL

1866 Nickel Three Cent, Frosty MS67+
Advanced Die State

- 3037** 1866 MS67+ NGC. CAC. The 1866 nickel three cent is rare in MS66 and exceedingly so finer. This Plus-designated Superb Gem is exceptionally vibrant and frosty, devoid of toning. Struck from severely deteriorated dies, the peripheries show extensive flowlines and both sides are heavily clashed. However, the sharpness of the obverse portrait is unaffected the luster is incredible. Close study with a loupe fails to reveal even minor abrasions. Census: 3 in 67 (1 in 67+), 1 in 67★), 1 finer. CAC: 6 in 67, 0 finer (8/16). NGC ID# 22NK, PCGS# 3732

PROOF THREE CENT NICKELS

1870 Three Cent Nickel, PR67 Cameo
Starkly Contrasted

- 3038** 1870 PR67 Cameo NGC. Only 1,000 proofs are estimated to have been struck in 1870. This is a deeply mirrored representative that benefits from noticeable contrast against the chalky central devices. There appear to be no grade-limiting factors on this appealing Superb Gem. Census: 6 in 67 Cameo (1 in 67+, 2 in 67★), 0 finer (8/16).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5409. NGC ID# 275W, PCGS# 83766

1876 Three Cent Nickel, PR67 ★ Cameo
Brilliant and Strongly Contrasted

- 3039** 1876 PR67 ★ Cameo NGC. Brilliant overall with exceptionally deep mirrors in the fields, the devices are nicely frosted, providing strong field-to-device contrast on each side. A stunning coin and virtually unsurpassable in terms of aesthetic appeal. Census: 7 in 67 Cameo (5 in 67★), 0 finer (8/16).

Ex: Dallas Signature (Heritage, 11/2005), lot 2028. NGC ID# 275W, PCGS# 83772

1876 Three Cent Nickel, PR67 ★ Cameo
Among the Finest Known

- 3040** 1876 PR67 ★ Cameo NGC. Ex: TDP Collection. Brilliant overall with exceptionally deep mirrors in the fields, the devices are nicely frosted which provides a strong field-to-device contrast on each side. A stunning coin and numerically unsurpassable. Census: 7 in 67 Cameo (5 in 67★), 0 finer (8/16).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5421. NGC ID# 275W, PCGS# 83772

1877 Three Cent Nickel, PR67 Cameo
Brilliant Surfaces

- 3041** 1877 PR67 Cameo PCGS. A brilliant high-grade specimen that features frosty motifs and reflective fields. The strike is intricate throughout. No contact is apparent, although a lens reveals minute obverse carbon. The Star designation is elusive on 19th century proofs. Population: 14 in 67 Cameo, 0 finer (8/16). NGC ID# 275X, PCGS# 83773

SHIELD NICKEL

1883/2 Shield Nickel, MS66
Popular FS-302 Overdate

- 3042** 1883/2 FS-302 MS66 NGC. More than one 1882-dated nickel die was leftover after the end of the year, resulting in several popular overdate varieties in 1883. Remnants of secondary digits are evident inside the loops of the two 8's and slightly left of the 3 on this delightful MS66 specimen. This sharply detailed Premium Gem shows a number of interesting die cracks on both sides, with vibrant mint luster and impeccably preserved surfaces. Census: 3 in 66, 3 finer (8/16). PCGS# 38413 Base PCGS# 3813

PROOF SHIELD NICKELS

1874 Shield Nickel, PR66 Deep Cameo
Sole Deep Cameo at PCGS

- 3043** 1874 PR66 Deep Cameo PCGS. This is the finer of only two Deep/Ultra Cameo examples certified, the other piece being a PR65 Ultra Cameo at NGC (8/16). This Premium Gem 1874 proof Shield nickel displays a needle-sharp strike and intense field-device contrast. Traces of golden toning add to the eye appeal. A finer 1874 proof is almost impossible to imagine. PCGS# 93828

**1878 Shield Nickel, PR67 Cameo
Proof-Only Date**

- 3044 1878 PR67 Cameo PCGS.** A reflective example of this proof-only issue — essential for a complete date set, and seldom seen any finer. Vibrant, brilliant-silver surfaces show frosted motifs and a razor-sharp strike with a slight hint of gold at the margins. A small planchet flaw by the T in TRUST goes nearly unnoticed but is mentioned for accuracy. Nicely mirrored for the issue, a date that often resembles a business strike although only proofs were made. Population: 6 in 67 Cameo, 0 finer (8/16). NGC ID# 276V, PCGS# 83832

LIBERTY NICKELS

**1886 Liberty Nickel, MS65
Lower-Mintage Key Date**

- 3045 1886 MS65 PCGS.** The 1886 Liberty nickel claims a small mintage of 3.3 million pieces and few high-quality examples were saved by contemporary collectors. This attractive Gem is sharply detailed in most areas but with a touch of softness on the lower wreath. The well-preserved, lustrous surfaces are visited by shades of golden-tan and lavender-gray toning. Population: 55 in 65 (3 in 65+), 9 finer (8/16). NGC ID# 277U, PCGS# 3847

**1888 Liberty Nickel, MS66+
Tied for Second Finest Certified**

- 3046 1888 MS66+ PCGS.** An impressive Premium Gem, this lovely Liberty nickel features frosty gray luster and dappled gold toning to enhance the eye appeal. A typical strike shows weakness at the lower left portion of the wreath, with the ear of corn expectedly flat. However, this is an outstanding example for a high grade Registry collection of Liberty nickels. Population: 22 in 66 (4 in 66+), 1 finer (8/16). NGC ID# 2774, PCGS# 3849

**1891 Liberty Nickel, MS66+
Only Two Finer at PCGS**

- 3047 1891 MS66+ PCGS.** Although the definition at the lower left part of the wreath is only partially visible, the strike is above average for this issue. A couple trivial toning spots appear on the brilliant surfaces of this highly lustrous light gray Premium Gem. An important opportunity for the advanced collector. Population: 37 in 66 (5 in 66+), 2 finer (8/16). NGC ID# 2776, PCGS# 3852

**1891 Nickel, Untoned MS66+
Highly Lustrous Surfaces**

- 3048 1891 MS66+ PCGS. CAC.** The 1891 is a scarcer date in the series, even though more than 16 million pieces were produced. Strike quality varies, but many examples are found with several areas of weakness. This is a highly lustrous coin with strong strike details — the only weak area is seen on the left ear of corn, as found on most dates. Untoned. Population: 37 in 66 (5 in 66+), 2 finer. CAC: 10 in 66, 1 finer (8/16). NGC ID# 2776, PCGS# 3852

**1903 Liberty Nickel, MS67
Tied for Finest at PCGS**

- 3049 1903 MS67 PCGS.** The 1903 Liberty nickel is a very rare issue at the MS67 grade level. This delightful Superb Gem exhibits sharply detailed design elements in most areas, with a touch of softness on the lower wreath. The impeccably preserved surfaces display vibrant mint luster throughout with a few hints of pale gold and lavender-gray toning. Population: 4 in 67, 0 finer (8/16). NGC ID# 277E, PCGS# 3864

1905 Liberty Nickel, MS67
None Certified Finer

- 3050 1905 MS67 PCGS.** This Superb Gem is tied with two others at PCGS for the finest certified, and NGC has graded a single similar example. Both sides are highly lustrous with delicate champagne toning on the frosty light gray surfaces. Here is an important opportunity for the advanced Set Registry collector. Population: 3 in 67, 0 finer (8/16). NGC ID# 277G, PCGS# 3866

PROOF LIBERTY NICKEL

1889 Nickel, PR65 Cameo
Rare With Field-Motif Contrast

- 3051 1889 PR65 Cameo PCGS.** Only a handful of proof 1889 Liberty nickels have achieved Cameo designations at PCGS and NGC combined. The present Gem is the sole second finest at PCGS and tied for the second finest overall (8/16). No Deep Cameos are reported. The strike is sharp throughout, and the modest field-device contrast is cast in warm golden toning without distracting contact marks. Population: 1 in 65 Cameo, 1 finer (8/16). NGC ID# 277X, PCGS# 83887

BUFFALO NICKELS

1913-S Type Two Nickel, MS66
Fully Lustrous and Well-Struck

- 3052 1913-S Type Two MS66 PCGS.** Fully lustrous with brilliant nickel-gray surfaces and wisps of pale rose toning. The faintest traces of peripheral gold color add to the overall eye appeal of this remarkable nickel. The design elements are well-struck, including the braid and bison's horn and tail. There are no mentionable marks or spots. Population: 35 in 66, 4 finer (8/16). NGC ID# 22R3, PCGS# 3923

1920-D Buffalo Nickel, MS65
Seldom Encountered Any Finer

- 3053 1920-D MS65 PCGS.** The 1920-D Buffalo nickel is known as a strike-rarity, but this delightful Gem is sharply detailed in many areas, with just a touch of the typical softness on the Bison's head and shoulder. The well-preserved surfaces radiate vibrant satiny mint luster, with highlights of greenish-gold and ice-blue toning. Population: 79 in 65 (4 in 65+), 4 finer (8/16). NGC ID# 22RR, PCGS# 3945

1920-D Nickel, Well-Struck MS65+
Few Finer Examples Known

- 3054 1920-D MS65+ PCGS.** Due to its typically weak strike and lackluster surfaces, the 1920-D is seldom seen in MS65 and rarely finer. This high-end Gem is unusually pleasing, with satiny champagne-tinted luster and unabraded surfaces. Slight weakness on the central high points and the bison's head is not to the extent seen on many other Uncirculated 1920-D nickels. Population: 79 in 65 (4 in 65+), 4 finer (8/16). NGC ID# 22RR, PCGS# 3945

1925-D Buffalo Nickel, MS66
Tied for Finest at PCGS

- 3055 1925-D MS66 PCGS.** The 1925-D Buffalo nickel is conditionally rare at the MS66 level, and no coins have been certified in higher numeric grades (8/16). This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with highlights of ice-blue and greenish-gold toning. Population: 12 in 66, 0 finer (8/16). NGC ID# 22S3, PCGS# 3955

1931-S Nickel, Beautifully Toned MS67
Tied for Finest Known

3056 1931-S MS67 PCGS. A gorgeously patinated and crisply struck nickel, with alternating shades of dusky-tan, sun-gold, lilac, and steel-blue toning. The Recession-era mintage of 1.2 million pieces was by far the lowest of the decade (and the second-lowest for the entire series), yet in even in Mint State grades through MS66 the 1931-S is available to collectors. The issue is rare only at the MS67 level, where a grand total of just nine coins have attained Superb Gem status at both services combined (8/16).

This representative is radiantly lustrous beneath the stunning coloration. Marks are virtually nonexistent on the satin-smooth, reflective surfaces. Both sides showcase memorable surface quality in addition to the outstanding eye appeal. Perhaps the ultimate condition rarity for Buffalo nickel collectors, this Registry Set candidate will upgrade even the finest set. Population: 7 in 67, 0 finer (8/16). NGC ID# 22SK, PCGS# 3971

PROOF BUFFALO NICKEL

1936 Buffalo Nickel, PR68
Satin Finish Proof

3057 1936 Type One — Satin Finish PR68 NGC. This amazing Superb Gem represents the early proof strikings of 1936 with the satin finish, before the Mint reverted to the brilliant proof style that was used for much of their earlier (and later) history. This fully defined example is highly lustrous with gorgeous champagne toning on its light gray surfaces. Census: 30 in 68 (1 in 68+, 2 in 68 ★, 1 in 68+★), 0 finer (8/16). NGC ID# 278X, PCGS# 3994

JEFFERSON NICKEL

1949-D/S Nickel, Lightly Toned MS67
Tied for Finest at PCGS

3058 1949-D/S FS-501 MS67 PCGS. This remarkable Superb Gem is tied with two others as the finest 1949-D/S nickel at PCGS (8/16). This important *Guide Book* variety shows an errant S plainly at the upper-left corner of the D mintmark. The present example is not fully defined on the steps of Monticello but is elsewhere sharp. The lavender-gray and champagne surfaces yield lovely, frosted mint luster without abrasions. Eye appeal is outstanding. NGC ID# 22UC, PCGS# 38511 Base PCGS# 4039

EARLY HALF DIMES

1792 Half Disme, Fine 12
Judd-7, Pollock-7
America's First Official Coinage

- 3059** 1792 Half Disme, Judd-7, Pollock-7, R.4, Fine 12 PCGS. The 1792 half disme is considered by many to be the most important issue in American coinage. As the first denomination manufactured after the Coin Act of April 2, 1792, the 1,500 half dismes struck represent the first official production of United States federal coinage. Interestingly, a number of pieces survive in extraordinarily high grades, saved as gifts from the likes of George Washington, Thomas Jefferson, and David Rittenhouse, while others actually circulated extensively in Early America.

This Fine 12 representative falls into the latter category. The steel-gray obverse displays gunmetal and olive accents around the borders and pale gold over the interiors. Liberty's portrait is clearly outlined with partial detail on the mouth, eye, and upper curls. The legends are entirely readable. The reverse is not quite as well-defined. Only the eagle's left (facing) wing, UNITED, and AMERICA are visible. HALF DISME is faint, and horizontal pin scratches occur over what would be the eagle's head. Despite the noted imperfections, this is a highly collectible example that will surely hold a place of significance in any meticulously assembled collection. Population: 5 in 12, 73 finer (8/16).

From The Walter Freeman Collection, Part I. NGC ID# 946T, PCGS# 11020

1794 Half Dime, Sharp XF45
Rare V-1, LM-1 Die Pairing

- 3060** 1794 V-1, LM-1, R.6, XF45 PCGS. LM-1 is the rarest of the four 1794 half dime varieties. For the variety enthusiast, this Choice XF example is something to get excited about. The sharpness of the central devices is nearly AU, although the deep gunmetal-gray and olive patina encourages the XF assessment. Much of the weakness around the peripheries is due to mint-made planchet adjustments, with the telltale file marks still visible along portions of the rims. A planchet lamination covers most of the IC in AMERICA. LM-1 is rare enough that any example is worthy of a premium bid. NGC ID# 22ZT, PCGS# 38581 Base PCGS# 4250

1794 Half Dime, Bold AU55
Rare V-2, LM-2 Variety

- 3061** 1794 V-2, LM-2, R.5, AU55 PCGS. The second-rarest die pair for the 1794 is attributed by the leaf tip under the U in UNITED and the R in LIBERTY mostly right of the hair curls. Reportedly, 7,756 half dismes were delivered on March 30, 1795. Most were dated 1794, but the group possibly included a small number of 1795 coins. Many 1794 half dismes were saved as first-year souvenirs, although few are as well-preserved as this brilliant Choice AU piece. The motifs are strongly defined with normal softness on the curl tips and extreme centers. Population (all varieties): 9 in 55, 58 finer (8/16).
From The Walter Freeman Collection, Part I. NGC ID# 22ZU, PCGS# 38582 Base PCGS# 4250

1794 Half Dime, V-4, LM-4, AU58
Sharp First-Year Flowing Hair Example

3062 1794 V-4, LM-4, R.4, AU58 NGC. The date sits low beneath curl and bust, while the reverse has three inner berries but no outer berries beneath the left (facing) wing. A total of seven berries left and five berries right confirm the LM-4 variety, which is more available than other 1794 die pairs but still scarce as a representative of the challenging 1794 Flowing Hair half dimes.

This near-Mint example displays a number of visual attributes, including a bold, even strike, an almost complete absence of perceptible wear, and a lack of detracting adjustment marks. Both sides show consistent steel-gray coloration with hints of luster in the fields. A few deeper gray toning streaks and light abrasions angle up from left to right on the obverse, but they are a trivial distraction at most. Census (all 1794 varieties): 18 in 58 (1 in 58+), 52 finer (8/16). NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1795 Half Dime, V-5, LM-8, MS62
Uncirculated Type Coin

3063 1795 V-5, LM-8, R.3, MS62 PCGS. LM-8 is a fairly plentiful variety overall, but as with all 1795 Flowing Hair half dime die pairings, Mint State pieces are scarce and highly sought-after for type purposes. The present coin displays bright centers surrounded by sea-green, russet, and olive toning in the margins and fields. Light abrasions account for the grade, as does considerable strike weakness on the devices — Liberty's central and lower hair curls are ill-defined, and the eagle's breast and left (facing) wing are similarly deficient. Some degree of this weakness is seen on nearly all examples of LM-8. Overall, this Mint State Flowing Hair half dime will appeal to type collectors on several levels. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1797 Half Dime, V-2, LM-1, XF40
Well-Detailed Example

3064 1797 15 Stars, V-2, LM-1, R.3, XF40 NGC. The 1797 Draped Bust half dime claims a mintage of 44,527 pieces, with four die varieties known for the date. This coin represents the LM-1 variety, with 15 stars and the outer berry between N and I in UNITED. This lightly worn example retains much original design detail in the hairlines. The lightly abraded surfaces display shades of pale gold and lavender-gray toning. The central obverse portrait shows slight strike softness. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

1800 LIBEKTU Half Dime, AU53
Lightly Toned V-2, LM-3 Example

- 3065** 1800 LIBEKTU, V-2, LM-3, R.4, AU53 PCGS. The broken upper loop of the R in LIBERTY gives this variety its LIBEKTU moniker. The present coin shows an even strike with some expected weakness on the stars, central portrait, and on much of the central reverse shield and stars. Each side shows delicate lavender and champagne coloration along with minor chatter consistent with the grade. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

PROOF SEATED HALF DIMES

1858 Half Dime, PR66 Cameo
Sole Finest at PCGS

- 3066** 1858 PR66 Cameo PCGS. Frosted design elements stand out boldly against reflective fields. Shades of champagne-gold, crimson-orange, and cobalt-blue toning enhance the terrific eye appeal. The mintage of the 1858 is unrecorded but estimated at only 300 proofs, the first time proofs were sold to the general public. This PR66 Cameo example is destined for a fine Registry Set. Population: 1 in 66 Cameo, 0 finer (8/16). NGC ID# 235N, PCGS# 84437

1860 Seated Liberty Half Dime, PR67
Legend Obverse

- 3067** 1860 PR67 NGC. CAC. An untoned silver-white example of this first-year Legend Obverse half dime issue, struck to replace the Stars Obverse half dimes and using the Cereal Wreath reverse, suggested by half dime specialist Harold P. Newlin for some 1859 pattern half dollars (e.g. Judd-247-25 inclusive) and adopted in 1860 for this denomination. This Superb Gem proof shows some die polishing lines but virtually no post-Mint defects. Census: 8 in 67, 0 finer. CAC: 7 in 67, 0 finer (8/16). NGC ID# 235V, PCGS# 4443

EARLY DIMES

1796 JR-2 Dime, Bright AU58
Sharply Detailed First-Year Type Coin

- 3068** 1796 JR-2, R.4, AU58 NGC. Other than a small area of light wear on the eagle's breast, this near-Mint JR-2 dime is sharply detailed with bright silver-white coloration. The strike is even and well-centered, producing complete dentils around each perimeter. A small rim cud is seen above stars 7 and 8 on the obverse, and both sides exhibit extensive clash marks in the fields. Liberty's portrait shows almost no perceptible wear.

Although many varieties are known, the 1796 dime as a date is highly sought-after as the debut issue of this denomination. Pieces in the upper AU and the Mint State grades are elusive and always command strong bidder activity at auction. The present coin pleases on multiple levels.

From The Walter Freeman Collection, Part I. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1796 JR-2 Dime, MS62
Heavy Clash Marks

1796 Dime, JR-6, AU53
Outstanding First-Year Small Eagle Type Coin

3069 1796 JR-2, R.4, MS62 PCGS. Both sides of this pleasing Mint State first-year dime show prominent clash marks, but no evidence of die lapping. The obverse has minor rim crumbling at 10 and 2 o'clock on this late die state example. Only about 10% of all surviving 1796 dimes are from the elusive JR-2 die pair. An attractive example, this piece has muted silver luster and splashes of delicate gold toning. Trivial hairlines and marks are evident as expected at the grade level. The strike is generally bold, although slightly blunt at the center of the obverse and reverse. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

3070 1796 JR-6, R.3, AU53 NGC. Luster beckons from the design when this pearl-gray and silver-blue Small Eagle dime is rotated beneath a light. The coin is surprisingly unabraded aside from a hair-thin mark on the eagle's neck. Eye appeal is excellent.

Nine die varieties of 1796 dimes are known, one of which (JR-7) is known only from a single low-grade example. The year 1796 was the first instance of dime production and one of just two dates that bore a Small Eagle reverse. Its Heraldic Eagle successor is substantially more available, mostly due to comparatively high mintages for the 1805 and 1807.

Ex: *Summer FUN Signature* (Heritage, 6/2008), lot 705. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

1798/97 Dime, JR-2, MS62
13 Stars Reverse, Rare in All Grades

3071 1798/97 13 Stars Reverse, JR-2, R.6, MS62 PCGS. JR-2 is the rarest of the four 1798 dime varieties, comprising only a tiny percentage of the total population for the date. The generally accepted survival estimate is only about 20 to 30 coins in all grades, a figure that is proportionate to the certified population which lists 24 pieces. Mint State coins are extremely rare. PCGS has seen two other examples in MS62, as well as a sole MS63 representative; NGC has encapsulated just one Uncirculated coin, also an MS62 (8/16).

This is the only use of this 13-star reverse die, but the second use of this obverse which was previously employed for JR-1, the more available overdate variety for this issue. The 8 in the date is small in relation to the other digits, and is punched over a large 7, the remnants of which are bold below and within the loops of the 8. This is the only overdate of the Draped Bust type and the feature is plain even to the unaided eye.

The present piece is largely toned in deep olive-gray patina, with areas of deeper gunmetal-blue color also observed in the border recesses. The peripheral stars and denticles are sharply detailed, though the central regions are deficiently struck — such central weakness is characteristic of virtually all known examples of this variety. Heavy clash marks are also noted on each side, and particularly noticeable is a sharp, incuse star in the obverse field before Liberty's throat, transferred from the reverse die. Such clash marks are also characteristic of this die pairing, and expected. An excellent opportunity for the advanced early dime specialist to acquire one of the rarest varieties in the Draped Bust type. NGC ID# 236G, PCGS# 38751 Base PCGS# 4469

1805 Dime, JR-2, AU58
Attractive Four Berries Type Coin

- 3072** 1805 4 Berries, JR-2, R.2, AU58 PCGS. There is little difference in rarity between the two 1805 Draped Bust dime varieties, although students of early type coins often identify the two die pairings as separate subtypes. JR-2 shows four berries on the reverse olive branch, and JR-1 has five. This near-Mint JR-2 coin displays a delightfully even, bold strike that produces complete rims around each side and razor-sharp detail on Liberty's portrait and the stars. Slight weakness on the central reverse shield is almost unnoticed. Lavender-gray and gold toning blankets each side, while some luminescence remains in the fields.
From The Twelve Oaks Collection, Part II NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

1805 Dime, Colorful AU58+
JR-2, Four Berries Reverse

- 3073** 1805 4 Berries, JR-2, R.2, AU58+ PCGS. CAC. This Plus-graded near-Mint 1805 Four Berries dime displays a sharp, well-centered and even strike, with satiny luster that remains in the protected portions of the peripheral fields. Bright centers quickly cede to vivid multicolor toning that encompasses the margins. Visual appeal is outstanding for the issue, making this an ideal Draped Bust type coin. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

BUST DIMES

1811/09 JR-1 Dime, MS63
Very Rare in Uncirculated Condition

- 3074** 1811/09 JR-1, R.3, MS63 PCGS. Mint officials repunched the final two date digits on an unused 1809 die to strike dimes in 1811. The reverse was the same one employed two years earlier. This Select example shows the die cracks that confirm the extended usage. Original mint luster flashes from beneath rich layers of gold, crimson, and gunmetal-blue patina. The motifs are well-struck, softening over the left-hand stars, middle curls, and around the reverse legends. Population: 9 in 63, 7 finer (8/16).
From The Walter Freeman Collection, Part I. NGC ID# 236V, PCGS# 38772 Base PCGS# 4487

1829 Dime, JR-10, VG10
Very Rare Curl Base 2 Variety
An Outstanding Example

- 3075** 1829 Curl Base 2, JR-10, FS-301, R.6, VG10 PCGS. A plentiful date but a rare and significant variety, the JR-10 1829 dime is distinctive for the Curl Base 2 in the date. This is the only 1829 head die that shows this logotype. Collector demand for this issue is highlighted by staggering auction realizations and a prominent *Guide Book* listing. It is almost always seen only in very low grade, with the finest at PCGS designated VF. This high-end VG coin displays a bold, even die impression with the reverse rotated slightly clockwise. Olive-gray and tan-gold colors in the fields and on the devices, respectively, deliver outstanding old-time circulation-cameo eye appeal. A few old pinscratches are discernible with a loupe, unobtrusively, and are hardly mentionable for this grade level. Population: 6 in 10, 4 finer (8/16). NGC ID# 9BHH, PCGS# 38836 Base PCGS# 4512

SEATED DIMES

1873-CC Arrows Dime, VF25
Problem-Free Collector Coin

- 3076** 1873-CC Arrows, F-101, R.4, VF25 PCGS. The 1873-CC Arrows dime is a key date in all grades, typically seen well-worn and/or with various impairments. This midgrade circulated example is above average for the issue and an ideal collector coin. The obverse displays lavender-gray patina, the reverse steel-gray. Grade-consistent wear is evenly distributed. Population: 4 in 25, 22 finer (8/16). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

1884-S Dime, Reflective MS66
Tied for Finest at PCGS

- 3077** 1884-S F-102, R.3, MS66 PCGS. The fields are reflective and fully prooflike on each side, showing little evidence of patina but considerable field-device contrast. The die-lapped weakness on Liberty's rock base is typical for this die pairing. This extremely attractive coin justifies its Premium Gem grade with no marks of any importance, despite a couple of tiny reeding marks in the right obverse field. The 1884-S Seated dime is a low-mintage issue of about 560,000 pieces, and few survive as nice as this example. The underrated 1884-S was the first San Francisco dime issue since the 1877-S, although its celebrity is dimmed by its proximity to the 1885-S the following year, a production of less than 44,000 pieces and a noted key date in the series. Population: 2 in 66, 2 finer (8/16). PCGS# 593527 Base PCGS# 4693

PROOF SEATED DIMES

1859 Transitional Dime, PR65
Judd-233, Elusive *Guide Book* Variety

- 3078** 1859 Transitional, Judd-233, Pollock-280, High R.6, PR65 PCGS. The Stars Obverse design appears on regular issue dimes minted from 1838 to 1859, and the Cereal Wreath reverse design appears on regular issue dimes minted from 1860 to 1891. This variety combines the two designs into a transitional pattern that is struck in silver with a reeded edge. This stunning Choice proof dime exhibits fully mirrored fields that surround sharply defined devices beneath an overlay of gold, lavender, and blue patina. Diagonal die striations are clearly evident in the obverse and reverse fields.
Ex: Lindesmith Collection Sale (Bowers and Merena, 11/1999), lot 1145; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR64 PCGS with CAC approval), lot 98272. NGC ID# 23CH, PCGS# 4749

1880 Dime, Conditionally Rare PR68

Ex: Gardner

3079 1880 F-101, R.3, PR68 NGC. Gene Gardner owned three examples of the 1880 Seated dime issue in PR67 and PR68, but of the three he considered this piece to have the best eye appeal, giving it an "8" on his scale of 1-10 — high praise from such an aesthetically attuned numismatist. This immaculate Superb Gem proof will be a standout coin in any assemblage of Seated dimes. Rich toning is imbued with salmon-pink and electric-blue iridescence. The toning is nowhere near deep enough to impede the appreciation of the glistening, reflective fields and razor-sharp devices. No distracting hairlines or contact marks appear on either side of this solidly graded Superb Gem. Census: 7 in 68 (2 in 68 ★), 0 finer (8/16).

Ex: Long Beach Signature (Heritage, 9/2002), lot 6257; Long Beach Signature (Heritage, 2/2003), lot 6321; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98342. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777

1885 Seated Dime, PR68 Cameo

Colorful, Deep Mirrors

3080 1885 PR68 Cameo NGC. This beautiful proof Cameo is among the finer-known representatives of this late-series Seated dime issue. The strike is incomplete at Liberty's foot but razor-sharp elsewhere. The devices contrast strongly against the mirrored fields. Light golden hues encompass the central regions, yielding to violet and deep russet around the peripheries. Census: 7 in 68 Cameo (3 in 68 ★), 1 finer (8/16). NGC ID# 23DA, PCGS# 84782

BARBER DIMES

1894-O Dime, Patinated MS65

An Important Key Date

3081 1894-O MS65 PCGS. The 1894-O, with a mintage of 720,000 pieces, is a semikey in lower grades and a key date in AU and above. David Lawrence assigns a rarity rating of R.6 in MS64 and finer. Gem-quality coins are extremely rare, appearing at auction even less frequently than might be expected from the small certified population totals. Bluish-green and golden-tan patination bathes the lustrous surfaces of this Gem example, deeper on the reverse. The design elements are well-struck, a characteristic of most 1894-O dimes. Close examination reveals no significant marks on either side. Population: 5 in 65, 9 finer (8/16). NGC ID# 23DU, PCGS# 4804

1895-O Barber Dime, MS66
Cornerstone Date in the Series
Merely One Coin Finer

3082 1895-O MS66 PCGS. This is, without a doubt, the key to the collectible series of Barber dimes, ranking second only to the extremely rare and virtually unobtainable 1894-S issue. The 440,000-coin mintage is the lowest in the series. In his recent *Guide Book of Barber Silver Coins* (2015), Bowers estimates that 1,000 to 1,200 examples survive in circulated grades, plus 15 to 18 pieces in MS65 and higher (no estimate is given for MS60 to MS64). Premium Gems are extremely rare, with two submissions at PCGS and one other at NGC. A single MS67 dime is reported at PCGS (8/16).

This example is radiantly lustrous with satiny surfaces. The obverse features mostly rich orange and russet patina, while the reverse is predominantly blue-green in tone. Both sides are fully struck, an unusual occurrence among O-mint dimes from this era, though not all that surprising for this well-made issue. NGC ID# C4KL, PCGS# 4807

MERCURY DIMES

1916-D Mercury Dime, Choice AU
Richly Toned, Pleasing Natural Appeal

3083 1916-D AU55 PCGS. Silvery high points contrast nicely with speckled olive-gray toning to give this Choice About Uncirculated key issue dramatic eye appeal. Light wear on the highest points determines the grade, yet most of the elements are still razor-sharp including the diagonals on the fasces. There are no marks of note on this exceptionally original and appealing 1916-D dime. NGC ID# 23GY, PCGS# 4906

1917-D Mercury Dime, MS66 Full Bands
Well-Preserved, Naturally Toned

3084 1917-D MS66 Full Bands PCGS. More than 9.4 million Mercury dimes were struck at the Denver Mint in 1917, but few survivors can match the high technical quality and terrific eye appeal of the present coin. This spectacular Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with Full Bands definition on the fasces. The well-preserved surfaces are visited by attractive highlights of pale gold, lavender, and amber toning. Population: 14 in 66 (3 in 66+) Full Bands, 0 finer (8/16). NGC ID# 23H3, PCGS# 4913

1919-D Dime, MS64+ Full Bands
Richly Toned Surfaces

3085 1919-D MS64+ Full Bands PCGS. CAC. While a common coin in lower grades, the 1919-D is seldom encountered in high grades and even more infrequently with full bands definition. This is a richly toned coin that displays multiple shadings on each side. If abrasions caused this coin to not grade MS65, they are well concealed by the toning. Sharp, complete definition on the central bands. Population: 90 in 64 (6 in 64+) Full Bands, 20 finer. CAC: 12 in 64, 3 finer (8/16). NGC ID# 23H9, PCGS# 4925

1927-S Dime, MS65 Full Bands
Few Finer Examples are Certified

- 3086** 1927-S MS65 Full Bands PCGS. The 1927-S dime is elusive with Full Bands, and pieces grading finer than this Gem are rare. This piece shows a sharp strike and satiny luster with a light blush of warm champagne toning. There are no distracting abrasions. Eye appeal is excellent. Population: 35 in 65 Full Bands, 22 finer (8/16). NGC ID# 23HW, PCGS# 4965

ROOSEVELT DIME

1956-D Dime, MS68 Full Bands
Impressive Obverse Toning

- 3087** 1956-D MS68 Full Bands PCGS. Remarkably cherry-red and apple-green toning consumes the obverse of this lustrous and well struck dime. The reverse displays similar shades although in more delicate fashion. Pristine aside from unobtrusive contact on the portrait. As of (8/16), the single-finest certified by PCGS. NGC ID# 23LJ, PCGS# 85113

PROOF ROOSEVELT DIMES

1951 Dime, PR68 Deep Cameo
Virtually Top-of-the-Line at PCGS

- 3088** 1951 PR68 Deep Cameo PCGS. 30th Anniversary Green Label Holder. To an even greater extent than the previous proof issue, the 1951 proof Roosevelt dime is a rarity with Deep Cameo contrast. The present coin is an essential Registry Set acquisition, ranking among the four finest seen by PCGS (8/16). The coin is completely untuned, allowing for full display of the sharp, frosty devices and liquidlike mirroring of the fields. Finer visual appeal may not be known for this issue. PCGS-certified examples in this grade especially command strong premiums at auction. This piece may very well surpass the \$14,100 price realized by the last PR68 Deep Cameo PCGS coin we offered, in lot 4820 of our March 2016 ANA Signature sale. Population: 4 in 68 (1 in 68+) Deep Cameo, 0 finer (8/16). NGC ID# 27EK, PCGS# 95226

1956 Roosevelt Dime, PR69 Deep Cameo
Tied for Finest Certified

- 3089** 1956 PR69 Deep Cameo PCGS. The design elements of this magnificent Roosevelt dime are fully detailed and richly frosted, creating intense cameo contrast with the deeply mirrored fields. The completely brilliant surfaces are just one tick away from technical perfection and eye appeal is terrific. Population: 3 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 42VC, PCGS# 95231

EARLY QUARTERS

1796 B-1 Quarter, Fine 12
First U.S. Quarter Dollar

- 3090** 1796 B-1, R.4, Fine 12 PCGS. CAC. Minor die lapping is evident among the lower curls, and a short die crack attached to the 1 in the date is virtually parallel to the upright of that digit. Just enough wear appears along the reverse border to obscure die state evidence. The central obverse and reverse exhibit pewter-gray color, deepening to brownish-gray along the borders. A glass is required to view the trivial lines and marks on this outstanding early quarter. This is an impressive example for the grade, a wonderful representative of the first U.S. quarter dollar issued for circulation, and a single-year type coin. NGC ID# 23RA, PCGS# 38919 Base PCGS# 5310

BUST QUARTERS

1815 B-1 Quarter, Vibrantly Toned MS62
'E' Counterstamp, Baffling Numismatic Mystery

- 3091** 1815 "E" Counterstamp B-1, R.1, MS62 NGC. No sooner does a theory about the origin of the mysterious "E" and "L" counterstamps on 1815 and 1825 quarters gain traction, than a new conjecture adds to the conundrum. In 2004, Ted McAuley satisfied many scholars by tying the countermarks to a voting or accounting method used by the Economite Society of Economite, Pennsylvania. More recently, Karl Moulton discussed the topic at length in his book on the early Mint, suggesting a shipment of quarters to Planters Bank of New Orleans was the source (Planters Bank was no stranger to issuing counterstamped coins). Today, the purpose and issuer of the counterstamps remain elusive. There is no debate about the originality or eye appeal of this Uncirculated example of the E-marked 1815 quarter. Bright mint luster at the borders enhance its album-toned patina. Marks are limited to a few stray abrasions and Mint-related die clashing.
From The Hamilton Collection, Part III.

1836 B-3 Quarter, MS64+
Later Die State

- 3092** 1836 B-3, R.1, MS64+ NGC. Tompkins Die State 4/4. Splendid aquamarine toning fills the peripheries. The fields and motifs display almond-gold and stone-gray shades. This coruscating quarter is minimally abraded and sharply struck. Despite the several die cracks on both sides, the coin is only a middle-to-late die state, since it lacks the later crack across the cheek and the one over the 3 in the date does not yet extend to the bust. Census: 15 in 64 (1 in 64+), 0 finer (8/16). NGC ID# 23S3, PCGS# 39007 Base PCGS# 5355

1837 B-4 Quarter Dollar, MS64
Possible Finest Late Die State Piece
From the Gardner Collection

- 3093 1837 B-4, R.3, MS64 PCGS. CAC.** The obverse has a prominent bisecting die crack from the border at 7 o'clock through the drapery and bust to Liberty's throat, the E in LIBERTY, the hair, cap, and the border at 1 o'clock. The reverse has a die crack grazing the upper curve of the D, then curving through STATE. The late die state examples are slightly scarcer than early state pieces. This pristine quarter has original light gold surfaces with brilliant luster. Hints of blue toning appear on the reverse. No finer examples are reported in Steve Tompkins' Condition Census, nor in the Rea-Koenings-Haroutunian Condition Census. Of the four Choice Mint State examples in those lists, this piece is the only late die state example. One finer early die state example graded MS65 PCGS appeared in our March 2016 Dallas Signature sale.
Ex: American Numismatic Rarities (3/2005), lot 1671; Legend Numismatics (9/2006); Eugene Gardner Collection (Heritage, 10/2015), lot 98407. NGC ID# 23S4, PCGS# 39013 Base PCGS# 5356

SEATED QUARTERS

1854-O Arrows Quarter, MS64
Sharp and Appealing

- 3094 1854-O Arrows MS64 PCGS. CAC. Briggs 1-B.** The weight reduction implemented in 1853 successfully stimulated the circulation of subsidiary silver coins, explaining the rarity of the 1854-O Arrows quarter in Mint State. This Select piece features rich rose-gold and blue-gray toning that combines with softly frosted luster. The coin is strongly struck, particularly for a New Orleans issue. Population: 10 in 64, 3 finer. CAC: 4 in 64, 1 finer (8/16). NGC ID# 3EA2, PCGS# 5433

1856-S Quarter, Sharp MS63
Condition Census Rarity

3095 1856-S MS63 PCGS. Briggs-Unlisted. The tail die is Briggs' Reverse C, the head die shows the date further left than is seen on the usual obverse. As a date, the 1856-S Seated quarter is a scarce issue in the upper circulated grades and decidedly rare in Mint State. Our Permanent Auction Archives list a total of nine previous appearances in Uncirculated condition, a total which seems to belie the certified population. PCGS reports 23 Mint State coins, including 16 in MS63 with an MS64 and an MS65 finer; NGC reports six Uncirculated pieces, with three MS63s as the finest (8/16). It would not be too much to assume that there are a number of resubmissions reflected in the MS63 figures.

This example is fully struck with satiny luster and a blush of green-tinted champagne toning. Light surface grazes appear on each side, although none are singularly significant. A finer example may simply not be obtainable for many years. NGC ID# 23TD, PCGS# 5440

1858-O Quarter, Semiprooflike MS64
Condition Census Rarity
Stand-Out Eye Appeal

3096 1858-O MS64 PCGS. In absolute terms, the 1858-O Seated Liberty quarter is a rarity in Mint State but somewhat underrated as such. PCGS reports six Uncirculated submissions, including two MS62, two MS63, this MS64, and a single Gem finer; NGC has seen Mint State submissions in MS61 (1), MS62 (3), MS63+ (1), and MS65 (1). The MS65 PCGS coin was previously graded by that service as MS64+ when it was offered in the Eugene H. Gardner Collection, Part III (Heritage, 5/2015), where it realized \$21,150.

The present Choice example is among the pieces illustrated on PCGS CoinFacts, and although not overly flamboyant with regards to toning, this eye-catching coin is dazzling in other respects: The fields are semiprooflike and deliver modest cameo contrast, and the sharpness of the strike is staggering. Both sides have light golden toning into which a few tiny ticks melt, leaving this coin with stop-and-look-twice eye appeal. NGC ID# 44LC, PCGS# 5446

1860-S Quarter, XF45, Only One Finer at PCGS

3097 1860-S XF45 PCGS. Briggs 1-A. Struck on the eve of the Civil War in San Francisco, the 1860-S quarter saw a meager mintage of 56,000 pieces, although likely for reasons unrelated to that distant conflict. This frosty Choice XF example shows some scattered abrasions consistent with moderate circulation, but a long, lateral scrape from Liberty's knee is the only singular mark. Wear and strike weakness combine to soften the central details. Only one Mint State coin is reported on the certified population reports, an MS61 PCGS example, recently sold in lot 98372 of the Gardner Collection, Part II where it realized \$55,812.50. Population: 4 in 45, 3 finer (8/16). NGC ID# 442R, PCGS# 5453

1860-S Quarter, MS61
The Only Mint State Example of This Rarity

3098 1860-S MS61 PCGS. CAC. Even though 56,000 quarters were produced of this issue, the story is the same for it as it is for many other S-mint issues from the 1850s through the 1870s: high attrition. Demand in the West for hard currency severely limited the survival rate of high-grade examples. Many S-mint issues from this period do not have even a single remaining coin in Mint State, and we can only speculate about the circumstances surrounding the preservation of this 1860-S representative. In the November 1990 edition of *The Gobrecht Journal*, Jim Gray pointed out, “the most underappreciated and undervalued of all Seated coins is the 1860-S quarter, particularly in higher grades.”

After 30 years and multiple millions of coins certified, this piece still remains the sole 1860-S quarter encapsulated as Mint State by PCGS. The surfaces are even, light gray with soft, frosted mint luster visible beneath the toning. There are a few tiny abrasions on each side, as one would expect from an MS61 coin, the most obvious and easily usable for pedigree purposes being a vertical mark to the left of the date and a similar tick on Liberty's thigh. Several stars are a trifle soft, but the overall striking quality is satisfactory.

It is noteworthy that the two most prominent collectors of Seated coinage of the past generation have owned this coin: Jim Gray and Eugene H. Gardner. Its status as the finest known of the issue stands unrivaled, and the next owner will find it an important addition to a high-end Seated quarter collection.

Ex: Public Auction (Stack's, 9/1989), lot 1126; Jim Gray Collection (Bowers and Merena, 7/2004), lot 2240; Eugene H. Gardner Collection, Part II (Heritage, 10/2014, as MS61 NGC with CAC approval), lot 98372; Central States Signature (Heritage, 4/2015), lot 5024; Central States Signature (Heritage, 4/2016), lot 4624. NGC ID# 442R, PCGS# 5453

1867-S Quarter, Near-Gem
Almost Uncollectible in Higher Grades

3099 1867-S MS64 PCGS. Briggs 1-A. From a mintage of just 48,000 pieces, the 1867-S Seated Liberty quarter is an elusive issue in all grades, and Mint State examples are rare. There was no collector demand for mintmarked issues at the time (proofs satisfied the date sets then in vogue), so coins like this one circulated extensively on the West Coast. This Choice representative is attractive despite minor incompleteness of strike on the final three stars, the dentils near the date, and STATES. Well-preserved and coruscating surfaces are blanketed in shades of golden-brown, lavender, and gray patina, with patches of amber on the reverse. There is merely one coin finer between the two services, an MS67 representative at PCGS, previously in an NGC holder, that has long been recognized as the sole finest example of the issue. Population: 2 in 64, 1 finer (8/16). NGC ID# 23UE, PCGS# 5471

1868 Seated Liberty Quarter, MS66
Among the Finest of This Underrated Issue

3100 1868 MS66 PCGS. The mintage of 29,400 coins puts this issue into the “underrated” category along with the 1867 quarters, although the 1868 is slightly more available in Gem grade. Copious mint luster runs over rose-gray and lilac surfaces bounded by a ring of aqua patina at the rims on each side. Sharply struck design elements are the rule throughout. Die lines between the Liberty pole and the forearm accompany others appearing at the end of the ribbon and into the drapery. The shield on reverse shows many diagonal die lines, and recutting is present on some of the letters in the denomination. A few scattered marks are minor but hold the coin back from an MS66 grade. The eye appeal is excellent. Population: 3 in 66 (1 in 66+), 0 finer (8/16). NGC ID# 23UE, PCGS# 5472

PROOF SEATED QUARTER

1876 Seated Quarter, PR67, One of the Finest-Graded Examples

3101 1876 PR67 PCGS Secure. CAC. Type Two Reverse. Beautiful pastel shades of lavender, champagne, and mint-green are blended together across the immaculately preserved surfaces of this impressive Superb Gem proof. From a generous mintage of 1,050 pieces, struck in anticipation of the nation's Centennial celebration. Population: 2 in 67 (1 in 67+), 1 finer. CAC: 2 in 67, 1 finer (8/16). NGC ID# 3TWJ, PCGS# 5577

PROOF BARBER QUARTERS

1892 Barber Quarter, PR68 Cameo
Impressive First Year Example

3102 1892 PR68 Cameo PCGS. CAC. Type Two Reverse. This impressive Superb Gem is tied for the finest Cameo proof of the date, and it ranks among a handful of the best survivors, an impressive piece destined for a high end Registry Set. One example is graded PR69 Ultra Cameo, but that piece is brilliant and untoned, while most collectors will prefer the present piece for its gorgeous, original toning. Bright silver appears at the upper left obverse, with a lovely blend of gold, rose, violet, and blue toning. The reverse exhibits light gold at the center, gradually changing to magenta and light blue. Population: 4 in 68 Cameo, 0 finer. CAC: 1 in 68, 0 finer (8/16). NGC ID# CEF4, PCGS# 85678

1898 Quarter, Toned PR68
Stark Cameo Obverse

3103 1898 PR68 PCGS. Tied for the finest non-Cameo at PCGS. The strike is needle-sharp, and the preservation is immaculate. The obverse is starkly contrasted beneath light golden toning with the faint remnant of a print on Liberty's neck. The reverse is deeply toned in lavender-gray, gold, and amber hues that preclude field-device contrast. The 1898 proof is rarely seen this fine. Population: 5 in 68, 0 finer (8/16). NGC ID# 242D, PCGS# 5684

STANDING LIBERTY QUARTERS

1917-S Type Two Quarter, MS66 Full Head
Rarely Encountered Finer

3104 1917-S Type Two MS66 Full Head PCGS. A well-preserved Full Head example of this better 1917 issue, showing satiny luster and traces of light golden toning. Liberty's head, the date, and the inner shield lines are sharp, although the shield rivets and the leading edge of the eagle's left (facing) wing exhibit the expected softness. The 1917-S Type Two quarter is rarely seen in this high of a grade. Population: 23 in 66 (2 in 66+) Full Head, 9 finer (8/16). NGC ID# 2436, PCGS# 5719

1918-S Standing Liberty Quarter
MS66 Full Head
Nice Registry Set Candidate

3105 1918-S MS66 Full Head PCGS. The 1918-S is a challenging issue in Full Head grades, and such coins are extremely rare as fine as MS66. J.H. Cline wrote: "Perhaps less than three percent of these were struck with real Full Heads." Specialists well-know the challenge of locating a well-struck 1918-S, as production at the San Francisco Mint during this period was lacking significant quality control. Besides inadequate striking pressure, many working dies were used well-beyond their normal life expectancy, which further inhibited the production of sharp strikes.

This magnificent coin is among the finest at PCGS. Liberty's head is fully defined and the date numerals are bold. The shield rivets and the central eagle exhibit some of the characteristic softness. This piece was struck from heavily clashed dies; the upper-left obverse and much of the reverse show fine die striae, the telltale result of a mint-effort to remove these clash marks. Clash marks were especially prominent on San Francisco Standing Liberty quarters from this point through the end of the series. This piece is well-preserved and lightly toned in pastel hues. Population: 15 in 66 (3 in 66+) Full Head, 1 finer (8/16). NGC ID# 2439, PCGS# 5725

1919 Quarter, MS67 Full Head
Stellar Strike and Eye Appeal

3106 1919 MS67 Full Head PCGS. The 1919 Standing Liberty quarter is heavily sought in Superb Gem Full Head, not only for its rarity in this grade but also for the remarkable strike and eye appeal that such coins possess. This piece is sharply rendered throughout the shield, eagle, and central gown folds and boasts immaculately preserved surfaces. Both sides exhibit a blend of lavender and champagne hues, while the obverse also displays olive-russet toning around much of the periphery. Population: 29 in 67 (1 in 67+) Full Head, 2 finer (8/16). NGC ID# 243B, PCGS# 5729

Doris Doscher, model for the Standing Liberty Quarter

1926-D Quarter, MS66 Full Head
Incredibly Sharp and Lustrous
A Major Rarity in This Grade

3107 1926-D MS66 Full Head PCGS. CAC. The 1926-D is famously one of the most poorly struck dates in the Standing Liberty quarter series, surpassed perhaps only by the 1918/7-S, which is never seen sharp. Full Head '26-D quarters are rare in all grades, and in fact are far rarer than the certified population reports indicate. J.H. Cline estimated that as many as half of the pieces reportedly certified in Full Head were merely duplicate submissions, and examination of auction records for this date seems to validate Cline's study, particularly with regards to Premium Gem examples.

PCGS and NGC combined list 16 Full Head submissions in MS66 and MS66+ combined. There has been an average of only about six auction appearances of such coins per decade for the past 30+ years. Our Permanent Auction Archives list a dozen previous offerings dating back as far as 1998, but with only five different coins therein represented, all PCGS-certified. Counting these, the present example, an NGC coin that sold in a 2006 Superior sale, and the MS66+ PCGS Just Having Fun Collection example, we can confirm the existence of only eight Premium Gem Full Head pieces — exactly half of the certified population. Even if two or three more exist in tightly held collections that have never seen public auction, it is doubtful that the certification data are without at least some inflation.

The last 1926-D in MS66 Full Head to appear at auction was the Gardner coin (Heritage, 6/2014), lot 30458, which realized \$64,625. At the time, that coin was the only MS66 Full Head '26-D with a CAC endorsement. Today, it is joined in that distinction by the present PCGS Premium Gem. This CAC-stickered piece displays blazing frost-white luster with the barest trace of light champagne color around the borders. The strike sharpness belies the issue's reputation. Liberty's head is sharp and full, and all but two shield rivets are bold — the outer rim of the shield is also fully separated from Liberty's torso. The lowest two obverse stars are well-struck, as are the right-hand reverse stars and the eagle's wings and breast. There are no more than a few trivial slide marks that limit the grade. Another opportunity to acquire a 1926-D of this caliber may be years in coming. NGC ID# 2435, PCGS# 5757

**1927-D Quarter Dollar, MS66 Full Head
None Finer at PCGS**

- 3108 1927-D MS66 Full Head PCGS.** From a low-for-the-series-mintage of 976,000 pieces, the 1927-D Standing Liberty quarter is rare in MS66 condition with the Full Head designation, and finer coins are virtually unobtainable. This well-detailed Premium Gem exhibits well-preserved, lustrous surfaces with highlights of golden-tan toning and outstanding eye appeal. An interesting die crack runs from rim to rim through Liberty's head, as is seen on many examples of this issue. Population: 19 in 66 (1 in 66+) Full Head, 0 finer (8/16). NGC ID# 243V, PCGS# 5763

**1927-D Quarter, MS66 Full Head
Rare in This High Grade**

- 3109 1927-D MS66 Full Head PCGS.** The 1927-D is underrated in high-grade Full Head. This Premium Gem example is conditionally rare and among the finest certified at PCGS. The surfaces display satiny luster with irregular splashes of olive, gold, russet, and amber toning. Struck from worn dies but with adequate head detail on the figure of Liberty. The shield and toes are not fully defined. Population: 19 in 66 (1 in 66+) Full Head, 0 finer (8/16). NGC ID# 243V, PCGS# 5763

WASHINGTON QUARTERS

**1932-D Quarter, MS65
Key-Date Washington Issue**

- 3110 1932-D MS65 PCGS.** Intended as a commemorative to mark the bicentennial of Washington's birth, the design continues in production today with slight modifications, and in just 15 more years it will mark the 300th anniversary of the first president's birth if left unchanged. This Gem has brilliant silver luster and dappled gold toning on the obverse. The reverse is bright and untoned. Population: 84 in 65 (3 in 65+), 2 finer (8/16). NGC ID# 2448, PCGS# 5791

**1932-D Quarter, MS65
Low-Mintage Key**

- 3111 1932-D MS65 PCGS.** Always a popular coin and the key to the series, especially at this lofty grade level, the low-mintage 1932-D Washington quarter is very scarce at the Gem grade level. Only three examples have graded higher at both services (two at PCGS, one at NGC), and not many MS65 examples are likely to compare favorably to the present piece. Speckled russet-red and sea-green patina is present on both sides, and there are no distracting abrasions on either side. A small contact mark on the eagle's neck, just below the head, is noted only for the sake of accuracy. Population: 84 in 65 (3 in 65+), 2 finer (8/16). NGC ID# 2448, PCGS# 5791

**1932-D Key-Date Quarter, MS65
Prohibitively Rare Any Finer**

- 3112 1932-D MS65 PCGS.** This key Denver issue is the rarest in the series in Gem and finer condition. The present MS65 coin displays a sharp strike and satiny mint luster. Deep olive-green and golden-gray toning blankets each side, masking a few minor surface marks. The 1932-D has room for increased appreciation in this grade, as finer pieces are headlining rarities. Population: 84 in 65 (3 in 65+), 2 finer (8/16). NGC ID# 2448, PCGS# 5791

**1936-D Quarter, Stand-Out MS67
CAC-Approved Registry Coin**

- 3113 1936-D MS67 PCGS. CAC.** The 1936-D quarter is a rarity this fine, and higher-grade coins are unknown. The present Registry-grade example displays a fully executed strike and satiny luster. Bits of russet appear on the obverse, leaving the rest of each side with a faint suggestion of champagne color. A loupe shows virtually perfect surfaces — a couple of microscopic ticks at the base of Washington's bust are the only imperfections on the obverse, and a similarly unimportant tick on the eagle's left (facing) leg is the only flaw seen on the reverse. Population: 22 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (8/16). NGC ID# 244H, PCGS# 5801

1948-D Quarter, MS67+, Tied for the Finest Certified

- 3114** 1948-D MS67+ PCGS. CAC. PCGS has only certified six examples of this issue that are graded MS67+, and they are tied for the finest certified of this issue (8/16). A spectacular Superb Gem, this piece has brilliant silver luster with rich gold, rose, and steel toning at the upper obverse and along the reverse border. Here is a wonderful opportunity for advanced Washington quarter collectors to boost their Registry score. NGC ID# 245M, PCGS# 5837

EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VF20
Pleasing First-Year Example

- 3115** 1794 O-101a, T-7, High R.3, VF20 PCGS. This late die state variant of O-101 is cracked through the F in OF and from the wreath to the final S in STATES. Overton-101a representatives are typically seen in well-worn condition, making this VF coin above average. Any 1794 half dollar certified finer than this is a rarity. The present coin displays excellent original pewter-gray coloration with tinges of olive-gold in the protected portions of the fields, mainly tucked close to the relief elements. Some lighter patina is observed on the worn points of the Liberty portrait and eagle. To the unaided eye, this piece presents well and has smooth surfaces. A loupe reveals several old, horizontal pinscratches on the obverse that are not overly detracting.
From The Walter Freeman Collection, Part I. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, XF40
Rare O-106 Example

- 3116** 1794 O-106, T-4, Low R.6, XF40 NGC. This very rare die pairing is attributed by star 2 touching the lowest hair curl on the obverse. The berries are arranged 10 left, 11 right on the reverse, a leaf pair between O and F in OF, and the M in AMERICA is lower at the bottom than the adjacent A. This piece as yet shows no sign of the O-106a obverse die state, showing a bisecting crack through LI and the top of Liberty's head. The deeply toned surfaces on this piece show extensive planchet adjustment marks in the central obverse that intermingle with a few of what appear to be post-Mint scrapes. The reverse shows no mentionable contact or file marks. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

1795 Half Dollar, XF45
O-125, T-13, Sharp Album-Toned Example

- 3117** 1795 2 Leaves, O-125, T-13, R.4, XF45 PCGS. Tompkins Die State 2/2. Areas of deep blue-gray toning at the margins surround the silver-gray centers of this Choice XF Flowing Hair half. The O-125 is often weak below and to the left of the date area, but other than slight flatness on the stars, this example is sharply struck. Minor die clashing shows on both sides. A few light lines and small marks do not distract from the appeal of this crisply struck early half. There are no adjustment marks on either side. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1797 Half Dollar, O-101a, Original Fine 15
Excellent Example of This Two-Year Type

- 3118** 1797 O-101a, T-1, High R.4, Fine 15 PCGS. Amato-449. The die crack running through the bottoms of ST in STATES connecting the cracks from the rim at 9:30 and 10:30 confirm the late die state of this Overton-101 variety (O-101a). This reverse later shattered and was replaced with a new reverse, creating 1797 O-102.

Natural light- to medium-gray toning imbued with hints of light rose and green covers both sides. The design elements are well-defined for a large silver coin having seen moderate circulation. The lower and middle parts of Liberty's hair in particular display a good amount of detail as does the eye pupil and eye lid. Most letters in LIBERTY are strong as are the left-side star outlines (the right side star outlines are a tad weaker due to the misalignment of 1797 half dollar dies in the press). The obverse of this coin might lay claims to VF definition. The eagle is outlined and exhibits a modicum of feather detail on the wings; the tail reveals more feather delineation. The wreath and letters are outlined except for the often-seen weakness on the ICA of AMERICA and the bottom of the 2 in the fraction. A field abrasion to the upper-right of star 2 will help to pedigree the coin as will a few light adjustment marks along the lower-right reverse border. No U.S. type collection is complete without a 1796 or 1797 Draped Bust Small Eagle half dollar. This original piece will be an excellent addition to a mid- to high-grade type collection, or to a variety collection by die state. Housed in a green label holder.

Ex: *The Regal Collection, Part II* (Stack's 5/1956), lot 496.

From *The Walter Freeman Collection, Part I*. NGC ID# 24EC, PCGS# 39265 Base PCGS# 6060

1806 Half, O-111a, MS62
6 Over Inverted 6, Intermediate Die State

- 3119** 1806 6 Over Inverted 6, O-111a, T-11, R.4, MS62 PCGS. Reflective surfaces are visible beneath variegated gray, rose, sea-green, and lilac toning on both sides. The strike is typically weak at the drapery and right (facing) wing. A few minor scrapes and abrasions are evident on each side, including a thin, shallow mark on Liberty's neck. Excellent luster remains across both sides, glowing ember-orange at the centers. The popular 6 over Inverted 6 variety, in this instance an intermediate die state with a rim break over TED but only a crack over U. The Overton-111 is the middle die pair in a four-marriage pairing. The obverse was used later for O-112, while the reverse was first used for O-110, and also for O-127. Population: 1 in 62, 2 finer (8/16). NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078

BUST HALF DOLLARS

1808/7 Half Dollar, O-101, MS63
Lustrous and Lightly Toned

- 3120** 1808/7 O-101, R.1, MS63 PCGS. The second 8 in the date is punched over a previous 7. This *Guide Book* variety is scarce in Mint State. The present coin displays satiny luster and warm champagne toning. Sharp stars and central devices prevail despite die erosion in the fields. Extensive clash marks and peripheral die cracks are characteristic of this die pairing. There are no singular abrasions. Population: 2 in 63 (1 in 63+), 3 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

1808 Half Dollar, MS63
Frosty O-103 Example

- 3121** 1808 O-103, R.1, MS63 PCGS. A sharp, even strike produces complete dentilation around each rim on this Select O-103 half dollar. Vibrant cartwheel luster spirals in the fields, and the motifs are bold. A few light marks on Liberty's cheek and below the chin are all that preclude a near-Gem designation from PCGS. The 1808 half as a date is elusive above this grade level. *From The Twelve Oaks Collection, Part II* NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

1812 Half Dollar, Attractive MS64+
Overton-103, Large 8

- 3122** 1812 Large 8, O-103, R.1, MS64+ PCGS. Die lines in the field left of the eagle's neck aid in attribution of this collectible variety. The present coin is sharp, although metal flowlines around the borders weaken the dentilation. The fields are vibrantly lustrous, with only slight contact on the portrait preventing a full Gem grade. Sea-green, lavender, and champagne hues deliver pleasing visual appeal on each side. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

The Eliasberg 1818 O-105 Half, MS65
Intermediate Die State

3123 1818 O-105, R.3, MS65 NGC. Ex: Eliasberg. This intermediate die state has prominent clash marks and a die crack through star 12. However, the late state branch crack for O-105a is not visible, unless Overton confused the clash marks for a crack. This lovely Gem has fully lustrous ivory surfaces with splashes of gold and blue-steel toning. This piece is certainly in the Condition Census for the O-105 die pair and is far the finest that has appeared at auction in recent years.

Ex: George H. Earle (Henry Chapman, 6/1912); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1750. NGC ID# 4FKV, PCGS# 39519 Base PCGS# 6113

1819 O-114 Half Dollar, MS64
Excellent Luster and Toning

3124 1819 O-114, R.3, MS64 PCGS. CAC. Although plentiful in the absolute sense, O-114 is elusive in Choice and finer condition — any 1819 half dollar variety is so well-preserved. This CAC-endorsed near-Gem displays a sharp, even strike and satiny luster. Olive-gold, lavender-gray, and gunmetal-blue toning attests to the originality of the surfaces. Population (all varieties included): 38 in 64 (6 in 64+), 14 finer. CAC: 8 in 64, 9 finer (8/16). NGC ID# 24FB, PCGS# 39553 Base PCGS# 6117

1820/19 Half Dollar, MS62
O-102, Curl Base 2

3125 1820/19 Curl Base 2, O-102, R.1, MS62 PCGS. CAC. Two different 1820/19 overdate varieties are known, one with a Square Base 2, and the other with a Curl Base 2 that is offered here. Although a trifle short of the Condition Census, this is a solid Mint State piece with rich golden-brown and iridescent toning over full luster. Population: 8 in 62, 12 finer (8/16). NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

1826 Half Dollar, O-102, MS65
Ex: Eliasberg

3126 1826 O-102, R.1, MS65 NGC. This delightful Gem features sharply detailed central design elements, but the stars are typically a little flat. The well-preserved lustrous surfaces are blanketed in attractive shades of champagne-gold, lavender-gray, and amber. Ex: Henry Blair Collection (Charles Steigerwalt, 10/1896); John M. Clapp; John H. Clapp; Louis Eliasberg Collection, Part II (Bowers and Merena, 4/1997), lot 1820; Houston Signature (Heritage, 11-12/2012), lot 3638. NGC ID# 4ENC, PCGS# 39668 Base PCGS# 6143

1828 O-118a Half Dollar, MS65
Large Letters, Square Base 2

3127 1828 Square Base 2, Small 8s, Large Letters, O-118a, R.4, MS65 PCGS. Rich forest-green and rose-gold toning blends throughout this coruscating and unabraded Gem. The strike is full aside from slight softness on the upper left star. Among the finest examples of O-118a, and in fact the present coin is the first two listed auction appearances for the subvariety in Herrman's Autumn 2015 revision. PCGS# 39774 Base PCGS# 6151

1829 Small Letters O-112 Half, MS65+
Top-Notch Surface Preservation

- 3128 1829 Small Letters, O-112, R.1, MS65+ PCGS.** The obverse of this available variety is most readily distinguished, in the early die stages as here, by a patch of five or so diagonal die lines between the 9 in the date and star 13. Star 7 points to the upper half of a dentil and the top of a curl. The reverse shows a large 50 C with the 0 smaller than the 5 or C and line 6 in the shield solid. The I in PLURIBUS is a touch left of the center of T2. This MS65+ coin boasts top-notch eye appeal, displaying excellent luster throughout both sides. Rose-gray and blue-tinged rim patina on the obverse cedes on the reverse to ivory-gray, amber-gold, russet, and more blue. A few faint ticks on Liberty's chin and the denomination are all insignificant but among the only noticeable marks on this extremely well-preserved coin. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

1829 O-114 Bust Half, MS65
Finest Known of This Scarce Variety

- 3129 1829 Small Letters, O-114, R.3, MS65 PCGS.** Previously, the finest O-114 half to appear in one of our auctions was the former Queller coin, which certified as MS64 NGC, and that was more than 13 years ago. Here is the third recent appearance of this coin that is a full grade point finer, and most likely the finest known for the variety.

The O-114 is scarce (rated R.3), and in our experience it is perhaps more challenging than that. The variety is most often identified by two “filled A’s” in AMERICA — as shown on this coin — but early die states may lack this feature. A more reliable diagnostic for the die pair are shield stripes that pierce the crossbar in multiple locations while showing unusual, V-shaped gaps at the top of gules 4, 5, and 6. The C in the denomination is large and close to the stem. The flag on the 5 is short and curls upward at the tip.

Sharply struck, the present coin displays a pleasant silver-gray patina (more silver than gray) with lilac and rose-red accents. There are no marks or distractions of any significance to be seen on the softly lustrous, frosted surfaces. Population: 18 in 65 (2 in 65+), 3 finer (8/16). NGC ID# 24FS, PCGS# 39799 Base PCGS# 6154

1830 O-101 Half Dollar, MS65
Small O Date Style

- 3130 1830 Small O, O-101, R.1, MS65 PCGS. CAC.** This fully lustrous Gem ranks close to the top examples that have been auctioned in recent years. The surfaces are pristine with hints of blue over the ivory mint brilliance. The stars and other details are quite sharp. An exceptional example that should capture the attention of advanced collectors. Population: 23 in 65 (2 in 65+), 6 finer for all 1830 Small O varieties (8/16). NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

1834 Half Dollar, O-105, MS66
Ex: Eliasberg, Condition Census

- 3131** 1834 Large Date, Small Letters, O-105, R.1, MS66 NGC. Ex: Eliasberg. The Eliasberg catalog gave this coin high marks for “its overall beauty, a visual treat, a specimen that is certainly one of the very finest in existence.” The coin is at the top of the Condition Census for the O-105 variety, and it is among the finer-known 1834 halves overall. Higher-grade examples are extremely rare. The Eliasberg coin displays satiny original luster with luminescent sea-green and blue toning around the peripheries. The interior regions show dusky lavender-gray and gold coloration. The left-hand obverse stars are slightly weak, as is the eagle’s left (facing) wing, although Liberty’s portrait is sharp. There are no distracting abrasions. Census (all varieties included): 23 in 66 (1 in 66+), 5 finer (8/16). Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1890. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

1834 O-115 Half Dollar, MS66
From the Eliasberg Collection

- 3132** 1834 Small Date, Small Letters, O-115, R.2, MS66 NGC. Ex: Eliasberg. An old friend to the present cataloger who described this piece 20 years ago as part of the Eliasberg Collection. The Eliasberg coins all possessed a stunning original appearance that is unmistakable even after two decades have passed since they first appeared in the marketplace. This Premium Gem is no exception with dappled gold and blue toning over frosty and highly lustrous ivory surfaces. A few stars are weak, as are the hair details over the ear, and the feathers left of the shield. Other details are presented in bold relief. Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1896; Goldberg Coins (1/2012), lot 2488. NGC ID# 24FY, PCGS# 39919 Base PCGS# 6166

REEDED EDGE HALF DOLLAR

1838 GR-15 Half Dollar, MS65
Lustrous and Border-Toned

3133 1838 GR-15, R.3, MS65 PCGS. Golden-brown and powder-blue margins frame the pearlescent-silver fields and devices. The lustrous surfaces are smooth with a few faint grazes on the left obverse. The coin is well-struck at the centers, and the peripheral elements show moderate roller marks, as made. This is an original Reeded Edge half with remarkable eye appeal.

The 1838 Reeded Edge half dollar is available through MS64, but Gems are rarely seen. Our Permanent Auction Archives record only eight previous appearances of a piece in MS65 in more than two decades. The sole finest example known is an MS67 NGC coin, which topped \$48,000 in our August 2012 Philadelphia Signature sale. The present Gem example should appeal to numerous collectors. Population: 8 in 65, 3 finer (8/16). NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

SEATED HALF DOLLARS

1839 No Drapery Half Dollar, AU58
WB-101, One-Year Type

3134 1839 No Drapery, WB-101, AU58 PCGS. The first Seated half dollars struck in 1839 lacked drapery at Liberty's elbow. This one-year type is rare in Mint State and extremely popular with collectors. The present near-Mint example may be financially feasible for the budget-conscious collector and still maintain some luster and sharp definition — only the eagle's left (facing) leg and talons are slightly soft. The surfaces are brilliant and have light, scattered marks consistent with the grade. Population: 22 in 58, 33 finer (8/16). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1841 Half Dollar, MS64
Only One Finer at PCGS

3135 1841 WB-101 MS64 PCGS. The 1841 half dollar is rare in all Mint State grades, and pieces grading finer than MS64 are exceedingly so. This Choice example is well-struck with satiny luster that illuminates shades of lavender-gray, gold, and pale olive-blue over each side. Semiprooflike reflectivity is observed in the fields. Population: 7 in 64, 1 finer (8/16). NGC ID# 24GR, PCGS# 572007 Base PCGS# 6236

1841 WB-102 Half Dollar, MS64
Repunched First 1

3136 1841 Repunched Date, WB-102, MS64 PCGS. The bases of the 18 in the date are lightly repunched. This precisely struck and shimmering Choice Seated half is nearly free from bagmarks, and the light tawny-gold toning is clearly original. Population: 7 in 64, 1 finer (8/16).

From our sale of the Silbermünzen Collection (Long Beach Signature, 5/2008), lot 654. NGC ID# 24GR, PCGS# 572008 Base PCGS# 6236

1841-O Seated Half, MS66
WB-101, Tied for Finest Certified

3137 1841-O Large O, WB-101, Die Pair 6, R.4, MS66 PCGS. The date is shifted noticeably to the left. Struck from the only use of both the obverse and reverse dies. Like many early New Orleans dates, the Mint's mantra regarding dies seemingly was, "if it ain't broke, don't use it." This coin is a case in point, with a long die crack spanning edge-to-edge from 2 to 6 o'clock.

Exceptionally well-struck and attractive for the issue, this lustrous Premium Gem displays full details on the devices and colorful iridescence across virtually mark-free surfaces. Coppery-peach shades are surrounded by olive-gold toning at the rims, with occasional blue and lilac accents. Struck from a late die state confirmed by the diagnostic die crack through M of AMERICA through the right wing to the dentils below F in HALF. This piece is the sole finest at PCGS. We know of only one other MS66 (at NGC) and none finer. PCGS population: 1 in 66, 0 finer (8/16). NGC ID# 24GS, PCGS# 572009 Base PCGS# 6237

1846 Half Dollar, MS64
6 Over Horizontal 6, WB-104, FS-301
Classic Mint Blunder, Finest at PCGS

3138 1846 6 Over Horizontal 6, WB-104, FS-301, MS64 PCGS. CAC. This highly coveted overdate variety is the result of a Mint official erroneously punching the 6 digit horizontally. Recognizing his mistake, the employee corrected it (perhaps "attempted to cover it up" is a better description) by overpunching the 6 vertically, leaving the underlying digit readily apparent. Such occurrences were not uncommon during the tenure of Chief Engraver James B. Longacre, but the blunder is no less baffling.

The primary 6 is punched over a horizontal secondary 6, and a diagnostic rim cud occurs below 84 in the date. Peach-orange and olive hues appear in the recesses and legends, complementing lavender-gray patina overall. This near-Gem is fully struck, and small grade-limiting marks are well-hidden beneath the attractive toning. A superlative example of this key *Guide Book* and *Cherrypickers'* variety. PCGS has not seen a finer example, nor has CAC. Population: 1 in 64, 0 finer. CAC: 1 in 64, 0 finer (8/16). NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254

**1846 Tall Date Half Dollar, MS64+
Sole Plus-Graded Example in Borderline Gem**

- 3139** 1846 Tall Date, WB-106, MS64+ PCGS. CAC. Tall, Normal Date. A die crack extends from the rim through the base of the 1, and another connects the base of the rock to the rim and stars 1 and 2. A prominent die break appears on the upper reverse above ATES. Original golden-gray and olive tones adorn each side of this Plus-graded, satiny near-Gem, melding into amber patina near the obverse peripheries. The right obverse stars are a touch incomplete, and the smooth surfaces show a few small milling marks on each side. A likely Condition Census Tall Date half. Population: 5 in 64 (1 in 64+), 2 finer. CAC: 4 in 64, 2 finer (8/16). PCGS# 572045 Base PCGS# 6252

**1855-O WB-101 Arrows Half Dollar
Frosted Gem, Scarce Die Pair**

- 3140** 1855-O Arrows, WB-101, Die Pair 16, R.5, MS65 PCGS. CAC. Struck from a monogamous die pair (the sole use of both the obverse and reverse dies). Highly lustrous surfaces display a liberal speckling of blue and olive-gray toning on both sides and a nearly full strike. The date and the accompanying arrows were struck into the master die so they do not vary in position among the varieties, making attributions all the more difficult. With a mintage approaching 3.7 million pieces, die pairs are numerous and new discoveries are already being made. Gem examples of the 1855-O are very scarce despite the large mintage. A scattering of tiny bagmarks keeps this vibrant MS65 from an even finer grade. Population: 23 in 65 (2 in 65+), 8 finer. CAC: 8 in 65, 3 finer (8/16). NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

**1870 Half Dollar, MS65
Condition Census**

- 3141** 1870 WB-101 MS65 NGC. WB-101 is the normal date variety, although the 1870 Seated half dollar as a whole is a great rarity in Gem condition. NGC and PCGS combined report only 10 total coins in MS65 and finer (8/16). The present coin displays vibrant, champagne-tinted luster and a razor-sharp strike. Preservation is equally impressive. The 1870 Seated half is arguably underrated in this condition. Census: 3 in 65 (1 in 65+), 1 finer (8/16). NGC ID# 24JZ, PCGS# 572188 Base PCGS# 6327

**1870 Seated Half, Smooth and Lustrous MS65
Among the Finest Known**

- 3142** 1870 WB-101 MS65 PCGS. CAC. The 1870 half dollar can be located in circulated condition but it is rare in all Mint State grades. This gorgeous MS65 piece displays lustrous surfaces that are nearly untuned except for whispers of golden-gray toning most visible on the reverse margin. Sharply struck, the coin reveals no marks of consequence anywhere on the satin-smooth surfaces. A hands-down Gem, deserving of the CAC endorsement with only one piece finer at PCGS. Population: 5 in 65, 1 finer. CAC: 2 in 65, 0 finer (8/16). NGC ID# 24JZ, PCGS# 572188 Base PCGS# 6327

1872-S Half Dollar, MS66
Condition Census Example

- 3143** 1872-S Medium Small S, WB-102, Die Pair 3, R.3, MS66 NGC. The 1872-S (580,000 coins) has one of the lowest mintages among San Francisco No Motto Seated halves after the 1873-S and 1874-S Arrows issues, and the key 1878-S. The issue is scarce in any grade and becomes conditionally rare in Mint State. As one of the three finest examples extant, this Premium Gem is surely destined for a top-tier collection. The surfaces offer a medley of silver-gray and rose patina with strong underlying mint frost typical of the West Coast branch mint. Another indication of this Premium Gem's origin is the sharp strike, particularly on the stars, Liberty's head, and the eagle's claws. Microscopic ticks and grazes are scattered in the fields, scarcely discernible without a loupe. Census: 3 in 66, 0 finer; The finest at PCGS is a sole MS66+ coin (8/16). NGC ID# CGRS, PCGS# 572205 Base PCGS# 6335

1873-CC Seated Liberty Half Dollar, MS63
Popular With Arrows Variant

- 3144** 1873-CC Arrows MS63 PCGS. WB-Unlisted, Die Pair 7. A weight change was mandated for U.S. subsidiary silver coinage partway through the year in 1873, and coins with the new standard were struck with arrows flanking the date. A small mintage of 214,560 With Arrows Seated Liberty half dollars was accomplished at the Carson City Mint that year. The With Arrows coins are seen more often than their No Arrows counterparts, but both issues are quite elusive, especially in high grade.

This Select example offers well-detailed design elements with some interesting die cracks through the olive leaves on the reverse. Large Arrows appear at the date, with the left arrow higher than the right, and an Open 3 logotype. The lightly marked original surfaces are patinated in shades of lavender-gray and greenish-gold, with traces of satiny mint luster underneath. Population: 5 in 63, 8 finer (8/16). NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

PROOF SEATED HALF DOLLARS

1845 Half Dollar, PR64 Cameo, Sole Cameo Survivor

3145 1845 PR64 Cameo PCGS. CAC. The only Cameo proof 1845 half dollar certified at PCGS and NGC, and one of just four certified proof 1845 half dollars at the two grading services. Our roster records eight different specimens. However, two of those have been absent from the marketplace for nearly 40 years and are possibly earlier appearances of others in the following roster. Another example is in the Smithsonian Institution. Heritage has handled all five of the remaining examples.

1. **PR66 NGC.** James Kelly (1946); John Jay Pittman (David Akers, 5/1998), lot 1711, as part of a complete 1845 proof set; Kaufman Collection; FUN Signature (Heritage, 1/2008), lot 3031; Heritage (1/2013), lot 5659.
2. **PR65 NGC.** Eric P. Newman Numismatic Education Society (Heritage, 4/2013), lot 3905.
3. **PR64 Cameo PCGS.** FUN Signature (Heritage, 1/2008), lot 2889; FUN Signature (Heritage, 1/2012), lot 3247; **the present coin.**
4. **PR64 NGC.** F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 4/1945), lot 273; Stack's (3/1965), lot 447; Superior Galleries (10/1990), lot 3662; Heritage (5/2008), lot 719; Eugene Gardner Collection, Part I (6/2014), lot 30529.
5. **PR63 PCGS.** Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1929; Phil Kaufman; Bowers and Merena (1/1999), lot 1142; Richmond Collection (David Lawrence, 3/2005), lot 1789; American Numismatic Rarities (6/2006), lot 1487; Heritage (4/2015), lot 5093.
6. **Proof.** Smithsonian Institution.
7. **Proof.** New England (7/1978), lot 878.
8. **Proof.** RARCOA (1/1973), lot 872

A stray die chip appears below the left side of the 8, perhaps a diagnostic feature of proofs. The same die chip is visible on plates of five different examples. Several vertical shield lines cross numerous horizontal lines of the shield on the reverse.

This specimen has excellent contrast with light gold toning and peripheral accents. Both sides have fully mirrored fields, and boldly defined, lustrous devices. A few trivial hairlines fail to detract from the overall beauty of this near-Gem Cameo proof. NGC ID# 27T7, PCGS# 86389

1856 Half Dollar, PR66 Cameo The Finest PCGS Certified Example

3146 1856 PR66 Cameo PCGS Secure. CAC. This is the only PR66 example of the rare 1856 half dollar that PCGS has certified, regardless of designation, and there are none finer at that service (8/16). The proof mintage is unknown, but it was doubtless quite small. In all grades, PCGS has certified 26 proofs, and that total certainly includes resubmissions. We believe that the total proof population is probably no more than two dozen examples. Both sides of this boldly detailed Premium Gem Cameo proof exhibit satin luster and fully mirrored fields with delicate peripheral gold and blue toning. NGC ID# 27TF, PCGS# 86410

1858 Seated Half, PR65 Only Three Finer Coins at PCGS

3147 1858 PR65 PCGS. The Mint experimented with marketing proofs to the general public in 1858 and increased proof production to handle anticipated demand from a wider audience. While the exact quantity of proofs is still open to debate, the number of grading events suggests the 2017 *Guide Book* mintage of 300+ pieces is reasonable. Of these, PCGS estimates no more than 80 to 100 examples survive in all grades. This sharply detailed Gem displays deeply mirrored fields under attractive shades of cobalt-blue and lavender-gray toning. Population: 6 in 65, 3 finer (8/16). NGC ID# 27TH, PCGS# 6412

BARBER HALF DOLLARS

1893-O Half Dollar, MS66 Among the Finest Certified

- 3148 1893-O MS66 NGC.** Although not rare in the absolute sense with nearly 1.4 million coins struck, the 1893-O Barber half is a condition rarity in high Mint State grades. A look at the population reports reveals that the number of 1893-O halves drops significantly above the MS63 grade level. Only seven MS66 pieces have been certified by both NGC and PCGS combined with none finer. This is an extremely rare opportunity for a collector to obtain one of the finest representatives of this early Barber half. Splendid green-gray peripheral toning encircles the lighter silver-gray centers. The strike is razor-sharp, showing no mentionable weakness on either side — a pleasing exception to the rule for O-mint coins. Glowing luster radiates beneath the vibrant toning, enhancing the compelling eye appeal. This virtually pristine Premium Gem Barber half would make a perfect addition to a fine Registry Set. Census: 2 in 66, 0 finer (8/16). NGC ID# 24LL, PCGS# 6466

1897-O Barber Half, Outstanding MS66 Important Key Issue

- 3149 1897-O MS66 PCGS. CAC.** This key-date Premium Gem Barber half shows the usual softness of strike on Liberty's forecurls and the eagle's claws, as one would expect from a New Orleans coin, but the remaining motifs show good detail. The surfaces display thick, satiny luster, and each side is toned deep smoky gray-rose coloration. There are no overt abrasions on either side. The 1897-O is a highly coveted key date in the series, having a low mintage of 632,000 pieces. The supply of surviving representatives in circulated grades — let alone in Mint State — is scarcely enough to satisfy demand. Premium Gems are extremely rare and seldom appear at auction, generating lots of excitement among series specialists when they do. A significant coin for the Barber specialist. Watch the bidder cards fly on this one. Population: 6 in 66 (1 in 66+), 3 finer. CAC: 1 in 66, 3 finer (8/16). NGC ID# 24LZ, PCGS# 6478

1897-S Barber Half, MS64 Elusive in Mint State

- 3150 1897-S MS64 PCGS. CAC.** This Choice example is pearl-gray with tan freckles and coruscating silver luster; a boldly struck and attractive near-Gem with impressive eye appeal. A better date coin that is likely headed to an outstanding date collection of Barber halves. Population: 18 in 64, 32 finer. CAC: 5 in 64, 12 finer (8/16). NGC ID# 24M2, PCGS# 6479

1898-S Barber Half Dollar, MS66 Elusive, Underrated Issue

- 3151 1898-S MS66 PCGS.** The 1898-S Barber half dollar was produced in adequate quantities, with a reported mintage of more than 2.3 million pieces, but the issue is surprisingly difficult to locate in today's market. It seems a large number of coins were sent to the Philippines at the end of the Spanish American War, and few examples were saved by contemporary collectors. The elusive nature of the 1898-S is not widely known, outside of series specialists, making the issue somewhat underrated.

The present coin is a remarkable Premium Gem, with sharply detailed design elements and vibrant satiny mint luster. The well-preserved surfaces are blanketed in pleasing shades of golden-brown and lavender toning, with outstanding eye appeal. Population: 5 in 66 (2 in 66+), 0 finer (8/16). NGC ID# 24M5, PCGS# 6482

1901-S Half Dollar, MS65
Only One Finer at NGC

- 3152 1901-S MS65 NGC.** *The Complete Guide to Certified Barber Coinage* ranks this tricky issue third in Mint State rarity, surpassed only by the 1904-S and 1896-O emissions. NGC has certified only four Gems of this date with one piece finer; PCGS has certified six pieces in MS65 and six finer (8/16).

This example offers silver surfaces lightly tinged with gold throughout, and even under a loupe there are no singularly distracting abrasions. For an S-mint coin, however, the strike is curiously soft on the right shield corner and the nearby areas. Some interesting die cracks appear on both sides, the sign of die fatigue. Census: 4 in 65 (1 in 65+), 1 finer (8/16). NGC ID# 5EPB, PCGS# 6491

1902-S Barber Half, Elusive MS65
Underrated Condition Rarity

- 3153 1902-S MS65 PCGS.** The 1902-S Barber half issue is an unheralded condition rarity within the series, likely overshadowed by its proximity to the even-more-elusive 1901-S and the fabled 1904-S. All of these difficult S-mint Barber halves seem to have inflated population numbers that thereby understate their true rarity in the higher Mint State levels. This Gem 1902-S offers powerful luster on ivory-gray surfaces laced with gold and cream patina. A few thin scrapes on Liberty's cheek and the wreath above define the grade. The strike is adequate, save for momentary weakness in the centers of stars 11 and 12 and trivial incompleteness at the upper-right corner of the shield on the reverse. A similarly graded example was lot 1223 in our ANA Signature (Heritage, 8/2015), where it brought \$5,170. Population: 7 in 65, 12 finer (8/16). NGC ID# 24MH, PCGS# 6494

1906-S Barber Half, MS65+
Vibrantly Lustrous, Exceptional Quality

- 3154 1906-S MS65+ PCGS. CAC.** Rare in Gem Mint State or finer, this high-end MS65 coin earns the meaningful PCGS Plus designation for its smooth, lustrous, and unmarked surfaces that combine with a faint pale-gold toning for extraordinary eye appeal. The strike is needle sharp for the issue. Vibrant mint luster adds to the all-encompassing quality. This is the sole Gem 1906-S to attain the Plus mark from PCGS, an accolade confirmed by CAC endorsement. Population: 12 in 65 (1 in 65+), 9 finer. CAC: 6 in 65, 6 finer (8/16). NGC ID# 24MX, PCGS# 6507

1906-S Barber Half, MS66, Rare This Nice

- 3155 1906-S MS66 PCGS.** The 1906-S Barber half is marginally available in grades through MS64, but it becomes rare in MS65, and finer pieces are exceedingly so. This Premium Gem representative displays vibrant, largely untuned luster and nearly unabraded surfaces. The eagle's right (facing) shoulder shows the typically seen weakness, but the remainder of the design elements are crisply defined. Population: 4 in 66, 5 finer (8/16). NGC ID# 24MX, PCGS# 6507

1909-S Barber Half Dollar, MS67**Extraordinary Quality****Ex: Duckor, Queller**

3156 1909-S MS67 PCGS Secure. Ex: Duckor/Queller. Struck from perfect dies, with no evidence of cracks, clash marks, or other signs of die wear. This Superb Gem exhibits some strike weakness, probably due in part to parallel rolling lines visible on both sides. Two small marks on Liberty's cheek are all that separate this piece from virtual perfection. Both sides of this piece exhibit frosty luster and full mint brilliance beneath gorgeous original toning. The obverse has delicate gold in the center, with a lovely frame of blue, green, and yellow. The reverse is deeper-colored, with lilac-brown at the center surrounded by thick iridescence.

The San Francisco Mint only coined 1.7 million Barber half dollars in 1909. However, census data suggests that a small group of high-grade pieces may have been preserved. The combined NGC and PCGS population records 13 MS66 coins and eight MS67 specimens. Population: 7 in 67 (1 in 67+), 0 finer (8/16).

Ex: James A. Stack (*Stack's*, 3/1975), lot 630; Queller Family Collection (*Stack's*, 10/2002), lot 814; Dr. Steven Duckor; Boston ANA Signature Auction (*Heritage*, 8/2010), lot 3229; Central States Signature (*Heritage*, 4/2011), lot 5196. NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518

1910 Barber Half Dollar, MS66**None Certified in Numerically Finer Grades**

3157 1910 MS66 PCGS. From a small mintage of 418,000 pieces, the 1910 Barber half dollar is very rare in MS66 condition. This delightful Premium Gem is sharply detailed in most areas, with just a touch of the usual softness on the shield point and the adjacent wing. The well-preserved surfaces are blanketed in attractive shades of lavender and golden-brown toning, with vibrant satiny mint luster. Population: 8 in 66 (1 in 66+), 0 finer (8/16). NGC ID# 24NB, PCGS# 6519

1915 Barber Half, Seldom-Seen MS66**Great Quality for Final Year of Design**

3158 1915 MS66 PCGS. The regions of the country served by the Philadelphia Mint had little need for additional half dollars from 1913 to 1915; none of the P-mint issues in those years broke the 200,000-coin mark, and in 1915, only 138,000 pieces were struck. This Premium Gem offers great quality from among the known survivors, richly toned blue-violet, peach, and gold with small streaks of light silver-gray. The streaks disguise the handful of true marks visible on each side, which are small in any event. The portrait has solid detail, and the eagle's talons are uncommonly well-defined. Population: 5 in 66 (2 in 66+), 0 finer (8/16). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS**1901 Barber Half Dollar, PR66+ Cameo****Last Year of the Classic Cameo Proofs**

3159 1901 PR66+ Cameo PCGS. Only 813 proof Barber half dollars were struck in 1901, the last year the Mint struck proofs with the deliberately frosted devices that result in cameo contrast. Cameo specimens were seldom encountered in later years. This Plus-graded Premium Gem is sharply detailed and immaculately preserved, with stunning contrast between the frosty design elements and the deeply mirrored fields. Population: 21 in 66 (4 in 66+) Cameo, 13 finer (8/16). NGC ID# 24P5, PCGS# 86548

**1908 Half Dollar, Toned PR68
Among the Finest Certified**

- 3160 1908 PR68 NGC.** From a limited mintage of only 545 pieces, this proof 1908 half dollar is one of only a handful of coins surviving in the PR68 grade level. There is a touch of softness on the upper-right corner of the shield, but the design elements are otherwise sharply impressed. Deep shades of forest-green, olive, blue, and lavender-gold encompass each side, preventing a Cameo designation. Census: 4 in 68, 0 finer (8/16). NGC ID# 24PC, PCGS# 6555

WALKING LIBERTY HALF DOLLARS

**1917-S Obverse Half Dollar, MS64
Scarce Issue Among Early Walkers**

- 3161 1917-S Obverse MS64 PCGS. CAC.** In the 1940s, the 1917-S Obverse was regarded as the rarest Walking Liberty half dollar in Mint State, even more elusive than the 1919-S. While this issue's relative condition rarity has since been readjusted (it now ranks second behind the 1919-S), it is still well respected as one of the keys to this long-lived series. While not fully struck, this coin displays above average definition for an early Walking Liberty half with only the slightest softness of detail in the centers. It is a Choice example of this very difficult Obverse Mintmark issue, with satiny, matte-like surfaces and virtually no noticeable marks. Untoned on each side. Ex: *Long Beach Signature* (Heritage, 6/2005), lot 6422. NGC ID# 26G7, PCGS# 6572

1919 Half Dollar, Lustrous MS64

- 3162 1919 MS64 PCGS.** This coruscating Choice Walker has smooth surfaces and medium sea-green and lilac-rose toning. The strike is good, with strong separation on the thumb of the branch hand. All 1919-dated half dollars are known for their conditional scarcity. Encapsulated in an old green label holder. NGC ID# 24PY, PCGS# 6577

**1919-D Half Dollar, MS62
Third Scarcest Walker in Mint Condition**

- 3163 1919-D MS62 PCGS.** Of the 65 issues in the complete set of Walkers, the 1919-D ranks third overall in mint condition. In Gem or finer grade it is first in the series; thus explaining the need for alternatives. This brilliant example has bright, satiny surfaces that are remarkably clean for the grade. Softly struck in the centers, as always. NGC ID# 24PZ, PCGS# 6578

**1919-D Half Dollar, MS63
Lustrous and Appealing
Scarce in All Mint State Grades**

- 3164 1919-D MS63 PCGS.** The 1919-D is a semikey date in the upper circulated grades, but it is most famous for its scarcity in Mint State. In Uncirculated condition, the 1919-D is among the most elusive issues in the series, and in Gem or better condition, it is the rarest. The present Select example delivers on the appeal of a well-preserved Mint State example without adding the high cost of a finer representative. This piece is scarce but accessible. Softly frosted luster shows warm light golden toning on each side, while abrasions are minimal for the grade. Liberty's head and branch hand, as well as the eagle's trailing leg, show the expected softness. Visual appeal is excellent for the grade. NGC ID# 24PZ, PCGS# 6578

**1919-S Half Dollar, MS63
Sharp and Brilliant**

- 3165 1919-S MS63 PCGS.** Although the 1919-D is significantly rarer in Gem condition, the '19-D and '19-S Walking Liberty half dollar issues have similar overall Mint State populations. In fact, it is the San Francisco issue that is less often seen in MS63 and MS64. This Select representative displays impressively sharp motifs and bright, untuned satin luster. The obverse fields are well-preserved, although light marks on the high points of the devices determine the grade. NGC ID# 24R2, PCGS# 6579

**1920 Half Dollar, MS66
Top-Grade Condition Rarity**

- 3166 1920 MS66 PCGS.** This rare Premium Gem example is among the finest 1920 Walking Liberty half dollars certified. The date becomes scarce in MS65 and in this grade is something of a "stopper" for many enthusiasts. Liberty's branch hand is sharply defined, and the eagle's trailing leg shows similarly unusual boldness. Softly frosted surfaces breathe a trace of champagne warmth, and the fields are devoid of noticeable abrasions. Population: 36 in 66 (1 in 66+), 0 finer (8/16). NGC ID# 24R3, PCGS# 6580

**1920-D Walker, Lustrous MS64
Strong Detail on Liberty's Head**

- 3167 1920-D MS64 PCGS.** Ranked fifth scarcest in the 65-issue series in mint condition, the 1920-D is a popular coin in MS64 condition and a much more affordable alternative to a Gem. This near-Gem presents a curious striking anomaly. The head of Liberty is fully detailed, but the hand area and eagle's leg are soft. Another interesting aspect is the presence of roller marks seen in the areas of weakness, a feature not usually seen on coins from the 1920s. Bright, frosted luster with just the slightest hint of toning over each side. NGC ID# 24R4, PCGS# 6581

**1920-D Walking Liberty Half Dollar, MS66
None Certified Finer**

- 3168 1920-D MS66 PCGS. CAC.** With an adequate mintage of more than 1.5 million pieces, the 1920-D Walking Liberty half dollar is surprisingly difficult to locate in Mint State grades. In fact, the 1920-D is unknown in grades above MS66, but its elusive nature is largely unheralded, outside of series specialists.

The present coin is a spectacular Premium Gem, with a much better-than-average strike that shows significant emerging detail on Liberty's head and wreath hand. The virtually pristine surfaces are brilliant, with radiant mint luster on both sides. Eye appeal is tremendous. This delightful specimen is tied with six others as the finest at PCGS, and NGC has seen only two pieces in this exalted grade (8/16). NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS65
Great Color and Luster

- 3169 1920-S MS65 PCGS. CAC.** Although the 1920-S half dollar is somewhat more available overall than the 1920-D in most grades, it is nonetheless quite elusive in the higher Mint State levels, even though there are examples certified up to MS66 at PCGS and NGC (seven and 11, respectively), with one MS67 at NGC. This Gem PCGS example is one of 54 submissions at this level (8/16). This is a piece with great-looking color and luster, largely silver-white (especially on the lower reverse) with a medium golden-amber cast on both sides. Contact marks are minimal, save for a small nick in the center of the eagle's breast. Some strike weakness through the center high points is typical. NGC ID# 24R5, PCGS# 6582

1921 Half Dollar, MS65
Satinny Surfaces

- 3171 1921 MS65 NGC.** Even casual collectors of the series are familiar with the mighty triumvirate of 1921-dated Walking Liberty halves from Philadelphia, Denver, and San Francisco, the most illustrious trio of issues, if not the rarest in every grade within the series. The 1921 Philadelphia has the second-lowest mintage but appears more often in Gem condition than the 1921-D or 1921-S. The present Gem shows light, even satin luster throughout both sides, predominantly silver with light tinges of pinkish color. The few light ticks appearing through the central high points are consistent with the grade; the only mentionable mark is at the top of the juncture of the eagle's neck and right (facing) wing. The sharp is quite bold, showing a well-defined split thumb on Liberty and excellent head details. Census: 33 in 65, 2 finer (8/16). NGC ID# 24R6, PCGS# 6583

1921 Half Dollar, AU58
Popular Collector Grade

- 3170 1921 AU58 PCGS. CAC.** Many collectors consider the grades of AU55 and AU58 to be ideal, as coins at those grade levels are often more attractive than lower level Mint State pieces, and at a substantial savings. This example, for instance, has an adequate strike, original silver-gray surfaces, and virtually full luster. An excellent representative of the key issue. NGC ID# 24R6, PCGS# 6583

1921 Walking Liberty Half, MS65+
Few Known Finer

3172 1921 MS65+ PCGS. Despite being the most plentiful of the three 1921 issues in high grade, the 1921 Philadelphia half dollar is scarce in MS65 and prohibitively rare any finer with such coins headlining auctions whenever offered. The present example stands out from its peers with the coveted Plus designation, a distinction awarded to only three other Gems at PCGS and none at NGC (8/16). Previous offerings of Plus-graded MS65s in our auctions have realized between \$21,000 and \$28,000, prompted by spirited bidding.

The present coin is prominently struck on Liberty's head and branch hand and on the eagle's trailing leg. The frosty, luminous surfaces emit traces of light champagne toning, and there are no obtrusive abrasions. A well-preserved, high-end example of this key date. Population: 58 in 65 (4 in 65+), 4 finer (8/16). NGC ID# 24R6, PCGS# 6583

1921-D Walking Liberty Half, MS63
Conditionally Scarce Key Issue

3173 1921-D MS63 PCGS. The 1921-D Walker boasts the lowest mintage in the series at 208,000 pieces and is the most elusive in circulated condition. This key date maintains its scarcity in Mint State, where it is the fourth-rarest date overall behind the 1921-S, '19-D, and '19-S. Gem examples are rare. The present Select representative displays surprisingly clean fields for the grade with warm golden toning over softly frosted mint luster. Liberty's figure and the central eagle exhibit moderate strike weakness, which is common on this issue. A high-grade 1921-D is one of the most important Walking Liberty acquisitions necessary for a high-ranking Registry Set. NGC ID# 24R7, PCGS# 6584

1921-D Walking Liberty Half, Toned MS64
Original and Appealing Key

- 3174 1921-D MS64 PCGS.** One of the widely recognized 1921-PDS keys to the Walking Liberty Half set, the 1921-D has the lowest mintage of the series with a mere 208,000 pieces struck. It is extremely elusive above VF; Mint State pieces are seldom seen, as few were saved. The surfaces on this piece are unquestionably original, toned with rich, multicolored hues. The obverse exhibits a brilliant center and deep iridescence at the circular border areas; the reverse is completely toned. The strike is sharp and complements the thick, underlying mint luster. No distracting blemishes appear. If rich, original toning is one of the criteria for someone's set of Walkers, this piece would make a splendid addition. PCGS reports only 35 submissions of this issue in the Gem grade — where the cost would double to triple the price of an MS64 coin. NGC ID# 24R7, PCGS# 6584

1921-D Half Dollar, MS64
Lustrous Key-Date Example

- 3175 1921-D MS64 PCGS. CAC.** A near-Gem example from the lowest business strike of the entire Walking Liberty half dollar series, with a mintage of only 208,000 coins. Unsurprisingly, the number of surviving examples in Mint State grades is low, especially at the upper-grade levels.

Softly frosted luster contributes to the attractiveness of this piece. Subtle toning is present, with scattered splashes of color also appearing. The colors include hues of green, gold, and orange. Areas of incompleteness are present, including Liberty's branch hand. There are no mentionable marks on this lovely coin. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, Lustrous AU58
Exceptional Collector Coin

3176 1921-S AU58 NGC. The 1921-S Walking Liberty half dollar claims the lowest Mint State population of any date in the series, and it is second only to the 1919-D for high-grade rarity. So difficult is this issue to acquire in Uncirculated condition that most collectors find it inaccessible at that level. Thus the appeal of the present coin. This lustrous 1921-S Walker has the eye appeal and overall luster of a Mint State example, but a trace of high-point friction seen under a loupe dictates the AU58 grade. Other than some light grazes in the right obverse field, there are no noticeable abrasions. Some of the usual strike weakness is seen on Liberty's branch hand and the eagle's trailing leg. Both sides display a blush of warm golden toning, which is deeper on the obverse. Visual appeal exceeds expectations.

From The Twelve Oaks Collection, Part II NGC ID# 24R8, PCGS# 6585

1921-S Half Dollar, Unc Details

3177 1921-S — Filed Rims — PCGS Genuine. Unc Details. Here is an extremely important opportunity for a Walking Liberty half dollar collector to acquire a Mint State 1921-S half dollar at a price that should prove affordable, all because someone carefully filed the rims to remove trivial rim nicks. The work was done with care, and we believe this untoned silver half dollar looks finer now than it did before. Take a look at this one and see if it is the right piece for you. NGC ID# 24R8, PCGS# 6585

1921-S Half Dollar, MS62
Attractive Collector-Grade Coin

3178 1921-S MS62 PCGS. This 1921-S Walking Liberty half dollar in a medium Mint State grade might represent an excellent potential acquisition for a collector working on a Mint State set, even if most of the coins in the set are of slightly higher grade. Full mint luster covers both sides of this silvery MS62 example, complementing the light pinkish-golden accents. The strike is somewhat weak through the obverse center, accounting for the grade, with a lack of detail on Liberty's branch hand and the head. The reverse is better-struck overall, both on the high points of the eagle and the peripheral details as well. A nice, attractive collector-grade example of this key date. Population: 13 in 62, 99 finer (8/16). NGC ID# 24R8, PCGS# 6585

1923-S Half Dollar, MS63
Ideal Collecting Grade

- 3179 1923-S MS63 PCGS.** Many collectors consider MS63 to be the optimum collecting grade for the early Walking Liberty half dollars, representing attractive coins and a nominal price when compared to the next few grade levels. According to the PCGS Price Guide, an MS64 1923-S half dollar is valued 25% higher than this MS63, and an MS65 is nearly five times the price of this Select Mint State piece. Both sides are fully brilliant and highly lustrous with no toning on the silver-white surfaces. NGC ID# 24R9, PCGS# 6586

1929-S Half Dollar, MS66
Only One Coin Finer at PCGS

- 3180 1929-S MS66 PCGS.** As a result of the moderate availability of lower-grade pieces, the scarcity of Premium Gem 1929-S half dollars is often overlooked. This frosty example showcases beautifully preserved surfaces and above-average design sharpness, including partial thumb separation. Champagne-toned luster exhibits a few olive overtones around portions of the obverse periphery. Population: 52 in 66 (1 in 66+), 1 finer (8/16). NGC ID# 24RD, PCGS# 6590

1940 Walking Liberty Half, MS68
Immaculate Surfaces

- 3181 1940 MS68 PCGS.** An easily obtainable date in grades up to and including MS67, the 1940-P is a noteworthy condition rarity at the present level of preservation. This coin displays a razor-sharp strike in all areas, with glistening, pristine surfaces. Warm golden-tan patina is seen overall, with the lightest suggestion of powder-blue iridescence toward the center obverse. Population: 28 in 68, 0 finer (8/16).
Ex: Long Beach Signature (Heritage, 10/2000), lot 6307; Ally Collection / New York Signature (Heritage, 7/2002), lot 8553; Central States Signature (Heritage, 4-5/2009), lot 2881. NGC ID# 24RZ, PCGS# 6609

PROOF WALKING LIBERTY HALF DOLLAR

1936 Walking Liberty Half Dollar, PR67
First Proof of the Design

- 3182 1936 PR67 PCGS.** The Mint resumed proof set offerings in 1936 and a nominal mintage of 3,901 proof Walking Liberty half dollars was accomplished. This impeccably preserved Superb Gem offers sharply detailed design elements and deeply reflective fields, under attractive shades of greenish-gold and lavender toning. Population: 41 in 67 (3 in 67+), 1 finer (8/16). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLAR

1949-D Franklin Half, MS66+ Full Bell Lines
None Certified Finer

- 3183 1949-D MS66+ Full Bell Lines PCGS. CAC.** A Plus-graded Premium Gem Franklin half dollar, with razor-sharp design elements, and Full Bell Lines definition. The impeccably preserved surfaces are blanketed in pleasing shades of sea-green and lavender toning, with vibrant mint luster underneath. Population: 81 in 66 (8 in 66+) Full Bell Lines, 0 finer. CAC: 18 in 66, 0 finer (8/16). NGC ID# 5HWE, PCGS# 86654

PROOF FRANKLIN HALF DOLLAR

1955 Franklin Half, PR68 Deep Cameo
Top-Grade PCGS Registry Coin

- 3184 1955 PR68 Deep Cameo PCGS. CAC.** This conditionally scarce and visually captivating Superb Gem Deep Cameo is at the top of the population report at PCGS. The strike and preservation are comparably almost flawless. The 1955 proof Franklin half dollar is rarely seen this fine. Population: 33 in 68 Deep Cameo, 0 finer. CAC: 20 in 68, 0 finer (8/16). NGC ID# 27VF, PCGS# 96696

EARLY DOLLARS

1794 B-1, BB-1 Silver Dollar, VF25
An Old Friend

3185 1794 B-1, BB-1, R.4, VF25 PCGS. Steve Ivy conducted his first public auction sale, the Gateway Sale, in August 1976. Lot 583 in that sale was a 1794 silver dollar. In fact, it was THIS 1794 silver dollar that has come back for another visit. This example is the usual middle die state that Martin Logies identifies as Die State III in his book, *The Flowing Hair Silver Dollars of 1794*. There is evidence of die lapping on the obverse with no visible clash marks. Reverse clash marks are not readily apparent on this example, with no indication of die lapping.

This piece exhibits the usual strike that shows weakness at the lower left obverse and corresponding reverse. The bottoms of the 17 are weak, with the 94 sharper. Stars 1 through 4 are partially visible, while stars 5 through 8 are sharper. LIBERTY and stars 9 through 15 are fully evident. The reverse shows only the bottoms of the letters in STATES, that word being opposite the lower left obverse. The steel-blue and pewter-gray surfaces exhibit a few iridescent splashes, especially on the obverse. Unlike many surviving 1794 silver dollars, this one has trivial adjustment marks, mostly from 7 to 9 o'clock on the obverse. A few other surface marks on each side allow the past provenance of this piece to be traced, and those marks will remain useful in the future.

Ex: *Essex Institute* (Stack's, 2/1975), lot 980; *Gateway Sale* (Steve Ivy Numismatic Auctions, 8/1976), lot 583; *Stockton Collection* (NASCA/Smythe, 10/1986), lot 1785.

From *The Walter Freeman Collection, Part I*. NGC ID# 24WY, PCGS# 39972 Base PCGS# 6851

1795 Flowing Hair Dollar, VF35

B-4, BB-14, Two Leaves

- 3186** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, VF35 PCGS. A remarkably attractive example of this fairly elusive Two Leaves variety, this Choice VF BB-14 Flowing Hair dollar displays delightful lavender-gray and olive-gold patina with a mild circulation-cameo appearance on the obverse. Liberty's portrait is well-defined, and the surfaces are smooth. Both sides exhibit sharp border dentils. This coin has scattered, shallow planchet voids, mostly on the reverse, caused by grease that was struck into the coin during production. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

1795 Flowing Hair Dollar, B-1, BB-21, Fine Details

Possible 'Confederate Treasury' Memento

- 3187** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Engraved — NGC Details. **Fine.** This attractive Flowing Hair dollar is one of the most intriguing coins in the sale. It is an appealing example of the B-1, BB-21 variety — a common die marriage, yet it displays an uncommon combination of engraving and countertamping that gives it historical presence and significance. The obverse is skillfully engraved in curved format with MAJ. CHAS. M. WILLARD and G.B. McCLELLAN, with a countermark beneath the engraving that says GEO. F. MILLS. The countermark is struck from a prepared punch in the style of a silversmith.

Each of the individuals inscribed on this coin are readily identifiable. The most celebrated name, of course, is General George B. McClellan, the Civil War commander of the Army of the Potomac and an eventual candidate for President, who ran against Abraham Lincoln in 1864. Major Charles M. Willard was a leading Illinois lawyer who rose through the ranks of Battery "A" of the First Illinois Artillery. He later was appointed Provost Marshal of Memphis and served there until the advance on Vicksburg, when poor health compelled his resignation. George F. Mills was a silversmith and jeweler, first in New York, then in Woodstock, Illinois, and later in Chicago. He and Major Willard were no doubt acquainted, both having moved to Woodstock in 1855. We believe George F. Mills engraved this piece and then applied his hallmark as the maker.

Numismatically, the piece fits the genre of coins that were reportedly taken from Jefferson Davis' "Confederate Treasury," which was comprised of worn-out federal silver coinage and Mexican 8 reales pieces. Departing U.S. soldiers were paid with the coins or presented with a coin as a souvenir, and shortly thereafter it was popular to have them engraved by a local jeweler or engraver as souvenir pieces. In particular, McClellan was known to permit high-ranking Union officers to select coins as "presentation" pieces, which were subsequently engraved.

Willard's Chicago connections make it likely he personally knew George B. McClellan, who was chief engineer and vice president of the Illinois Central Railroad before the Civil War. Exonumia from the Civil War is always suspect because many counterfeits and concoctions that exist, but the verified silversmith mark and the convergent circumstances of all the individuals inscribed on the coin argue for authenticity. This early dollar is smoothly worn and may have been Major Willard's personal pocket piece. The coin is high-end for the grade with a golden sheen around bluish-gray centers and no distracting marks. The engraving and counterstamp show wear, as expected for such a piece, but the names are fully readable. The rims are full and essentially perfect for the grade.

From The Hamilton Collection, Part III.

1795 B-1, BB-21 Flowing Hair Dollar, VF25
Two Leaves Reverse, Blundered Date

- 3188** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF25 PCGS. The 7 is punched over a 1 after the engraver mistakenly entered the date as 1195. This popular variety is the second most plentiful die marriage among 1795 silver dollars, although it is only seen about half as often as the famous B-5, BB-27 variety. This example has deep golden-brown and steel-blue toning. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 B-15, BB-52 Silver Dollar, AU53
Centered Bust

- 3189** 1795 Draped Bust, Centered, B-15, BB-52, R.2, AU53 NGC. Bowers Die State V. The obverse has a break in the hair near the ribbon, with an upward extension. A faint die crack joins the tops of ICA on the reverse. Just over 200,000 1795 silver dollars were coined, according to contemporary records, but only about 42,000 of those were the Draped Bust type, according to the best numismatic estimates. This lovely pewter-gray dollar has faintly reflective fields that exhibit traces of delicate gold and pale blue toning on both sides. Scattered handling marks are entirely trivial, with faint adjustment marks on the reverse. A nicely centered impression adds to the aesthetic appeal of this lovely dollar. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 Draped Bust Dollar, AU50
Large Date, Small Letters, B-5, BB-65

- 3190** 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU50 PCGS. Bowers-Borckardt Die State II. The variety is easily recognized by the irregular die lump between I and C in AMERICA. The die combination is interesting, as the obverse uses the larger style letters that were continued the following year and was probably the last die manufactured with this date, while the reverse is the third and final Small Letters reverse die of the series, and was probably produced before the other reverse dies used in 1796. Both dies were only used to strike the BB-65 variety of this date.

The present coin is an attractive AU specimen that shows just a touch of wear on the left side of the drapery and eagle's feathers. Pleasing shades of lavender-gray and greenish-gold toning visit the lightly abraded surfaces, with traces of original mint luster underneath. On close inspection, a few faint planchet adjustment marks are evident on the bust. Population (for the variety): 3 in 50, 5 finer (8/16). NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 Draped Bust Dollar, XF40
9x7 Stars, Large Letters, B-1, BB-73

- 3191** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, XF40 PCGS. Bowers-Borckardt Die State I. The arrangement of the obverse stars in a 9x7 pattern and the Large Letters in the reverse legend identify the BB-73 variety. This attractive XF specimen shows some light wear on the design elements, but the hair is well-outlined and retains much interior detail. The pleasing surfaces are lightly abraded and show highlights of greenish-gold, magenta, and amber toning. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Large Eagle, Pointed 9 Dollar, AU53
Wide Date, B-23, BB-105

- 3192** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU53 PCGS. Bowers Die State II. The wide date with 8 firmly touching the bust and star 13 close to the bust tip help attribute this relatively available die variety. The reverse shows an arrowhead extending to the center of the N in UNITED. Four-line stripes show in the shield (four pale gules if you speak Heraldic), fitting this into the *Guide Book's* Pointed 9, Wide Date category. Star 7 points directly at the lower serif of L in LIBERTY, and star 2 to a space between dentils. Die rust appears above and in several letters of LIBERTY and around star 13. The gray-white surfaces of this lightly circulated dollar show a few scattered marks and darker toning within some of the devices, none of the marks overt save for one nick behind Liberty's ear. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1801 Dollar, B-1, BB-211, AU55
Toned and Appealing

- 3193** 1801 B-1, BB-211, R.3, AU55 PCGS. Bowers Die State IV, a later die state but not yet to the point where the reverse buckles at the E in AMERICA. This Choice AU BB-211 dollar shows a bold, even strike with a trace of high-point friction on the eagle and portrait. Glimpses of luster remain in the protected portions of the fields, and the surfaces are delightfully well-preserved. Splashes of original toning include gold, lavender, blue, and olive-gray on each side. Population (all varieties included): 15 in 55, 32 finer (8/16). NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

1802 Bust Dollar, XF40
Narrow Date, B-6, BB-241

- 3194** 1802 Narrow Date, B-6, BB-241, R.1, XF40 PCGS. CAC. Bowers-Borckardt Die State III. The T in LIBERTY has a broken right foot and there is a spur on the third star from the left on the reverse, identifying the popular BB-241 variety. The design elements show only light wear and the pleasing surfaces display only scattered, minor abrasions, with attractive lavender-gray and golden-brown patina. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

1803 Draped Bust Dollar, XF45
Small 3, B-5, BB-252

- 3195** 1803 Small 3, B-5, BB-252, R.3, XF45 PCGS. Bowers-Borckardt Die State I. The thin-top 3 in the date is positioned high and there is a spur on the outside lower right curve of the D in UNITED, identifying the BB-252 variety. The pleasing slate-gray surfaces of this Choice XF specimen are free of large or distracting abrasions and only light wear shows on the well-detailed design elements. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

GOBRECHT DOLLAR

1836 Original Gobrecht Dollar, PR50
Judd-60, Die Alignment I, Die State B

- 3196** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR50 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State B. There is no trace of the diagonal die clash mark above the eagle's wing. This is a very early die state, struck just after the perfect die reverse coins. A single diagonal die chip in the denticles above the final A in AMERICA is the only characteristic of this early strike. The fields show the usual shallow mirrors and each side is covered with smoky gray-rose toning. A few medium-sized contact marks are scattered over each side, none of which are particularly distracting.
From The Walter Freeman Collection, Part I. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1846 Dollar, MS64
Very Scarce in This Grade

- 3197** 1846 MS64 NGC. Repunched 1, OC-1. Osburn-Cushing Die State g/f. Mottled golden-olive and russet patina embraces each side of this attractive near-Gem example. Trivial softness occurs on stars 4 and 5 and on a few of the eagle's neck feathers, while the other design elements are crisply rendered. Marks are virtually unseen without magnification. An array of die cracks traverse the top of the reverse legend, with a heavy crack across the rim to STA of STATES with the beginnings of a retained cud between D and ST. Such advanced die cracks are seldom seen on Seated dollars, which normally have lesser mintages. On the obverse, faint die cracks remain among the right-hand stars despite die polishing. The 1 in the date is repunched at the top, barely visible on this Choice, late die state coin. Census: 21 in 64 (1 in 64+), 3 finer (8/16). NGC ID# 24YH, PCGS# 6932

1859-S Seated Dollar, MS62
Mint State Rarity

- 3198** 1859-S MS62 PCGS. The inaugural silver dollar from this branch mint, the 1859-S was produced to the extent of just 20,000 coins. Most of these were exported and subsequently melted, and even high-grade circulated survivors will set one back several thousand dollars. Uncirculated examples are even rarer, with few coins grading above the present level of preservation. There is some hallmark strike softness over the reverse portrait, but all other features are bold, if not sharp. The number of distractions is few for the grade — a small area of tiny marks in the right obverse field is noted for accuracy. A pleasing example, nonetheless, with a delicate overlay of steel-gray and mixed pastel colors. Population: 8 in 62, 9 finer (8/16).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 6738. NGC ID# 24YZ, PCGS# 6948

PROOF SEATED DOLLARS

1851 Restrike Dollar, PR63 Cameo
Key Date in the Seated Dollar Series

3199 1851 Restrike PR63 Cameo PCGS. The offering of an 1851 silver dollar at auction — whether it is a business strike or a proof — is sure to elicit the attention of collectors far and wide. Of the 33 different Philadelphia Seated dollar issues from 1840 to 1873, the 1851 is considered the rarest date. In his *Silver Dollars & Trade Dollars of the United States* (1993), Bowers estimates that between 26 and 52 examples out of the original 1,300 mintage of 1851 circulation strike dollars survive to this day. Regarding the proof restrikes of the same date, he approximates an extant population of between 30 to 60 pieces, thus suggesting that business strike and proofs are of equal rarity. Recent research by Dick Osburn and Brian Cushing estimates the proof restrike mintage at 50 to 100 pieces. Why the Mint would take the time and expense to prepare silver dollar dies for such a paltry mintage of silver dollars remains a mystery.

The current coin is one of the few to have been designated as a Cameo by either NGC or PCGS, and based on the reverse die it was likely struck in late 1859 or early 1860. As expected, the fields are exceptionally deep in their mirrored reflectivity, which helps set up contrast against the frosted devices. Variegated reddish patina is seen over each side with a faint accent of blue noted around the margins. Light hairlines explain the PR63 grade and why this piece does not grade higher even though visually it appears finer. The only surface disturbance worthy of note is a tiny area of pinscratching in the exergual area between the 1 and 8 in the date. Population: 4 in 63 Cameo, 2 finer (8/16). NGC ID# 2524, PCGS# 86993

1863 Seated Liberty Dollar, PR63 Cameo
Only 460 Examples Struck

3200 1863 PR63 Cameo PCGS. OC-P1. Only 460 proof Seated Liberty dollars were struck in 1863, when wartime hoarding and the suspension of specie payments made proof sets more expensive and difficult to order. This attractive Select specimen exhibits sharply detailed, frosty design elements that contrast boldly with the mirrored fields. Only minor signs of contact are evident and a few hints of pale gold toning add to the outstanding eye appeal. Population: 11 in 63 (2 in 63+) Cameo, 18 finer (8/16). NGC ID# 252H, PCGS# 87006

1870 Seated Liberty Dollar, PR65
Attractive Toning, Moderate Contrast

3201 1870 PR65 PCGS. OC-P1. According to Mint records, a generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1870. One obverse die was combined with three different reverses to strike these proofs. This Gem specimen is sharply detailed throughout and shows the light doubling on the banner that identifies the OC-P1 variety. The well-preserved surfaces are toned in shades of greenish-gold and electric-blue, with deeply mirrored fields underneath. Moderate field-device contrast is evident on both sides. The 1870 proof is rarely seen this fine, and higher-grade pieces are exceedingly rare. This coin possesses tremendous visual appeal. Population: 17 in 65, 6 finer (8/16). NGC ID# 252S, PCGS# 7018

1872 Seated Dollar, PR65
CAC Endorsement, Original Toning

3202 1872 PR65 NGC. CAC. An unknown percentage of the 950 Seated dollar proofs struck in 1872 were melted. Today, somewhere around 600 specimens survive — a fair estimate based on the number of submissions at NGC and PCGS. Most examples grade in the PR63 to PR64 range, and Gem proofs are decidedly rare.

This originally toned dollar offers lovely violet and cobalt-blue toning with dusky tan-gold color at the central obverse. Sharply struck, the coin shows dramatic die doubling on the banner and motto, most noticeable at IN GOD and, to a lesser extent, on the eagle's left (facing) wing and the denomination. Census: 17 in 65, 8 finer. CAC: 5 in 65, 0 finer (8/16). NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

1873-CC Trade Dollar, MS62
Elusive Mint State Example

3203 1873-CC MS62 PCGS. Collectors of the Trade dollar series run up against stiff competition for the Carson City issues, which enjoy extra demand from CC-Mint specialists and branch mint enthusiasts alike. Moreover, Trade dollar production and popularity was rooted in the West, where the China trade absorbed most of the San Francisco and Carson City production. The 1873-CC is the second most-elusive Trade dollar behind the 1878-CC, both in terms of mintage and survivorship. Almost all of the 124,500-piece mintage was exported and lost to the melting pots, never to return into the hands of collectors. The 1872-CC is especially scarce in any Mint State condition.

This lustrous and frosty example is nearly untoned, with a faint glint of champagne-gold over the silver surfaces. A few light marks account for the assigned grade, yet the strike is generally sharp with only minor incompleteness at Liberty's foot and the eagle's right (facing) leg. Cartwheel mint luster adds to the strong eye appeal. Population: 18 in 62, 17 finer (8/16). NGC ID# 252X, PCGS# 7032

1877-S Trade Dollar, MS65
Scarce in This Grade as a Type

3204 1877-S MS65 NGC. Large S. This 1877-S is a plentiful type-coin issue through MS64, but Gems are rare. This MS65 coin displays mottled olive-gold and pale gray toning over satiny mint luster, without any distinguished abrasions. Several right-hand stars exhibit the only mentionable strike weakness on this pleasing late-series Trade dollar. Census: 27 in 65, 6 finer (8/16). NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

1879 Trade Dollar, PR67
Delightful Coloration

3205 1879 PR67 PCGS. The 1879 proof-only Trade dollar is plentiful in the absolute sense but seldom seen in Premium Gem condition and rare in PR67. This CAC-endorsed example displays a bold strike and frosty devices with a deeply reflective backdrop in the fields. The obverse displays colorful violet, ocean-blue, sun-gold, crimson, and forest-green toning, while the reverse reflects more uniform amber coloration with hints of lavender-blue around the periphery. PCGS reports half a dozen non-Cameos in this grade and none finer (8/16). Any proof 1879 Trade dollar is rare this fine. NGC ID# 27YR, PCGS# 7059

1881 Trade Dollar, PR64 Cameo
Stark Field-Device Contrast

- 3206 1881 PR64 Cameo PCGS.** Cameo examples of the proof 1881 Trade dollar are in the minority, and this near-Gem is decidedly scarce. The strike is sharp, and subtle lavender-gray and blue-green hues in the fields accentuate appreciable cameo contrast on each side. A few stray lines in the fields determine the grade but pose little distraction. Population: 38 in 64 (3 in 64+) Cameo, 40 finer (8/16). NGC ID# 27YT, PCGS# 87061

1882 Trade Dollar, PR66
Lovely Toning

- 3207 1882 PR66 PCGS.** This Premium Gem is far finer than the typical 1882 proof Trade dollar, showing a bold strike and deeply reflective fields beneath rich, original toning. The obverse displays lavender, ocean-blue, and lemon-gold, while the reverse has a blended lavender-blue appearance. There are no perceptible hairlines or marks. This is an old-time-looking coin for the traditional proof Trade dollar collector. Population: 20 in 66, 6 finer (8/16). NGC ID# 27YU, PCGS# 7062

MORGAN DOLLARS

1878 8TF Morgan Dollar, MS66
VAM-17, Doubled LIBERTY

- 3208 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS.** LIBERTY is lightly die doubled on this popular VAM variety. Overall, the eight tailfeathers 1878 Morgan dollar is elusive this well-preserved, and anything finer is extremely rare. The present coin displays razor-sharp detail and dazzling frost-white cartwheel luster with a hint of yellow-gold toning around the outer periphery. A few light grazes on Liberty's cheek are all that preclude an even finer grade. Population (all 8TF varieties): 58 in 66 (4 in 66+), 2 finer (8/16). NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

1878-CC Morgan Dollar, MS66
Inaugural Carson City Issue

- 3209 1878-CC MS66 PCGS.** A fantastic first-year Carson City Morgan dollar with strong cartwheel luster. Frosted on the devices with a stronger reflective element on the minimally toned reverse plus a sharp strike. Eye appeal is excellent for this brilliant Premium Gem — only a few light grazes brush the highest points. PCGS reports just six numerically finer coins (8/16). Ex: FUN Signature (Heritage, 1/2012), lot 6913; Long Beach Signature (6/2016), lot 4933. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Frosty and Attractive

- 3210 1878-CC MS66 PCGS.** While scarce in Premium Gem grade, the 1878-CC is extremely rare any finer. This brilliant and frosty example approaches a finer grade with nearly full details and only minor marks on the lustrous, cream-white surfaces. Few Carson City dollars escaped heavy marks from handling and transport, making this coin one of the finest survivors from the first year of minting operations. PCGS reports just six numerically finer examples (8/16). NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66 Prooflike
Brilliant and Contrasted

- 3211 1878-CC MS66 Prooflike NGC.** A conditionally rare example and among the finest Prooflike pieces certified, this Premium Gem 1878-CC Morgan dollar displays radiant mint luster and frost-white motifs with only trivial signs of contact. The strike is razor-sharp, and the brilliant surfaces yield modest cameo contrast. Census: 9 in 66 (1 in 66 ★) Prooflike, 0 finer (8/16). NGC ID# 253M, PCGS# 7081

1878-S Morgan Dollar, MS67 ★
Tied for Finest at NGC

- 3212 1878-S MS67 ★ NGC.** A magnificent Superb Gem Morgan dollar, from the first year of the design, this specimen has been awarded the Star designation for exemplary quality and eye appeal. The design elements are sharply detailed and the surfaces are impeccably preserved, with a mix of vibrant mint luster and prooflike reflectivity in the fields. Census: 34 in 67 (5 in 67★), 0 finer (8/16). NGC ID# 253R, PCGS# 7082

1879-CC Silver Dollar, MS64
Frost-White Carson City Morgan

- 3213 1879-CC MS64 PCGS.** Normal Mintmark. A lack of silver made the 1879-CC a scarce issue in its own time, and today the rarity of Gem or finer coins makes the near-Gem grade the most appealing collector option. Bowers calls MS64 the Optimal Collecting Grade, and this coin is clearly Choice in all regards. A blazing white representative, the mint luster rolls across fully brought-up, frosty devices. Marks are few and of minor consequence, while the eye appeal is terrific. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS61
VAM-3, Capped Die

- 3214 1879-CC Capped Die, VAM-3, Top 100, MS61 PCGS.** A Top 100 Variety. The Capped Die variety is actually a repunched mintmark with the original mintmark concealed by myriad minuscule marks before punching the final mintmark in the die. This lovely piece has frosty silver luster and outstanding eye appeal. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Capped Die Dollar, MS64
A Top 100 Variety

- 3215 1879-CC Capped Die, VAM-3, Top 100, MS64 PCGS.** A Top 100 Variety. Nearly uncollectible finer, the 1879-CC Capped Die Morgan dollar is an elusive issue in better Mint State grades. The specimen that we offer here displays lilac-toned surfaces that are free of all but the most trivial bagmarks. The otherwise strong strike wanes only slightly over the central obverse and reverse, but the overall eye appeal is undiminished.

Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1007. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-S Morgan, MS64 Prooflike
Reverse of 1878

- 3216 1879-S Reverse of 1878, VAM-6, MS64 Prooflike PCGS.** CAC. A Top 100 Variety. The upper serif is missing on the R in TRUST, forming instead TIUST. A stone-white and strongly mirrored Choice Morgan dollar from the elusive Second Reverse subtype. Fully struck with frosty motifs and good cameo contrast, particularly on the reverse. Light, grade-defining abrasions are seen on the cheek, but are not overly detracting. Population: 10 in 64 (1 in 64+) Prooflike, 0 finer. CAC: 3 in 64, 0 finer (8/16). NGC ID# 253W, PCGS# 40961 Base PCGS# 7095

1880-CC Cameo-Contrasted Morgan Dollar
VAM-6, 8 Over Low 7, MS66+ Prooflike

- 3217 1880-CC 8 Over Low 7, VAM-6, MS66+ Prooflike PCGS.** A Top 100 Variety. VAM-6 is the famous 8 Over Low 7 variety. Plain remnants of an earlier 7 are visible within both loops of the second 8 in the date, as well as above and below faintly. Reverse die interests include metal lumps within both C's of the mintmark and prominent die lines through the M in AMERICA and along the lower edge of the eagle's left (facing) wing. This Prooflike coin is struck from freshly polished dies with deep mirroring on each side. Some die rust remains visible in the vicinity of the ST in STATES. The devices are sharply struck and thickly frosted without perceptible toning. Cameo contrast on each side is outstanding. A few faint marks are hardly noteworthy, as almost all of the lines in the fields are mint-made die polishing lines, not surface impairments. NGC ID# 35BH, PCGS# 41135 Base PCGS# 7105

1880-O Silver Dollar, MS64
Top-Grade Deep Mirror Prooflike Example

- 3218 1880-O MS64 Deep Mirror Prooflike PCGS.** The 1880-O Morgan is a known scarce date in Deep Mirror Prooflike, and this Choice example is among the finest seen in that category by either leading service. The strike is bold, and grade-limiting marks are minor. Frosty devices provide ample contrast with the liquidlike mirroring of the fields. Population: 38 in 64 (1 in 64+) Deep Mirror Prooflike, 0 finer (8/16). NGC ID# 2543, PCGS# 97115

1880-S Silver Dollar, MS68 Prooflike
Registry Set Condition Rarity

- 3219 1880-S MS68 Prooflike PCGS.** The 1880-S is one of only a few dates in the entire Morgan dollar series that even exists as fine as MS68 in the Prooflike category, making the present piece a must-have item for the Registry collector. Liberty's portrait and the eagle are fully struck, and the fields display a balance of dazzling cartwheel luster and reflectivity. There are virtually no abrasions, and each side displays a hint of light champagne color. Almost unknown finer. Population: 20 in 68 (2 in 68+) Prooflike, 1 finer (8/16). NGC ID# 2544, PCGS# 7119

1881-CC Morgan Dollar, MS67
Excellent Branch Mint Type Coin

- 3220 1881-CC MS67 PCGS.** From a small mintage of 296,000 pieces, the 1881-CC is more available than its relatively tiny production total would suggest because a large number of specimens were released in the famous GSA sales of the 1970s. This delightful Superb Gem is sharply detailed and impeccably preserved, with vibrant mint luster and terrific eye appeal. PCGS has graded only four numerically finer examples (8/16). NGC ID# 2549, PCGS# 7126

**1882-O Silver Dollar, Remarkable MS66
Beautifully Toned, Uncommonly Radiant**

- 3221 1882-O MS66 PCGS.** Dave Bowers, in *A Guide Book of Morgan Silver Dollars*, fourth edition, notes that the 1882-O Morgan was “produced with relatively little care,” and usually has “dull and insipid” luster. This Premium Gem stands in stark contrast to norms for the issue, showcasing a strike and luster combination reminiscent of the 1882-S, which is widely regarded as one of the most eye-appealing issues in the entire series. This vibrant and frosty 1882-O is strong for the MS66 grade and yields soft champagne toning over the reverse and central obverse with incredible ice-blue, mint-green, sun-gold, plum, and forest-green hues around the obverse margins. Population: 58 in 66 (4 in 66+), 6 finer (8/16). NGC ID# 254K, PCGS# 7136

**1883 Silver Dollar, MS67+
Only Four Finer at PCGS**

- 3222 1883 MS67+ PCGS.** CAC. Both sides exhibit delicate peripheral die cracks. An impressive Superb Gem, this 1883 exhibits a single tiny toning spot in the lowest hair curls, and that is the only evidence of toning on either side of this brilliant silver example with its frosty mint luster. PCGS has certified 20 examples in MS67+ and only four finer pieces (8/16). NGC ID# 254G, PCGS# 7142

**1883-S Silver Dollar, MS64+
Rarely Encountered Finer**

- 3223 1883-S MS64+ PCGS.** The Mint State population of the 1883-S Morgan dollar drops of precipitously above MS64. This Plus-designated coin will appeal to a wealth of collectors who find a rare Gem to be out of reach. This piece is well-preserved and satiny with warm orange-gold and lavender interiors that cede to sea-green and blue borders. Slight strike weakness is seen on the eagle's breast and the hair above Liberty's ear. PCGS lists 19 finer representatives (8/16). NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64
Conditionally Rare in Finer Grades**

- 3224 1883-S MS64 PCGS.** CAC. From a mintage of more than 6.2 million pieces, the 1883-S Morgan dollar is a relatively available issue in MS64 condition, but the population drops dramatically in any higher grade. This attractive Choice specimen displays shades of golden-tan and lavender toning, with vibrant mint luster and sharply detailed design elements underneath. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 254K, PCGS# 7148

**1884-CC Dollar, MS67 Prooflike
Among the Finest Known**

- 3225 1884-CC MS67 Prooflike NGC.** Large quantities of the Carson City-produced Morgan dollars remained in government vaults until the 1970s, at which time they were finally distributed to the numismatic community. However, 90 years of storage and handling during inventories, were not kind to many CC dollars, and very few were located in what would be considered today as MS66 and MS67 grades. This is one of the rare exceptions. The surfaces are extraordinarily lustrous, as one would expect from a Carson City dollar. The fields are bright and reflective with a notable absence of the abrasions that usually accompany CC dollars. The cheek of Liberty is smooth and virtually unblemished, and the mint frost on the eagle is equally abrasion-free. Fully struck in all areas, this is one of the finest Carson City dollars we have handled. Census: 9 in 67 (1 in 67+) Prooflike, 0 finer (8/16).
Ex: *Denver Signature* (Heritage, 8/2006), lot 5349; *Central States Signature* (Heritage, 4/2013), lot 4783. NGC ID# 254M, PCGS# 7153

**1886-O Morgan, MS64
None Finer at NGC**

- 3226 1886-O MS64 NGC.** The 1886-O Morgan is only marginally scarce in Choice condition, but the extreme rarity of finer examples makes this MS64 coin among the finest most collectors will be able to acquire. Satiny luster is golden-toned in the margins and exhibits only a few light abrasions. Trivial strike softness is seen on the eagle's breast and the hair above Liberty's ear. None are finer at NGC (8/16). NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS64
Prime Condition Rarity in Finer Grades

3227 1886-O MS64 PCGS. The 1886-O Morgan dollar is a notable condition rarity in high grade. This impressive Choice example exhibits unusually sharp design elements and the well-preserved brilliant surfaces radiate vibrant mint luster on both sides. While the 1886-O is only very scarce in MS64, PCGS has graded only seven numerically finer examples (8/16). NGC ID# 254W, PCGS# 7168

1887-O Morgan, MS65 Prooflike
Appealing Field-Device Contrast

3229 1887-O MS65 Prooflike PCGS. Considerable contrast appears on frosty silver-white devices complementing deeply mirrored, looking-glass fields on both sides of this nicely preserved Gem 1887-O Morgan. A glint of sunset-orange and gold enlivens the rims, but the coin is largely untoned. The O-mint strike is a tad better than expected. Population: 18 in 65 Prooflike, 2 finer (8/16). NGC ID# 2552, PCGS# 7177

1886-S Silver Dollar, MS67
Condition Census Registry Coin
None Known Finer

3228 1886-S MS67 PCGS. This remarkable Superb Gem 1886-S Morgan dollar is tied for the finest certified. PCGS lists five pieces in MS67 and NGC just two; the finest Prooflike coins are Premium Gems, and the highest-grade Deep Mirror Prooflike examples seen grade MS65 (8/16). The '86-S is plentiful in lower grades, but it is not known for being available above MS65. This unassuming San Francisco issue is one of the most difficult acquisitions for the Registry Set collector in top grade. The present coin displays a sharp strike and dazzling cartwheel luster that is devoid of toning. A few faint grazes seen with a loupe do not distract. Population: 5 in 67, 0 finer (8/16). NGC ID# 254X, PCGS# 7170

1889-CC Morgan Dollar, MS61
Low-Mintage Carson City Key

3230 1889-CC MS61 PCGS. CAC. Highly collectible in all grades, the 1889-CC receives unbounded demand both for the low, 350,000-piece mintage and for its status as the rarest of all Carson City Morgans. The issue is especially elusive with good eye appeal. The strike is normally below-average, and attractive mint luster often goes missing.

This lustrous and appealing Mint State example bucks both trends. While a couple of hair strands above the ear show merging, the strike is strong despite the peripherally cracked dies on both sides. Deep and abiding frosty luster covers the brilliant surfaces, while the semireflective fields are impressively clear of all but a few non-distracting marks. The eye appeal is exceptional for the grade level, as witnessed by the CAC endorsement. NGC ID# 2559, PCGS# 7190

**1890-CC Silver Dollar, MS65
Fully Toned Surfaces**

- 3231 1890-CC MS65 PCGS. CAC.** This impressive Gem exhibits full cartwheel luster beneath its impressive display of gold, rose, violet, blue, and golden-brown toning over the entire obverse and reverse surfaces. The reverse toning is especially spectacular, a veritable rainbow. PCGS has only certified 15 numerically finer examples. CAC: 39 in 65, 4 finer (8/16). NGC ID# 255D, PCGS# 7198

**1891-S Silver Dollar, MS66+
Exceptionally Clean Surfaces**

- 3232 1891-S MS66+ PCGS.** The 1891-S is a slightly better Morgan dollar issue in Premium Gem condition, and Superb Gems are rare. This Plus-designated MS66 coin shows a virtually flawless cheek on Liberty and vibrant, frosty mint-fresh luster. A tiny obverse graze near star 5 and another on the reverse below the U in UNITED are the only stoppers to an even finer grade. This piece is sharply struck and displays splashes of sun-orange and bluish toning. PCGS lists eight finer representatives (8/16). NGC ID# 255K, PCGS# 7210

**1892-CC Silver Dollar, MS65
VAM-8A, Die Chip in 2**

- 3233 1892-CC MS65 PCGS. VAM-8A.** A small die chip fills the bottom part of the 2 on this attractive Gem, with die clashing visible at Liberty's neck, chin, and mouth. Both sides display frosty and brilliant silver luster with no evidence of toning. Additional faint clash marks and minor die cracks are noted on each side. Only 32 numerically finer examples reside in PCGS holders (8/16). Ex: FUN Signature (Heritage, 7/2012), lot 4376. NGC ID# 255M, PCGS# 7214

**1893-CC Silver Dollar, MS60
Lacks Significant Marks**

- 3234 1893-CC MS60 PCGS. CAC.** This green-label PCGS 1893-CC dollar is an exceptional example for the grade. Both sides are fully brilliant and untuned with reflective fields. The strike exhibits the usual weakness over Liberty's ear and on the eagle's breast, but the remarkable characteristic of this example is actually a missing trait, and that is bagmarks. Although both sides have the usual trivial marks, there are no heavy bagmarks that impair the aesthetic appeal of this wonderful Carson City silver dollar. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62
Reflective Fields, Frosted Devices**

- 3235 1893-CC MS62 PCGS.** 1893-CC dollars are notably scarce in prooflike or deep mirror prooflike formats, yet this example would likely earn such a designation if it was in a different holder. As normally seen for the final-year Carson City silver dollars, both sides are softly struck at the centers and numerous bagmarks dot the surfaces. The reflective fields contrast boldly with the frosted devices for a powerful visual impact. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS64
Low-Mintage, Final-Date Key**

3236 1893-CC MS64 PCGS. The Carson City Mint was closed for coinage operations on June 1, 1893, ending one of the most romantic eras in American coinage. Because of the short production year, only 677,000 Morgan dollars were struck. Some of those coins were released into circulation in the hard-money economy of the western United States and a relatively small number were stored in government vaults, to be paid out in later years. By the 1970s, the government stockpile was all but exhausted, and only one example was offered in the famous GSA sales. A number of survivors surfaced in the Redfield Hoard, but many of those coins were deemed unreadable after they were damaged by coin-counting machines.

Unlike many '93-CC dollars, this piece shows sharp definition in the center of each side. This issue was generally roughly handled, but this coin is a notable exception with only the tiniest abrasions present. The centers are untoned and surrounded at the margins by rich golden-brown patina. A lovely near-Gem example of this key Carson City issue. PCGS has graded 14 numerically finer examples (8/16). NGC ID# 255S, PCGS# 7222

**1893-O Silver Dollar, MS63
In a First Generation Holder**

3237 1893-O MS63 PCGS. Dusky champagne and powder-blue hues encompass this Select 1893-O Morgan dollar, masking the grade-limiting abrasions to the point where they are almost invisible to the unaided eye — only a loupe and careful rotation beneath a light reveals light grazes on the cheek and in the field that prevented a finer numeric assignment from PCGS. This coin is slightly weak on the hair above Liberty's ear but otherwise outstanding for the grade and issue. Housed in an old "rattler" holder. NGC ID# 255T, PCGS# 7224

**1893-S Morgan Dollar, XF45
In-Demand Series Key**

3238 1893-S XF45 PCGS. A Choice XF specimen of the most sought-after business-strike issue of the Morgan dollar series, this coin shows only light wear on the well-detailed design elements. The lightly abraded surfaces display mingled shades of blue-steel, sea-green, and lavender-gray toning. From a series-low mintage of 100,000 pieces. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, AU50
Uncommonly Seen Grade for This Key Date

3239 1893-S AU50 PCGS. Hints of tan toning are present here and there, but this key-date dollar is mostly untuned. Luster is obvious within Liberty's hair and the eagle's plumage, and the margins offer glimpses of satin iridescence. Close examination beneath a lens locates a few moderate marks on the portrait, although these do not distract given the AU50 grade. Some detail remains on the eagle's breast and on the hair curl above the ear. In short, this is a problem-free lightly worn example that provides an affordable alternative to the nearly unobtainable Mint State grade. The 1893-S has a mintage similar to the 1894, but the latter is much more plentiful in Uncirculated condition. The 1893-S is the rarest date in the series in high grade.

Ex: *Dallas Signature* (Heritage, 11/2006), lot 1426. NGC ID# 255U, PCGS# 7226

1894 Dollar, Toned MS64+
Philadelphia Rarity in High Grade

3240 1894 MS64+ PCGS. The Sherman Silver Purchase Act, the replacement legislation for the Bland-Allison Act, was repealed in 1893. Morgan dollar mintages immediately plummeted as a result and did not fully recover until 1896. The 1894 branch mint issues each saw limited production and are semikeys today in high grade. But the 1894 Philadelphia dollar had a particularly scant production of just 110,000 coins — the second-lowest mintage of the circulation strike series. Mint State examples of this P-mint semikey are seldom seen at the Choice grade level, and Gems are rare. This Plus-designated MS64 coin balances rarity with moderate affordability and should draw substantial interest at auction. The strike is bold, and the satiny surfaces reveal few noticeable abrasions. The obverse is warm golden in color, the reverse displays mottled lavender-gold and ocean-blue hues. There are 27 finer examples at PCGS, five at NGC (8/16). NGC ID# 255V, PCGS# 7228

1895-S Morgan Dollar, MS63
Popular Date Coin

- 3241 1895-S MS63 PCGS.** The 1895-S is the most available Morgan dollar bearing the date, making it a popular choice for collectors who seek one example for each year of the series. The Philadelphia issue is known only in proof format, and the New Orleans issue is a formidable rarity in Mint State grades. This Select Mint State piece has brilliant silver surfaces with splashes of gold toning and slightly reflective surfaces. NGC ID# 255Z, PCGS# 7238

1896-O Morgan Dollar, AU58
Rare Deep Mirror Prooflike Example

- 3242 1896-O AU58 Deep Mirror Prooflike NGC.** The 1896-O Morgan dollar was produced in adequate numbers, but problems with weak strikes, insipid luster, and excessive surface marks make the issue conditionally challenging in high grade. This impressive near-Mint specimen shows just the slightest trace of high-point wear and the brilliant surfaces display deep prooflike reflectivity throughout, with just the expected number of minor contact marks for the grade. Census: 3 in 58 Deep Mirror Prooflike, 5 finer (8/16). NGC ID# 27ZU, PCGS# 97243

1896-S Silver Dollar, MS64
In a Green Label Holder

- 3243 1896-S MS64 PCGS.** The 1896-S Morgan is much scarcer in Mint State than its mintage of 5 million pieces would suggest. This near-Gem example remains accessible, but finer coins are seldom seen. The strike is sharp, and brilliant cartwheel luster rolls over minimally marked surfaces. Housed in a green label holder. NGC ID# 2564, PCGS# 7244

1896-S Dollar, Frosty MS64
Repunched 6 in the Date

- 3244 1896-S MS64 PCGS. VAM-2.** Ex: New York City Set. The *Guide Book* reports a mintage of 5 million pieces for the 1896-S, but a goodly portion of those presumably were melted in conformance with the Pittman Act. The issue is tough across all Mint State grades, and Choice examples are well-contested by collectors. This nicely struck and nearly brilliant piece features clean surfaces and blazing luster. The peak of the 6 in the date is lightly repunched on VAM-2. Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1236. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS65
Conditionally Scarce Example

- 3245 1896-S MS65 PCGS. VAM-2.** The 6 in the date is faintly doubled at the top of the upper loop. Like many Morgans, the 1896-S is plentiful in Uncirculated condition but becomes challenging in Gem and above. Treasury releases ensured an ample supply of survivors, but few match the quality of this Gem example. This coin exhibits especially clean fields with only a minor abrasion above the cap and below B of PLURIBUS. The strike at the center of the obverse is a touch soft with roller marks evident on the hair and temple. Both sides are largely brilliant but display russet and blue-green at the rims. The reverse reveals light chatter above the motto, and there is a light die crack joining the peripheral letters. This issue is scarce at the MS65 level, and the populations of finer examples are all in the single digits. Population: 84 in 65 (4 in 65+), 5 finer (8/16). NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS65
Prime Condition Rarity in Finer Grades

- 3246 1896-S MS65 PCGS.** The 1896-S Morgan dollar enjoyed a substantial mintage of 5 million pieces, but the issue is much more difficult to locate than that generous production total would suggest, especially in high grade. The number of circulated examples in today's market indicate that a significant portion of the mintage was released into circulation near the time of issue, but most of the coins were probably placed into storage and melted in 1918, under the provisions of the Pittman Act. Most Mint State survivors probably come from the famous Redfield Hoard, which included several hundred relatively nice examples. The Redfield coins were generally well-struck, but showed extensive bag marks, and few specimens graded as high as MS64. The 1896-S is very scarce at the MS65 grade level, and finer coins are very rare.

The present coin is a spectacular Gem, with well-detailed design elements that show just a touch of the typical softness on the hair above the ear. The well-preserved surfaces are blanketed in low-intensity shades of greenish-gold toning, with slightly subdued satiny mint luster underneath. Population: 84 in 65 (4 in 65+), 5 finer (8/16). NGC ID# 2564, PCGS# 7244

1900-S Morgan Dollar, MS67

Among the Three Finest Certified at PCGS

3247 1900-S MS67 PCGS. CAC. A respectable mintage of 3.5 million Morgan dollars was achieved at the San Francisco Mint in 1900, with the great majority of the coins delivered after September 1. Most of the mintage was stored at the Mint until the 1930s, when bag quantities were initially paid out. Sizeable periodic releases continued through the 1950s, and the 1900-S was also well-represented in the great Treasury releases of the 1960s. Many of the coins went into circulation or were used to service the casino gambling industry in Nevada, but a significant number of high-quality specimens were preserved by numismatists over the years.

The present coin is one of the finest survivors of this popular turn-of-the-century issue. The design elements are well-detailed and the impeccably preserved surfaces radiate vibrant mint luster, under vivid shades of magenta and greenish-gold toning. Population: 3 in 67, 0 finer. CAC: 2 in 67, 0 finer (8/16). NGC ID# 256H, PCGS# 7270

PROOF MORGAN DOLLARS

1889 Morgan Dollar, PR67 Cameo

Incredibly Stark Contrast

Conditionally Rare

3248 1889 PR67 Cameo NGC. The proof 1889 Morgan dollar is inherently rare in Superb Gem condition, and Cameo examples in this grade represent the peak accomplishment among Registry collectors. No Ultra Cameos are recorded by NGC, and the finest PCGS Deep Cameos grade PR66+. This high-end, starkly contrasted proof showcases a combination of field-device separation and visual appeal that is almost unseen on the retail market for this issue. It represents very nearly the finest auction offering recorded in our archives —only a single PR68 Cameo PCGS coin has been offered finer, which realized nearly \$75,000 in our August 2011 Chicago Signature sale as lot 7364. The last PR67 Cameo we offered was an NGC coin that appeared in lot 4733 in our June 2016 Long Beach Signature sale, where it realized an impressive \$31,725.

Dare we suggest that the present piece is visually finer than that coin? This representative shows contrast nearly adequate for an Ultra Cameo designation, and the preservation is virtually flawless. A halo of golden peripheral toning surrounds the borders, leaving the interiors brilliant. A loupe reveals faint die polishing lines in the fields, not to be mistaken for hairline scratches, of which there are none worthy of mention. Census: 12 in 67 Cameo (2 in 67+), 1 finer (8/16). NGC ID# 27ZJ, PCGS# 87324

**1897 Morgan Dollar, PR67 Cameo
Only 731 Examples Struck**

3249 1897 PR67 Cameo PCGS. CAC. Only 731 proof Morgan dollars were struck in 1897, with deliveries occurring every three months (March, June, September, and December). The coins were produced to a high standard of quality and, among graded coins, about one survivor in ten has enough field/device contrast to earn the Cameo designation. Some minor doubling shows on the numerals in the date in all examples seen.

The present coin is a delightful Superb Gem, with sharply detailed design elements and impeccably preserved surfaces that show subtle hints of pale gold toning. The deeply mirrored fields create a bold cameo effect with the frosty devices and overall eye appeal is terrific. Population: 5 in 67 Cameo, 3 finer. CAC: 1 in 67, 2 finer (8/16). NGC ID# 27ZV, PCGS# 87332

**1902 Silver Dollar, PR66
Vivid Concentric Toning**

3250 1902 PR66 PCGS. CAC. Vivid royal-blue, lavender, gold, and sea-green toning encompasses both sides of this high-end proof 1902 Morgan dollar. The strike is full, and the reflective fields are devoid of mentionable flaws. The 1902 proof is elusive this finer and rarely seen in higher grades. CAC-endorsed in a green label holder. Population: 22 in 66 (2 in 66+), 7 finer. CAC: 9 in 66, 5 finer (8/16). NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

**1926 Peace Dollar, MS66+
Among the Finest at PCGS**

3251 1926 MS66+ PCGS. The 1926 Peace dollar can be located in MS66 condition with a little patience, but finer coins are virtually unobtainable. This Plus-graded Premium Gem exhibits sharply detailed design elements throughout, with well-preserved, lustrous surfaces under shades of greenish-gold and lavender toning. Population: 225 in 66 (10 in 66+), 0 finer (8/16). NGC ID# 257N, PCGS# 7367

**1926-D Silver Dollar, MS66+
Brilliant, Sharp Central Strike**

3252 1926-D MS66+ PCGS. CAC. This brilliant and lustrous high grade Peace dollar has a fully struck portrait. Marks are limited to a few ticks near the P in PLURIBUS, and a graze at the top of the eagle's front wing. Conditionally rare in the present quality; the (8/16) PCGS Census shows ten coins as MS66+ with only eight examples finer. NGC ID# 257P, PCGS# 7368

1934-S Peace Dollar, MS64 Challenging in Mint State

- 3253** 1934-S MS64 PCGS. The 1934-S is the most elusive Peace dollar issue in Mint State. Examples grading finer than this near-Gem are infrequently seen and are out of reach for most series collectors. The present coin displays vibrant, frosty luster with occasional glimpses of milky-gold toning. Some light strike softness on the central high points is not unusual for the issue. NGC ID# 257Z, PCGS# 7377

ERRORS

1907 Liberty Nickel, AU53 Struck on a Cent Planchet

- 3254** 1907 Liberty Nickel — Struck on a Cent Planchet — AU53 PCGS. Struck aligned with the collar die at 10:30, this wrong planchet mint error lacks dentils across the lower obverse and upper reverse. The peripheral legends are distorted from metal flow toward the rims. Liberty's hair displays slight wear, but the chocolate-brown surfaces retain indications of luster. Off-metal error coins released into commerce often display test marks made by curious finders, and the present example shows such marks on the upper left obverse field and below the C in CENTS.

1976-S Jefferson Nickel Obverse Impression on a Clad Proof Ike Dollar Planchet

- 3255** 1976-S Jefferson Nickel — Obverse Impression Struck Into Center of a Dollar Planchet — NGC. 22.37 gm, very close to the 22.68 gm statutory weight of a clad Eisenhower dollar. Very softly struck on a proof Ike dollar planchet with a plain edge, between mismatched dies. One side shows a nicely centered impression from a 1976-S proof Jefferson nickel obverse die. The nickel date and mintmark are bold, and the Jefferson portrait is fully outlined. The other side exhibits a larger diameter design, described by noted error authority Mike Diamond as from "a proof dime obverse die ... The dime design was hubbed or transferred into a larger area marked by many irregular features." Fred Weinberg adds, "this incredible proof nickel/dime striking is unique." Jon Sullivan examined this unique striking and said that "this is the only known muling of a U.S. dime obverse and a U.S. nickel obverse. This is one of the most fascinating mint errors I have ever seen." The date, mintmark, and neck outline of Roosevelt is perceptible in incused, reversed, and expanded format, similar to a mid-to-late stage brockage striking. We note that opinions may vary regarding the reverse impression, and we suggest personal examination prior to bidding.

1904 Double Eagle, MS62
Double Struck in Collar
Rotated 180 Degrees Between Strikes

- 3256 1904 Liberty Double Eagle — Double Struck, Rotated 180 Degrees in Collar — MS62 NGC. CAC. Ex: Byers Collection.** An outline of the hairbun from the initial strike is apparent in front of Liberty's mouth, while her profile from the first impression remains beneath the hairbun from the second strike. Outlines of the bust are also evident above the bust tip and beneath Liberty's eye. Neither strike was off center. The reverse also shows evidence of a prior strike, near the D in UNITED and on the field within the left scroll. The reeding is visible within the holder and does not show doubling, which suggests that the collar die was impeded or absent for the second strike. Perhaps the coin made it between the dies on two different occasions. The other possibility is that after the first strike, the coin widely rotated but failed to eject. The second in-collar strike created a prominent wire rim on the reverse between 9 and 12 o'clock. Lustrous and conservatively graded.

From our online auction archives, perhaps the closest match to the present error coin was an MS62 NGC 1925-D quarter eagle that was also double struck with a 180 degree collar rotation between strikes. That coin, lot 5345 from our April 2011 Rosemont Central States Signature, was hammered down for \$57,500. Another double struck 1904 Liberty double eagle, with a spread between strikes of only a few degrees, brought \$37,375 as lot 5685 in our 2006 Denver Platinum Night Signature.

GOLD DOLLARS

1849 No L Open Wreath Gold Dollar
Conditionally Rare MS66

- 3257 1849 No L, D-1, Normal Stars, MS66 NGC.** The scarcer No L Open Wreath variant, lacking the designer's initial on Liberty's neck truncation. This Premium Gem example displays sharp details and pleasing yellow-gold luster without significant abrasions. The central reverse shows semiprooflike mirroring in the fields, and Liberty's portrait has a halo of satiny luster surrounding it, producing a backlighting effect. Census (No L): 11 in 66 (1 in 66 ★), 7 finer (8/16). PCGS# 521670 Base PCGS# 7501

1852-D Gold Dollar, MS60
Mint State Rarity

- 3258 1852-D MS60 NGC. Variety 4-F.** The 1852-D gold dollar is a challenging date in all grades with a surviving population estimated between 125 and 175 coins, and Mint State pieces are rare. This Uncirculated example displays a bold strike from cracked and eroded dies. Satiny yellow-gold luster shows a few scattered abrasions, as expected for the grade. Eye appeal is quite pleasing for the issue and grade. Census: 5 in 60, 25 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 25BS, PCGS# 7519

1854 Type Two Gold Dollar, MS63
Appealing for the Grade

- 3259 1854 Type Two MS63 NGC.** The 1854 Type Two gold dollar is popular for type purposes. This Select example displays bold central devices with weakness along the upper obverse and lower reverse dentils. The dies are lightly clashed, but neither side exhibits significant abrasions. Thoroughly lustrous fields deliver excellent eye appeal. *From The Twelve Oaks Collection, Part II* NGC ID# 32EH, PCGS# 7531

1855-C Gold Dollar, AU53 In-Demand Type Two Issue

- 3260 1855-C AU53 NGC. Variety 2.** The second 5 in the date is to the right below the A. This variant comes better struck than Variety 1, with DOLLAR and the date boldly impressed. The wreath elements and portrait, though, are incomplete. Light straw-gold surfaces exhibit thin, wispy abrasions. The 1855-C is always in high demand as the sole Charlotte Type Two gold dollar. Only 9,803 coins were struck.

From The Walter Freeman Collection, Part I. NGC ID# 25C5, PCGS# 7533

1855-C Gold Dollar, AU53 Sole Type Two Charlotte Issue

- 3261 1855-C AU53 NGC. Variety 1,** the rarer of the two 1855-C gold dollar die pairings, showing weakness on the 8 in the date and LL in DOLLAR. The obverse portrait is similarly weak. This coin shows pleasing wheat-gold surfaces with hints of luster in the protected regions of the fields. The reverse is rotated slightly counterclockwise. The 1855-C is the only Type Two gold dollar from the Charlotte Mint. Examples are highly sought-after in every grade but infrequently seen at auction.

From The Twelve Oaks Collection, Part II NGC ID# 25C5, PCGS# 7533

1882 Gold Dollar, MS67 Rare Any Finer

- 3262 1882 MS67 PCGS.** Despite its low 5,000-coin mintage, the 1882 gold dollar is usually available in Mint State. Nonetheless, Superb Gems are scarce. This frosty yellow-gold example is almost untouched on the surfaces, showing only a few truly faint lines in the central reverse fields that prevent an even finer grade. The strike is sharp, and eye appeal is pleasing. Population: 32 in 67 (1 in 67+), 11 finer (8/16). NGC ID# 25DL, PCGS# 7583

PROOF GOLD DOLLAR

1883 Gold Dollar, PR66 Deep Cameo Sole Deep Cameo at PCGS

- 3263 1883 PR66 Deep Cameo PCGS.** With a mintage of 207 pieces, the proof 1883 gold dollar is collectible but scarce. Survivors are seen in numerous levels of preservation, but one common characteristic is a general lack of truly deep cameo contrast. This Premium Gem, showing stark field-device contrast and glasslike mirroring in the fields, is the sole Deep Cameo certified at PCGS (8/16). The coin is fully struck and seemingly flawless in preservation. The mirrored obverse fields show faint die striations beneath a 10x loupe, and a tiny link mark appears midway between Liberty's nose and the ED in UNITED. The reverse also has a few small lintmarks, the most prominent of which occurs on the left branch of the wreath. This is quite a lovely little coin, even if its demanding rarity is not considered. NGC ID# 25ET, PCGS# 97633

EARLY QUARTER EAGLES

1796 Capped Bust Left Quarter Eagle, XF45
 First Year of Denomination
 Popular Single-Year, No Stars Type, BD-2

3264 1796 No Stars on Obverse, BD-2, R.4, XF45 PCGS. Bass-Dannreuther Die State d/b. The year 1796 ranks among the most crucial and important of the fledgling Philadelphia Mint. Its first director, David Rittenhouse, died in that city on June 26, at the age of 64, having established and led the institution for about three years before resigning in June 1795 because of ill health. Two famous future numismatic figures were also born during the year — Col. Mendes I. Cohen and Charles Cushing Wright — while at the Mint, a treasure trove of one-year rarities was created.

Equally important to understanding American numismatics in 1796 is the realization that this was the first year that the Mint struck every authorized denomination, including two copper denominations, five silver issues, and the gold quarter eagle, half eagle, and eagle. Many of those issues are today rarities, if not outright keys to their respective series. The 1796 No Stars quarter eagle merits special status as a first-year and one-year type, a status it shares with the 1796 quarter dollar. But while the 1796 quarter is a one-year type because no more were coined until 1804, the quarter eagle saw the addition of stars around the obverse rim on some of the 1796-dated pieces, making both quarter eagle variants one-year types — the former as the only No Stars issue, the latter as the only quarter eagle with 16 obverse stars.

The present coin is an attractive Choice XF specimen that shows only light wear on the well-detailed design elements, but some detail has been lost due to lapping in areas like the bottom curls. The pleasing antique-gold surfaces show the expected number of minor abrasions, but the surface features that stand out the most are a couple of lint marks, one in the lower right obverse field and the other near the L in LIBERTY. There is also a distinctive planchet flaw beneath the 9 in the date. These features give the coin a passing similarity to the March 2014 Donald Bentley example, but that is definitely a different coin. Some prooflike reflectivity is evident in sheltered areas.

From The Walter Freeman Collection, Part I. NGC ID# 25F2, PCGS# 45501 Base PCGS# 7645

1808 BD-1 Quarter Eagle, AU Details
One-Variety Type

3265 1808 BD-1, R.4 — Graffiti, Polished — ANACS. AU Details, Net VF20. Bass-Dannreuther Die State b, as usual, cracked through the right-hand stars. The 1808 is likely the most famous early quarter eagle issue. There is only one die variety, and this issue is the only one of the Large Bust Left design type, as no further quarter eagle coinage was accomplished until 1821, after another design change.

John Dannreuther suggests that the recorded mintage of 2,710 pieces was likely all actually struck with this one die pair, unlike in previous years when outdated dies were often carried over into the next year's coinage. However, only 125 to 150 pieces are believed extant in all grades. These are more or less evenly distributed throughout the VF to AU grade ranges, with a few surviving in Mint State. The present coin is evenly struck and well-detailed, showing weakness only on some peripheral stars and dentils. Short pin scratches in the obverse fields and enthusiastically polished, brightly reflective surfaces prevent a numeric grade.

From The Walter Freeman Collection, Part I. NGC ID# BFVZ, PCGS# 45515 Base PCGS# 7660

1831 Quarter Eagle, BD-1, AU55
Sharp and Partially Reflective

3266 1831 BD-1, R.4, AU55 NGC. Bass-Dannreuther Die State a/a. Only a single die marriage exists for the 1831 quarter eagle, employing the reverse die that was used for all coinage of this denomination from 1830 through the end of the type in 1834. This Choice AU coin is in the early die state of the obverse, before clash marks are seen. The coin is boldly and evenly struck with sharp central devices and peripheral stars. The protected portions of the fields showcase prooflike mirroring, and light high-point friction is without any significant abrasions. An outstanding example of the type or of this date, which has an estimated survival of only 110 to 125 pieces, per John Dannreuther. Census: 4 in 55, 49 finer (8/16).

From The Walter Freeman Collection, Part I. NGC ID# BFWA, PCGS# 45525 Base PCGS# 7671

CLASSIC QUARTER EAGLES

1838-C Two and a Half, AU53
Lowest Classic Head Mintage

- 3267** 1838-C AU53 NGC. Variety 20. William Kneass' Classic Head quarter eagle series was short-lived, spanning from 1834 to 1839. The branch mint issues starting in 1838 all pose a certain challenge, but none moreso than the 1838-C with its low mintage of 7,880 coins. This orange and greenish-gold two and a half showcases needle-sharp definition on the portrait, date, and popular obverse mintmark. Reverse softness is often found on coins from this issue. Lightly marked and partly lustrous. Census: 7 in 53, 46 finer (8/16).

From *The Walter Freeman Collection, Part I*. NGC ID# 25FZ, PCGS# 7697

1839-C Quarter Eagle, AU53
Winter-1, Variety 23

- 3268** 1839-C Breen-6149, Winter-1, Variety 23, R.3, AU53 NGC. The mintmark is over the right half of the 3 and the stem extends nearly over the center of the D. There are no obvious die cracks on either side of this piece. Considerable luster remains on the green-gold surfaces of this attractive piece, with trivial, scattered handling marks on each side. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1840-D Quarter Eagle, AU50
Cornerstone Dahlonega Product

- 3269** 1840-D AU50 NGC. Variety 1-A. The Liberty Head quarter eagle series commenced in 1840 with a production of 3,532 D-mint coins. The 1840-D is tied with the 1854-D for third-rarest among all Dahlonega quarter eagles, and is the rarest in AU50 and finer. This coin was struck from shattered dies, showing bisecting cracks on each side. Definition is typical for the issue. There are few major abrasions over light yellow-gold surfaces. According to Winter (2013), nine to 12 examples are extant in AU condition. Census: 6 in 50, 21 finer (8/16).

Ex: Long Beach Bullet (Heritage, 2/2000), lot 256; Central States Bullet (Heritage, 4/2001), lot 796.

From *The Walter Freeman Collection, Part I*. NGC ID# 54TT, PCGS# 7719

1871 Quarter Eagle, MS64
Conditionally Rare Philadelphia Date

- 3270** 1871 MS64 PCGS. This is a sharply struck and prooflike representative of the low-mintage 1871 Philadelphia issue. Nearly all 1871 P-Mint quarter eagles were struck from fresh dies (just 5,320 business strikes were made), and this near-Gem coin is a textbook example of a Choice survivor. Pleasing honey-gold color covers both sides, with a few tiny ticks on the reflective surfaces but no large marks. The eye appeal is outstanding. Population: 7 in 64, 2 finer (8/16). NGC ID# 25KH, PCGS# 7813

1875 Quarter Eagle, MS60
Only 400 Pieces Struck, Rare in All Grades

3271 1875 MS60 PCGS. The 1875 quarter eagle is famous for its scant 400-coin mintage, and it is about as rare as that number suggests. Only 40 to 50 pieces are believed extant, which ranks the 1875 among the rarest issues in the series from any mint. The 400-coin mintage is the second-lowest in the Liberty Head series, surpassed only by that of the 1854-S (246 pieces) — an issue with fewer than a dozen known survivors, one in the Smithsonian Institution. The 1875 is also represented by a piece in the National Numismatic Collection, which grades AU50, per Garrett and Guth.

In Mint State, the 1875 quarter eagle is extremely rare. PCGS and NGC combined list only 12 such submissions, the finest of which is a sole MS62 PCGS coin (8/16). This MS60 coin is lightly abraded but shows sharp detail and the characteristic prooflike fields that give this issue so much visual appeal. Honey-gold coloration delivers ample warmth to the mirrored surfaces. Population: 4 in 60, 3 finer (8/16).

From The Twelve Oaks Collection, Part II NGC ID# 7JS5, PCGS# 7822

PROOF LIBERTY QUARTER EAGLES

1881 Quarter Eagle, PR65 Ultra Cameo
Approximately 30 Pieces Extant
Extremely Rare Any Finer

3273 1881 PR65 Ultra Cameo NGC. A low mintage of quarter eagles was accomplished in 1881, when 640 circulation strikes and 51 proofs were struck at the Philadelphia Mint. Coins in both formats are highly sought-after rarities in today's market. An unknown number of proofs were put into circulation or otherwise impaired, and it is believed that anywhere from 20 to 35 proofs are extant. The true number is probably somewhere in between. Any opportunity to acquire one of the few surviving proofs is important, but the significance is heightened when the coin is as well-preserved and boldly contrasted as this Ultra Cameo Gem.

Reflective, jet-black fields stand in stark contrast to the frosted motifs on this amazing proof Liberty quarter eagle. Deep orange-gold hues color each side. There are a couple of trivial contact marks in the fields that serve only to identify this piece. Those interested are encouraged to bid accordingly, as another example may not appear at auction for some time. Census: 2 in 65 Ultra Cameo, 3 finer (8/16). NGC ID# 2884, PCGS# 97907

1895 Two and a Half, MS66

3272 1895 MS66 PCGS. A conditional rarity and among the finest 1895 quarter eagles at PCGS. This Premium Gem displays full design definition and frosty yellow-gold mint luster. There are no mentionable abrasions, and eye appeal is correspondingly strong. This issue's small mintage of 6,000 pieces contributes to its low survival in high grade. Population: 11 in 66, 0 finer (8/16). NGC ID# 25LK, PCGS# 7847

1905 Quarter Eagle, PR63
Exceptional Visual Appeal

3274 1905 PR63 NGC. From a mintage of 144 pieces, the 1905 proof quarter eagle is challenging in all grades. Cameo examples are rare, and no Ultra Cameos are certified. This Select non-Cameo is starkly contrasted on the reverse but less so on the obverse. The mirrored fields are remarkably well-preserved for the grade, and eye appeal is correspondingly abundant. An outstanding coin for the budget-conscious collector seeking quality. Census: 20 in 63, 47 finer (8/16).

From The Twelve Oaks Collection, Part II NGC ID# 7KG5, PCGS# 7931

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS61
Strong D, Strong Strike

3275 1911-D MS61 NGC. Strong D. A bold strike and satiny orange-gold luster give this Mint State 1911-D quarter eagle pleasing eye appeal for the grade. Light field marks are present, as expected, but none are individually significant. The 1911-D does not really need an introduction, as its key-date appeal is universally recognized. But the present coin is a notably strong example of the issue for this grade level.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, Strong D, MS61
Pleasing Lower-End Mint State Example

3276 1911-D MS61 NGC. Strong D. This Mint State 1911-D is razor-sharp throughout the headdress and eagle plumage. The textured yellow-gold surfaces are free of major abrasions, although scattered lines in the fields prevent a finer designation. Eye appeal exceeds expectations for the grade. Lower-end Mint State examples of this key Denver issue are always in demand, but the present coin is a stand-out example for the grade.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62
Strong D, High-End for the Grade

3277 1911-D MS62 NGC. Strong D. The characteristic satiny/textured luster of the 1911-D quarter eagle is quite attractive on this Mint State example, and the strike is sharply rendered. Only faint lines in the fields limit the grade, as there are no detracting abrasions. The 1911-D is seldom found so appealing in this moderately affordable Mint State grade. The specialist should examine this piece in person to fully appreciate its qualities.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Strong D Quarter Eagle, MS62
Pleasing Mint State Example

3278 1911-D MS62 PCGS. Strong D. A well-struck, satiny Mint State example of this series key issue, showing yellow-gold surfaces that are surprisingly smooth for the grade — only scattered light hairlines prevent a higher numeric designation. Visual appeal is pleasing. The 1911-D comes from a mintage of only 55,680 pieces, the lowest in the series by a significant margin.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62
Strong D Example

3279 1911-D MS62 NGC. Strong D. Splendid yellow-gold luster gives this Mint State 1911-D excellent visual merit for the grade. There are no outright abrasions, only a few light lines in the fields that are seen upon magnification. The headdress and eagle are sharp. This piece easily surpasses most other comparably graded examples with regards to quality and eye appeal.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62+
Only 12 Plus-Graded NGC Coins in This Grade

- 3280 1911-D MS62+ NGC.** Strong D. The Plus designation sets this attractive coin apart from its peers. The softly lustrous surfaces show very few abrasions, none of which are individually significant. The strike is sharp throughout. NGC lists only a dozen Plus-graded coins at the MS62 numeric grade level (8/16), making the present piece a must-have item for the collector who finds an MS63 example to be just out of reach.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, Strong D, MS63
Appealing and Well-Preserved

- 3281 1911-D MS63 NGC.** Strong D. The MS63 grade level is an ideal balance of quality and affordability for this key Denver issue. The present coin displays satiny yellow-gold mint luster with no more than a few light abrasions that determine the grade. Sharp design elements add to the eye appeal. Above this grade level, the 1911-D quarter becomes elusive and may be out of reach for many collectors.

From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, MS64
Popular Branch Mint Key

- 3282 1911-D MS64 PCGS.** Strong D. The Indian quarter eagle series includes only three branch mint issues, all from the Denver Mint. The first of these popular issues is the famous 1911-D, from a series-low mintage of 55,680 pieces. The 1911-D is a sought-after key and examples in MS64 condition are only somewhat scarce, but strong collector-demand makes securing a piece at that grade level quite challenging. Finer specimens are rare. This attractive Choice example exhibits sharply detailed design elements, with all three claws in the necklace boldly rendered. The lustrous orange-gold surfaces radiate vibrant mint luster and overall eye appeal is outstanding. PCGS has graded 25 numerically finer examples (8/16). NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS64+
Rarer in This Condition Than Reported

3283 1911-D MS64+ PCGS. CAC. Strong D. It is difficult to pinpoint the exact rarity of the 1911-D quarter eagle in high grade, as this issue is a favorite among those who resubmit coins for upgrades, particularly between the MS64 and MS65 levels. The certified population totals are unreliably skewed by this commonplace phenomenon. In terms of actual auction appearances, using our Permanent Auction Archives as a data platform, the 1911-D is handily the most elusive issue in the series in all Mint State grades. Thus, the appeal of Plus-graded coins residing midway between the MS64 and MS65 numeric tiers are highly coveted.

The present coin is the first Plus-graded near-Gem that we have handled in nearly a year. Previous appearances of such pieces over the past several years have realized prices that range from more than \$25,000 to upwards of \$34,000. This example is beautifully preserved for a sub-Gem '11-D, with glowing yellow-gold luster and razor-sharp design elements. A few tiny marks behind the eagle on the reverse appear to be all that prevent that ever-elusive Gem grade. PCGS lists 25 finer submissions (8/16). NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, MS65
Sought-After Series Key

3284 1911-D MS65 PCGS. Strong D. From a small mintage of 55,680 pieces, the 1911-D Indian quarter eagle is the acknowledged key to the series. Always in demand, the issue can be found in lower Mint State grades with little trouble, but the 1911-D is definitely elusive in MS65 condition, and finer coins are extremely rare. This delightful Gem exhibits sharp definition on all design elements, with the lines in the lower headdress feathers distinctly visible and no blending of the feathers on the eagle's shoulder. The all-important mintmark is quite bold. The well-preserved orange-gold surfaces radiate vibrant mint luster to complete the package. Population: 22 in 65 (1 in 65+), 3 finer (8/16). NGC ID# 7KR7, PCGS# 7943

1915 Quarter Eagle, MS66
Major Condition Rarity
Among the Finest Certified

PROOF INDIAN QUARTER EAGLE

1909 Quarter Eagle, PR63
The So-Called 'Bright' Finish

3285 1915 MS66 PCGS. The 1915 survives in great numbers through MS64, but like most other issues in Bela Lyon Pratt's Indian quarter eagle series, the population dwindles significantly in MS65. Premium Gems are major condition rarities. They are seldom offered and fetch considerable sums from competitive series specialists. This rich honey-gold representative shows wisps of eye-catching lavender color. Radiant luster glitters over impeccably preserved surfaces. The headdress elements and eagle's feathers are strongly rendered, cementing this piece among the finest survivors from a mintage of 606,000 coins. Population: 6 in 66, 0 finer (8/16). NGC ID# 7KRC, PCGS# 7948

3287 1909 PR63 PCGS. After the negative reception by collectors of the matte finish gold proofs in 1908, the Mint decided to strike non-sandblasted proofs in 1909 and 1910. The result was coins that were yellow-gold, and to many eyes indiscernible from a sharply struck business strike. In 1909 there were 139 proof quarter eagles struck with perhaps half that number extant today. The PR63 grade is explained by light hairlining on each side; however, the hairlining has not noticeably altered the color of the coin. It is still yellow-gold with just a tinge of reddish patina. Otherwise, there are no contact marks we can see on either side. Population: 24 in 63, 24 finer (8/16). NGC ID# 289H, PCGS# 7958

1926 Quarter Eagle, MS66
Frosty Top-Grade Type Coin

3286 1926 MS66 PCGS. The 1926 is among the plentiful late-series issues that are popular among type collectors, although even this date becomes conditionally rare in MS66. Finer pieces are unknown. The present coin displays boldly defined relief elements and exceptionally well-preserved fields — only a couple of light marks are seen on the reverse amid IN GOD WE TRUST. The frosty wheat-gold surfaces just glow beneath a light. Population: 44 in 66, 0 finer (8/16). NGC ID# 7KRE, PCGS# 7950

THREE DOLLAR GOLD PIECES

1855-S Three Dollar Gold, AU58
Tied for Finest at CAC
Few Examples Certified Finer

- 3288 1855-S AU58 PCGS. CAC. The 1855-S is a challenging issue in the three dollar gold series. From a mintage of 6,600 pieces, only a handful of coins survive in Mint State, and About Uncirculated examples are rare. This CAC-endorsed near-Mint representative is nearly Condition Census-quality, and it is tied with one other as the finest endorsed by CAC. The other CAC AU58 coin is certified by NGC and last appeared in our auctions in the November 2013 New York Signature sale, where it realized \$17,625. The present coin is at least as fine. The strike is razor-sharp, and the lightly abraded fields exhibit considerable reflectivity. Rich orange-gold coloration delivers excellent visual appeal. Population: 8 in 58, 2 finer. CAC: 2 in 58, 0 finer (8/16). NGC ID# 7K5D, PCGS# 7973

1857-S Three Dollar Gold, AU53
Elusive Branch Mint Issue

- 3289 1857-S AU53 NGC. A conditionally elusive San Francisco issue with a mintage of 14,000 pieces, most of which was released into circulation. This AU survivor displays pale yellow-gold surfaces with some luster in the protected regions of the fields. Scattered light marks are consistent with the grade. Census: 28 in 53, 42 finer (8/16). NGC ID# 7K5H, PCGS# 7977

1860 Three Dollar Gold Piece, MS63
Elusive, Lower-Mintage Issue

- 3290 1860 MS63 PCGS. As relations between the North and South began to break down, coinage of gold saw diminished production. Only 7,036 business strike threes were minted in 1860, and they are elusive in any grade. Especially rare are coins that grade MS63 or finer. This sensational example has rich orange-gold luster with reflective fields and bold design definition, save for the ribbon knot. Population: 20 in 63, 19 finer (8/16). Ex: Summer FUN Signature (Heritage, 7/2010), lot 4638. NGC ID# 25ME, PCGS# 7980

1863 Gold Three Dollar, AU55
Reflective Fields

- 3291 1863 AU55 PCGS. This sharp Choice AU 1863 gold three dollar displays bright yellow-gold surfaces with semireflective fields and minimal chatter. The dies are clashed, as usual for this low-mintage issue (5,000 pieces). This Civil War-era issue is scarce in AU condition and rare in Mint State, although it remains among the more collectible dates from the period. NGC ID# 7K5R, PCGS# 7984

1879 Three Dollar Gold, MS63
Start of the Low-Mintage Issues

- 3292 1879 MS63 PCGS. CAC.** Regardless of mintage or scarcity, this delightful Select Uncirculated three dollar gold would make an exceptional addition to any collection. The fact that it is a low-mintage, slightly better-date issue is icing on the cake. Variegated green and orange accents drift across partially prooflike surfaces for outstanding eye appeal. The strike is bold and marks are at a minimum, suggesting that the assigned grade may be a bit conservative. CAC endorsement adds to the resume. NGC ID# 25N2, PCGS# 8001

1889 Gold Three Dollar, MS64
Seldom Seen Finer

- 3293 1889 MS64 PCGS.** The 1889 three dollar gold piece, its attractively small mintage of 2,300 pieces, and its collector-friendly, substantial Mint State survival rate make it a favorite type-coin issue. Nonetheless, near-Gems are scarce, and finer pieces are borderline rare. This coin displays a sharp strike and satiny orange-gold luster without bothersome abrasions. NGC ID# 7KDU, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECES

1883 Gold Three Dollar, PR62 Cameo
Collectible Proof Coin

- 3294 1883 PR62 Cameo PCGS. CAC.** Proof three dollar gold pieces are rarely seen in a grade that budget-restricted collectors can access, particularly if a Cameo designation is desired. This CAC-endorsed lower-end 1883 proof displays a full strike and deeply mirrored fields with rich orange-gold coloration. Few Cameos in any grade have been certified by PCGS. Population: 2 in 62 Cameo, 5 finer. CAC: 2 in 62, 4 finer (8/16). NGC ID# 28AS, PCGS# 88047

1884 Three Dollar Gold, PR60
Important for Date Collectors

- 3295 1884 PR60 NGC.** With the rarity of 1884 business strikes, additional pressure from date collectors adds to the demand for proofs. This PR60 example displays sharp eye appeal for the grade, with glossy surfaces and only moderate contrast with the devices. Attractive orange-gold patina deepens at the borders. The proof mintage of 106 pieces shows a survival rate between 50 and 60 percent, enough to probably outnumber surviving business strikes for the date. Census: 2 in 60, 4 finer (8/16). NGC ID# 28AT, PCGS# 8048

PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, Judd-1635, PR50
Seldom-Seen Circulated Example

3296 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR50 PCGS. In March 1911, *The Numismatist* published an article by Edgar H. Adams on the stella coins of 1879 and 1880. It represented the first time images of all four stella variants were presented at once in that publication. The article is interesting to review 105 years later with a better understanding of the series, though some might say marginally so.

One of the first points Adams address is the production of a small quantity of “original” 1879 stellas, though he does not specifically refer to them as such: “In 1879 it is on record that 15 sets of the metric set, including the Barber stella, were struck.” We now suspect that 25 sets, rather than 15, were ordered thanks to letters written by Treasury Secretary John Sherman and recently published in the *Journal of Numismatic Research* by Roger Burdette.

Adams also presents the circumstances of the stella’s creation and production. He writes:

“The stella, or four dollar gold piece, was the work of Dr. W.W. Hubbell, the patentee of the goloid metal, and was originally intended to serve as an international coin, to be of approximate value to the Austrian eight florin piece. The latter coin had an approximate value of \$3.88. The stella was made at the solicitation of the United States Minister to Austria at that period.”

The assertion is mostly accurate. The stella was the work of Hubbell, intended to approximate the Austria eight florin coin and other European denominations. However, it is misleading to claim that the stella was made at the solicitation of Minister John A. Kasson. Kasson suggested a coin be struck of equal value to its European counterparts. A denomination of approximate value missed Kasson’s intention entirely — one of the many flaws that ultimately led to the stella’s downfall.

This example was carried for years as a pocket piece, as it is unlikely to have circulated because of the odd denomination and the general public’s unfamiliarity with these coins. Even wear is seen over the devices. The golden-rose color deepens significantly around the margins and there are numerous small contact marks seen in the fields on each side.

From The Walter Freeman Collection, Part I. NGC ID# 28AZ, PCGS# 8057

EARLY HALF EAGLES

1795 Half Eagle, AU50
Small Eagle, BD-4
Inaugural Issue

3297 1795 Small Eagle, BD-4, R.5, AU50 PCGS. Bass-Dannreuther Die State d/a. A crack travels from the edge through star 12 into the field. Star 1 points to and touches the lowest curl, star 11 overlaps with the Y and star 12, and the reverse has three berries on the wreath. This was the second obverse and third reverse die used to strike 1795 half eagles. Although the variety is rare in the absolute sense with 60 to 75 examples believed extant, BD-4 is one of the more often-seen die marriages for the date. The estimated mintage of BD-4 was 1,000 to 1,500 half eagles out of a total production of 8,707 to 12,106 coins, according to *Early U.S. Gold Coin Varieties* (2006).

This About Uncirculated early half eagle is strongly struck overall with minimal blending over the middle portion of the curls and the eagle's feathers. Light orange-gold surfaces retain a degree of luster. Wispy marks are scattered evenly over each side. A small planchet flake occurs in the field left of the wreath.

From The Walter Freeman Collection, Part I. NGC ID# 25ND, PCGS# 519853 Base PCGS# 8066

1800 BD-2 Half Eagle, AU53
Excellent Early Gold Type

3298 1800 BD-2, High R.3, AU53 PCGS. Bass-Dannreuther Die State c/d, with cracks between IB in LIBERTY and from the right wingtip to the rim. It is believed that BD-2 represented nearly half of the entire production of 1800 half eagles, according to John Dannreuther's *Early U.S. Gold Coin Varieties* (2006). Possibly 175 to 250 survivors are known, a relatively high number for an early five dollar gold variety. Bright gold surfaces exhibit adjustment marks over Liberty's cheek and scattered post-Mint blemishes in line with the lightly circulated grade. A strongly struck type coin with much to admire.

From The Walter Freeman Collection, Part I. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1807 Bust Right Five Dollar, MS64+
BD-1, Small Reverse Stars

- 3299** 1807 Bust Right, BD-1, High R.4, MS64+ PCGS. Bass-Dannreuther Die State b/b-c. An impressive peach-gold near-Gem. The strike is crisp, since definition is incomplete only on the upper left border of the shield. Marks are confined to trivial obverse field chatter and a small bright area above the arrowheads. The reverse is lightly clashed, and both sides exhibit several delicate die cracks. The obverse lacks the clashes associated with Die State c, and the reverse lacks any crack at the E in UNITED. However, the “rust lump on skin of bust,” as described by Bass for obverse Die State c, is present. PCGS has certified only a single 1807 Bust Right half eagle finer, another BD-1 example graded MS65+ (8/16). Indeed, even available die pairings from this early type are rare in high grade. NGC ID# CKLF, PCGS# 519898 Base PCGS# 8092

1807 Bust Left Half Eagle, BD-8, MS63
Superb Luster and Strike

- 3300** 1807 Bust Left, BD-8, R.2, MS63 PCGS. Bass-Dannreuther Die State d/b, clashed as usual. BD-8 features the second and final use of this obverse and the first of four die pairings for this reverse. The variety is plentiful in the context of early half eagles, suitable for type representation, but high-end Mint State coins are conditionally rare. This Select example displays original, frosty golden luster that shimmers when rotated beneath a light. The strike is sharp, even, and well-centered, showcasing the grandest achievement of the screw press used in the Mint during this period. There are a few faint surface grazes on each side, but none that distract. The visual appeal of this BD-8 half eagle is the epitome of ideal for a high-end type collection. Population: 42 in 63, 27 finer (8/16). *From The Walter Freeman Collection, Part I.* NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1809/8 Half Eagle, AU58
BD-1, Sole Die Pair for the Issue

- 3301** 1809/8 BD-1, High R.3, AU58 NGC. Bass-Dannreuther Die State b/b. The overdate (some say simple repunching) is only slightly visible beneath the 9 in the date. With an estimated mintage of 33,875 pieces, the 1809/8 is the scarcest issue (as a date) of the Draped Bust To Left design type. This near-Mint example displays delightful orange-gold patina with bright mint luster remaining throughout the protected areas. A small, kidney-shaped die flaw or dig near star 2 may be of Mint origin. The strike is sharp with little actual wear, and the eye appeal is substantial. Census: 33 in 58, 101 finer (8/16). NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1814/3 BD-1 Half Eagle, AU53
Popular Overdate, About 100 Survivors

- 3302** 1814/3 BD-1, High R.4, AU53 NGC. Bass-Dannreuther Die State c/d. Both sides are clashed (boldly near the ear), and a crack travels through 14 toward star 13. The remnants of a 3 appear at each side of the top of the 4. The *Guide Book* reports a mintage of 15,454 coins for this ever-popular overdate, and possibly fewer than 100 examples are extant. This still-lustrous, minimally circulated five dollar gold piece displays a good strike with merging over the devices. Myriad marks occur over each side. Yellow-gold color dominates, accompanied by accents of mint-green. Census: 3 in 53, 57 finer (8/16).
From The Walter Freeman Collection, Part I. PCGS# 519908 Base PCGS# 8117

CLASSIC HALF EAGLES

1834 Classic Head Five, MS62
McCloskey 1-A, Plain 4

- 3303** 1834 Plain 4 MS62 PCGS. First Head, Breen-6501, McCloskey 1-A, R.3. The radiant devices are surprisingly crisp, although a few of the stars possess soft centers. There are no marks of relevance, and luster brightens the motifs and legends. Unlike their Capped Head predecessors, the Classic types circulated extensively, and most survivors are in VF to AU grades.
Ex: Central States Signature (Heritage, 5/2007), lot 3591. NGC ID# 25RR, PCGS# 8171

1834 Five Dollar, Dazzling MS62
Plain 4, McCloskey 2-C Type Coin

- 3304** 1834 Plain 4 MS62 NGC. Second Head, Breen-6502, McCloskey 2-C, R.4. The type coin appeal of this Mint State Classic Head half eagle is magnificent. Unlike many other MS62-graded examples, this piece does not show any high-point friction or dulling of the luster. The fields and devices showcase full, frosty lemon-gold luminescence. There are no significant abrasions, although some faint lines in the open areas of the fields determine the grade. Trivial incompleteness on the highest hair curls around Liberty's face is little noticed. Visual appeal far surpasses expectations for the grade. This variety shows the 4 in the date triple punched, and the 5 in the denomination is recut on the flag.
From The Twelve Oaks Collection, Part II NGC ID# 25RR, PCGS# 8171

1838-D Half Eagle, AU Sharpness
McCloskey 1-A, One-Year Type

- 3305** 1838-D — Altered Surfaces — PCGS Genuine. AU Details. McCloskey 1-A, R.3. Some dark encrustation exists on the surfaces of this scarce Dahlonega half eagle, along with a peppering of many small marks and evidence of cleaning — all of which contribute to the PCGS decision not to grant a numeric grade. The surfaces are overly bright and abraded, yet enough definition remains for About Uncirculated sharpness. All early branch mint gold is in strong demand, and despite the impairments this coin will be a worthy addition to a collection needing this one-year Dahlonega Classic Head type.

1838-D Classic Head Five, AU58
McCloskey 1-A, Debut Dahlonega Type Coin

3306 1838-D AU58 PCGS. McCloskey 1-A, R.3. Although usually available (300 to 350 pieces are believed extant), the 1838-D half eagle is heavily sought-after due to its one-year Classic Head type-coin status. The typical example shows moderate wear from circulation, and high-end AU coins are rare. Mint State examples are exceedingly rare and far out of reach for the average Dahlonega gold enthusiast.

This nearly Uncirculated representative displays an impressively sharp strike, as is often a hallmark of this issue. Later-date D-mint fives are typically affected by strike weakness or planchet problems. This Classic Head coin exhibits bright yellow-gold coloration and has scattered abrasions, as is consistent the reputation of Dahlonega gold pieces. Population: 24 in 58 (1 in 58+), 10 finer (8/16). NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1839-D Five Dollar, Choice AU
First and Single-Year Type

3307 1839-D AU55 PCGS. Variety 2-A. The usual variety with the mintmark centered over the area between 39. A number of factors contribute to the perennial popularity of the 1839-D half eagle. It represents the first issue in the Liberty Head half eagle series, and is a distinct, single-year type within that set. The obverse mintmark placement adds a tremendous level of interest. All 1839-D half eagles are scarce. Winter (2013) estimates 200 to 225 pieces remain available from a mintage of 18,939 coins. Only 45 to 50 of those are in AU, and merely four to six examples are known in mint condition.

The obverse stars are nearly full, and strike softness is limited to the hair over Liberty's ear and the bun, both normal occurrences for the issue. The reverse is pinpoint-sharp, including the talons, fletchings, and olive leaves. Softly lustrous, medium yellow-gold surfaces exhibit minimal planchet roughness and few marks of note. A prize for the specialist. Population: 11 in 55, 12 finer (8/16).

From *The Walter Freeman Collection, Part 1*. NGC ID# 25S9, PCGS# 8193

1843-D Half Eagle, AU58
Medium D, Variety 10-G

- 3308** 1843-D Medium D AU58 PCGS. Variety 10-G. The usual variety of 1843-D half eagle, if either can be called that. PCGS and NGC have only grade 31 finer Mint State pieces, and that total includes an unknown but likely considerable number of resubmissions. This boldly defined green-gold example is a lovely near-Mint half eagle with reflective surfaces and outstanding eye appeal. Minimal surface marks on each side are consistent with the grade. Population: 7 in 58, 13 finer (8/16). NGC ID# 25T4, PCGS# 8215

1854-C Five Dollar, AU58
Low Survivorship C-Mint Five

- 3309** 1854-C AU58 NGC. Variety 1. The 1854-C is one of the scarcest C-mint fives. The mintage was substantial enough with 39,283 pieces struck; but only 140-170 pieces are believed to survive in all grades. This is among the finest and lies just outside the Condition Census. This bold mintmark 1854-C shows substantial semiprooflike luster outlining the design elements. An extended inspection beneath a glass fails to locate any consequential marks. The mintmark is sharp, unlike many 1854-C fives, although the strike is soft on the eagle's neck and lower body and on the curls near the forehead. NGC ID# 25UH, PCGS# 8257

1861-C Five Dollar, Unc Details
Final Charlotte Half Eagle

- 3310** 1861-C — Obverse Scratched — NGC Details. Unc Details. Variety 1. The 1861-C half eagle had a mintage of 6,879 pieces, of which some are thought to have been coined after the Charlotte Mint was seized by the Confederacy. Only 150 to 175 pieces are believed extant in all grades. This is one of the most important Charlotte issues in the series. The present coin shows a sharp strike and bright yellow-gold coloration. The fields exhibit scattered polishing lines. A heavy mark on Liberty's neck precludes a numeric grade from NGC.
From The Twelve Oaks Collection, Part II NGC ID# 25VL, PCGS# 8289

1862 Five Dollar, AU55
Elusive in All Grades

- 3311** 1862 AU55 NGC. Coming from a small mintage of 4,430 pieces, the 1862 half eagle is rare in all grades. Fewer than 100 pieces are believed known, mostly in the VF to lower AU grade range. This Choice AU example is on the top side of the population, and finer pieces are exceedingly scarce. Mint State coins are uncollectible for the majority of enthusiasts. This piece displays sharp design detail with remnants of orange-gold luster in the protected areas of the fields, mostly around the borders. Olive-gold coloration accompanies scattered abrasions, which are characteristic of the issue and grade. Visual appeal will satisfy collectors who appreciate that old-time look. Census: 10 in 55, 11 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25VP, PCGS# 8292

1862 Five Dollar, MS61
Only Five Mint State Pieces Certified

3312 1862 MS61 PCGS. With a mintage of 4,430 pieces, the 1862 Philadelphia half eagle is scarce in all grades with fewer than 100 pieces believed known. Since 2005, we have handled only a single Mint State example of this date, an MS60 PCGS coin that appeared in lot 4526 of our April 2013 Central States Signature sale, where it realized \$17,625. The certified population of Uncirculated coins consists of an MS60, two MS61, and an MS62 at PCGS with a single MS62 at NGC (8/16). This piece is sure to excite bidders. The strike is sharp, and each side displays original olive-gold coloration with luster in the protected regions of the fields. Scattered surface chatter determines the grade but there are no individually significant abrasions. Quite appealing for the issue. NGC ID# 25VP, PCGS# 8292

1874-CC Five Dollar, AU55
Smooth Surfaces, Rare This Fine

3313 1874-CC AU55 PCGS. Variety 1-C. This Carson City issue comes from a mintage of only 21,198 pieces. Surviving examples are scarce in all grades, mostly residing in XF and lower levels. This issue experienced heavy circulation in Western regions. About Uncirculated examples are rare, and only three Mint State pieces are certified, none finer than MS62. This Choice AU coin displays unusually smooth surfaces for the grade with moderate luster remaining in the protected regions. Slight strike softness is seen on the hair curls around Liberty's face and on the central shield, but the definition is otherwise pleasing. Honey-gold surfaces offer excellent visual appeal. Population: 17 in 55, 10 finer (8/16). NGC ID# 25WP, PCGS# 8334

1877-CC Five Dollar, AU55
Challenging in All Grades

3314 1877-CC AU55 NGC. Variety 1-B. Coming from a small mintage of 8,680 pieces, the 1877-CC half eagle is elusive in all grades and extremely rare in Mint State. This Choice Almost Uncirculated example displays semiprooflike reflectivity in the fields and hints of frosty luster in the recesses of the design. The devices are sharply detailed, and scattered abrasions are consistent with the grade. Census: 13 in 55, 4 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# BT9Z, PCGS# 8343

1906 Liberty Half Eagle, Sharp MS66+

- 3315 1906 MS66+ PCGS. CAC.** Even with a loupe, it is difficult to discern what separates this Plus-graded Premium Gem from most MS67 coins on the market, save for perhaps slightly more vibrant luster on the higher-grade pieces. Nonetheless, this CAC-endorsed 1906 half eagle displays booming eye appeal fueled by a sharp strike and unabraded, softly frosted luster. The yellow-gold fields shimmer when tilted beneath a light. Population: 38 in 66 (5 in 66+), 4 finer. CAC: 12 in 66, 4 finer (8/16). NGC ID# 2529, PCGS# 8413

PROOF LIBERTY HALF EAGLE

1905 Half Eagle, PR65 Ultra Cameo
Sole Ultra Cameo Certified
Outstanding Eye Appeal

- 3316 1905 PR65 Ultra Cameo NGC.** The 1905 might be viewed as one of the more plentiful proof Liberty half eagles and a suitable type candidate. For type purposes, there are few better options, but that does not mean the 1905 proof is common. Only 108 pieces were struck, and many have not survived. PCGS estimates 75 to 100 pieces are extant, but the combined NGC and PCGS population figures count only 82 coins, including likely resubmissions. Cameo examples are scarce regardless of grade. In Ultra/Deep Cameo, only a single coin is known: the present Gem (8/16).

This glimmering, starkly contrasted beauty showcases liquidlike mirroring in the fields and satiny yellow-gold design elements. There are surprisingly no obvious hairlines at first glance, and only when rotated beneath a light do a few faint vertical lines appear in the left obverse field — the only grade-limiting factor on this beautiful Gem proof. NGC ID# 28DB, PCGS# 98500

INDIAN HALF EAGLES

1909-O Five Dollar, AU Details
Key Issue to the Five Dollar Indian Series

- 3317 1909-O — Cleaning — PCGS Genuine. AU Details. Variety 1.** While not mentioned on the insert, this piece shows a readily discernible mintmark. Only 34,200 pieces were struck in this final year of the New Orleans mint and examples are scarce in all grades. This piece shows bright surfaces from cleaning and there are numerous small abrasions peppered over each side, especially in the fields. NGC ID# 25ZK, PCGS# 8515

1914-S Half Eagle, MS62+
Seldom Available Finer

- 3318 1914-S MS62+ PCGS. CAC.** The Mint State scarcity of the 1914-S half eagle seldom gets the attention it deserves. Heavily abraded coins are occasionally seen in Uncirculated condition, but pieces grading finer than MS62 are genuinely rare. This Plus-graded, CAC-endorsed MS62 coin will appeal to a plethora of series enthusiasts. The strike is sharp, and each side displays satiny olive-gold luster. Light, scattered abrasions define the grade, including a small mark between the eagle's wing and the G in GOD. NGC ID# 28DW, PCGS# 8529

1915-S Half Eagle, MS63
Series Key at This Grade

- 3319 1915-S MS63 PCGS. CAC.** More satiny than frosty, this Select Uncirculated 1915-S is strongly lustrous and imbued with pleasing orange-gold coloration. The issue is decidedly rare in high Uncirculated grades, both for the Indian Head series and among all 20th century gold. At the MS63 level it is very scarce (yet comparatively affordable) compared to the 1914-S and other key issues. The 164,000-piece mintage only partially explains how elusive the 1915-S is in Mint State.

The present coin exudes eye appeal as suggested by the CAC endorsement. Like other San Francisco issues, bagmarks are always a concern, yet this example shows relatively few marks throughout the fields. The incuse motifs are essentially mark-free. The strike weakens at the lower headdress, but the eagle's shoulder is boldly impressed. Population: 45 in 63, 11 finer. CAC: 8 in 63, 3 finer (8/16). NGC ID# 25ZR, PCGS# 8531

EARLY EAGLES

1795 BD-1 Eagle, Choice XF
Excellent Visual Appeal for the Grade

- 3320 1795 13 Leaves, BD-1, High R.3, XF45 NGC.** Bass-Dannreuther Die State b/a-b. The obverse crack is faintly visible from star 9 to 5, although the reverse is yet to fracture. Three head and three tail dies were used for 1795-dated eagle coinage, producing a total of five varieties. Of these, the most frequently seen is BD-1 (225 to 325 pieces believed known), which is distinguished in part by a minute extension at the top left serif of the Y in LIBERTY. The type coin appeal of this variety is significant. BD-1 is the only use of this obverse, although the reverse was later employed for BD-2.

This lightly circulated example is well-struck and displays rich orange-gold coloration. The only surface distractions are several randomly placed scratches in the center of the reverse. Hints of original luster remain in the very protected peripheral areas of the fields.

Ex: *Central States Signature* (Heritage, 4/2001), lot 7822.

From *The Walter Freeman Collection, Part I*. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

1797 BD-4 Ten Dollar, Heraldic Eagle
Rarely Offered MS62
Semiprooflike Reverse

3321 1797 Large Eagle, BD-4, High R.4, MS62 NGC. Bass-Dannreuther Die State d/a. The forked die crack through the second 7 in the date is a familiar feature on the 1797 eagle, as this head die was used for all three Heraldic Eagle die marriages, and the earliest, BD-1, is undocumented in a perfect die state. The present coin is in the earlier die state of the BD-4 marriage, as the reverse is yet uncracked at the R and C in AMERICA. This is the final use of the obverse and the only use of this reverse, although no terminal die state coin has been verified.

BD-4 is one of the two most frequently seen 1797 varieties, although it is still itself scarce with only 90 to 110 pieces extant. This is the variety most likely to be represented by a Mint State coin, although any 1797 eagle in Uncirculated condition is a rare and sought-after item, particularly among type collectors. Most such pieces reside in MS61 and MS62, although are weighted toward the lower grade. Finer coins are prohibitively rare, and the prices they realize at auction attest to this.

The present MS62 representative stands out among its peers with a sharp, even strike that produces bold central and peripheral detail. The bright yellow-gold surfaces have light chatter in the fields that limits the grade but are without singular abrasions. The reverse exhibits an appealing semiprooflike reflection in the fields.

The last Mint State BD-4 example we offered was in lot 4415 of our August 2015 ANA Signature sale, where an MS61 NGC coin realized \$44,650. The present piece surpasses that coin in terms of quality and eye appeal. This is the sort of high-end early gold type that often highlights a major numismatic auction, as it does in this sale. Census (all Large Eagle varieties included): 12 in 62, 4 finer (8/16).

From The Walter Freeman Collection, Part I. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

LIBERTY EAGLES

1838 Eagle, Choice XF, First Liberty Head Issue

- 3322 1838XF45 PCGS.** The 1838 represents the first Liberty Head issue across all denominations and the first production of ten dollar gold coins dating back to 1804. A delivery of 6,700 coins was recorded on December 26, 1838, followed by 500 more pieces five days later. Few examples were saved for numismatic purposes, and probably 80 to 100 coins survive in all. The hair strands are almost completely delineated despite light friction, and the eagle is well-defined throughout. Olive and rose-gold hues color the obverse, while the reverse is a shade lighter with added luster in the recesses. The only singular mark occurs behind Liberty's neck. Population: 20 in 45, 27 finer (8/16).

From The Walter Freeman Collection, Part I. NGC ID# 262D, PCGS# 8575

1851-O Liberty Eagle, MS62
Important Condition Rarity1860-O Ten Dollar, AU55
Scarcer No Motto Issue

- 3324 1860-O AU55 PCGS. Variety 2.** The 1860-O is a scarcer issue among O-mint tens. Only 11,100 pieces were produced with a mere 115-135 coins believed extant. This is a bright yellow-gold representative that shows a couple of abrasions on the face of Liberty, but lacks the numerous small clusters of marks usually found. Strike details are sharp throughout and the fields are vaguely prooflike with faint traces of luster surrounding the devices. NGC ID# 2645, PCGS# 98631

- 3323 1851-O MS62 PCGS Secure. CAC.** Ex: Simpson-Hall. Despite a mintage of 263,000 examples, the 1851-O Liberty eagle is an important condition rarity in Mint State grades. This impressive piece is certain in the Condition Census, with just three finer examples certified at both PCGS and NGC. In fact, those two grading services have only examined 34 Mint State representatives of this issue, and 27 of those grade just MS60 or MS61. Both sides exhibit a bold strike and brilliant lemon-yellow surfaces with traces of field reflectivity. Trivial hairlines are the only detriment to an otherwise sumptuous example. Population: 1 in 62, 2 finer. CAC: 2 in 62, 1 finer (8/16). NGC ID# 557V, PCGS# 8607

1865-S Ten Dollar, AU58
Inverted Date, None Finer at NGC

3325 1865-S 865 Over Inverted 186 AU58 NGC. Fewer than 100 1865-S eagles are known in all grades, with slightly more than half being of the 865 Over Inverted 186 variety. Examples are almost unknown in Mint State, making this nearly Uncirculated coin rare and highly sought-after. This is tied for the finest Inverted Date representative seen at NGC, although the overall rarity of the issue in this grade is equally impressive. The only coin at PCGS above AU55 is the remarkable MS64 finest-known. Some luster appears in the peripheral portions of the fields, leaving the interiors with deep olive-gold patina. The eagle's neck feathers are slightly soft, but Liberty's portrait is bold. Wear is light. Census: 4 in 58, 0 finer (8/16). NGC ID# 28ED, PCGS# 8643

1890 Ten Dollar, MS63+
Prohibitively Rare Any Finer

3326 1890 MS63+ PCGS. Most Uncirculated 1890 eagles reside in the MS60 to MS62 range. This high-end Select example is rare, and finer coins are almost unobtainable. Liberty's portrait, the stars, and the eagle are sharply brought up, and the frosty surfaces yield delicate wheat- and rose-gold hues. A few light marks are consistent with the grade. Population: 31 in 63 (6 in 63+), 2 finer (8/16). NGC ID# 266R, PCGS# 8717

1905 Ten Dollar, MS66
Vibrantly Lustrous Condition Rarity

3327 1905 MS66 PCGS. Although considered a common date in lower grades, the 1905 Liberty eagle becomes conditionally rare in MS65 and is exceedingly so any finer. This Premium Gem yields a degree of eye appeal that is arguably unsurpassed by other examples in this grade. It is the first MS66 coin we have handled since 2009, and only the second PCGS-graded piece. The other PCGS Premium Gem we offered was in lot 2413 of the November 2006 Dallas Signature sale and realized \$12,650. The finest pieces in the Smithsonian Institution grade only MS63, per Garrett and Guth.

The present example showcases a razor-sharp strike and vibrant, frosty cartwheel luster. A small alloy discoloration between the leaves and the U in UNITED is barely mentionable. The preservation is superb. Population: 7 in 66, 4 finer (8/16). NGC ID# 7LD3, PCGS# 8757

1907-S Ten Dollar, MS63
Rarely Encountered This Fine

3328 1907-S MS63 PCGS. Uncirculated 1907-S Liberty eagles are scarce across the board. Most reside in MS62 and lower grades, making the present Select example conditionally rare. Finer pieces are far out of reach for most collectors. This coin displays sharp devices and vibrant orange-gold luster. Scattered abrasions are consistent with the grade. Population: 19 in 63, 11 finer (8/16). NGC ID# 38EP, PCGS# 8765

PROOF LIBERTY EAGLES

1901 Ten Dollar, PR65+ Cameo
Rarely Offered in Any Grade

- 3329 1901 PR65+ Cameo NGC.** The type-coin appeal of this 20th century proof ten is obvious, although acquiring an example will prove challenging. The 1901 proof Liberty eagle had a small mintage of 85 pieces, of which 50 to 65 examples are believed to survive, including two in the Smithsonian Institution. The certified population is highly inflated, as NGC and PCGS combined list 88 coins — more than were reportedly struck. Our Permanent Auction Archives show mainly multiple appearances of a few impaired examples, with high-grade pieces being scarce. The last Gem Cameo we offered was an NGC coin in lot 5062 of our October 2011 Pittsburgh Signature sale, which realized nearly \$36,000. The present Plus-graded example is superior in quality and eye appeal, show a depth of mirroring and contrast that borders an Ultra Cameo grade. The strike is full, and the fields are delightfully free of bothersome hairlines. Census: 3 in 65 Cameo, 6 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 28G8, PCGS# 88841

1901 Ten Dollar, PR64 Deep Cameo
Only 85 Proofs Struck

- 3330 1901 PR64 Deep Cameo PCGS. CAC.** Although the 1901 is common in business strike format, proofs are rare. Only 85 pieces were struck, some of which may have been spent by heirs, or even by turn-of-the-century dealers, since proof gold type coins commanded little premium over face until after 1933. This is a fully struck lemon-gold near-Gem that has a hint of repunching on the bases of the 19 in the date. A small planchet flake on the field above the eagle's neck serves as an identifier. The radiant devices provide noticeable contrast with the glass-like fields. Population: 3 in 64 (1 in 64+) Deep Cameo, 3 finer. CAC: 1 in 64, 1 finer (8/16).
Ex: West Palm Beach Signature (Heritage, 6/2008), lot 2197. NGC ID# 28G8, PCGS# 98841

INDIAN EAGLES

1907 No Periods Indian Ten, MS65
Abundant Eye Appeal

- 3331 1907 No Motto MS65 PCGS.** The 1907 No Periods Indian eagle is the go-to No Motto type-coin issue for many collectors. The present example is a luminous Gem with satiny luster and a vibrant cartwheel effect. Hints of pale rose toning appear on the central obverse, while the remainder of each side has bright yellow-gold color. A few light grazes do not reduce the grade. NGC ID# 28GE, PCGS# 8852

1910-S Indian Eagle, MS64
Very Rare Any Finer

- 3332 1910-S MS64 PCGS.** Despite the ample mintage of 811,000 pieces, the 1910-S Indian eagle is a rare issue in MS64 condition, and finer coins are very rare. This attractive Choice specimen is sharply detailed and well-preserved, with especially vibrant mint luster and terrific eye appeal. Population: 35 in 64 (2 in 64+), 4 finer (8/16). NGC ID# 268D, PCGS# 8867

1913 Ten Dollar, MS65
Lustrous, Few Seen Finer

- 3333 1913 MS65 NGC.** The 1913 Indian eagle is elusive in Gem condition and rare any finer. This MS65 coin represents the finest that most collectors will be able to acquire the issue. The strike sharply defines the motifs, and the fields are vibrantly lustrous with rich yellow-gold hues. A few tiny ticks on Liberty's jaw appear to be all that limit the grade. Census: 89 in 65 (3 in 65+, 1 in 65 ★), 16 finer (8/16). NGC ID# 28GY, PCGS# 8873

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU58
Razor-Sharp and Semiprooflike

- 3334 1850 AU58 NGC.** The creation of the double eagle in 1850 allowed for more California gold to be converted into coins in less time. The first year of issue saw the production of 1.1 million twenty dollar gold pieces at the Philadelphia Mint. Examples are among the most sought-after dates in the series, yet they are very scarce at this grade level. Yellow-gold surfaces show semiprooflike fields and razor-sharp definition that evades most Type One twenties. Imperceptible friction and scattered marks limit the assessment but not the appeal.

From The Walter Freeman Collection, Part I. NGC ID# 268F, PCGS# 8902

1850-O Variety 3 Double Eagle, XF45
High Mintmark Position

- 3335 1850-O XF45 PCGS. Variety 3.** Ex: The Blue Hill Collection. The mintmark is joined to the eagle's tail feathers on the reverse of this variety, and that position is diagnostic. Both sides have trivial circulation marks that are consistent with the grade, but none of those marks stand out among the others. Faint greenish color appears on the brilliant yellow surfaces with a hint of luster in the protected areas. NGC ID# 268G, PCGS# 8903

1850-O Twenty Dollar, AU53
Introductory Issue

3336 1850-O AU53 PCGS. Variety 3. The mintmark touches the tailfeathers. In June 1850, the *New Orleans Bulletin* published a small commentary on the recently inaugurated double eagle:

"The Mint in this city is now in full operation, turning out double eagles with such rapidity that they will soon work up the immense heap of 'the root of all evil,' which was so long locked up in its vaults, to the great inconvenience of many parties. ... [T]he plan adopted by the Mint is judicious, of applying their force to the double eagle, as it will enable them to work up the accumulated stock of gold in a very short period."

By year's end, the Louisiana branch mint had struck 141,000 of the new twenty dollar gold pieces. Production would fall dramatically after 1853, making the 1850-O one of the only collectible New Orleans twenties. Its first-year status adds a high level of interest. This AU53 representative has minimally abraded yellow-gold and lavender surfaces with blushes of orange color over the obverse. The strike is exceptionally bold for both a Type One double eagle and a New Orleans gold coin. Population: 27 in 53, 18 finer (8/16).

From *The Walter Freeman Collection, Part I*. NGC ID# 268G, PCGS# 8903

1852-O Twenty Dollar, AU50
Attractive, O-Mint Type

3337 1852-O AU50 PCGS. Variety 1. Although no New Orleans double eagle from the 1850s is common in an absolute sense, the first three years of the series (1850 through 1852) are the most available dates for O-Mint collectors. This reflective, lightly circulated example is a rich-gold color with only a few light abrasions. The devices remain bold. An attractive, early New Orleans issue, desirable for type. NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, MS60
Among the Finest Known

3338 1852-O MS60 PCGS. In the Type One series of twenties, the 1852-O is the second most available O-mint. It is occasionally available in Choice AU, but is rarely seen finer. One of the problems in locating an 1852-O is finding a piece that lacks the heavily abraded surfaces seen on most survivors. This coin certainly qualifies in that regard. The strike details on this piece are surprising strong also; the only area of weakness is the usual one at the top of Liberty's head. The surfaces are remarkably clean and there is still a glimmer of semiprooflikeness surrounding the devices on each side. Of the 1000-1250 pieces estimated known in all grades, only 15-20 Uncirculated coins are estimated extant. Population: 5 in 60, 12 finer (8/16). NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, AU53
Luster Remains in the Fields

- 3339 1853/'2' FS-301 AU53 PCGS.** As indicated in the 2017 *Guide Book*, FS-301 is no longer considered a true overdate, although it remains a popular and sought-after variety. This AU example displays a sharp strike and original orange-gold coloration with flashes of luster in the protected regions of the fields. An old reed mark above the eagle's head is among the scattered light abrasions that accompany the grade. Population: 15 in 53, 49 finer (8/16). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1854 Small Date Twenty, AU58
Smooth and Lustrous

- 3340 1854 Small Date AU58 NGC.** While the Small Date 1854 double eagle is more available than its Large Date counterpart, it is scarce in Choice About Uncirculated grades or finer. This near-Mint example is close to full Mint State, with only a trace of wear on the highest points of Liberty's hair and on the eagle's neck feathering. A few light abrasions are scattered about the fields and devices, yet fewer than on many Uncirculated coins. Generous amounts of mint luster remain across the smooth, attractive surfaces. NGC reports just 34 numerically finer examples (8/16). NGC ID# 268R, PCGS# 8911

1855-S Double Eagle, AU58
Challenging Any Finer

- 3341 1855-S AU58 PCGS.** The 1855-S twenty dollar is mostly seen in Very Fine and Extremely Fine condition. AU pieces can also be located without too much difficulty, but Mint State coins require more patience and searching. The bright yellow-gold surfaces of this near-Mint example retain considerable luster and are well-struck. Light marks are scattered about, as expected. NGC ID# 268X, PCGS# 8916

1862 Twenty Dollar, AU55
Scarce in All Grades

- 3342 1862 AU55 NGC.** With its moderately low mintage of 92,133 pieces, the 1862 double eagle is a scarce issue. Fewer than 200 pieces are reported by NGC and PCGS combined in all grades, including possible resubmissions. About Uncirculated and XF representatives are the usually seen grades — lower-end pieces are rare due to limited circulation of the issue during the Civil War, and the rarity of Mint State examples reflects the low mintage of the issue and virtually no immediate numismatic interest.

The present coin is a well-detailed Choice AU representative with lightly abraded orange-gold surfaces that retain hints of luster in the protected regions of the fields. A faint rim bump above the M in AMERICA is almost unnoticed. Census: 13 in 55 (1 in 55 ★), 28 finer (8/16). NGC ID# 269M, PCGS# 8937

1862-S Twenty Dollar, Lustrous AU58
Ex: Brother Jonathan

- 3343 1862-S AU58 NGC. CAC. Ex: Brother Jonathan.** The frosty luster and rich orange-gold coloration of this near-Mint 1862-S double eagle showcase the eye appeal that shipwreck salvage coins can offer. This piece is sharp with only light, scattered marks. The '62-S is a challenging issue in the upper AU grades, and Mint State pieces are rare. NGC has seen only 34 finer submissions (8/16). NGC ID# 269N, PCGS# 8938

1863 Twenty Dollar, AU55
Scarce, Low-Mintage Wartime Issue

- 3344 1863 AU55 NGC.** All gold denominations were produced in small numbers by the Philadelphia Mint in 1863, to the extent that no quarter eagles at all were minted. Just 142,790 double eagles were produced. Collectors put aside few circulation strikes during the war years, and hardly any shipwreck coins of the issue are known — just 35 examples were recovered from the *S.S. Republic*, and none were found on the *Brother Jonathan*. This Choice About Uncirculated coin shows light wear and minimal abrasions for the assigned grade. Considerable mint luster glows beneath the attractive, light-gold patina. NGC ID# 269P, PCGS# 8939

1863-S Liberty Twenty, AU58
Lustrous and Smooth

- 3345 1863-S AU58 PCGS.** This is an outstanding coin for the grade, showing luminous orange-gold luster in the frosty fields and just a brush of friction over the high points of the design elements. The surfaces are free of the scattered heavy abrasions that typically affect coins in this grade. Finer 1863-S double eagles are seldom available. This near-Mint coin surpasses many lower-end Mint State pieces in terms of eye appeal. NGC ID# 269R, PCGS# 8940

1863-S Double Eagle, AU58
Lustrous Fields, Elusive Any Finer

- 3346 1863-S AU58 NGC.** The 1863-S is another Type One San Francisco issue that is moderately obtainable in AU levels but becomes scarce or rare in Mint State. This accessible near-Mint coin retains moderate luster in the fields, while the well-struck design elements have light high-point friction. Surface chatter on each side is not unusual for the grade. NGC ID# 269R, PCGS# 8940

1864-S Double Eagle, Pleasing AU58
Ex: *S.S. Republic*

- 3347 1864-S AU58 NGC. Ex: *S.S. Republic*.** An extremely rare San Francisco issue before the shipwreck recoveries, the 1864-S is still scarce in high circulated grades and rare in Mint State. More than 250 coins were brought up from the *S.S. Brother Jonathan* and *S.S. Republic*. Today, virtually all of the highly graded coins at the services are from seawater salvage. This near-Mint example displays finely granular surfaces with light, yellow-gold coloration. Luster remains at the margins on the obverse and flows more generously across the reverse. NGC ID# 269T, PCGS# 8942

1865-S Double Eagle, AU58
Good Remaining Mint Luster

- 3348 1865-S AU58 PCGS.** Medium S, a mintmark size unlisted in Breen (1988). This green-gold representative is minimally abraded given its size, alloy, and brief stint in Old West commerce. A few of the obverse stars are incompletely brought up but the motifs are well impressed. The treasure ships *S.S. Brother Jonathan* and *S.S. Republic* both sank in 1865, and their recoveries in recent decades have made the 1865-S comparatively available.
 Ex: *Houston Signature (Heritage, 11-12/2012), lot 5158.* NGC ID# 269V, PCGS# 8944

1867-S Twenty Dollar, AU58
Lustrous Fields, Few Coins Finer

- 3349 1867-S AU58 PCGS.** Moderately lustrous fields add warmth and eye appeal to this near-Mint 1867-S double eagle, complementing the pleasant orange-gold coloration. The devices are well-defined, and abrasions are at a minimum. The 1867-S is occasionally seen in this grade, but Uncirculated coins are rare. This piece offers a balance of eye appeal and affordability. Population: 74 in 58 (1 in 58+), 21 finer (8/16). NGC ID# 26A2, PCGS# 8952

1867-S Double Eagle, AU58
Seldom Seen in Higher Grades

- 3350 1867-S AU58 NGC.** Despite a mintage that approached a million pieces, the 1867-S Type Two Liberty double eagle is a rare issue in any Mint State grade. Nearly all the coins circulated heavily at the time of issue, or were melted at a later date. This well-detailed near-Mint specimen offers lustrous yellow-gold surfaces that show only minor signs of contact.
Ex: ANA Signature (Heritage, 10/2012), lot 6202. NGC ID# 26A2, PCGS# 8952

1868 Double Eagle, MS61
Rarely Offered in Mint State

- 3351 1868 MS61 PCGS.** A moderately low mintage of 98,575 pieces ensures the scarcity of the 1868 double eagle in comparison to other dates from this period, although its true hallmark is the great rarity of Mint State examples. PCGS and NGC combined report only 22 submissions in Uncirculated condition, almost all of which grade MS60 or MS61. Heavy abrasions are the rule of the day on high-end representatives. The present coin is only the sixth problem-free Mint State coin that we have handled, and it is the first such offering since 2010. The surfaces display frosty yellow-gold luster cast in a blanket of light chatter on the obverse that determines the grade. The strike is sharp, and the coloration is original. A finer 1868 double eagle is nearly out of the question when even a comparable example may take years to surface at auction. Population: 7 in 61, 3 finer (8/16). NGC ID# 26A3, PCGS# 8953

1869 Liberty Double Eagle, AU58

- 3352 1869 AU58 NGC.** With speculators trying to corner the gold market and the financial district in turmoil, apparently few Mint State double eagles were set aside in 1869. This lustrous, near-Mint example is a good alternative to a Mint State coin and much more affordable. A modest assortment of abrasions are seen (as expected), as are a couple of minor rim nicks. The color and luster, however, are outstanding. Bright yellow-gold enhances a strong strike amid minimal wear. Census: 81 in 58, 12 finer (8/16). NGC ID# 26A5, PCGS# 8955

1870-S Double Eagle, Reflective MS63
Among the Three Finest Certified

- 3353 1870-S MS63 NGC.** Small Squat S. Writing in 2002, Doug Winter reported that the 1870-S is an underrated rarity in Mint State with perhaps just 25 to 35 coins extant at that level. Even the vaunted Dallas Bank and Bass collections were missing Uncirculated representatives of this date. Intensely colored, both sides are awash in peach and rose-gold shades. Decidedly reflective fields glimmer under the patina. The strike is typical for a Type Two twenty with isolated areas of softness. Wispy bagmarks are largely confined to the obverse and do not distract in the slightest. For pedigree purposes, a single contact mark is noted on Liberty's cheek near the hair curl over the ear. This is an important bidding opportunity for the advanced double eagle collector to obtain one of the top three examples of this elusive condition rarity. NGC has seen two examples in MS63, while PCGS has seen one other in the same grade. None are reported finer (8/16). NGC ID# 26A9, PCGS# 8959

1871-CC Double Eagle, AU55
Carson City Key Date
Rarely Seen So Fine

- 3354 1871-CC AU55 NGC. Variety 2-A.** The first 1 in the date is positioned directly over a dentil. If one considers the 1870-CC to be out of reach, as it is for even the most well-resourced specialists, then the 1871-CC is the first obtainable Carson City double eagle and highly collectible as such. It is also the second-rarest issue from that facility with a small mintage of 17,387 coins and a survivorship of perhaps 200 to 250 examples. That population falls rapidly in AU condition, where Doug Winter estimates 45 to 55 pieces are extant. Only two or three 1871-CC twenties are known in Mint State. There were no collectors interested in branch mint products at the time these coins were made, and Uncirculated survivors are merely the benefactors of happenstance.

A hint of reflectivity occurs in the fields on each side of this lovely Choice AU key date. Rose accents complement light yellow-gold color. The strike is characteristically bold for the issue with full star radials and strong curl and feather detail for a Type Two double eagle. Abrasions are expected and pose little distraction, if any. Census: 27 in 55, 24 finer (8/16).

From The Walter Freeman Collection, Part I. NGC ID# 26AB, PCGS# 8961

1872-CC Twenty Dollar, AU55
Challenging Early CC-Mint Date

- 3355** 1872-CC AU55 NGC. *Variety 2-A*, as usual. Pre-1874 Carson City double eagles are scarce to rare in all grades. The 1872-CC stands among the semikeys in the CC-mint short set in high grade, with only the famous 1870-CC and the also scarce 1871-CC rarer in Mint State. This Choice AU 1872-CC representative, itself conditionally scarce, is a more affordable and accessible option than the handful of heavily abraded Uncirculated pieces known. Well-detailed design elements complement moderate field luster, while each side displays original olive-gold coloration. The surfaces are unusually smooth for the grade, showing only light chatter and friction on the high points. A mint-made grease streak is seen below the N in UNITED on the reverse. NGC ID# 26AE, PCGS# 8964

1873 Open 3 Double Eagle, MS63
In an Old Green Label Holder

- 3356** 1873 Open 3 MS63 PCGS. A thoroughly frosted, glowing Open 3 example with minimal abrasions and sharp devices. Only a couple of marks on Liberty's cheek prevent an even finer grade. The Open 3 1873 double eagle is challenging to acquire in this grade, and finer coins are decidedly rare. Housed in an old green label holder. PCGS reports only 11 numerically finer submissions (8/16). NGC ID# 26AL, PCGS# 8967

1873-CC Twenty Dollar, XF45
Partly Lustrous, Eye-Appealing

- 3357** 1873-CC XF45 PCGS. *Variety 2-A*. Ex: Rainy Day Collection. There is a misplaced date digit in the denticles below the 3, and the first C in the mintmark is centered over the N. With a mintage of 22,410 coins, the 1873-CC is definitely one of the more elusive Carson City double eagles, comparable to the 1872-CC. Eye-appealing surfaces display a layer of rich orange-gold color and remarkably vibrant luster within the recessed areas. Stars 5 through 13 shows full centers, and the feathers are strongly rendered. *From The Walter Freeman Collection, Part I*. NGC ID# 26AJ, PCGS# 8968

1878-CC Twenty Dollar, XF45
Partially Lustrous and Reflective Fields

- 3358** 1878-CC XF45 PCGS. *Variety 3-A*. A few lilac overtones add eye appeal to the already attractive orange-gold coloration of this Choice XF example. The fields are partially reflective with a surprising amount of mint luster remaining for the grade. Just 13,180 pieces were struck — a rare double eagle from day one in terms of mintage. An important opportunity for anyone assembling a high-end circulated set, since this minimally marked example is unlikely to be upstaged by any other representative of the grade. Population: 80 in 45 (1 in 45+), 98 finer (8/16). *From The Walter Freeman Collection, Part I*. NGC ID# 26B4, PCGS# 8986

1879-CC Twenty Dollar, XF45
Pleasing for the Grade

- 3359 1879-CC XF45 PCGS. CAC. Variety 1-A.** Ex: Rainy Day Collection. The mintage of 10,708 pieces is the fourth lowest among all CC twenties. Yet, it is more available than the low mintage suggests with an estimated 300-350 pieces believed known. This Choice XF retains considerable mint luster around the devices and each side displays even reddish-golden patina. According to Doug Winter the usually seen 1879-CC "is plagued by excessively abraded surfaces." But that is not the case here. This is a refreshingly unabraded example that shows only slight, widely scattered marks. NGC ID# 338L, PCGS# 8989

1882-CC Double Eagle, Radiant AU58
High-End for the Grade

- 3360 1882-CC AU58 NGC. Variety 1-B.** The mintmark position and die crack through TWENTY DOLLARS are diagnostic. Without question, this 1882-CC double eagle has the look of a higher-grade coin. The design elements are fully brought-up, and light cabinet friction is exceedingly difficult to discern even under high-powered magnification. Uninhibited mint luster rolls over rose and green-gold surfaces. Eye appeal is terrific. NGC reports 59 finer submissions (8/16).
From The Walter Freeman Collection, Part I. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU58
Refreshingly Unabraded

- 3361 1883-CC AU58 NGC. Variety 2-A.** A better grade Carson City type coin. Marks are uncommonly inconsequential for a double eagle that witnessed Western commerce, and the cartwheel luster is dominant on the reverse and partial on the obverse. The butter-gold surfaces display excellent eye appeal. Finer 1883-CC double eagles are elusive.
Ex: ANA Signature (Heritage, 10/2012), lot 6254. NGC ID# 26BH, PCGS# 8999

1883-S Liberty Head Twenty, MS63
Few Known Finer

- 3362 1883-S MS63 NGC.** Frosty cartwheel luster and a sharp strike give this Select 1883-S double eagle pleasing eye appeal. Rose-gold interiors cede to lighter yellow-gold around the margins, and grade-limiting abrasions are minimal. The 1883-S twenty is occasionally seen in this grade but rarely finer. Census: 88 in 63 (2 in 63+), 6 finer (8/16). NGC ID# 26BJ, PCGS# 9000

1885-CC Liberty Head Twenty, XF40
Scarce Nevada Mint Offering

- 3363 1885-CC XF40 NGC. Variety 1-A.** A single variety is known for this Nevada issue, struck to the extent of 9,450 coins. The 1885-CC is highly prized among branch mint gold specialists, but its scarcity in finer condition makes better-graded pieces prohibitive for most collectors. This is an accessible representative with medium orange-gold color. The hair curls and feathers are boldly struck but show light rubbing over the highest points. Abrasions are fewer in number than one might expect.
From The Walter Freeman Collection, Part I. NGC ID# 26BN, PCGS# 9004

1890-CC Twenty Dollar, Strong AU58

- 3364 1890-CC AU58 NGC. Variety 1-A.** The mintmark is centered over the space between Y and D. Careful inspection reveals the faintest possible trace of friction on the cheek, preventing a full Uncirculated assessment. No matter, for this bold, late-date Carson City twenty maintains the appearance of a Mint State coin with swirling mint frost over radiant, minimally marked, rose-gold surfaces. A great example for the budget-conscious collector.
From The Walter Freeman Collection, Part I. NGC ID# 26BY, PCGS# 9014

1891-CC Twenty Dollar, AU55
Only 5,000 Coins Struck

- 3365 1891-CC AU55 PCGS. Variety 1-A.** The rarity of Carson City double eagles cannot be determined by how early or late a particular issue was made. Many of the early-to-middle CC dates are far more available than the 1891-CC, which claims a low mintage of 5,000 coins and is the third-rarest issue in the series. The estimated number of coins extant ranges from 150 (Winter) to 300 (PCGS) coins, though the combined populations at PCGS and NGC suggest it might be closer to 400 pieces. The 1891-CC is very scarce in Choice AU condition and very rare in Mint State. Frosty luster and crisp definition characterize the issue in general and this piece in particular. Coloration ranges from medium orange-gold to pale lilac. A hint of softness occurs over the lower part of the obverse, but the corresponding area on the reverse is bold. Two pedigree marks occur within the rays, while unobtrusive abrasions are peppered elsewhere. Population: 28 in 55, 41 finer (8/16).
From The Walter Freeman Collection, Part I. NGC ID# 26C3, PCGS# 9017

1892-CC Twenty Dollar, AU55
Radiant Mint Luster

- 3366 1892-CC AU55 PCGS. Variety 1-A. Ex: Rainy Day Collection.** The 1892-CC was well-made and can be found with minimal searching in AU grades, creating the perfect conditions for type representation. Frosty luster swirls radiantly over this rich yellow-gold double eagle. Minimal friction occurs over uniformly strong relief elements. Imperfections are minor for the grade.
From The Walter Freeman Collection, Part I. NGC ID# 26C6, PCGS# 9020

1893-CC Twenty, AU58
Bright, Semiprooflike Fields

- 3367 1893-CC AU58 PCGS. CAC. Variety 1-A.** An earlier die state lacking the usually seen die crack to the left of the date and through the A in STATES. In spite of the low mintage of only 18,402 pieces, quite a few were shipped to Europe and later repatriated. Today numerous examples are available of this final-year issue with several hundred AU coins known. This is a bright, semiprooflike example with only slight evidence of handling. Few abrasions are evident also, none of which are large or deserving individual mention. Often found with alloy spots, the only ones on this piece are slight and located on the upper reverse. NGC ID# 26C9, PCGS# 9023

1906 Liberty Double Eagle, MS63
Low-Mintage, Late Series Issue

- 3368 1906 MS63 PCGS.** The 1906 Liberty double eagle claims a small mintage of 69,500 pieces. This sharply detailed Select specimen offers lightly marked orange-gold surfaces with vibrant mint luster and outstanding eye appeal. Housed in a new 30th Anniversary green label holder. PCGS has graded 32 numerically finer examples (8/16). NGC ID# 26D4, PCGS# 9049

HIGH RELIEF DOUBLE EAGLES

1907 High Relief, AU Details
Wire Rim

- 3369 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. AU Details.** The surfaces are brighter-than-usual on this cleaned High Relief, but the effect is still visually arresting of this magnificent design struck in high relief. Close examination shows small abrasions peppered across each side, none of which are individually significant. The strike details are strong throughout and there is just the slightest trace of high-point friction. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty Dollar, AU55
Much Satiny Luster Remains

- 3370 1907 High Relief, Wire Rim AU55 PCGS. CAC.** "The Most Beautiful Coin Ever Made" compels many collectors to seek out a High Relief twenty. This particular example retains significant portions of satiny mint luster with occasional breaks in the fields and over the highest portions of the design. The overall appearance is of a coin that is much finer in technical grade. This upper-end appearance is confirmed by the CAC endorsement. The strike is strong throughout and there is just a bit of loss of detail over the highest points of the high-relief design. An exceptional High Relief and one that will be of great pride to its new owner. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Twenty, MS62
Satin Surfaces, Wire Rim Variant**

- 3371 1907 High Relief, Wire Rim MS62 PCGS.** The December 1907 issue of *The Numismatist* addressed protests in the newspapers concerning the removal of “In God We Trust” from the new High Relief twenty dollar gold pieces designed by Augustus Saint-Gaudens. The author disagreed with the protests, arguing that the motto was introduced at a time of great national crisis and was inappropriate during peacetime:

“Forty odd years of peace, growth, and corporation building puts a different aspect on the case, and places us indifferent of celestial influences. Take out the twenty centuries old eagle of Egypt and ‘E Pluribus Unum’ from the reverse of the new coin and in their places put a modern first class battle ship and the legend ‘In Our Navy We Trust.’ Then we will have something strictly up to date and distinctly Rooseveltian.”

Nautical motifs aside, the coins are “distinctly Rooseveltian” in character, for both their impressive High Relief detail, and their overt symbolism is strongly tied to the sense of American progressivism around turn of the century. Today, examples are prized for exactly that: their beauty and historical significance. This example has rich, satiny mint luster and minimal contact marks that are widely scattered over each side and individually insignificant. Fully struck. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief, Unc Details

- 3372 1907 High Relief, Flat Rim — Reverse Rim Filed — NCS. Unc Details.** Yes, there are problems on the reverse, but they are minor. Someone is going to see this coin and be captivated by its presentation rather than the technical grade. There is slight filing noted on the lower-left reverse rim, also two spots of very shallow pinscratching or tooling — one to the left of the eagle’s beak and one just below the tailfeathers — areas that will cause more technically minded buyers to shy away. However, the coin would probably grade MS62 without these problem areas. It is bright, lustrous, and satiny with the appearance of a much finer coin. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

**1908 Twenty Dollar, MS64+
With Motto**

- 3373 1908 Motto MS64+ PCGS. CAC.** The luster on this first-year With Motto Saint-Gaudens twenty is especially attractive, showing vibrant wheat-gold hues on each side. Light, scattered grazes are not overly obtrusive and there are no singularly mentionable abrasions. Sharp detail is seen throughout the eagle’s feathers and Liberty’s torch hand shows well-delineated fingers. NGC ID# BNAK, PCGS# 9147

**1908-D With Motto Twenty, MS65
Rarely Encountered Finer**

- 3374 1908-D Motto MS65 NGC.** In 1908, Congress moved to reinstate the motto IN GOD WE TRUST to U.S. coinage, after President Roosevelt and Augustus Saint-Gaudens left it off of the new gold issues of 1907. On the double eagle, it was placed on the lower reverse, along the top of the sun. The 1908-D With Motto issue is rarely seen above the Gem grade level. This piece displays a bold strike and frosty orange-gold luster. NGC reports 12 numerically finer representatives (8/16). NGC ID# 26F9, PCGS# 9148

1910 Saint-Gaudens Twenty, MS65
Extremely Rare Any Finer

- 3375 1910 MS65 PCGS.** Satiny orange-gold luster delivers pleasing visual appeal on this Gem 1910 Saint-Gaudens double eagle, while the design elements exhibit sharp definition. The 1910 is a challenging issue in MS65, and finer coins are rare. PCGS and NGC combined report nine higher-grade representatives, all in MS66 or MS66+ (8/16). NGC ID# 26FF, PCGS# 9154

1926-D Saint-Gaudens Double Eagle, MS60
20th Century Melt Rarity

- 3376 1926-D MS60 NGC.** The certified population of 1926-D double eagles confirms the scarcity of the issue in all grades. The mintage of 481,000 pieces has no relation to the number of survivors, because most coins never circulated before meeting an inglorious end at the melting pots of the Gold Recall in 1933. Some pieces made it into the hands of overseas gold hoards, later to return and lessening the rarity of the lower rungs of the Mint State ladder.

This frosty, greenish-gold example shows few abrasions for the bottom-level Mint State grade, the largest mark being a contact at Y of TWENTY on the reverse. Soft-but-complete mint luster lurks beneath the frost-laden obverse patina, with less interference on the brightly lustrous reverse. Some blending of strike at the Capitol building is offset by sharper definition at the centers. NGC reports 93 finer coins for this scarce Denver issue (8/16). NGC ID# 26GE, PCGS# 9184

COMMEMORATIVE SILVER

1900 Lafayette Dollar, MS65
Only Classic Silver Dollar Commemorative

- 3377 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C.** The 1900 Lafayette dollar is the first, and only, coin of this denomination in the classic silver commemorative series. This impressive Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under shades of pale gold and lavender-gray toning. Overall eye appeal is outstanding. NGC ID# BYKW, PCGS# 9222

1915-S Panama-Pacific Half Dollar, MS67
Ex: Eliasberg

- 3378 1915-S Panama-Pacific MS67 PCGS. Ex: Eliasberg.** The 1915-S Panama-Pacific half dollars were produced in large numbers, but few survivors can match the technical quality and eye appeal of the present coin. This delightful Superb Gem offers well-detailed design elements and vibrant mint luster under shades of pink and golden-brown toning. Population: 98 in 67 (13 in 67+), 3 finer (8/16). NGC ID# BYHP, PCGS# 9357

1954-S Washington-Carver Half, MS67
Very Scarce in High Grades

- 3379 1954-S Washington-Carver MS67 PCGS. CAC.** This higher-mintage Washington-Carver does not have correspondingly high numbers of Superb Gem examples. This is a surprisingly clean example that has pale, mottled autumn leaves toning that deepens just a bit around the obverse rim. Population: 8 in 67, 0 finer. CAC: 5 in 67, 0 finer (8/16). NGC ID# BYLB, PCGS# 9444

COMMEMORATIVE GOLD

1904 Lewis and Clark Gold Dollar, MS67
Extraordinary Strike and Luster

- 3380 1904 Lewis and Clark Gold Dollar MS67 PCGS.** The Lewis and Clark Exposition was held in Portland, Oregon to commemorate the centennial of the pair's expedition to the Pacific Northwest. The journey began near St. Louis and progressed westward past the Continental Divide to eventually reach the Pacific coast. They set out from Camp Dubois, Illinois (15 miles upstream from St. Louis) on May 14, 1804 and concluded their travel in St. Louis on September 23, 1806. This Superb Gem is a remarkable example to commemorate the expedition, featuring pristine and highly lustrous yellow-gold surfaces and a bold strike. Population: 20 in 67, 2 finer (8/16). NGC ID# BYLF, PCGS# 7447

1905 Lewis and Clark Gold Dollar, MS66
Extremely Rare Any Finer

- 3381 1905 Lewis and Clark Gold Dollar MS66 NGC.** Lewis and Clark's 1804-1806 Corps of Discovery Expedition across the Western half of the North American continent and back was celebrated in 1905 with the Lewis and Clark Centennial Exposition, held in Portland, Oregon — near the mouth of the Columbia River where the explorers emerged into view of the Pacific Ocean 100 years before. The present coin is a souvenir gold dollar from the 1905 exposition. Pieces dated 1904 and 1905 were issued, both with distributions of slightly more than 10,000 coins, including assay pieces. This Premium Gem 1905 survivor displays a sharp strike and satiny yellow-gold luster. A few lint marks (as struck) appear near the obverse rim at 12 o'clock. Census: 52 in 66 (3 in 66+, 1 in 66 ★), 3 finer (8/16). NGC ID# BYLG, PCGS# 7448

1915-S Panama-Pacific Quarter Eagle
Frosty MS64+

- 3382 1915-S Panama-Pacific Quarter Eagle MS64+ PCGS.** An especially frosty example of this popular classic commemorative quarter eagle, showing bold motifs amid glowing fields. There are no significant abrasions, although some faint high-point grazes preclude a full Gem designation from PCGS. The Panama-Pacific quarter eagle is almost never seen so appealing below MS65. *From The Twelve Oaks Collection, Part II* NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65
Limited Distribution

- 3383 1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** Gem-quality surfaces yield frosty yellow-gold mint luster with minimal signs of contact on this appealing Panama-Pacific quarter eagle. Congress authorized a coinage of 10,000 examples of this denomination for the Panama-Pacific International Exposition commemorative coin program in 1915, although only 6,749 pieces were ever distributed. The design of the quarter eagle received minimal appreciation at the time of issue. *From The Twelve Oaks Collection, Part II* NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65
Well-Preserved Type Coin

- 3384 1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** Luminous, frosty green-gold luster delivers attractive visual quality on this Gem 1915-S Panama-Pacific quarter eagle, while a few tiny ticks on the obverse determine the grade. The Pan-Pac commemoratives were issued in conjunction with Panama-Pacific International Exposition, held in San Francisco in 1915. The souvenir coins were distributed individually and in sets. *From The Twelve Oaks Collection, Part II* NGC ID# BYLP, PCGS# 7450

1915-S Pan-Pac Quarter Eagle, MS65
Frosty and Attractive

3385 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. At a glance, this Gem Panama-Pacific quarter eagle is almost flawlessly preserved — only a loupe reveals faint lines on the devices that limit the numeric designation. This piece is sharp and softly frosted with excellent visual merit. The MS65 grade level is ideal for a balance of quality and affordability on this issue.

From The Twelve Oaks Collection, Part II NGC ID# BYLP, PCGS# 7450

1915-S Pan-Pac Two and a Half, MS65+
A Stand-Out Coin for the Grade

3386 1915-S Panama-Pacific Quarter Eagle MS65+ PCGS. Once unpopular among collectors and wannabe art critics alike, the Panama-Pacific quarter eagle is now a widely collected favorite in the classic commemorative series. The Plus designation denotes stand-out surface quality on this Gem example, while the strike is sharp and each side shows warm orange-gold coloration. Eye appeal is abundant.

From The Twelve Oaks Collection, Part II NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Octagonal Fifty, AU55
Eye Appeal of a Finer Grade

3387 1915-S Panama-Pacific 50 Dollar Octagonal AU55 PCGS. Struck in both round and octagonal formats, the identical design appears on both coins except for a pod of dolphins that occupy the exergues of the octagonal coins, giving them an art-deco appearance lacking on the round varieties. It is the shape and heft of the coin, however, that attracted more buyers to the eight-sided format than the rounds, as well as the resemblance to Gold Rush “slugs” that circulated in mid-1800 California.

This still-lustrous example shows a trace of wear to earn the Choice About Uncirculated grade. Otherwise, the coin is unimpaired by the brief circulation, and there are no heavy marks, dents, or dings that characterized the original Humbert and Assay Office octagonals. The obverse displays a pleasing orange-gold patina, while the reverse is a light yellow-gold color, perhaps a result of its original packaging when issued.

From The Walter Freeman Collection, Part I. NGC ID# BYHP, PCGS# 7452

1917 McKinley Gold Dollar, Iridescent MS67+

3388 1917 McKinley Gold Dollar MS67+ PCGS. The preservation of this coin's surfaces will immediately grab the attention of those reading this listing. But when viewed in-person what is even more visually arresting is the amazing color. Swirling rose, yellow-gold, and lilac patina is seen over each side of this immaculately preserved coin. Few could equal the visual impact of this piece. Population: 78 in 67 (7 in 67+), 0 finer (8/16). NGC ID# BYLL, PCGS# 7455

PROOF COMMEMORATIVE GOLD

1925 Norse Gold Medal, Unc Details, Attractive and Rare Matte Proof

- 3389** 1925 Norse Gold Medal, Matte Proof — Mount Removed — PCGS Genuine. Unc. Details. Although the puristic Bowers references on commemorative coins (and the *Guide Book*) spare not a single word on the Norse medals, they are avidly collected alongside the regular series. This lovely example shows a few light marks but still retains its essential appeal. The Norse gold medals were struck to the extent of only 100 pieces but 53 of them were melted as unsold — the issue price was \$20, a lot of money at the time — leaving a net distribution of 47 pieces. This piece will certainly pose an interesting and fertile bidding opportunity. Personal inspection of this lot (and all lots with similar TPG caveats) is suggested. NGC ID# 28NU, PCGS# 9452

MODERN BULLION COINS

1995-W Silver Eagle, PR70 Deep Cameo So-Called 10th Anniversary Issue

1995-W Silver Eagle, PR70 Deep Cameo The Ultimate Modern Issue

- 3390** 1995-W Silver Eagle PR70 Deep Cameo PCGS. The American Eagle bullion coin program began with the first issues in 1996. The 10th year was 1995, and the U.S. Mint issued their 10th Anniversary sets that year. The 1995-W proof Silver Eagles could only be acquired as part of the complete set that included four different sized gold coins at an issue price of \$999. Only 30,125 sets were sold. For those that did buy and hold those sets, it proved to be a good investment. This impressive example is a perfect Deep Cameo proof with extraordinary field-to-device contrast. The fields are deeply mirrored and the devices are frosty and highly lustrous. Population: 92 in 70 Deep Cameo, (8/16). NGC ID# CFWX, PCGS# 9887

- 3391** 1995-W Silver Eagle PR70 Deep Cameo PCGS. There are hundreds of thousands of collectors interested in modern issues such as the American Eagle silver and gold bullion coins, and most of those collectors are interested in complete sets. The number of collectors far exceeds the 30,125 proofs minted of this issue, the rarest silver Eagle. As the grade indicates, this is a perfect Deep Cameo proof that exhibits deeply mirrored fields and highly lustrous devices with extraordinary field-to-device contrast. Population: 92 in 70 Deep Cameo, (8/16). NGC ID# CFWX, PCGS# 9887

1999-W Quarter-Ounce Gold Eagle, MS70
Unfinished Proof Die Striking

- 3392** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 PCGS. Officially, the West Point mintmark was reserved for proof issues in the quarter-ounce Gold Eagle series, although in 1999, a West Point head die was left unfinished and erroneously employed for regular coinage. This popular *Guide Book* variety is always sought-after in top condition. The present example displays a full strike and flawlessly preserved yellow-gold surfaces. Eye appeal abounds. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

1999-W Quarter-Ounce Gold Eagle, MS70
Guide Book Unfinished Proof Dies Variety

- 3393** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 PCGS. The 1999-W quarter-ounce Gold Eagles were inadvertently struck with unfinished proof dies, probably due to the larger demand for bullion coins that was occasioned by the Y2K hysteria of the time, which put considerable strain on the Mint's facilities. This technically perfect example is fully struck and lustrous. This issue is listed among the *100 Greatest U.S. Modern Coins*. Population: 9 in 70 (8/16). NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

2001 Half-Ounce Platinum Eagle, MS70
Only Six Coins This Fine at PCGS

- 3394** 2001 Half-Ounce Platinum Eagle MS70 PCGS. Boasting a small mintage of 12,815 pieces, the 2001 half-ounce Platinum Eagle is rare in top condition. PCGS-graded coins are particularly important in MS70, as only six exist (8/16). This example displays full design definition and flawless preservation and contrast. Eye appeal abounds on the glowing surfaces. NGC ID# 26TG, PCGS# 9788

TERRITORIAL GOLD

1851 Humbert Fifty, XF Details
887 Thous., Reeded Edge, K-7

- 3395** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous., K-7, R.4 — Cleaning — PCGS Genuine. XF Details. The famous octagonal fifty dollar "slugs" are the most widely recognized numismatic issues of the fabulous Gold Rush era. Struck by the authority of the United States Assay Office in California, with Augustus Humbert official assayer, these majestic ingots served the region well in their day and survivors are among the most treasured artifacts of that colorful historical period. All the Humbert fifties employed the same basic design, but they were struck in different compositions and edge treatments, with minor variations on the motifs. This coin represents the K-7 variety, struck in .887 fineness, with a reeded edge. Although the Humbert fifties were struck in relatively large numbers and circulated widely in the early 1850s, most of the coins were turned in and melted for recoinage when the San Francisco Mint opened a few years later in 1854.

The present coin is a pleasing orange-gold specimen, with a few noticeable rim bruises, but fewer surface abrasions than one might expect on such a large gold coin. Some light wear shows on the well-detailed design elements, but all lettering and the date remain legible. Traces of original mint luster are evident, though somewhat muted by the effects of a light cleaning long ago. NGC ID# ANH9, PCGS# 10214

1852 U.S. Assay Office Fifty Dollar
K-13, Unc Details
Later Issue, Scarcer Kagin Variety

CALIFORNIA FRACTIONAL GOLD

1871 Octagonal Quarter, MS62
Extremely Rare BG-718A

3396 1852 Assay Office Fifty Dollar, 887 Thous. — Edge Repair — PCGS Genuine. Unc. Details. K-13, Low R.5. This is an attractive example of the now-famous fifty dollar “slugs” that were produced in great numbers during the early years of the California Gold Rush (1849-1854). The Gold Rush occurred in a remote location, far from the nearest official U.S. coinage facility, resulting in complications that arose from the need for local circulating money. Numerous foreign coins were used for the purpose, while officials struggled to convince federal authorities of a better solution: an official U.S. mint facility located in San Francisco. That facility did not materialize until 1854, and in the meantime the so-called United States Assay Office of Gold was one of the forerunners that served as a temporary stopgap measure.

This green-gold piece is bright and has a flashy appearance that is quite unusual for this type, examples of which ordinarily present satiny, rather muted surfaces. The design features are well-impressed, save for some of the secondary peripheral legends. Small-to-moderate abrasions pepper the front side of the piece, but are not necessarily an indicator of circulation, as acknowledged by PCGS with their “Unc Details” designation. Considering the paucity of Uncirculated examples, this piece may be considered conditionally scarce, even if it is net-graded due to an Edge Repair.

A rare fifty-dollar slug or ingot that represents a tremendous amount of numismatic interest for the serious Territorial Gold specialist. NGC ID# ANHG, PCGS# 10016

3397 1871 Liberty Octagonal 25 Cents, BG-718A, R.8, MS62 PCGS. An extremely rare Frontier, Deviercy & Co. variety, unlisted in the 1983 first edition of Breen-Gillio. The 2003 second edition called it unique, since only the Jay Roe specimen was confirmed at that time. The obverse is shared with BG-718, but the reverse differs, as it lacks wreath stems and has a different bow and berry arrangement. The AR in DOLLAR are defective, and the first 1 in the date is awkwardly repunched.

We know of only four examples of BG-718A:

- 1. MS64+ PCGS.** Heritage, 1/2012, lot 6880. The only example without a heavy reverse die crack near 9 o'clock.
- 2. MS64 PCGS.** Discovery coin. Robert B. Leece, 8/1991; Jay Roe Collection (Bowers and Merena, 9/2003), lot 162. Toned between stars 1 and 2.
- 3. MS62 PCGS.** The present coin. Much nicer than implied by its conservatively assessed grade. Readily identified by rich and pleasing ruby-red and sea-green toning throughout both sides.
- 4. MS62 PCGS.** Ira & Larry Goldberg, 9/2013. Untoned. Minor field scratch above the AR in DOLLAR.

From The Twelve Oaks Collection, Part II NGC ID# 2BMX, PCGS# 10955

PATTERNS

1864 'Transitional' Dollar in Copper
Judd-397, PR63 Red and Brown

- 3398 1864 Dollar, Judd-397, Pollock-465, R.6, PR63 Red and Brown PCGS. This is the so-called transitional dollar with the With Motto reverse that was first adopted in 1866 and paired with the regular Seated dollar obverse. Struck in copper with a reeded edge. This particular piece shows two scribe lines above the E in UNITED that matches some 1871 patterns and regular proofs, suggesting a later striking period than 1864. Struck in silver, copper, aluminum, and nickel. Only a dozen pieces are believed known in copper. The surfaces display attractive "autumn leaves" coloration over each side. Fully struck throughout, much of the original copper surface is still apparent. Housed in a first-generation holder. PCGS# 70568

1868 Longacre Ten Dollar in Aluminum
Judd-663, PR63

- 3399 1868 Ten Dollar, Judd-663, Pollock-736, Low R.6, PR63 PCGS. Believed to be a Longacre design, the obverse has a large bust of Liberty facing left with thirteen stars around and the date below. The reverse has a small eagle with upraised wings as the central motif, the motto on a scroll in the field above, and UNITED STATES OF AMERICA / TEN D. at the margin. Struck in aluminum with a reeded edge. Struck in copper and aluminum. The aluminum pieces are twice as rare as those in copper with only a dozen or so examples known. The surfaces are unoxidized and the fields deeply mirrored with the expected mint frost over the devices. A few minor contact marks account for the grade. An important aluminum pattern. Housed in a first-generation holder. NGC ID# 29PJ, PCGS# 60881

1870 William Barber Seated Dime in Aluminum
Judd-836, PR64

- 3400 1870 Ten Cents, Judd-836, Pollock-927, High R.7, PR64 PCGS. The obverse is the William Barber Liberty Seated design, with Liberty holding a pole topped by a Liberty cap. UNITED STATES is to the left and OF AMERICA to the right; the date 1870 is below. The shield is behind her rather than in front, with drapery reading LIBERTY across the top. The reverse is the regular dime die of the year. Struck in aluminum with a plain edge. These pieces were sold by the Mint as part of complete silver sets. USPatterns.com estimates that only a half-dozen examples of this variant are known today. The fields are deeply mirrored with the usual frost over the devices. Just the slightest trace of cloudiness can be seen over each side. Housed in a first-generation holder. PCGS# 61080

1882 Liberty Nickel in Aluminum
Judd-1686, PR64

- 3401** 1882 Liberty Head Five Cents, Judd-1686, Pollock-1888, High R.7, PR64 PCGS. The design is similar to that adopted for the regular issue Liberty nickel in 1883, but the legend UNITED STATES OF AMERICA has replaced the stars around the periphery, and the wreath and V are larger with E PLURIBUS UNUM placed at the top. Struck in aluminum with a plain edge. The nickel strikes in this three piece issue are what are usually seen, with copper and aluminum rarely encountered. Only a half-dozen of each are estimated known. This is a bright example with deeply reflective fields and the normally seen frosted, contrasting devices. A few minor planchet voids and a shallow lamination on the obverse probably figured into the grade of this exceptional piece. Housed in a first-generation holder. NGC ID# 2AK9, PCGS# 62091

1883 Transitional Liberty Nickel in Aluminum
Judd-1713, PR64

- 3402** 1883 Liberty Head Five Cents, Judd-1713, Pollock-1917, High R.7, PR64 PCGS. The obverse closely resembles that of the regular issue Liberty nickel, except that the stars have been replaced with the legend UNITED STATES OF AMERICA. The reverse has a wreath similar to that on the Liberty nickel, except it has been reduced in size and is bookended by stars. The inscription 33 N. / 67 C. is inside the wreath. Struck in aluminum with a plain edge. It is estimated that two to three dozen pieces are believed extant of this popular transitional pattern. The fields are heavily striated, similar to the Exemplar pattern we also handled, suggesting this may be a common trait to all known pieces. The surfaces otherwise are bright and untuned with minor milkiness and a few scattered Mint-created lint marks. Housed in a first-generation holder. NGC ID# 2AL3, PCGS# 62130

1942 Wartime Cent Pattern in Brown Plastic
Judd-2060, MS66

- 3403** 1942 Cent, Judd-2060, Pollock-4035, Low R.7, MS66 NGC. Part of the World War II effort to divert copper from the U.S. cent, this design was tried in various unusual materials, including red fiber and Bakelite. The obverse Liberty bust right design is based on the KM-198 Columbia two centavos. The wreath and legend reverse is taken from a Baker-155 Washington medalet. Struck in brown plastic with a plain edge. Medallion Turn. Burdette's Third Reverse. The surfaces are glossy-brown with slight reflectivity in the fields. NGC ID# 2ANA, PCGS# 12215

1942 Light Brown Plastic Cent
Judd-2063, MS65

- 3404** 1942 Judd-2063, Pollock-4025, Low R.7, MS65 NGC. The obverse portrait of Liberty is taken from the KM-198 Columbia two centavos. The reverse wreath was formerly used on Baker-155 Washington medalets. The central reverse states UNITED STATES MINT instead of a denomination. Struck in light tan plastic with a plain edge. Burdette's Third Reverse. This piece shows surfaces like others we have seen in this composition with a granular sparkle. Softly defined on Liberty's hair, but essential defect-free throughout. NGC ID# 2ANC, PCGS# 12216

End of Session One

SESSION TWO

COLONIALS

- 3405** 1652 Oak Tree Shilling, IN at Bottom, VG10 PCGS. Noe-8, W-490, Salmon 6-E, High R.6. 68.36 gn. This Oak Tree shilling exhibits the "S" bend characteristic of rocker press production. The coin's natural wave causes uneven wear, most apparent on the tree branches and above the date. The date and denomination are bold, and a majority of the peripheral letters are clear. A straight mint clip at 3 o'clock affects the tops of NEW. Listed on page 41 of the 2017 *Guide Book*. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Large Planchet Pine Tree Shilling Very Scarce Noe-9, VF30, Reversed N

- 3406** 1652 Pine Tree Shilling, Large Planchet, Reversed N, VF30 PCGS. Noe-9, W-750, Salmon 7a-Diii, R.6. 68.67 gn. A dove-gray midgrade example of this famous Colonial silver issue. Mildly wavy, as made, causing moderately uneven wear on the obverse center and the E in NEW. The reverse legends are virtually complete while selected outer obverse letters are incomplete due to mint-issued clips to bring the piece within standard weight. Refreshingly unabraded. Listed on page 41 of the 2017 *Guide Book*.
Ex: *Long Beach Signature* (Heritage, 6/2013), lot 4303. NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

- 3407** (1670-75) St. Patrick Farthing VF25 PCGS. Breen-208, W-11500. Made for circulation in Ireland, but Mark Newby imported a sizeable quantity to New Jersey in 1681. They were declared legal tender by the colonial legislature and circulated extensively. The present walnut-brown example is well defined for the type and exhibits moderately granular surfaces. Listed on page 43 of the 2017 *Guide Book*. NGC ID# AUAR, PCGS# 42

- 3408** 1720-S French Colonies 12 Deniers or Sol MS62 Brown NGC. KM-439.7. Struck at the Reims Mint in France. The 2 in the date is entered over a reversed 2. The inverted acorn privy mark of mint director Jacques Lagoille is present near the bust tip. The diamond privy mark of local engraver Pierre Delahaye precedes the date. Boy head of Louis XV. A lustrous, well made, and carefully preserved lavender-brown and sea-green example. The issue is associated with John Law's "Mississippi Bubble" speculation. PCGS# 227199

1787 Connecticut Copper, VG10 Triple Struck Draped Bust Left Miller 33.7-r.2

- 3409** 1787 Connecticut Copper, Draped Bust Left — Triple Struck — VG10 NGC. M. 33.7-r.2, W-3440, R.1. The CO in CONN is present on three places on the present triple-struck piece. The first strike was normal, or nearly so, but the coin was struck two additional times, approximately 50% and 60% off center toward 7:30, at 6 o'clock relative to the first strike. The russet-brown surfaces are moderately granular and lightly burnished. Listed on page 63 of the 2017 *Guide Book*. NGC ID# 2B33, PCGS# 370

- 3410** 1786 Vermont Copper, VERMONTENSIMUM, VF25 NGC. RR-7, Bressett 5-E, W-2025, R.3. An unmarked deep brown representative. Struck off center several degrees toward 7 o'clock. Softly defined on the left portion of both sides, but the landscape and all-seeing eye are bold, as are most of the legends. The surfaces are moderately granular. Listed on page 74 of the 2017 *Guide Book*. NGC ID# 2B57, PCGS# 545

- 3411** 1787 Fugio Cent, UNITED STATES, No Cinquefoils — Environmental Damage — PCGS Genuine. XF Details. N. 1-B, W-6600, R.4. Only a single obverse die (probably the first produced) shows a crosslet after the date instead of four cinquefoils. The die proved durable, and was eventually paired with four reverse dies. N. 1-B is the sole variety that mates the No Cinquefoils obverse with a standard UNITED STATES reverse. This walnut-brown example has even, moderate wear. The reverse field is granular near 10:30. NGC ID# 2B8D, PCGS# 880

- 3412** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU50 PCGS. N. 13-X, W-6855, R.2. A satiny and unabraded olive-brown Fugio type coin with numerous tiny flan imperfections. Slightly out of parallel dies cause minor inexactness of strike along the left-side margins. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3413** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU53 PCGS. N. 8-X, W-6750, R.3. This example shows the heavy radial die break from the rim below the N in BUSINESS to the center of the obverse. The coin is well-struck and shows little wear. Bits of verdigris cling to FUGIO and the date. The obverse displays pleasing auburn-brown and deep olive hues, while the reverse has lighter brassy hues with chestnut-brown toning. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS64 Brown
N. 13-X, STATES UNITED Reverse**

- 3414** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS64 Brown NGC. N. 13-X, W-6855, R.2. Shows the usual vertical die crack at 6 o'clock on the reverse rim. This glossy chocolate-brown near-Gem is struck from clashed dies with some weakness around the peripheral elements. The centers are well-defined, and there are no major abrasions. Satiny luster offers pleasing visual appeal. NGC ID# AX5E, PCGS# 883

- 3415** 1796 REPUB AMERI, Plain Edge, Born 1732 Under Bust, AU55 PCGS. Baker-69, Breen-1278. Breen called this Thomas Wyon variety "extremely rare," while Rulau lists it as R.5. Whitman omits the variety from its *Colonial Encyclopedia*, but several other references place Baker-69 in the category of post-colonial issues. Said by Rulau to have been struck in 1870, despite the erroneous date of death, and its similarity to the 1796-dated Baker-68. A lightly worn chocolate-brown piece with a subtle field spot near the RG in GEORGE. PCGS# 20038

HALF CENTS

**1793 C-1, B-1 Half Cent, VF Details
The First Half Cent Variety**

- 3416** 1793 C-1, B-1, High R.3 — Environmental Damage — PCGS Genuine. VF Details. Cohen-1 is attributed as the first half cent variety produced at the fledgling U.S. Mint in Philadelphia. This nicely detailed example has evenly distributed obverse and reverse porosity on its steel-brown surfaces. The impression is nicely centered with complete border beads on both sides. Our EAC grade VG8. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

- 3417** 1794 Normal Head, C-1a, B-1a, R.3, Fine 15 PCGS. CAC. Large Edge Letters variant. This attractive, CAC-endorsed example displays an even strike and minimal wear for the grade. The smooth, problem-free surfaces have outstanding medium-brown color that sets off the devices and delivers outstanding visual appeal. The rims are sharp save for a small portion of the reverse above OF. Our EAC grade VG7. NGC ID# 2223, PCGS# 35018 Base PCGS# 35015

- 3418** 1794 Normal Head, C-3a, B-5b, R.5, VG10 PCGS. Manley Die State 2, with the die bulge right of the date. Most specimens seen are heavily worn or in impaired condition. The olive-brown surfaces are slightly granular on this pleasing VG example. The major design elements are complete in outline and all lettering and the date remain legible. Our EAC grade Good 6. NGC ID# 2223, PCGS# 35030 Base PCGS# 35015

- 3419** 1803 Widely Spaced 3, C-3, B-3, R.1, AU53 PCGS. Manley Die State 3. The downward-slanting die lines from BERTY on the obverse are still visible in this middle die state. The present coin shows an even strike with complete dentils around each perimeter. The attractive chocolate-brown surfaces are generally smooth in the margins, yielding to a few light marks on the central reverse. Our EAC grade VF35. NGC ID# 222E, PCGS# 35134 Base PCGS# 1060

- 3420** 1806 Large 6, Stems, C-4, B-4, R.1, MS61 Brown NGC. Manley Die State 2. Rich purple, blue, and sea-green hues encompass each side of this lovely representative, while satiny luster illuminates the patina. The strike is strong on the obverse, though several wreath leaves are not fully brought up. Relatively few surface abrasions are present, considering the grade. Struck from mildly rotated dies. Our EAC grade AU50. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

- 3421** 1811 Close Date, C-2, B-2, Low R.3, VF25 PCGS. Manley Die State 2.0. The 1811 is the key business date of the Classic Head type, unless one believes that examples of the 1831 C-1 were struck for commerce. This is a charming medium brown 1811 half cent with deeper toning on the upper left-side stars. The dies were misaligned for the C-2 production, which led to sharper definition on the right borders than on the left borders. Our EAC grade Fine 15. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

- 3422** 1835 C-1, B-1, R.1, MS65 Red and Brown PCGS. Manley Die State 2.0 with prominent obverse and reverse clash marks. This lovely Gem exhibits about half of the original mint red, here slightly mellowed. Both sides exhibit full cartwheel luster with no marks or spots of any consequence. Our EAC grade MS63. NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

- 3423** 1853 C-1, B-1, R.1, MS65 Brown PCGS. CAC. A magnificent chocolate-brown Gem. Well struck except on the dentils near star 13. Free from spots or marks. About as nice as can be obtained without any hints of the initial Red color. Our EAC grade MS60. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

- 3424** 1853 C-1, B-1, R.1, MS66 Brown PCGS. Glossy, medium brown surfaces exhibit accents of steel-blue. The strike is uniformly bold, aside from incompleteness along the right obverse rim, where the dentils are somewhat indistinct. Among the finest examples in this color category at PCGS. Our EAC grade MS60. Population: 10 in 66 Brown, 0 finer (8/16). NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

- 3425** 1855 C-1, B-1, R.1, MS64 Red PCGS. A mark-free near-Gem with predominantly orange-gold surfaces. The reverse displays a few small gunmetal areas, and minor carbon is scattered. The dentils show softness but the devices and legends are bold. Our EAC grade MS62. NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

LARGE CENTS

- 3426** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Environmental Damage — PCGS Genuine. P/FR Details. Just enough of the bust line is visible to be reasonably certain of our attribution, although there is little else visible on the obverse, and about two-thirds of the chain remains visible on the reverse of this moderately porous but eminently affordable early copper. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

- 3427** 1794 Head of 1794, S-24, B-8, R.1, VF30 NGC. The fully rounded cheek is diagnostic of the variety, and this specimen is a later die state with both obverse cracks and a bulge obliterating ENT on the reverse. The pleasing tan-brown surfaces exhibit minor granularity and show only trivial contact. Our EAC grade Fine 15. Ex: *Stack's* (10/1991), lot 510; *Phillip Clover Collection* (Heritage, 9/2012), lot 3027; *Louis J. Alfonso*; *Houston Money Show Auction* (Heritage, 12/2015), lot 3509. NGC ID# 223P, PCGS# 35537 Base PCGS# 901374

- 3428** 1794 Head of 1795, S-70, B-62, R.2, Fine 12 NGC. The usual die crack between the T and Y of LIBERTY is prominently visible on this pleasing chestnut and mahogany-brown cent. Slight weakness is apparent at the center and left side of the reverse. Trivial circulation marks are consistent with the grade. Our EAC grade VG7. NGC ID# 223R, PCGS# 35693 Base PCGS# 1365

**1795 Cent, Choice XF
Plain Edge, S-76b**

3429 1795 Plain Edge, S-76b, B-4b, R.1, XF45 NGC. A charming tan-brown and olive-green Liberty Cap type coin. Glimmers of luster remain, and no marks are remotely consequential. The strike is generally consistent, although planchet striae is noted near the date and OF. Struck from lightly clashed dies. Our EAC grade VF20. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

3430 1797 Reverse of 1797, Stems, S-140, B-22, R.1, XF40 PCGS. A richly defined example with moderately granular deep olive-brown surfaces. Refreshingly unabraded. OF is weakly defined due to a failing reverse die, usual for S-140. Encapsulated in an old green label holder. Our EAC grade VF30. NGC ID# 2242, PCGS# 35951 Base PCGS# 1422

3431 1798/7 S-152, B-13, R.2, VF30 PCGS. The left serif of the 7 is visible above the upper left curve of the 8 on this obverse die that only appeared on S-152. A pleasing light olive piece that exhibits dappled steel toning, this example exhibits the usual minor handling marks with a couple rim bumps. Our EAC grade Fine 15. NGC ID# 2245, PCGS# 35999 Base PCGS# 1440

3432 1799 S-189, B-3, R.2 — Rim Damage — PCGS Genuine. AG Details. An affordable example of this elusive date, showing smooth olive-brown surfaces and even wear. Liberty's portrait is fully outlined, and the date, wreath, and denomination are clear. Portions of LIBERTY and the reverse peripheral legend merge with the rim. The rim shows numerous bumps that preclude a numeric grade. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3433 1805 S-267, B-1, R.1, XF40 NGC. Breen Die State III. This is an appealing XF example of this slightly less often seen Draped Bust issue. The surfaces are mostly smooth with glossy chocolate-brown coloration, although a couple of small marks are seen on Liberty's cheek and neck and in the field below AMERICA. Two small abrasions appear near the obverse rim after the Y in LIBERTY and next to the tip of the bust, respectively. A couple of faint rim bumps can be discerned on the lower-left obverse rim. The strike is even and sharp, and Liberty's portrait is well-detailed. Our EAC grade VF25. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

1810 S-285 Cent, Choice AU

3434 1810 S-285, B-2, R.2, AU55 NGC. A faint crack through the right-side stars helps attribute this collectible but conditionally rare Sheldon marriage. Refreshingly void of contact though protected areas of the reverse display build-up. A late die state with bold clash marks, flowlined fields, and blurry peripheral elements. Our EAC grade XF40. Census: 6 in 55, 12 finer (8/16). NGC ID# 224S, PCGS# 36484 Base PCGS# 1549

3435 1817 15 Stars, N-16, R.1, AU55 PCGS. CAC. The absent-minded engraver entered an incorrect number of stars into the die, the only such occurrence on a post-1807 large cent, although a wrong star count also occurs on the C-2 1828 half cent. A lovely chocolate-brown example that retains substantial mint gloss despite light high point wear. Our EAC grade VF35. NGC ID# 2252, PCGS# 36598 Base PCGS# 1597

3436 1833 N-3, High R.1, MS64 Brown PCGS. CAC. The E in ONE and the CE in CENT are repunched north, characteristic of Newcomb-3. A Choice semiprooflike chocolate-brown cent. The reverse appears unabraded and the obverse exhibits only a few inconsequential ticks. Our EAC grade AU55. NGC ID# 225P, PCGS# 37024 Base PCGS# 1696

3437 1835 Head of 1836, N-7, N-17, R.1, MS63 Brown NGC. CAC. Small Date, Small Stars. A reddish-chocolate example with traces of Mint red around the raised devices. Recutting on stars 3 through 5 join several die scratches between D and S and a spike from the leaf tip beneath T in UNITED to confirm the N-7 variety. Struck from an early die state, without the often-seen die crack between 1 and 8 and with sharp dentils throughout most of both sides. Our EAC grade AU50. PCGS# 37057 Base PCGS# 1714

3438 1857 Large Date, N-1, R.1, MS64 Red and Brown PCGS. CAC. Grellman Die State a. The obverse is principally brick-red, and the reverse is Red and Brown with gunmetal-blue freckles on the right margin. Satiny and unabraded. Well struck except on the last few stars. Our EAC grade MS62. NGC ID# 226P, PCGS# 389635 Base PCGS# 1929

FLYING EAGLE CENTS

3439 1857 MS63 PCGS. CAC. Softly frosted golden-brown luster illuminates well-struck design elements on this Select 1857 Flying Eagle cent. A lack of any serious abrasions affirms the CAC endorsement, as eye appeal is high for the grade. The coin is housed in a green label holder. NGC ID# 2276, PCGS# 2016

3440 1857 MS64 NGC. Several interesting die lines appear near the eagle's beak, including one that travels through the open mouth. Lustrous, copper-gold and amber surfaces show razor-sharp strike definition, especially the wreath elements. A well-preserved and attractive example of this short-lived type. NGC ID# 2276, PCGS# 2016

3441 1858 Large Letters MS64 NGC. High Leaves Reverse. Closed E in ONE. A lustrous, well struck and unabraded orange-gold near-Gem. A few strike-throughs are near the E in ONE and the reverse rim at 12:30. The obverse displays a couple of tiny spots. NGC ID# 2277, PCGS# 2019

**1858 Large Letters Cent, MS65
High Leaves, Well Struck**

3442 1858 Large Letters MS65 PCGS. High Leaves Reverse. Closed E in ONE. A peach-gold and lime-green Gem. The satiny surfaces boast an above average strike, and no carbon is consequential. Marks are essentially absent aside from minor contact above the N in ONE. An impressive example from the final year of the design. Ex: Orlando FUN Signature (Heritage, 1/2003), lot 5258, which realized \$2,760. NGC ID# 2277, PCGS# 2019

INDIAN CENTS

1860 Pointed Bust Cent, MS65 Elusive Variety in High Grade

- 3443 1860 Pointed Bust, FS-401, MS65 PCGS. CAC.** By a significant margin, the 1860 Pointed Bust Indian cent is scarcer than its Rounded Bust counterpart. This Gem CAC example had few peers and is second to a rare few. The strike is sharp throughout, and each side displays satiny tan-gold luster. Population: 40 in 65 (2 in 65+), 13 finer. CAC: 9 in 65, 4 finer (8/16). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

1862 Cent, Satiny MS66 Elusive CAC-Stickered Coin

- 3444 1862 MS66 PCGS. CAC.** Satiny peach-gold luster illuminates the exceptionally clean surfaces of this high-end 1862 Indian cent. The devices are sharp, and there are no distractions. Higher-grade pieces are decidedly rare. The 1862 in this grade would make an outstanding copper-nickel type coin. Population: 89 in 66 (7 in 66+), 12 finer. CAC: 20 in 66, 1 finer (8/16). NGC ID# 227H, PCGS# 2064

- 3445 1864 Copper-Nickel MS65 PCGS.** The final copper-nickel issue in the Indian cent series is collectible in MS65 but rarely seen finer. This Gem example displays well-preserved, satiny luster with medium tan-gold hues. The top three headdress feathers show finer weakness at the tips, but the remaining design elements are well brought up. PCGS reports 31 higher-grade representatives (8/16). NGC ID# 227K, PCGS# 2070

- 3446 1864 Copper-Nickel MS65 PCGS. CAC.** Pumpkin-gold coloration and luminous luster combine over this Gem copper-nickel cent. The surfaces are free of any noticeable distractions. The year 1864 was a transitional one, with the Mint striking the final batch of copper-nickel cents and the first group of bronze coins. PCGS shows 31 finer grading events (8/16). NGC ID# 227K, PCGS# 2070

- 3447 1865 Plain 5, Repunched Date, Snow-1, FS-301, MS64 Red PCGS.** The date was initially entered with an upward slant, then repunched in a level position. Repunching is apparent near the tops of all four digits. Crisply struck, lustrous, and unabraded. Orange-gold overall with minor obverse carbon and a blush of aquamarine near the wreath stem. PCGS# 37434 Base PCGS# 92084

- 3448 1868 MS65 Red and Brown PCGS. CAC.** Appealing woodgrain patination includes pumpkin-gold and copper-brown colors. Swirling luster furthers the eye appeal of this Gem cent. The feathertips are bold. PCGS lists 30 Red and Brown grading events finer (8/16). NGC ID# 227S, PCGS# 2092

- 3449 1869 MS66 Red and Brown PCGS.** This glowing Red and Brown Premium Gem cent features warm copper-orange and honey-brown coloration. Swirling luster covers fully raised relief elements, providing top-notch aesthetic appeal to each side. A faint clash mark passes through the C in CENT. Population: 7 in 66 Red and Brown, 0 finer (8/16). NGC ID# 227T, PCGS# 2095

- 3450 1869 MS66 Red and Brown NGC.** A lovely Premium Gem with considerable subdued orange mint luster blended with medium brown toning. The strike is sharp throughout. Only a couple of tiny specks are seen with a loupe. The reverse exhibits numerous peripheral die cracks. Census: 19 in 66 Red and Brown, 0 finer (8/16). Ex: *Houston Signature* (Heritage, 12/2009), lot 73. NGC ID# 227T, PCGS# 2095

1872 Indian Cent, MS65 Red and Brown Bold Feathers and Shield

- 3451 1872 MS65 Red and Brown PCGS.** Unlike many examples of this issue, the present Red and Brown Gem has full detail in the feather tips, and a completely detailed shield, including the horizontal lines. This piece exhibits about 35% orange mint luster on the obverse, and more than 75% on the reverse. An exceptional piece for the advanced collector. Population: 78 in 65 (1 in 65+) Red and Brown, 10 finer (8/16). NGC ID# 227W, PCGS# 2104

- 3452 1877 VF20 PCGS.** Uniform chocolate-brown patina gives this evenly circulated 1877 Indian cent pleasant eye appeal for the grade. The design elements are well-detailed. The shallow N in ONE is diagnostic of genuine examples.

From The Twelve Oaks Collection, Part II NGC ID# 2284, PCGS# 2127

- 3453 1877 VF25 NGC.** Light wear and smooth chocolate-brown patina give this midgrade 1877 Indian cent excellent eye appeal. This key-date issue had a small mintage for the series of 852,500 coins. Although the 1909-S mintage was smaller (309,000 coins), the 1877 is far scarcer overall. NGC ID# 2284, PCGS# 2127

- 3454 1877 VF35 PCGS.** As the numeric designation suggests, this circulated 1877 Indian cent is sharp for the VF grade level. The motifs are well-detailed, and the surfaces exhibit pleasing chocolate-brown patina. Light, scattered ticks are not unusual for the grade. Although Mint State examples of this issue are popular among wealthy collectors, many enthusiasts prefer the historical aspect of a piece that actually circulated in the late 19th century. *From The Twelve Oaks Collection, Part II* NGC ID# 2284, PCGS# 2127

- 3455 1886 Type One MS65 Red and Brown PCGS. CAC.** The lowest headdress feather points between the I and C in AMERICA on the Type One 1886 Indian cent. This Gem Red and Brown example displays a sharp strike and satiny luster. Rich coppery-pink, plum, and lavender hues adorn each side. Population: 52 in 65 (1 in 65+) Red and Brown, 5 finer. CAC: 20 in 65, 3 finer (8/16). NGC ID# 228D, PCGS# 2155

- 3456 1886 Type Two MS65 Red and Brown PCGS.** The lowest headdress feather points between CA in AMERICA. Light copper-orange surfaces show boldly struck motifs and minor ticks, though none deserve any special mention. Population: 34 in 65 (1 in 65+) Red and Brown, 1 finer (8/16). NGC ID# 228E, PCGS# 92155

**1890 Indian Cent, MS66 Red
Top-Grade Registry Coin**

3457 1890 MS66 Red PCGS. The 1890 Indian cent is a rarity in MS66 Red, the finest numeric grade achieved at PCGS, and is unknown this fine at NGC. This example displays shimmering, original mint luster in fiery copper-red hues, illuminating sharp devices and unabraded fields. Population: 13 in 66 (1 in 66+) Red, 0 finer (8/16). NGC ID# 228J, PCGS# 2177

3458 1891 MS65 Red PCGS. Blazing coppery-red and rose mint luster gives this Gem Red 1891 Indian cent stand-out eye appeal amongst its peers. The strike is sharp, and there are no abrasions worthy of mention. A few tiny, scattered flecks appear on each side but hardly detract from the glowing patina. Population: 73 in 65 (2 in 65+) Red, 17 finer (8/16). NGC ID# 228K, PCGS# 2180

3459 1895 MS66 Red PCGS. Effulgent luster sweeps across this amber-gold Gem cent, explaining the undeniable visual appeal seen throughout each side. Well-struck centers cede to minor softness around the borders. A tick on the cheek precludes an even higher grade. Population: 56 in 66 (6 in 66+) Red, 4 finer (8/16). NGC ID# 228P, PCGS# 2192

**1896 Cent, MS66 Red
Decidedly Rare This Fine**

3460 1896 MS66 Red PCGS. Satiny orange-gold luster delivers pleasing eye appeal on this Premium Gem Red 1896 Indian cent, while the devices are sharply brought up. There are no significant abrasions, although some light specks appear along the left reverse margin with a loupe. The 1896 is surprisingly rare in this lofty grade of preservation. Population: 22 in 66 (4 in 66+) Red, 2 finer (8/16). NGC ID# 228R, PCGS# 2195

3461 1897 Misplaced Date, FS-401, S-1, MS63 Brown PCGS. CAC. A 1 protrudes from the neck. The *Cherrypickers' Guide* notes that this variety is very difficult to locate in mint condition. Ice-blue centers are surrounded by shades of olive and brown. A well-struck example with great aesthetic appeal. Population: 2 in 63 Brown, 3 finer (8/16). NGC ID# 228S, PCGS# 37597 Base PCGS# 92196

**1903 Cent, MS67 Red
Tied for Finest at Both Services**

3462 1903 MS67 Red NGC. Collectors looking for the finest possible 1903 Indian Head cent can end their search with this Superb Gem. Both sides lack any marks visible to the unaided eye. Glowing fire-orange surfaces showcase fully struck relief elements and shimmering mint luster. Devoid of carbon. Census: 9 in 67 (2 in 67★) Red, 0 finer (8/16). NGC ID# 228Y, PCGS# 2216

3463 1905 MS66 Red PCGS. A conditionally scarce Premium Gem Red example of this otherwise plentiful Indian cent issue, showing frosty fire-orange luster that showcases complete originality. The top three headdress feathertips on the obverse have the only discernible strike weakness. A few trivial pepper specks are hardly noticed. Population: 64 in 66 (9 in 66+) Red, 1 finer (8/16). NGC ID# 2292, PCGS# 2222

3464 1908-S MS65 Red NGC. The design elements of this attractive Gem are well-detailed and the original red surfaces show a few streaks of light brown, but no mentionable distractions are evident and original mint luster adds to the considerable eye appeal. NGC ID# 2296, PCGS# 2234

**1909-S Indian Cent, MS65 Red and Brown
Only a Handful Finer at PCGS**

3465 1909-S MS65 Red and Brown PCGS. CAC. Subtle mahogany toning forms a woodgrain appearance emboldened by coppery-gold luster on this Gem 1909-S Indian cent, suitably earning the Red and Brown designation. Slight weakness on the top three headdress feathers is normal for the issue, and there are no mentionable abrasions. Minor blending of the dentils over the D in UNITED is noted. The eye appeal is excellent for this conditionally scarce and CAC-endorsed cent. PCGS reports just five numerically finer coins in Red and Brown (8/16). NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS66 Red and Brown
None Finer at NGC**

- 3466 1909-S MS66 Red and Brown NGC.** Deep cherry-red and forest-green hues accent satiny orange-gold luster on each side of this Premium Gem representative. No signs of carbon are observed on either side, and a tiny cut on the nose appears to be the only detectable surface flaw. A well-struck, luminous representative of this popular semikey. Census: 9 in 66 Red and Brown, 0 finer (8/16). NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENT

**1863 Cent, PR65 Cameo
Copper-Nickel Condition Rarity**

- 3467 1863 PR65 Cameo PCGS.** Cameo examples of the copper-nickel type in general are elusive in Gem condition, and the typical example is dated 1862 or 1864. This PR65 Cameo 1863 proof is a rarity. The strike is razor-sharp, and the mirrored fields provide superb contrast. A few tiny bluish toning specks appear on the obverse, and the reverse has an area of amber and violet toning along the lower right rim. Population: 12 in 65 (2 in 65+) Cameo, 9 finer (8/16). NGC ID# 26SX, PCGS# 82262

LINCOLN CENTS

**1909 VDB Cent, MS67+ Red
Dazzling, Shimmering Luster**

- 3468 1909 VDB MS67+ Red PCGS.** Although there is much hype regarding its San Francisco counterpart, the 1909 VDB Philadelphia Lincoln cent has its own brand of rarity in high grade. This Plus-designated full Red Superb Gem displays spectacular, glowing coppery-orange luster with luminous frosty texture. The coin is devoid of abrasions and showcases record eye appeal. Only a single piece is reported finer at each service (8/16). NGC ID# 22AZ, PCGS# 2425

- 3469 1909-S VDB MS64 Red and Brown PCGS.** It is difficult to find grade-limiting flaws on this near-Gem S-VDB cent, even with a loupe — eye appeal is that strong. Glowing satin surfaces offer a rich blend of coppery-orange, gold, and chestnut-brown hues. A small speck appears near the base of the T in CENT. NGC ID# 22B2, PCGS# 2427

- 3470 1911-D MS66 Red PCGS. CAC.** The surfaces are largely brick-red with a wash of pale lilac on the reverse. Carbon is completely absent, although one smallish brown toning fleck appears on the obverse. The obverse die shows some evidence of fatigue in the form of die crumbling, and the reverse die is noticeably rotated with respect to the obverse. This pristine Premium Gem Red 1911-D is tied for virtually the finest obtainable, as PCGS has certified a lone MS67 Red. Population: 57 in 66 (5 in 66+) Red, 1 finer. CAC: 11 in 66 Red, 0 finer (8/16). NGC ID# 22B8, PCGS# 2446

- 3471 1912-S MS65 Red PCGS.** A much better date, the 1912-S is seldom seen in Gem condition. Well-struck except on the LU in PLURIBUS and the O in ONE. Pumpkin-gold overall with scattered tiny spots and an area of gray patina on the left reverse. Certified in a first generation holder. NGC ID# 22BC, PCGS# 2458

- 3472 1914-S MS65 Red and Brown PCGS.** The original red surfaces of this attractive Gem have mellowed to light brown in many areas, but no mentionable distractions are evident and the design elements are sharply detailed throughout. Population: 25 in 65 Red and Brown, 0 finer (8/16). NGC ID# 22BJ, PCGS# 2475

**1914-S Cent, MS65 Red and Brown
Nearly Devoid of Contact**

- 3473 1914-S MS65 Red and Brown PCGS. CAC.** 30th Anniversary Green Label Holder. A jade-green and rose-red representative of this early branch mint issue. The strike is sharp and carbon is confined to pinpoint flecks on the reverse. Colorful Gem Red and Brown cents remain underrated relative to those certified as full Red. CAC: 7 in 65, 0 finer (8/16). NGC ID# 22BJ, PCGS# 2475

**1915-D Cent, Luminous MS66 Red
Only One Coin Certified Finer**

- 3474 1915-D MS66 Red PCGS.** A high-end Red 1915-D cent is in and of itself a challenge to locate, but pieces that display fully original color are even more so. This Premium Gem displays luminous copper-red and orange hues over softly frosted surfaces. The O in ONE shows the usual strike softness, but there are no stand-out carbon spots. A very faint, partial print is seen in the left obverse field with a loupe. Population: 39 in 66 (2 in 66+) Red, 1 finer (8/16). NGC ID# 22BL, PCGS# 2482

3475 1917 MS66+ Red PCGS. CAC. Frosty copper-orange luster on this high-end Premium Gem has a luminous glimmer generated by die erosion and metal flowlines in the fields. The strike is nonetheless well-executed. A loupe will find a few tiny pepper specks and a couple of reddish overtones. PCGS lists 20 finer Red coins (8/16). CAC: 20 in 66, 3 finer (8/16). NGC ID# 22BS, PCGS# 2497

3476 1918-S MS64 Red PCGS. Satiny copper-orange luster shows minimal abrasions on this near-Gem Red 1918-S Lincoln cent, an issue that is elusive in high grade with original mint color. The coin is well-struck. Some scattered flecks are not unusual for the grade and issue. Population: 70 in 64 (1 in 64+) Red, 16 finer (8/16). NGC ID# 22BX, PCGS# 2512

3477 1919-D MS66 Red and Brown PCGS. CAC. Both full Red as well as Red and Brown 1919-D cents are rare in Premium Gem condition. Specialists will adore the coppery-red hues of this CAC-endorsed Red and Brown coin, which shows lovely wisps of orange, lavender, and auburn color that deepen the luster just beyond what PCGS will designate as full Red. This is the sole finest Red and Brown coin at CAC. PCGS Population: 4 in 66 Red and Brown, 0 finer (8/16). NGC ID# 22BZ, PCGS# 2517

3478 1922-D MS65 Red PCGS. Only the Denver Mint struck cents in 1922, and this issue is a challenge to locate in high grade. The present Gem Red example displays an impressively sharp strike, clear mintmark, and satiny luster — plainly an early strike from this die pair. Original fire-orange, sun-gold, and rose-red hues give the well-preserved surfaces exceptional aesthetic merit. PCGS lists a dozen MS66 Red coins finer (8/16). NGC ID# 22C8, PCGS# 2539

1922 No D Cent, AU53 Mint Luster Surrounds the Devices

3479 1922 No D, Strong Reverse, FS-401, AU53 PCGS. Die Pair 2. In addition to being one of the rarest (the rarest?) Lincoln cent, the 1922 No D is also arguably the most difficult to grade. Struck from a heavily used obverse die, the detail is never great. Some pieces that are XF-AU look more like they are VF, judging from the obverse alone. Which is why AU pieces, such as this one, must be graded by remaining luster. The surfaces are even brown and there are no obvious abrasions. Most importantly, there is a trace of mint luster outlining the devices on each side. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

3480 1924-D MS65 Red and Brown PCGS. Glowing original luster emerges in brass-gold, copper-orange, and reddish hues from beneath a dusting olive-brown and lavender overtones. The strike is characteristically weak on the O in ONE but well-executed elsewhere. There are no mentionable abrasions. Population: 34 in 65 Red and Brown, 1 finer (8/16). NGC ID# 22CD, PCGS# 2553

1924-S Lincoln Cent, MS64 Red Very Rare Any Finer

3481 1924-S MS64 Red PCGS. The 1924-S Lincoln cent is a challenging issue in high grade, despite its reported mintage of nearly 11.7 million pieces. This attractive Choice specimen exhibits well-detailed design elements with some die bulges on the reverse, and well-preserved original red surfaces, with slightly subdued mint luster. Population: 87 in 64 (1 in 64+) Red, 10 finer (8/16). NGC ID# 22CE, PCGS# 2557

3482 1930-S MS66+ Red PCGS. The 1930-S is collectible through MS66 with original Red surface coloration. This piece has the added Plus-designation for quality within the grade. Each side is awash in frosty luster, and marks are scant. The reverse shows a bit of softness. PCGS lists six coins finer (8/16). NGC ID# 22CZ, PCGS# 2611

1931 Lincoln Cent, MS67 Red Among the Finest Certified

3483 1931 MS67 Red PCGS. Radiant hues of lemon-yellow, peach-red, and pumpkin-orange coruscate across the smooth and unblemished surfaces of this vibrantly lustrous 1931 cent. The undeniably original Red color ebbs and flows with the angle of view. Sharply struck, any residual planchet marks are minimal and the few microscopic flecks are of no concern given the amazingly fresh surfaces of this Registry Set quality Superb Gem. Population: 23 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22D2, PCGS# 2614

3484 1933-D MS67 Red PCGS. A conditionally scarce example of the 1933-D Lincoln cent and among the finest certified. This Superb Gem Red Registry coin displays a sharp strike and frosty copper-orange luster. A microscopic speck appears near the obverse rim at 8 o'clock. Population: 32 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22D8, PCGS# 2632

3485 1941-S MS67+ Red PCGS. CAC. Although plenty available in MS67 Red, the 1941-S cent is unknown numerically finer. PCGS has designated 30 Plus-graded MS67s as the finest at that service, of which one is here represented (8/16). This Registry Set essential displays frosty sun-orange luster and unabraded surfaces. A couple of small flecks appear unobtrusively near the PLU in PLURIBUS. NGC ID# 22DY, PCGS# 2701

3486 1942 MS67+ Red PCGS. This amazing Superb Gem is tied for the finest certified among 20 MS67+ PCGS examples and four similar NGC pieces (8/16). Both sides have fiery orange mint luster with frosty surfaces and bold design details. NGC ID# 22L9, PCGS# 2704

- 3487 1942-S MS67+ Red PCGS. CAC.** A pristine and thoroughly lustrous orange-red World War II-era Superb Gem. The strike is intricate, and the technical quality is remarkable. The reverse exhibits minor retained laminations, as produced. NGC ID# 22E3, PCGS# 2710
- 3488 1953-D MS67 Red PCGS.** This highly lustrous and brilliant orange Lincoln cent has a bold strike and pristine surfaces with excellent eye appeal. An important Set Registry collection entry, tied for the finest certified. Population: 55 in 67 (3 in 67+) Red, 0 finer (8/16). NGC ID# 22FA, PCGS# 2809
- 3489 1954-S MS67+ Red PCGS. CAC.** The 1954-S cent may be plentiful in MS67 Red, but few are Plus-graded and none are finer. The CAC population at this level is also small. The present Plus-graded, CAC-approved Superb Gem is a diamond of a Registry coin, showing virtually flawless honey-orange luster with hints of mint-green and rose-red in the centers. The strike is bold, and there is no carbon spotting. Population: 15 in 67+ Red, 0 finer. CAC: 43 in 67, 0 finer (8/16). NGC ID# 22FE, PCGS# 2821
- 3490 1955 Doubled Die Obverse, FS-101, AU53 NGC.** Slight high-point wear hardly softens the design detail, and each side exhibits attractive chocolate-brown patina. A few stray marks are consistent with the grade. Although plentiful in the AU grade range, the 1955 doubled die cent is heavily sought at this level due to the balance of technical quality and affordability. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3491 1955 Doubled Die Obverse, FS-101, AU53 NGC.** The deep chocolate-brown surfaces of this About Uncirculated 1955 doubled die cent are outstanding for the grade, showing smooth, faintly luminous fields with coppery highlights on the worn areas of the devices. Eye appeal surpasses expectations for the grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3492 1955 Doubled Die Obverse, FS-101, AU55 NGC.** This Choice AU example is sharply detailed with glossy chocolate-brown toning. A few stray marks are seen here and there. The 1955 doubled die Lincoln cent is the most famous variety in the series, widely sought-after in all grades. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3493 1955 Doubled Die Obverse, FS-101, AU55 NGC.** Substantial amounts of original luster glow in the fields of this Choice AU example, showing subtle mint-green and bluish hues amid olive-brown toning. The devices are boldly detailed, and eye appeal is outstanding. This coin must be seen in person to be fully appreciated. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3494 1955 Doubled Die Obverse, FS-101, AU58 NGC.** The amount of original luster in the fields of this 1955 doubled die cent affirms the near-Mint grade awarded by NGC. Lavender and bluish hues appear throughout medium brown surfaces, and tiny tinges of coppery-orange luster are seen tucked into the crevices around the obverse relief elements. A superb near-Mint example of this popular *Guide Book* variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3495 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** This is a medium brown representative that displays satin luster and incidental contact. A good strike prevails despite some incompleteness on Lincoln's jaw and cheekbone. FS-101 is a remarkably strong doubled die variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3496 1955-D MS67 Red PCGS.** The design elements of this remarkable Superb Gem are well-detailed and the original red surfaces are virtually pristine, with vibrant mint luster throughout. Population: 34 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22FH, PCGS# 2830
- 3497 1955-D MS67 Red PCGS.** The original red surfaces of this Plus-graded Superb Gem are impeccably preserved, with vibrant mint luster on both sides. The design elements are sharply detailed throughout. Population: 34 in 67 (1 in 67+) Red, 0 finer (8/16). NGC ID# 22FH, PCGS# 2830
- 3498 1958-D MS67+ Red PCGS. CAC.** The final Denver issue of the Wheat Ears reverse type is occasionally seen in MS67 Red but rarely with an added Plus designation; Finer representatives are unknown. The present Plus-designated CAC coin is sharply struck on the obverse and only a trifle weak on the reverse at the PLU in PLURIBUS. There are no mentionable carbon spots or other distractions. PCGS lists nine coin in MS67+ Red (8/16). NGC ID# 22FR, PCGS# 2851
- 3499 1960 Small Date MS67 Red PCGS.** An extremely important opportunity for the Set Registry collector as there are no finer examples certified by PCGS or NGC (8/16). This beauty has rich orange luster with frosty mint surfaces and outstanding eye appeal. Population: 19 in 67 Red, 0 finer (8/16). NGC ID# 22FV, PCGS# 2863
- 3500 1973-S MS67 Red PCGS.** A satiny Superb Gem with rich orange luster, this 1973-S cent is tied for the finest certified and is destined for an advanced Registry set. Population: 15 in 67 Red, 0 finer (8/16). NGC ID# 22GZ, PCGS# 2968
- 3501 1974-S MS67 Red PCGS.** A virtually flawless Superb Gem, this brilliant and lustrous orange cent has pristine surfaces and extraordinary eye appeal. Population: 19 in 67 Red, 0 finer (8/16). NGC ID# 22H5, PCGS# 2978
- 3502 1992-D Close AM, FS-901, AU55 PCGS.** The AM in AMERICA are closely spaced, and the G initial in FG lacks a crossbar. These are the key characteristics of the Close AM subtype, customary for 1992-S proofs but rarely encountered on 1992 and 1992-D business strikes. The PCGS website states "about 15 known" although a greater quantity than that are certified by the service, presumably due to duplicate submissions. A satiny ocean-blue example with glimpses of orange-red within the Lincoln Memorial. PCGS# 391427 Base PCGS# 83099
- 3503 1997 MS68 Red PCGS.** Newly engraved master hubs in use at the Philadelphia Mint meant that coins had much sharper detail than those resulting from the previous hubs. This piece has rich deep orange mint luster with extraordinary amber and violet toning. Population: 17 in 68 Red, 0 finer (8/16). PCGS# 3145

PROOF LINCOLN CENTS

- 3504 1915 PR64+ Red and Brown PCGS.** Tack-sharp with rich matte luster, this high-end Choice Red and Brown proof displays chestnut-tinted orange-gold color on the obverse and deeper auburn-brown and olive hues across the reverse. A few flecks on the obverse are not unusual for the grade. NGC ID# 22KY, PCGS# 3322
- 3505 1937 PR65 Red Cameo PCGS.** Red Cameo proof 1937 cents are elusive in all grades and are rare above the Gem level. This starkly contrasted piece displays a full strike, glimmering mirrored fields, and rich fire-orange color. A small, bluish toning spot appears in the field near Lincoln's profile. Population: 25 in 65 Red Cameo, 31 finer (8/16). NGC ID# 22L5, PCGS# 83338
- 3506 1938 PR66 Red Cameo PCGS.** Thoroughly appealing and reflective, an ideal Registry coin. This Premium Gem Cameo 1938 proof cent displays rich coppery-orange color and modest contrast. Finer Cameos are extremely rare. Population: 29 in 66 (2 in 66+) Red Cameo, 3 finer (8/16). NGC ID# 22L5, PCGS# 83341

**1940 Cent, PR65 Red Cameo
Extremely Rare With Cameo Contrast**

3507 1940 PR65 Red Cameo PCGS. CAC. The certified population of Cameo-designated proof 1940 Lincoln cents is paltry in all grades. This Gem example is among only six such pieces graded by PCGS. The strike is full, and the mirrored fields showcase carbon-free copper-orange coloration. The field-device contrast is most plain on the obverse. Population: 4 in 65 Cameo, 1 finer. CAC: 1 in 65, 1 finer (8/16). NGC ID# 22L7, PCGS# 83347

3508 1942 PR66 Red PCGS. CAC. A high-end golden-orange proof with deeply reflective fields that frame satiny design elements. A few microscopic pepper specks on the top of Lincoln's head are hardly noticed with a loupe. PCGS has seen four numerically finer submissions, but only a single finer coin is listed at CAC. Population: 143 in 66 (3 in 66+) Red, 4 finer. CAC: 34 in 66, 1 finer (8/16). NGC ID# 22L9, PCGS# 3353

3509 1942 PR66 Red PCGS. CAC. A gleaming Red Premium Gem proof with liquidlike fields and sharp motifs. Balanced copper-orange, rose-red, and greenish hues span both sides. PCGS lists only four numerically finer Red proofs. CAC: 35 in 66, 1 finer (8/16). NGC ID# 22L9, PCGS# 3353

3510 1952 PR67 Red Cameo PCGS. The design elements of this spectacular Superb Gem are sharply detailed throughout and the deeply mirrored fields contrast boldly with the frosty devices. The blazing red surfaces are impeccably preserved and eye appeal is terrific. Population: 26 in 67 (1 in 67+) Cameo, 2 finer (8/16). NGC ID# 22LC, PCGS# 83365

3511 1960 Large Over Small Date, FS-101, PR68 Red PCGS. Die doubling is obvious on the BER in LIBERTY. All four date digits are also doubled, most strongly on the 9 and 0. Careful examination confirms that the working die was initially hubbed with a Small Date, followed by a Large Date hubbing. This is an outstanding orange-red specimen with a blush of lemon across the statue of Lincoln inside the Memorial. NGC ID# 22LM, PCGS# 38168 Base PCGS# 3413

**1971-S Lincoln Cent, PR68 Red Cameo
Doubled Die Obverse, FS-101**

3512 1971-S Doubled Die Obverse, FS-101, PR68 Red Cameo PCGS. There are three DDO proof cents from 1971. This is the second scarcest, the difference between 101 and 102 (the scarcest) being the degree of doubling on the motto above Lincoln's head. Strong doubling is seen on the date and LIBERTY. Cameo and Deep Cameo pieces are rarely encountered. This is a full red piece that shows pronounced contrast between the fields and devices. Population: 11 in 68 Cameo, 1 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 22M3, PCGS# 83533 Base PCGS# 83548

**1990 No S Cent, PR67 Red Deep Cameo
Starkly Contrasted**

3513 1990 No S PR67 Red Deep Cameo PCGS. Only 100-150 pieces are believed to have been produced of this popular No S proof. This is a remarkable, strongly contrasted proof that displays even, bright red color over each side. The strike is complete in all areas. The latest Cherrypicker's provides ample evidence why cherrypicking is so popular and lucrative. A regular PR67 cent of this date is worth \$7. A PR67 No S is valued at \$6,250.
From The Twelve Oaks Collection, Part II NGC ID# 274B, PCGS# 93506

TWO CENT PIECES

3514 1864 Small Motto MS65 Brown NGC. After the key-date 1872, the 1864 Small Motto two cent piece is the only true stopper in the series. This piece is sharp and satiny. Burgundy, amber, brown, and olive hues encompass each side. The reverse die is shattered, showing a network of thin cracks throughout the margins. NGC ID# 3XHD, PCGS# 3579

3515 1864 Large Motto MS65 Red NGC. Incredible red mint luster is interspersed with lime-green and yellow to render an impressive Gem two cent piece from this first year of issue. Fully struck. NGC ID# 22N9, PCGS# 3578

3516 1865 Fancy 5 MS66 Red NGC. Flynn-F8-RPD. Potent luster sweeps crisply struck and unabraded rose-gold and apricot surfaces. A dab of steel-gray is noted on the obverse near 9 o'clock. The 18 is lightly repunched. The reverse is strike doubled. NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

3517 1867 Doubled Die Obverse, FS-101, MS61 Brown NGC. Wide doubling is seen on IN GOD WE TRUST. The surfaces are even brown with faint traces of original red still evident around some of the devices. Well, but not fully struck. Census for this variety: 3 in 61 Brown, 11 finer (8/16). NGC ID# 22NB, PCGS# 38271 Base PCGS# 3594

3518 1869 MS65 Red and Brown PCGS. CAC. Unlisted in *Cherrypickers'*, the 1 in the date is lightly recut at its base. This recutting is not as obvious as that of FS-302, which also shows doubling at the top of the 8. The strike is sharp, and the luminous coppery-red surfaces show traces of brown toning that prevent a full Red designation. A few trivial flecks do not detract. Population: 65 in 65 (1 in 65+) Red and Brown, 5 finer. CAC: 26 in 65, 4 finer (8/16). NGC ID# 22ND, PCGS# 3604

3519 1869 Repunched and Misplaced Date, FS-301, MS66 Brown NGC. CAC. The 18 in the date is clearly repunched north, and a digit appears in the denticles below 18. This is one of three repunched date varieties for the issue. Primarily chestnut-brown patina has tinges of coppery-orange color that gives this Premium Gem two cent lovely eye appeal. Smooth and lustrous with strong detail on the olive leaves and wreath. NGC ID# 22ND, PCGS# 38277 Base PCGS# 3603

1872 Two Cent, MS62 Brown
Appealing for the Grade

- 3520 1872 MS62 Brown NGC.** Mint State examples of this key two cent issue are always in demand. This collectible Brown coin displays a solid strike and impressively clean fields considering the grade. Medium brown and chestnut hues span the elements from rim to rim, delivering a pleasant old-time appearance. Census: 17 in 62 Brown, 19 finer (8/16). NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

1864 Two Cent Piece, PR65 Brown
Large Motto Variant

- 3521 1864 Large Motto PR65 Brown PCGS. CAC.** The *Guide Book* estimates 100+ Large Motto proofs were struck, an imprecise number that is less meaningful than the population data, which confirms the scarcity of Gem or finer proofs. This nicely mirrored example displays royal-blue shades that intermix with orange luster for a consistent tan-brown appearance except when viewed at an advantageous angle for full appreciation of the surface quality and underlying colors. Sharply struck, this piece shows a single carbon between the ribbon ends on the reverse. CAC endorsed. Population: 7 in 65 Brown, 10 finer. CAC: 3 in 65, 2 finer (8/16). NGC ID# 274T, PCGS# 3621

1864 Two Cent Piece, PR65 Red and Brown
Large Motto Design

- 3522 1864 Large Motto PR65 Red and Brown NGC.** From a limited mintage of approximately 100 pieces, this first-year proof two cent piece exhibits the more available Large Motto motif. The design elements are sharply detailed and the well-preserved original red surfaces have mellowed to light brown in a few areas. Census: 36 in 65 Red and Brown, 6 finer (8/16). NGC ID# 274T, PCGS# 3622

- 3523 1868 PR66 Brown NGC.** Well-struck, with pleasing light brown and gold patination. This Premium Gem Brown 1868 proof two cent piece is essentially devoid of abrasions with just a couple of small, trivial flecks on each side. Housed in a prior generation holder. Census: 6 in 66 (1 in 66 ★) Brown, 0 finer (8/16). NGC ID# 274X, PCGS# 3636

- 3524 1868 PR65 Red and Brown PCGS.** The well-preserved original red surfaces of this spectacular Gem have mellowed to light brown on the reverse. The design elements are sharply detailed throughout and the obverse fields are brightly reflective. Population: 48 in 65 Red and Brown, 19 finer (8/16). NGC ID# 274X, PCGS# 3637

1870 Two Cent, PR66 Red and Brown
Excellent Original Color

- 3525 1870 PR66 Red and Brown PCGS. CAC.** This CAC-approved Premium Gem represents the top of the Red and Brown grade range at PCGS for the 1870 proof two cent piece. A glance at each side reveals almost full copper-orange coloration but with overlays of olive-green and violet in the central regions. The strike is sharp throughout, and only a few minute specks are observed with a loupe. Population: 26 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 14 in 66, 0 finer (8/16). NGC ID# 274Z, PCGS# 3643

- 3526 1871 PR66 Red and Brown Cameo NGC.** The fields are remarkably bright and mirror-like, a feature that certainly helps establish a reflective background for the noticeably frosted devices on each side. Slightly mellowed, a significant presence of original mint red is visible and especially so when the coin is angled beneath a light. Census: 37 in 66 (1 in 66★), 6 finer (8/16). NGC ID# 22NH, PCGS# 83647

- 3527 1872 PR66 Red and Brown NGC.** The Red and Brown color category comprises the majority of the certified proof 1872 two cent piece population, although even these coins are rare at the Premium Gem level. The present example displays a full strike and reflective fields. Vivid gold, tangerine, copper-red, and plum hues encompass each side. Census: 37 in 66 (1 in 66 ★) Red and Brown, 6 finer (8/16). NGC ID# 2752, PCGS# 3649

1873 Two Cent Piece, PR64 Red and Brown
Closed 3, Final Date

- 3528 1873 Closed 3 PR64 Red and Brown NGC.** Ex: Rev. Dr. James G.K. McClure. A boldly struck final-year proof, showing nearly full red color on the obverse and deeper olive-brown on the reverse. The fields are deeply mirrored, and the eye appeal is excellent. There is a faint planchet lamination above the second S in STATES, and a threadlike strike-through between the D in UNITED and the first S in STATES. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3529 1851 MS66 PCGS. CAC.** The pinkish-gray surfaces of this impressive Premium Gem are well-preserved, with satiny mint luster under the toning. The design elements are well-detailed and eye appeal is quite strong. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 22YX, PCGS# 3664
- 3530 1851-O MS64 PCGS. CAC.** From a mintage of 720,000 pieces, the 1851-O three cent silver piece is a scarce issue in grades above MS64. This attractive Choice example is well-detailed and lustrous, under shades of lavender-gray and greenish-gold toning. NGC ID# 22YY, PCGS# 3665
- 3531 1856 MS64 PCGS. CAC.** This impressive Choice specimen is well-preserved, with speckled highlights of golden-gray and amber toning. The design elements are well-detailed but the mint luster is slightly subdued. Population: 95 in 64 (4 in 64+), 33 finer. CAC: 13 in 64, 18 finer (8/16). NGC ID# 22Z5, PCGS# 3672

1860 Three Cent Silver, MS67 Among the Finest Certified

- 3532 1860 MS67 NGC.** The 1860 three cent silver is a seldom-seen issue, particularly in Gem or finer grades. This piece is one of just three MS67 coins at NGC (one in MS67 ★) with none finer; PCGS shows one coin in this grade, also with none finer (8/16). This piece displays delicate, satiny luster with blended shades of lavender-gold and olive-gray toning over each side. Trivial softness is noted on the central shield, as usual, but the strike is otherwise well-executed. NGC ID# 5LDM, PCGS# 3678
- 3533 1862/1 MS66+ PCGS.** First documented in the 1960s, this long-popular variety shows the remnant of a 1 within the loop of the 2 in the date. This high-end Premium Gem example displays bright silver surfaces with semireflective fields. A hint of light golden toning emerges from the left reverse rim. Population: 80 in 66 (5 in 66+), 16 finer (8/16). NGC ID# CBR7, PCGS# 3681
- 3534 1871 MS66 NGC.** Ex: Eliasberg. This delightful Premium Gem offers sharply detailed design elements and well-preserved prooflike fields, under vivid shades of pale gold and cerulean-blue toning. Census: 34 in 66 (1 in 66+, 2 in 66★), 19 finer (8/16). NGC ID# 22ZM, PCGS# 3692

THREE CENT NICKELS

- 3535 1873 Open 3 MS65 PCGS.** A well-preserved example with satiny luster and green-tinted champagne toning. The obverse is sharp, although the reverse was struck with a partially grease-filled die, resulting in weakness of the Roman numeral III and portions of the wreath. Population: 60 in 65 (9 in 65+), 4 finer (8/16). NGC ID# 22NR, PCGS# 3740
- 3536 1875 MS66 PCGS.** While not rare in the strict sense of the word, business strike three cent nickels are an unusual find when compared to their proof counterparts. This is a lovely gray-toned example with softly frosted mint luster. Remarkably clean surfaces. Population: 29 in 66 (5 in 66+), 4 finer (8/16). NGC ID# 22NS, PCGS# 3743
- 3537 1882 MS65 PCGS.** This impressive Gem offers well-detailed design elements and well-preserved lustrous surfaces, under attractive shades of greenish-gold and lavender toning. Overall eye appeal is outstanding. Population: 20 in 65, 21 finer (8/16). NGC ID# 275D, PCGS# 3750

PROOF THREE CENT NICKELS

- 3538 1866 PR66 Cameo NGC.** Sharp, frosted devices appear to float over the smooth, glassy reflectivity in the fields. There are no outwardly distracting problems, but a small lintmark is noted from Liberty's lower hair curl to the rim. Census: 22 in 66 Cameo (2 in 66+, 6 in 66★), 2 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5777. NGC ID# 275L, PCGS# 83762
- 3539 1868 PR66 Cameo PCGS. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements and deeply mirrored fields that create a bold cameo effect with the frosty devices. The well-preserved surfaces show highlights of greenish-gold toning. Population: 25 in 66 (1 in 66+) Cameo, 1 finer. CAC: 16 in 66, 0 finer (8/16). NGC ID# 275N, PCGS# 83764

1868 Three Cent Nickel, PR67 Cameo Superb Contrast and Eye Appeal

- 3540 1868 PR67 Cameo NGC.** This high-end Cameo proof 1868 three cent nickel is beautifully contrasted with little or no toning. The design elements are sharply defined throughout with no visible carbon in the fields. About 30 degrees of clockwise die rotation is noted. Census: 13 in 67 Cameo (1 in 67+), 0 finer (8/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5785. NGC ID# 275N, PCGS# 83764
- 3541 1869 PR66 Ultra Cameo NGC.** Razor-sharp definition is evident on the design elements of this delightful Premium Gem and the deeply mirrored fields contrast profoundly with the frosty devices. The virtually pristine surfaces show subtle hints of pale gold toning. Census: 15 in 66 Ultra Cameo (1 in 66+, 1 in 66★), 5 finer (8/16). NGC ID# 275P, PCGS# 93765

1875 Three Cent Nickel, PR66 Cameo None Certified in Numerically Finer Grades

- 3542 1875 PR66 Cameo PCGS. CAC.** From a Guide Book mintage of 700 pieces, this impressive Premium Gem displays sharply detailed, frosty design elements and deeply mirrored fields, with bold cameo contrast. The well-preserved surfaces enhance the terrific eye appeal. Population: 11 in 66 (1 in 66+) Cameo, 0 finer. CAC: 6 in 66, 0 finer (8/16). NGC ID# 22NV, PCGS# 83771
- 3543 1876 PR66 Cameo NGC. CAC.** From a reported mintage of 1,150+ proofs, this Premium Gem three cent nickel enjoys profoundly reflective mirrors set against frosted motifs. Preservation is seemingly unimprovable. Census: 33 in 66 Cameo (3 in 66★, 1 in 66+★), 7 finer. CAC: 10 in 66, 0 finer (8/16). NGC ID# 275W, PCGS# 83772

3544 1876 PR66 Cameo PCGS. CAC. Struck from heavily lapped dies, as seen by the attenuated leaves on the reverse wreath. The surfaces are completely brilliant. The fields show exceptional depth of reflectivity that establishes the background for the frosted devices which yields the cameo contrast. Population: 24 in 66 Cameo, 3 finer. CAC: 11 in 66, 0 finer (8/16). NGC ID# 275W, PCGS# 83772

3545 1876 PR66 Ultra Cameo NGC. For type purposes this 1876 would be hard to beat. Each side is brilliant, the fields are deeply mirrored and the devices heavily frosted. A very impressive three cent nickel and seldom encountered so fine. Census: 8 in 66 Ultra Cameo, 3 finer (8/16). NGC ID# 275W, PCGS# 93772

3546 1878 PR67 Cameo PCGS. CAC. A nicely contrasted proof despite some faint golden toning on the obverse. The raised elements are sharply struck and frosty, where a tiny lint mark on the neck is the only notation. The 1878 proofs are rare any finer, with just three Cameo pieces reported in finer numerical grades by PCGS and NGC combined. Population: 35 in 67 (5 in 67+) Cameo, 1 finer. CAC: 29 in 67, 0 finer (8/16). NGC ID# 275Y, PCGS# 83774

1879 Nickel Three Cent, PR68 Extremely Rare This Fine

3547 1879 PR68 NGC. The proofs of this issue were produced from three obverse dies. This die shows filling on neither the 8 nor the 9, and the date is further to the right than on other dies. The 9 is marginally higher and smaller than the remaining digits. The left serif of the 1 is over a space between two dentils. The reverse die, also used on the 1880 three cent nickels, shows fragmented ribbon and leaf details.

Only one word is needed to describe the brilliance and light original champagne-gold color of this remarkable Superb Gem proof three cent nickel: Wow! The 1879 proof is just another date in the three cent nickel series, not overly scarce, even in grades as high as PR66. But the parade slows above that level, and stops at PR68. If only the finest will do, consider this piece. Census: 5 in 68 (1 in 68 ★), 0 finer (8/16).

Ex: FUN Signature (Heritage, 1/2006), lot 1183; Denver Signature (Heritage, 8/2006), lot 533; Long Beach Signature (Heritage, 2/2008), lot 3332. NGC ID# 275Z, PCGS# 3775

3548 1881 PR66 Ultra Cameo NGC. NGC has certified only seven Ultra Cameo examples of the proof 1881 three cent nickel in total (8/16). This Premium Gem displays a full strike and impressive field-device contrast, unhindered by toning. A threadlike lint mark appears at the tip of Liberty's nose, as struck. Census: 2 in 66 Ultra Cameo, 3 finer (8/16). PCGS# 93777

3549 1881 PR66 Ultra Cameo NGC. Champagne-gold and gray toning add a hint of natural patina to this deeply mirrored and boldly contrasted Premium Gem proof — a mere speckling on the obverse, with the reverse evenly toned a delightful pale-gold color. The strike is full on the wreath and bowknot, while intense frost on the obverse portrait joins the sharp strike. Fewer than a dozen 1881 Ultra or Deep Cameo pieces exist between the two services in PR66 or finer grades. Census: 2 in 66 Ultra Cameo, 3 finer (8/16). PCGS# 93777

3550 1883 PR67 PCGS. CAC. A magnificent Superb Gem proof from a mintage of 6,609 pieces, this coin exhibits sharply detailed design elements and impeccably preserved surfaces, with deeply mirrored fields and a few hints of greenish-gold toning. Population: 84 in 67 (6 in 67+), 4 finer. CAC: 48 in 67, 2 finer (8/16). NGC ID# 2765, PCGS# 3779

1886 Three Cent Nickel, PR68 Top-Grade Registry Coin

3551 1886 PR68 PCGS Secure. Ex: TDP Collection. The 1886 three cent nickel was a proof-only date with a mintage of 4,290 pieces. Three PR68 coins, one here offered, are at the top of the PCGS population of non-Cameos, and neither PCGS nor NGC report a Cameo or Deep Cameo finer than PR67+ (8/16). This coin displays modestly reflective fields and thickly frosted, razor-sharp devices. Shimmering ice-blue and champagne hues deliver abundant visual appeal. NGC ID# 2768, PCGS# 3782

3552 1887/6 PR66 Cameo PCGS. CAC. FS-302. Strong Overdate. Both 8's are repunched and the remains of an undertype 6 are plainly evident beneath the 7 in the date. The well-detailed design elements are unusually frosty, creating bold Cameo contrast with the mirrored fields. Population: 68 in 66 (4 in 66+) Cameo, 10 finer. CAC: 18 in 66, 5 finer (8/16). NGC ID# 276A, PCGS# 83784

3553 1887 PR67 NGC. CAC. This is the sole finest non-Cameo proof 1887 three cent nickel endorsed by CAC (8/16). The devices are fully brought up, and the brilliant surfaces offer ample reflectivity in the fields and satin luster on the devices. Tied for the finest non-Cameo certified. Census: 5 in 67, 0 finer. CAC: 1 in 67, 0 finer (8/16). NGC ID# 276A, PCGS# 3783

1889 Three Cent Nickel, PR67+ Elusive Cameo Specimen

3554 1889 PR67+ Cameo PCGS. CAC. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The impeccably preserved surfaces show highlights of pale gold toning. Population: 25 in 67 (3 in 67+) Cameo, 1 finer. CAC: 15 in 67, 1 finer (8/16). NGC ID# 22NW, PCGS# 83786

SHIELD NICKELS

3555 1871 MS65 NGC. Soft champagne-gold color covers the lustrous surfaces of this Gem Shield nickel, accented with patches of deep gray on the reverse. Well-struck devices and nicely preserved surfaces are noted on each side. Census: 17 in 65, 5 finer (8/16). NGC ID# 22P5, PCGS# 3798

3556 1871 MS65+ PCGS. CAC. Pleasing shades of orange-gold and lavender toning blanket the well-preserved surfaces of this delightful Premium Gem, with well-detailed design elements and an extensive network of faint die cracks on the obverse. Vibrant mint luster adds to the outstanding eye appeal. Population: 34 in 65 (1 in 65+), 13 finer. CAC: 13 in 65, 8 finer (8/16). NGC ID# 22P5, PCGS# 3798

**1871 Shield Nickel, MS66
None Certified Finer**

3557 1871 MS66 PCGS. This softly frosted, champagne-toned Premium Gem 1871 Shield nickel ranks among the finest certified. There are no abrasions observed, although mild strike weakness is seen on the central shield and on the right-hand wreath leaves. Peripheral die cracks appear along the lower obverse. Population: 14 in 66 (2 in 66+), 0 finer (8/16). NGC ID# 22P5, PCGS# 3798

3558 1876 MS66 PCGS. The 1876 Shield nickel had a mintage in excess of 2.5 million coins, but survivors are rare above the Gem grade level. This Premium Gem example is well-struck, with satiny golden-gray luster and subtle reflectivity in the fields. Some strike doubling is evident on the date, not to be confused with a repunched date or one of the doubled die varieties known for this issue. Population: 18 in 66 (2 in 66+), 0 finer (8/16). NGC ID# 22PB, PCGS# 3805

3559 1883/2 FS-303 AU55 PCGS. The late die state with a cud connecting the bases of the 18 in the date with the rim. Light wheat-gold and cream-gray toning visits partly lustrous and well defined surfaces. The fields display a few unobtrusive abrasions. PCGS# 38414 Base PCGS# 3813

PROOF SHIELD NICKELS

**1866 Shield Nickel, PR65 Cameo
Popular Rays Design**

3560 1866 Rays PR65 Cameo PCGS. CAC. A delightful Gem representative of the short-lived Rays design, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show a few subtle hints of greenish-gold toning and overall eye appeal is terrific. Population: 36 in 65 Cameo, 37 finer. CAC: 10 in 65, 12 finer (8/16). NGC ID# 276G, PCGS# 83817

3561 1867 No Rays PR65 PCGS. Always popular as the first year of the No Rays design, this impressive Gem displays sharply detailed design elements and well-preserved surfaces under pleasing shades of greenish-gold and lavender toning. Population: 33 in 65, 11 finer (8/16). NGC ID# 4T4L, PCGS# 3821

3562 1868 PR66 PCGS. CAC. Non-Cameo proof 1868 Shield nickels are rarely seen this fine and none are finer at PCGS or CAC (8/16). The present coin displays full detail and deeply mirrored fields with warm champagne toning. The obverse has perceptible field-device contrast. Population: 14 in 66, 0 finer. CAC: 5 in 66, 0 finer (8/16). NGC ID# 276J, PCGS# 3822

3563 1872 PR66+ PCGS. CAC. A Plus-graded Premium Gem proof from a mintage of 950 pieces, this coin exhibits sharply detailed design elements and well-preserved surfaces with deeply reflective fields. Population: 77 in 66 (4 in 66+), 5 finer. CAC: 21 in 66, 1 finer (8/16). NGC ID# 22P6, PCGS# 3826

3564 1878 PR64 PCGS. Golden toning warms the mirrored surfaces of this Choice proof 1878 Shield nickel, while the design elements are fully defined. Very few lines are seen in the fields. Eye appeal is pleasing for the grade. NGC ID# 276V, PCGS# 3832

3565 1878 PR65 NGC. Hints of blue and violet toning appear on the light gray surfaces of this reflective Gem proof. Like many examples of this issue, the fields are only slightly mirrored but the design definition is boldly rendered. A few trivial spots prevent a higher grade. NGC ID# 276V, PCGS# 3832

3566 1881 PR67 NGC. Lilac and pale-gold shades embrace the moderately reflective fields of this Superb Gem proof nickel, with sharp definition on all of the elements except for the horizontal shield lines immediately beneath the shield apex. Proofs are always in demand to supplement the shortage of high-grade business strikes — especially when visually akin to a prooflike circulation strike such as this radiant example. Census: 24 in 67 (1 in 67+, 1 in 67★, 1 in 67+★), 2 finer (8/16). NGC ID# 5L6U, PCGS# 3836

LIBERTY NICKELS

3567 1890 MS66 PCGS. Cream-gray luster illuminates satiny surfaces on this Premium Gem 1890 Liberty nickel. Above-average detail appears on the stars and wreath, particularly to the left of the bowknot. Pieces grading this fine are rare, and anything finer is almost unobtainable. Population: 25 in 66 (7 in 66+), 1 finer (8/16). NGC ID# 22PM, PCGS# 3851

3568 1890 MS66 PCGS. Shades of pale gold and lavender-gray toning enhance the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements and ample mint luster underneath. Population: 25 in 66 (7 in 66+), 1 finer (8/16). NGC ID# 22PM, PCGS# 3851

3569 1896 MS65 PCGS. CAC. The satiny surfaces display pale shades of champagne-gold and subtle lilac, while the strike is sharp except at stars 1 to 3 and at the lower left wreath and bowknot. Only tiny marks at the neck and chin are visible under magnification. CAC endorsed — a popular date, not often seen this nice. Population: 68 in 65 (2 in 65+), 23 finer. CAC: 15 in 65, 11 finer (8/16). NGC ID# 277B, PCGS# 3857

**1897 Nickel, Colorful MS66+
Only a Single Coin Finer at PCGS**

3570 1897 MS66+ PCGS. As are most Liberty nickel issues, the 1897 is seldom seen in Premium Gem condition and extremely rare any finer. This Plus-graded coin is an ideal balance of quality and affordability. The corn ear to the left of the wreath bow is partially defined, and each side displays lovely champagne border toning that surrounds rainbow hues and sky-blue accents in the interiors. There are no mentionable abrasions. Population: 24 in 66 (5 in 66+), 1 finer (8/16). NGC ID# 22PN, PCGS# 3858

3571 1903 MS66+ PCGS. This is a sharp high-end example with softly frosted golden-gray luster and unmarked surfaces. PCGS lists only five MS67 coins finer (8/16), making this Plus-graded Premium Gem appealing for type purposes. NGC ID# 277E, PCGS# 3864

3572 1904 MS66+ PCGS. CAC. The 1904 Liberty nickel is virtually unobtainable in grades above MS66. This Plus-graded Premium Gem offers well-detailed design elements and vibrant mint luster, under pleasing shades of pale-gold and lavender-gray toning. PCGS has graded only one finer example (8/16). NGC ID# 277F, PCGS# 3865

3573 1908 MS66 PCGS. This attractive Premium Gem is sharply detailed in most areas, but a touch of the typical softness is evident on the lower wreath. The well-preserved surfaces radiate satiny mint luster, under shades of lavender-gray and champagne-gold toning. Population: 26 in 66 (5 in 66+), 0 finer (8/16). NGC ID# 24FR, PCGS# 3869

3574 1910 MS66 NGC. A wonderfully well-preserved Premium Gem with luxurious luster and colorful plum-green, rose, and lemon-yellow patina. Immensely appealing, this 1910 Liberty nickel is conditionally scarce this fine and exceedingly rare in higher grades. Census: 14 in 66 (1 in 66 ★), 1 finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2005), lot 1690; Dallas Signature (Heritage, 12/2005), lot 289; Long Beach Signature (Heritage, 9/2006), lot 875. NGC ID# 277L, PCGS# 3871

**1912-D Liberty Nickel, MS66
Attractive Luster and Color**

3575 1912-D MS66 PCGS. The well-preserved surfaces of this delightful Premium Gem are attractively toned in shades of autumn-gold and lavender-gray, with vibrant mint luster underneath. The design elements are well-detailed, with just a touch of softness on some star centers and the lower wreath. Population: 46 in 66 (4 in 66+), 0 finer (8/16). NGC ID# 277P, PCGS# 3874

3576 1912-S AU50 PCGS. A well-detailed AU example of this semikey San Francisco issue, showing olive-gray coloration and smooth surfaces. The 1912-S boasts the lowest mintage of the series with only 238,000 pieces to its name. Enough examples survive to make this date collectible. NGC ID# 277R, PCGS# 3875

**1912-S Nickel, Toned MS66
Among the Top-Graded Examples**

3577 1912-S MS66 PCGS. The 1912-S Liberty nickel is a challenge both in MS66 and with a sharp strike. This piece ranks among the finest certified by PCGS, and the lower-left portion of the wreath shows partial definition. A single tick on Liberty's cheek prevents a Plus designation. Softly blended multicolor hues coat both sides of this satiny semikey. Population: 47 in 66 (1 in 66+), 0 finer (8/16). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3578 1883 No Cents PR67 Cameo PCGS. A delightful Superb Gem from the first year of the Liberty design, with the famous No CENTS reverse. The well-detailed, frosty design elements contrast boldly with the deeply mirrored fields, under subtle shades of pale gold toning. Population: 21 in 67 Cameo, 0 finer (8/16). NGC ID# 22PU, PCGS# 83878

3579 1885 PR65 PCGS. An attractive Gem representative of this key date, with sharply detailed design elements throughout and well-preserved, hazily reflective fields, under shades of pale gold and lavender-gray toning. Eye appeal is outstanding. NGC ID# 277T, PCGS# 3883

3580 1885 PR65 ★ NGC. Exquisite lemon-gold, cherry-red, powder-blue, and olive-green toning provides outstanding eye appeal. Fully struck and flashy. One slender vertical strike-through reaches the 5 in the date. A key date due to its business issue rarity. The Star designation is elusive on 1885 proofs, present on only 11 specimens of the date (8/16).

Ex: Chicago Central States Signature (Heritage, 4/2013), lot 1496. NGC ID# 277T, PCGS# 3883

3581 1885 PR64 Cameo PCGS. This is a razor-sharp, highly reflective example of this popular proof Liberty nickel issue in a grade that the average enthusiast can acquire. Warm golden toning appears over each side, accentuating the stark field-device contrast. A few stray lines and marks are hardly noticed with a loupe. NGC ID# 277T, PCGS# 83883

3582 1893 PR65 Deep Cameo PCGS. The level of cameo contrast on this Gem proof 1893 Liberty nickel is captivating, accentuated by warm golden toning that enlivens the frosty devices. The strike is razor-sharp, and were it not for a few stray lines on the obverse portrait, an even finer grade might have been achieved. Deep Cameo 1893 proofs are rare at any numeric level. Population: 2 in 65 Deep Cameo, 6 finer (8/16). NGC ID# 2783, PCGS# 93891

3583 1907 PR67 PCGS. The hard nickel planchets caused no end of die problems for the Mint when coining both circulation strikes and proofs, yet this untuned Superb Gem proof seems wholly unaffected by such difficulties. The strike is pinpoint sharp, and the reflective fields frame a smooth, unmarked portrait of Liberty. The reverse displays equally reflective surfaces and a frosted wreath, with only slight haziness at the center. Neither PCGS nor NGC reports a coin in finer numerical grade. Population: 26 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 278H, PCGS# 3905

BUFFALO NICKELS

3584 1913 Type One MS67+ PCGS. CAC. This magnificent Plus-graded Superb Gem represents the short-lived Type One design, with sharp definition on all design elements and impeccably preserved lustrous surfaces. Shades of greenish-gold and lavender toning add to the outstanding eye appeal. PCGS has graded 17 numerically finer examples (8/16). NGC ID# 22PW, PCGS# 3915

3585 1913-S Type Two MS63 PCGS. CAC. Excluding the various mint errors and varieties, the 1913-S Type Two Buffalo nickel is the dominant key date in the series even in low circulated grades. This CAC-approved Select Mint State example displays blended pastel shades of rainbow toning over satiny luster. Slight weakness on the bison's shoulder and the hair above the Indian's braid is typical of this issue's strike. NGC ID# 22R3, PCGS# 3923

**1913-S Buffalo Nickel, MS65
Popular Type Two Issue**

3586 1913-S Type Two MS65 PCGS. CAC. From a mintage of 1.2 million pieces, the 1913-S Type Two Buffalo nickel is seldom encountered in grades above the MS65 level. This attractive Gem exhibits bold definition on all design elements and the lustrous surfaces show only the most insignificant signs of contact. PCGS has graded 39 numerically finer examples (8/16). NGC ID# 22R3, PCGS# 3923

3587 1914-D MS65 NGC. The 1914-D is available through MS64, but the population reduces at the Gem level and anything finer is scarce. This golden-toned MS65 example displays luminous satin luster and well-preserved surfaces. The bison's shoulder and the hair above the Indian's braid show minor strike weakness. NGC ID# 22R5, PCGS# 3925

**1914-D Nickel, MS66
Few Exist Any Finer**

3588 1914-D MS66 PCGS. Seldom seen any finer, the 1914-D Buffalo nickel is conditionally scarce because the series was not widely collected until the 1930s. By then, most early-date examples were in lesser grades with few coins numismatically saved. This sharply struck example glistens with smooth and attractive mint luster, untuned save for a hint of mellow gold at the rims. Population: 54 in 66 (4 in 66+), 8 finer (8/16). NGC ID# 22R5, PCGS# 3925

**1915-D Buffalo Nickel, MS66
Sharply Defined, Well-Preserved**

3589 1915-D MS66 PCGS. Strong definition on the hair and braid knot join well-defined musculature on the bison as immediate evidence of the sharp strike — a welcome departure for the 1915-D, which is seldom well-struck. The boldly defined elements suit the steely-nickel patina and pervasive, satiny mint luster. This Denver issue seldom exceeds the Premium Gem level. Population: 40 in 66 (3 in 66+), 3 finer (8/16). NGC ID# 22R8, PCGS# 3928

3590 1917-S MS64 PCGS. This attractive Choice example displays well-detailed design elements, with just a touch of softness on the hair above the braid and the bison's head. The lightly marked, lustrous surfaces show hints of emerald-green and ice-blue toning. NGC ID# 22RF, PCGS# 3936

3591 1918/7-D FS-101 Fine 15 PCGS. A silver-gray key date representative. The small half-moon openings in the 8 give away the 7 underdigit, along with the broad, flat top of the crossbar. Lightly marked overall, though we do note hair-thin obverse marks at 6 o'clock and on the cheek. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1918-S Buffalo Nickel, MS64
Bold Obverse Die Clashing**

3592 1918-S MS64 PCGS. This San Francisco Mint issue is challenging in any Mint State grade, but especially in near-Gem condition or finer. Struck from widely spaced dies (as is normal for the issue), the coin shows an incomplete strike on the high points, yet nice satiny luster and appealing pale-gold patina provide plenty of eye appeal. Strong die clashing on the obverse frames the Indian's portrait. PCGS reports just 40 numerically finer 1918-S nickels (8/16). NGC ID# 22RK, PCGS# 3940

3593 1924 MS66 PCGS. This Premium Gem is duly deserving of the grade, showing luminous champagne-tinted luster and remarkable preservation. Slight strike weakness is observed on the hair above the Indian's braid and on the bison's shoulder. PCGS has seen only seven Superb Gems finer (8/16). NGC ID# 22RX, PCGS# 3951

3594 1926-S AU53 NGC. With a sub-million-coin mintage (970,000 pieces), the 1926-S Buffalo nickel is a better date in all grades. This slate-gray example displays pleasing detail with some luster remaining in the fields. Pleasing for the grade. NGC ID# 22S7, PCGS# 3959

3595 1928-S MS65 PCGS. CAC. Delicate shades of ice-blue and champagne-gold toning visit the well-preserved surfaces of this impressive Gem, with vibrant mint luster and sharply detailed design elements that contribute to the terrific eye appeal. Population: 82 in 65 (5 in 65+), 11 finer. CAC: 19 in 65, 3 finer (8/16). NGC ID# 22SD, PCGS# 3965

3596 1934-D MS66 PCGS. Faintly patterned golden toning accents the satiny surfaces of this Premium Gem 1934-D Buffalo nickel. Slight strike weakness is seen on the bison's shoulder and the hair above the Indian's braid, as usual. None are numerically finer at either service. Population: 87 in 66 (5 in 66+), 0 finer (8/16). NGC ID# 22SM, PCGS# 3973

**1934-D Nickel, Iridescent MS66
Rare Top-Grade CAC Coin**

3597 1934-D MS66 PCGS. CAC. The 1934-D is an available date through MS65, but Premium Gems are scarce and nothing is certified finer. This CAC-endorsed Registry coin displays iridescent golden luster atop satiny, well-preserved surfaces. Die erosion in the fields and several cracks across the Indian's portrait denote a late die state, although the devices are nonetheless well-defined. Population: 87 in 66 (5 in 66+), 0 finer. CAC: 22 in 66, 0 finer (8/16). NGC ID# 22SM, PCGS# 3973

3598 1935-D MS66+ PCGS. Plentiful in MS66, the 1935-D Buffalo nickel becomes rare in finer condition. This Plus-graded coin displays satiny luster with iridescent champagne toning. Slight weakness is seen on the hair above the Indian's braid and on the bison's shoulder, as usual. PCGS reports nine finer representatives (8/16). NGC ID# 22SP, PCGS# 3975

3599 1936-S MS67 PCGS. A well-struck Superb Gem from worn dies with metal flowlines in the fields. Light champagne toning graces each side, providing excellent eye appeal along with the well-preserved nature of the surfaces. The 1936-S is scarce this fine and unknown finer. Population: 84 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 22SU, PCGS# 3979

3600 1938-D MS67+ PCGS. CAC. A Plus-graded Superb Gem from the final date of the Buffalo design, this coin displays sharply detailed design elements and vibrant mint luster, under shades of emerald-green and ice-blue toning. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 22T2, PCGS# 3984

PROOF BUFFALO NICKELS

3601 1936 Type Two — Brilliant Finish PR66 PCGS. A delightful Premium Gem proof, with the more popular Type Two, Brilliant Finish, this coin exhibits sharply detailed design elements and reflective fields under delicate shades of pale gold and lavender toning. Eye appeal is outstanding. NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, PR67
Popular Brilliant Finish**

3602 1936 Type Two — Brilliant Finish PR67 PCGS. CAC. The Satin Finish proofs produced earlier in the year were not as well-received as the Mint had hoped they would be when proof set offerings were resumed in 1936. As a result, the Mint soon switched to the Brilliant finish, which was much more popular. This spectacular Superb Gem is fully struck and impeccably preserved, with a few subtle hints of pale gold toning. PCGS has graded eight numerically finer examples (8/16). NGC ID# 278Y, PCGS# 3995

3603 1937 PR65 PCGS. CAC. A well-struck Gem representative, this proof 1937 nickel displays highly lustrous, silver-white surfaces, providing the piece with a tremendous appearance. The 1937 is the second and final year of issue for the later-date proof Buffalo nickels, although circulation strikes continued at the Denver Mint into 1938. NGC ID# 278Z, PCGS# 3996

1937 Buffalo Nickel, PR67+

3604 1937 PR67+ PCGS. CAC. This Plus-graded Superb Gem Buffalo nickel exhibits fully detailed design elements throughout and the fields are deeply mirrored, but the all-brilliant finish allows only minimal field/device contrast. The essentially brilliant surfaces are impeccably preserved and eye appeal is tremendous. PCGS has graded 33 numerically finer examples (8/16). NGC ID# 278Z, PCGS# 3996

**1937 Buffalo Nickel, PR67+
Hint of Light Toning**

3605 1937 PR67+ PCGS. CAC. From a proof mintage of 5,769 pieces, this Plus-graded Superb Gem exhibits razor-sharp definition on all design elements, with impeccably preserved surfaces and deeply reflective fields. A few hints of pale gold toning enhance the terrific eye appeal. PCGS has graded 33 numerically finer examples (8/16). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

3606 1938-S MS67 Full Steps PCGS. This softly frosted, champagne-tinted Superb Gem is tied for the finest in Full Steps at either service. The preservation is outstanding, and faint metal flowlines in the obverse fields add a lovely shimmer to the luminous surfaces. An essential Registry Set acquisition. Population: 13 in 67 Full Steps, 0 finer (8/16). NGC ID# 22T6, PCGS# 84002

3607 1940-S MS67 Full Steps PCGS. This lustrous, beautifully preserved Superb Gem is among the finest certified, an ideal Registry candidate. A hint of iridescence appears on each side. This piece was struck from lapped dies, with networks of die polishing lines in the fields on each side that present a unique, shimmering visual affect when rotated beneath a light. Population: 21 in 67 (2 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22TF, PCGS# 84009

3608 1941 MS67+ Full Steps PCGS. Attractive shades of lavender, cerulean-blue, and greenish-gold toning enhance the impeccably preserved surfaces of this Plus-graded Superb Gem, with sharply detailed design elements that show Full Steps definition on Monticello. Population: 55 in 67 (17 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22TG, PCGS# 84010

3609 1942-P Type Two MS67+ Full Steps PCGS. 30th Anniversary Green Label Holder. Numerous variations of a repunched mintmark are known for this issue, the present showing the recutting on the bottom and left edge of the upright of the P. This silver-alloy 1942-P nickel is conditionally scarce in this lofty grade where it ranks among the finest certified. The strike is bold, and the frosty surfaces show warm golden toning. Population: 61 in 67 (6 in 67+) Full Steps, 0 finer (8/16). NGC ID# 22TM, PCGS# 84016

1945-D Jefferson Nickel, MS68 Tied for Finest at PCGS

3610 1945-D MS68 PCGS. This magnificent Jefferson nickel was struck in wartime silver composition, as indicated by the large mintmark above Monticello. The design elements are sharply detailed and the virtually flawless lustrous surfaces display highlights of autumn-gold and ice-blue toning. Population: 2 in 68, 0 finer (8/16). NGC ID# 22TY, PCGS# 4026

3611 1948 MS66 Full Steps PCGS. Delicate shades of greenish-gold toning visit the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed, with Full Steps definition on Monticello. Population: 16 in 66 (1 in 66+) Full Steps, 0 finer (8/16). NGC ID# 22U8, PCGS# 84034

3612 1954-S/D FS-501 MS66 PCGS. The base and upright of the Denver mintmark is unmistakable on this early die state Premium Gem. The steps of Monticello and the hair near the ear show softness, but the surfaces are lustrous and unabraded. Light rose and olive toning furthers the eye appeal. NGC ID# 22UU, PCGS# 38517 Base PCGS# 4055

PROOF JEFFERSON NICKELS

3613 1955 PR69 Ultra Cameo NGC. A top-grade Registry coin with none finer at either service, this proof 1955 Jefferson nickel displays essentially flawless preservation of complete mirroring in the fields, while the fully struck devices exhibit contrasting frost-white luster. Census: 14 in 69 Ultra Cameo, 0 finer (8/16). NGC ID# 22YF, PCGS# 94187

3614 1959 PR68 Deep Cameo PCGS. The sharply detailed, heavily frosted design elements of this delightful Jefferson nickel create a stunning cameo effect against the deeply mirrored fields. The untuned surfaces are impeccably preserved. Population: 23 in 68 (1 in 68+) Deep Cameo, 1 finer (8/16). NGC ID# 27A9, PCGS# 94191

3615 1960 PR69 Ultra Cameo NGC. Conditionally rare and tied for the finest Ultra Cameo certified, this 1960 proof nickel showcases incredible white-on-black contrast and virtually unimprovable preservation. The fields are more deeply mirrored than a crystal pond. Census: 9 in 69 Ultra Cameo, 0 finer (8/16). NGC ID# 22YJ, PCGS# 94192

3616 1971 No S, FS-501, PR67 Cameo PCGS. A collectible yet high-end Cameo example of this popular *Guide Book* variety, lacking the S mintmark in the field below the date. The strike is fully rendered throughout, and the fields are liquidly mirrored. Only a few faint lines on the reverse prevent an even finer grade. *From The Twelve Oaks Collection, Part II* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

3617 1971 No S, FS-501, PR68 Cameo PCGS. A lovely gold-tinted Superb Gem Cameo example of this popular *Guide Book* variety. A single microscopic tick below Jefferson's eye is all that prevents an even finer grade, and the field-device contrast is nearly bold enough for a Deep Cameo designation. Few finer coins are certified. Population: 78 in 68 Cameo, 15 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

3618 1971 No S, FS-501, PR68 Cameo PCGS. A fully struck high-end No S proof, showing jet-black fields that have a blush of milky champagne toning, which attests to the originality of the surfaces. Cameo contrast is superb, and the preservation is outstanding. Population: 81 in 68 Cameo, 15 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

3619 1971 No S, FS-501, PR68 Cameo PCGS. A hint of pale champagne color warms the starkly contrasted surfaces of this high-end Cameo 1971 No S proof nickel. The design elements are needle-sharp, and the eye appeal is correspondingly strong. Few finer representatives are reported by the grading services. Population: 81 in 68 Cameo, 15 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

EARLY HALF DIMES

3620 1796 LIKERTY, V-1, LM-1, R.3, VG10 PCGS. Complete outlines of the central motifs appear on each side. The legends are legible with areas of softness on 17 and around various parts of the reverse. Olive and steel-gray patina covers this well-circulated 18th century type coin. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 4254

1797 Half Dime Type Coin, VF30 V-2, LM-1, 15 Stars

3621 1797 15 Stars, V-2, LM-1, R.3, VF30 NGC. Both 7s in the date are small on this plentiful 15 Stars variety. The present coin shows excellent detail for the grade with lightly abraded lavender-gray surfaces. The border dentils are complete around the reverse but slightly weak on the obverse above LIBERTY. Eye appeal is not reduced. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

3622 1800 V-1, LM-1, R.3 — Planchet Flaw — PCGS Genuine. XF Details. A split in the planchet between star 7 and the L in LIBERTY is the reason (or one of the reasons) that PCGS declined to assign a numeric grade. Sharp definition remains on Liberty's hair strands. The surfaces are finely granular with some minor pitting in the right obverse field and an area of corrosion at the left obverse rim. A steel-blue example, with traces of deep-gray toning in the recesses. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

3623 1803 Large 8, V-1, LM-2, R.4, Fine 12 PCGS. The design elements are well-detailed on this mid-level circulated 1803 Draped Bust half dime, although the reverse shows uneven weakness around the borders and above the eagle. The surfaces show light marks and lines beneath a loupe but display medium slate-gray color to the naked eye. *From The Twelve Oaks Collection, Part II* NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

BUST HALF DIME

1832 V-2, LM-12 Half Dime, MS66
Rich Obverse and Reverse Toning

- 3624** 1832 V-2, LM-12, R.2, MS66 NGC. Star 12 is recut, and the F in OF is recut, identifying the LM-12 die pair. This piece has central weakness as usual, although exhibits frosty luster beneath rich blue, gold and iridescent toning. Census: 43 in 66, 12 finer for all 1832 half dime varieties (8/16). NGC ID# 232E, PCGS# 38683 Base PCGS# 4279

SEATED HALF DIMES

- 3625** 1853 Arrows MS66 PCGS. A spectacular Premium Gem representative of the popular Arrows design, with well-detailed design elements and some interesting clash marks on both sides. The surfaces are well-preserved and lustrous. Population: 58 in 66 (4 in 66+), 11 finer (8/16). NGC ID# 233Y, PCGS# 4356

1857 Seated Liberty Half Dime, MS67
Strong Registry Set Contender

- 3626** 1857 MS67 PCGS. This spectacular Superb Gem exhibits well-detailed design elements, with just a touch of softness on some of the stars. The impeccably preserved surfaces show subtle hints of pale gold and lavender toning, with vibrant mint luster throughout. Overall visual appeal is exceptional. Population: 11 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 233S, PCGS# 4365

- 3627** 1860 MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits well-detailed design elements, with just a touch of softness on Liberty's head, and some prominent clash marks on the obverse. The impeccably preserved surfaces radiate vibrant mint luster. Population: 63 in 66 (8 in 66+), 50 finer. CAC: 21 in 66, 30 finer (8/16). NGC ID# 2347, PCGS# 4377

- 3628** 1860-O MS66 PCGS. CAC. An impressive Premium Gem, this brilliant half dime features a bold strike and untuned silver surfaces. This piece represents the first year of the Legend obverse type, and it is the only New Orleans Mint issue of that design modification, making it a highly important issue. Population: 8 in 66, 4 finer. CAC: 2 in 66, 4 finer (8/16). NGC ID# 2348, PCGS# 4378

PROOF SEATED HALF DIMES

1858 Half Dime, Sharply Struck PR66

- 3629** 1858 PR66 PCGS. CAC. Pale yellow, rose, and sky-blue patina embellishes the surfaces on each side of this generously lustrous Premium Gem proof 1858 half dime, one of the four finest survivors at PCGS (there is also one PR66 Cameo) (8/16). The *Guide Book* estimates that 300 examples of this issue were struck. This sharply rendered representative boasts top-notch eye appeal. CAC: 5 in 66, 0 finer (8/16). NGC ID# 235N, PCGS# 4437

- 3630** 1868 PR65 PCGS. Other than some minor weakness on the upper-left corner of the wreath, this Gem proof 1868 half dime is boldly struck. The glimmering mirrored fields display vivid teal, violet, and rose-gold toning, delivering outstanding eye appeal. Population: 23 in 65, 15 finer (8/16). NGC ID# 2365, PCGS# 4451

1873 Half Dime, PR66+
One-Sided Cameo

- 3631** 1873 PR66+ PCGS. CAC. Sharp, frosty design elements provide near-cameo contrast on the reverse and full contrast on the obverse of this Premium Gem final-year proof Seated half dime. The obverse displays mint-green and rose-gold toning, while the reverse has a lavender-orange interior surrounded by sky-blue margins. Population: 18 in 66 (2 in 66+), 5 finer. CAC: 7 in 66, 3 finer (8/16). NGC ID# 236A, PCGS# 4456

BUST DIMES

- 3632** 1831 JR-3, R.1, MS64 NGC. This is the NGC Coin Explorer plate coin. The strike is sharp throughout, and lustrous fields deliver strong visual appeal. Champagne-toned interiors cede to deeper amber, russet, and aquamarine hues around the peripheries. Abrasions are minimal. Census (all varieties included): 51 in 64 (1 in 64+), 41 finer (8/16). PCGS# 38851 Base PCGS# 4520

**1834 Dime, Toned MS64
Large 4, JR-1**

3633 1834 Large 4, JR-1, R.1, MS64 PCGS. Steel-gray and russet-brown colors grace the fields and motifs of this sharply struck Capped Bust type coin. The borders exhibit deep forest-green toning. Satiny surfaces are devoid of evident marks, although a loupe reveals trivial wispy marks near the bust tip. Population: 19 in 64, 12 finer (8/16). NGC ID# 237E, PCGS# 38873 Base PCGS# 4526

3634 1836 JR-2, R.2, MS62 PCGS. A well-struck lower-end Mint State example of this plentiful Capped Bust issue, suitable as a budget-friendly type coin. This piece displays satiny luster and olive-gray toning with hints of lavender in the fields. Scattered light abrasions define the grade. PCGS# 38889 Base PCGS# 4528

3635 1836 JR-2, R.2, MS64 NGC. CAC. Bright white, frosty mint luster appears on each side of this near-Gem JR-2 dime. A few light marks on the portrait limit the grade, and there is minor strike weakness, as usual, on the central eagle. Census (all varieties included): 31 in 64 (1 in 64+), 12 finer. CAC: 14 in 64, 6 finer (8/16). PCGS# 38889 Base PCGS# 4528

SEATED DIMES

3636 1851-O F-101, R.2, AU58 NGC. Star 7 is present on this most often seen Fortin-101 variant. As a date, the 1851-O Seated dime is scarce in all grades and rare in Mint State. This nearly Uncirculated example displays slight strike weakness on the wreath bow and Liberty's head. Remnants of satin luster remain in the protected regions of the fields, and light chatter accompanies trivial high-point friction. Some olive-gray toning appears on each side. Census: 12 in 58, 6 finer (8/16). PCGS# 537912 Base PCGS# 4596

3637 1873 Arrows, F-113, R.3, MS64 PCGS. Perhaps worthy of designation as Fortin-113a, since the reverse periphery exhibits spindly die cracks, and a clashed E is prominent near Liberty's raised elbow. Lustrous and essentially brilliant with a good strike and a thin mark above the E in ONE. PCGS# 538314 Base PCGS# 4665

3638 1873 Arrows, F-122, R.4, MS64+ PCGS. A lightly toned almond-gold and stone-gray near-Gem that boasts a good strike and an absence of mentionable marks. An unlisted late die state with obverse rim die breaks near OF A. Struck from clashed dies. PCGS# 538323 Base PCGS# 4665

3639 1875 F-104, R.2, MS66 PCGS. CAC. Shades of golden-brown, violet, and amber toning blanket the well-preserved surfaces of this attractive Premium Gem, with well-detailed design elements and traces of prooflike reflectivity underneath. Population: 29 in 66 (1 in 66+), 5 finer. CAC: 19 in 66, 7 finer (8/16). PCGS# 538352 Base PCGS# 4672

3640 1876-S Type One Reverse, F-118, R.4, MS66 PCGS. Early Die State. Turquoise and mauve toning meet in irregular-shaped patches over both sides of this interesting Seated dime. The strike is sharp on Liberty's portrait and equally so on the cereal wreath. Struck from seemingly perfect dies, with few distinguishing characteristics matching the Fortin variety reference. Mint luster glows beneath the unusual patina. A coin of high technical merit and a fascinating toning scheme. Population: 11 in 66, 0 finer (8/16). PCGS# 538553 Base PCGS# 4681

3641 1884-S F-103, R.5, MS63 PCGS. Fortin explains: "This die pairing variety is the most difficult to locate of the five known 1884-S die pairs..." The flag of the 1 is left the shield point, and the mintmark is positioned left. Soft mint luster percolates through tan patina. The reverse needle-sharp. A great coin for the specialist. PCGS# 593528 Base PCGS# 4693

PROOF SEATED DIMES

**1870 Dime, PR66 Cameo
Among the Finest Cameos at PCGS**

3642 1870 PR66 Cameo PCGS. F-101, R.3. A fully struck Premium Gem proof with stark cameo contrast and outstanding preservation. Aside from a dash of blue along the left-hand borders, each side displays faint lavender-gold toning. Cameo examples of the 1870 proof dime are rarely seen, regardless of grade. Population: 5 in 66 Cameo, 0 finer (8/16). NGC ID# 59UM, PCGS# 84763

**1870 Dime, PR67
Tied for Finest Certified**

3643 1870 F-101, R.3, PR67 NGC. A broken S1 in STATES and a die crack through the ribbon ends confirm the variety. The 1870 had a high mintage of 1,000 proofs. Examples are generally available, but not in this high grade. Purple and cobalt-blue iridescence fully covers this spectacular Superb Gem proof, among the finest specimens at both services. Census: 2 in 67, 0 finer (8/16). NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763

3644 1885 F-101, R.3, PR65 PCGS. Powder-blue fields cede to olive-gold borders and dove-gray motifs. A moderately mirrored Gem with undisturbed surfaces and a good strike. Die lines at the top of the wreath confirm the Fortin-101 die pair, used to strike all 930 proofs. NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

BARBER DIMES

3645 1892 MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved fields are blanketed in attractive shades of autumn-gold, cerulean-blue, and lavender toning, with a small planchet flaw near Liberty's eye. PCGS has graded 19 numerically finer examples (8/16). NGC ID# 23DK, PCGS# 4796

3646 1895 MS65 PCGS. An attractive Gem from a small mintage of 690,000 pieces, this coin offers well-detailed design elements and lustrous, well-preserved surfaces under shades of lavender and golden-brown toning. Population: 18 in 65, 32 finer (8/16). NGC ID# 23DV, PCGS# 4806

**1898-S Barber Dime, MS66+
Outstanding Quality, One Coin Finer**

- 3647 1898-S MS66+ PCGS. CAC.** Variegated autumn-gold and forest-green toning blankets this strongly rendered and lustrous high-grade Barber dime. The fields are pristine, and the portrait displays only minuscule marks. Although commonplace in well-circulated grades, the 1898-S is scarce in Mint State, and decidedly rare as a Premium Gem. A single finer coin is reported between PCGS and NGC combined. Population: 14 in 66 (2 in 66+), 1 finer. CAC: 5 in 66, 1 finer (8/16). NGC ID# 23E8, PCGS# 4817

- 3648 1900 MS66 PCGS. CAC.** Spectacular shades of magenta, blue, and golden-brown toning blanket the surfaces of this delightful Premium Gem, with well-detailed design elements and vibrant mint luster underneath. Population: 16 in 66 (4 in 66+), 6 finer. CAC: 10 in 66, 8 finer (8/16). NGC ID# 23EC, PCGS# 4821

PROOF BARBER DIMES

- 3649 1892 PR66 PCGS.** Always popular as a first-year of issue, and apparently it was anticipated it would be popular with an increased mintage of 1,245 proofs in this single year. Deep blue toning over each side with deeply mirrored fields. A single mark on the face of Liberty. Population: 36 in 66 (2 in 66+), 15 finer (8/16). NGC ID# 23G3, PCGS# 4875

- 3650 1893 PR66 PCGS. CAC.** A delightful Premium Gem proof, from a mintage of 792 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields, under shades of sea-green and violet toning. Population: 28 in 66, 17 finer. CAC: 10 in 66, 14 finer (8/16). NGC ID# 23G4, PCGS# 4877

- 3651 1913 PR65 PCGS.** This impressive Gem proof representative offers sharply detailed design elements and deeply mirrored fields, under shades of greenish-gold and lavender toning. No mentionable distractions are evident and eye appeal is terrific. Population: 30 in 65, 20 finer (8/16). NGC ID# 23GU, PCGS# 4897

MERCURY DIMES

- 3652 1916 MS67+ Full Bands PCGS.** Frosty original luster combines with dustings of olive-green, violet, and medium gold toning to give this high-end Superb Gem 1916 Mercury dime splendid eye appeal on top of its conditional scarcity. The strike is full. PCGS has seen only 11 finer representative of this first-year type-coin issue (8/16). NGC ID# 23GX, PCGS# 4905

- 3653 1916-D VG8 PCGS.** The obverse of this lower-end 1916-D Mercury dime is strong for the grade, although the right reverse rim slightly blends into the top of AMERICA. A faint dusting of olive-gray color accents the smooth battleship-gray surfaces. An outstanding coin for this budget-friendly grade.
From The Twelve Oaks Collection, Part II NGC ID# 23GY, PCGS# 4906

- 3654 1916-D VG8 PCGS.** Strong rims and some remaining detail on the central portrait are the chief attributes of this circulated 1916-D dime. The surfaces show smooth light gray coloration with a lavender tint on the reverse. Quality and eye appeal are outstanding for the grade.
From The Twelve Oaks Collection, Part II NGC ID# 23GY, PCGS# 4906

- 3655 1916-D VG8 PCGS.** Original battleship-gray patina gives this VG 1916-D Mercury dime pleasant eye appeal. The surfaces are smooth, and the rims are complete. This issue's small 264,000-coin mintage was a result of the Denver Mint being ordered to cease dime production in late 1916 in order to divert resources into the coinage of millions of Barber quarters.
From The Twelve Oaks Collection, Part II NGC ID# 23GY, PCGS# 4906

- 3656 1916-D VG8 PCGS.** Even wear leaves the designs boldly outlined and the rims complete on this collector-grade 1916-D Mercury dime. Smooth slate-gray surfaces deliver the pleasant eye appeal that budget-conscious collectors seek in this grade.
From The Twelve Oaks Collection, Part II NGC ID# 23GY, PCGS# 4906

**1917 Dime, MS67 Full Bands
Among the Finest Certified**

- 3657 1917 MS67 Full Bands PCGS.** This Superb Gem Full Bands example stands above the majority of the 1917 issue as a top-grade condition rarity. Rich violet, sun-orange, and russet toning spreads over each side, producing an attractive overlay atop frosty mint luster. There are no distracting abrasions. Population: 29 in 67 (4 in 67+) Full Bands, 0 finer (8/16). NGC ID# 23H2, PCGS# 4911

- 3658 1918 MS66+ Full Bands PCGS.** A sharply detailed Plus-graded Premium Gem, with fully split and rounded bands on the fasces. The impeccably preserved, lustrous surfaces show highlights of sea-green and amber toning. Population: 50 in 66 (1 in 66+) Full Bands, 4 finer (8/16). NGC ID# 23H5, PCGS# 4917

- 3659 1919-D MS62 Full Bands PCGS. CAC.** This attractive MS62 specimen exhibits well-detailed design elements, with Full Bands definition on the fasces and a n interesting die crack on Liberty's neck. The lightly marked, lustrous surfaces show highlights of greenish-gold and lavender toning. NGC ID# 23H9, PCGS# 4925

- 3660 1920-D MS65 Full Bands PCGS.** An impressive Gem Mercury dime, with sharply detailed design elements, including Full Bands definition on the fasces. The well-preserved, lustrous surfaces add to the outstanding eye appeal. Population: 51 in 65 Full Bands, 27 finer (8/16). NGC ID# 23HC, PCGS# 4931

**1928-S Dime, MS66 Full Bands
Elegant Eye Appeal**

- 3661 1928-S MS66 Full Bands PCGS.** Small S. If not for intermittent specks of orange patina, each side is completely brilliant, awash in frosty S-mint luster. Design detail is as strong around the peripheries as it is at the centers, where the bands of the fasces are fully split. Elegant eye appeal. Population: 41 in 66 (1 in 66+) Full Bands, 9 finer (8/16). NGC ID# 23HZ, PCGS# 4971

3662 1930-S MS66 Full Bands PCGS. This spectacular Premium Gem displays fully split and rounded bands on the fasces, and the other design elements are sharply detailed throughout. The lustrous, well-preserved surfaces show delicate highlights of pale gold toning. NGC ID# 84NT, PCGS# 4981

3663 1931-D MS67 Full Bands PCGS. This delightful Superb Gem exhibits sharply detailed design elements, with fully split and rounded bands on the fasces. The virtually pristine, untuned surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 63 in 67 (3 in 67+) Full Bands, 0 finer (8/16). NGC ID# 5BZ4, PCGS# 4985

PROOF MERCURY DIMES

**1936 Dime, Lightly Toned PR67
Few Known Finer**

3664 1936 PR67 PCGS. The debut proof Mercury dime is the most elusive proof in the series in high grade. This Superb Gem is scarce, and finer pieces are extremely rare. The strike is full and the fields are reflective. Bits of russet toning appear around the peripheries, framing champagne interiors. Population: 74 in 67 (3 in 67+), 2 finer (8/16). NGC ID# 27DG, PCGS# 5071

3665 1937 PR68 PCGS. Conditionally scarce and among the finest pieces known, this high-end proof 1937 dime displays sharp design elements and deeply reflective fields. A faint blush of champagne color warms each side. Population: 31 in 68 (1 in 68+), 0 finer (8/16). NGC ID# 27DH, PCGS# 5072

3666 1942 PR68 PCGS. A magnificent example of this final wartime proof issue, with razor-sharp definition on all design elements and deeply mirrored fields, with highlights of greenish-gold toning. Population: 83 in 68 (7 in 68+), 1 finer (8/16). NGC ID# 27DN, PCGS# 5077

3667 1942 PR68 PCGS. Razor-sharp definition is evident on all design elements of this magnificent Mercury dime. The impeccably preserved surfaces feature deeply reflective fields, and delicate shades of pale gold toning. Population: 83 in 68 (7 in 68+), 1 finer (8/16). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIME

3668 1954-S MS67+ Full Bands PCGS. A stunning Superb Gem with exquisite rainbow toning, this piece is exceeded by just one higher grade example at PCGS. For the connoisseur assembling a complete Roosevelt dime collection, this offering is exceedingly important. NGC ID# 2799, PCGS# 85108

PROOF ROOSEVELT DIME

3669 1950 PR67 Deep Cameo PCGS. The inaugural proof issue in the Roosevelt dime series is a rarity with Deep Cameo contrast, and this Superb Gem example is adequate for Registry Set inclusion. The strike is fully rendered, and the preservation of the stark-brilliant white-on-black surfaces is very nearly perfect. Population: 15 in 67 Deep Cameo, 5 finer (8/16). NGC ID# 27EJ, PCGS# 95225

TWENTY CENT PIECES

3670 1875 MS64 PCGS. Natural shades of greenish-gold and lavender-gray toning blanket the well-preserved surfaces of this impressive Choice specimen, with well-detailed design elements and slightly subdued satiny mint luster underneath. Population: 66 in 64 (3 in 64+), 29 finer (8/16). NGC ID# 23R5, PCGS# 5296

3671 1875-S MS63 NGC. CAC. FS-301, BF-12, R.2. A misplaced date variety, with the top of an 8 concealed within the dentils below the 8. Apple-green and golden-brown freckles accompany the margins, but the remainder of this lustrous example is slate-gray. Superior quality for the designated grade. Housed in a former generation holder. NGC ID# 23R7, PCGS# 5298

EARLY QUARTER

**1806 B-9 Quarter, XF40
Attractive Color and Surfaces**

3672 1806 B-9, R.1, XF40 PCGS. Tompkins Die State 2/2. The vertical die crack through the 1 in the date identifies B-9, as does the cud above the second T in STATES. This is a pleasing silver-gray and chestnut-gold representative. No marks are noticeable, and glimmers of luster emerge from protected regions. The centers show selected softness of strike, usual for B-9. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

3673 1815 B-1, R.1 — Obverse Scratched — NGC Details. AU. A partially lustrous example with rich toning across both sides. The obverse is sea-green and fire-red, and the reverse is mostly navy-blue despite a lavender-red center. A few obverse pinscratches are present, but they are less of a distraction than the NGC designation might imply.

From The Hamilton Collection, Part III. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

1815 B-1 Quarter, AU55

'E' Counterstamp

- 3674** 1815 "E" Counterstamp B-1, R.1, AU55 NGC. Theories abound for the issuer of the "E" and "L" counterstamps that appear above the portrait on a limited number of 1815 and 1825 quarters. This example of the "E" mark may just as well stand for "enigma," since the source of the countermark remains a perplexing mystery. Some researches ascribe to the origin of the counterstamps as a voting mechanism employed by the Economite commune in Pennsylvania, but the theory remains unproven. This Choice About Uncirculated 1815 quarter displays soft silver-gray luster that deepens at the borders. The E counterstamp is crisply applied. *From The Hamilton Collection, Part III.*

1824/2 B-1 Quarter, XF45 Elusive Single-Variety Overdate

- 3675** 1824/2 B-1, R.3, XF45 PCGS. Only one die pair was used for the quarter dollars bearing the 1824 date, and they are all 1824/2 overdates, adding demand to an already scarce issue from a mintage of 168,000 coins, a figure that included many pieces dated 1825. This attractive Choice XF piece has light silver-gray devices with pewter-gray fields and a few splashes of iridescence. Population: 12 in 45, 16 finer (8/16). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335
- 3676** 1828 B-1, R.1, XF45 PCGS. Tompkins Die State 1/2 with fine die cracks above the P in PLURIBUS. A pleasing pearl-gray Choice XF example. No marks are remotely consequential, and wear is both moderate and even. The B-1 obverse die also struck B-2 and B-3. The B-1 reverse die earlier struck the very rare original 1827 quarters. NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342
- 3677** 1834 O Over F in OF, B-1, FS-901, R.1, AU58 PCGS. CAC. Tompkins Die State 3/5. The die state shows a single bar clash below the ear, and the A in STATES is filled. This popular *Guide Book* and *Cherry-pickers'* variety shows the O in OF punched over an F. The surfaces are draped in golden-gray and olive tones with well-detailed design features and minor marks. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353
- 3678** 1836 B-3, R.1, MS62 PCGS. Tompkins Die State 5/4, nearly terminal — both dies are shattered, although the obverse is known in a slightly later stage before this pairing was retired. This Mint State Capped Bust type coin displays subtle luster beneath champagne and amber toning. The right-hand stars are weak, but the central devices display bold definition. Scattered abrasions limit the grade. Population: 9 in 62, 17 finer (8/16). NGC ID# 23S3, PCGS# 39007 Base PCGS# 5355

SEATED QUARTERS

- 3679** 1841 MS63 NGC. Briggs 1-A. Ex: New Orleans Bank Find. This attractive Select example displays well-detailed design elements and pleasing gold and gray surfaces with a few scattered, minor contact marks. Census: 5 in 63, 30 finer (8/16). NGC ID# 23SK, PCGS# 5399

1841 Briggs 1-A Quarter, MS64 Doubled Die Reverse

- 3680** 1841 MS64 PCGS. Briggs 1-A, Flynn-DDR-001. Flynn describes the variety as a Class II doubled die with "nice doubling toward the center seen on STATES OF AMERICA." This satiny near-Gem displays blue-green borders, while the fields and motifs are lavender and stone-gray. No marks are apparent. The seated Liberty minor blending of strike on the high points. Population: 24 in 64, 3 finer (8/16). NGC ID# 23SK, PCGS# 5399
- 3681** 1842-O Small Date VG10 PCGS. Briggs 1-A. A Guide Book semikey, the 1842-O Small Date dime is known from a single die pair. It is conditionally challenging, since a majority of the PCGS-certified examples are in grades below Fine. This is a gunmetal-gray example with navy-blue and lavender toning in design recesses. Marks are minor aside from a small recession at the top of the eagle's shield. NGC ID# 23SN, PCGS# 5403

1853 Seated Liberty Quarter, MS64 Excellent Arrows and Rays Type Coin

- 3682** 1853 Arrows and Rays MS64 PCGS. An attractive Choice specimen of the short-lived Arrows and Rays design type, with satiny mint luster that displays blended gold, lavender, and green-gray toning over each side. The design elements are well-detailed, with a touch of softness on some of the stars and matching die breaks from each of the arrowheads to the rims. PCGS has graded 29 numerically finer examples(8/16). NGC ID# 23U4, PCGS# 5426
- 3683** 1854 Arrows MS64 PCGS. Briggs 2-B. Medium plum-red and apple-green toning graces the margins of this boldly struck and coruscating near-Gem. The centers are stone-gray, and both sides are unblemished. Briggs' "compass point" reverse with a small circular area absent from the shield atop the first stripe. NGC ID# 23U6, PCGS# 5432
- 3684** 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS. An unusually attractive example of this iconic variety, showing an abnormally large and misshapen mintmark that was likely cut into the die by hand. Gunmetal-gray toning characterizes the fields, while the relief elements offer a "circulation cameo" effect with lighter hues. A problem-free coin. Population: 6 in 20, 35 finer (8/16). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1860 Quarter, Frosty MS65
Extraordinary Preservation and Strike**

- 3685 1860 MS65 NGC.** The centers of this spectacular Gem offering are frosty and untuned, while the border areas exhibit crimson and golden-russet patina. Design definition is complete, and the only significant marks occur in the field above the eagle's head. This is easily among the top survivors from a mintage of 805,400 quarters. Census: 5 in 65, 3 finer (8/16). NGC ID# 23TP, PCGS# 5451

**1873 Closed 3 Quarter, XF45
Philadelphia Semikey, Conditionally Rare**

- 3686 1873 Closed 3 XF45 PCGS.** The 1873 Closed 3 quarter had a mintage of 40,000 coins. Briggs wrote in 1991 that this date was "much harder to find than its mintage would indicate due to many pieces being melted at the Mint. Mostly seen in lower grades, with Business Strike pieces in XF or better being quite rare." Pale lilac-gray surfaces show a thin scrape in the field above Liberty's head. The motifs are clear, if incomplete, and a small toning spot occurs on the right talon. Population: 7 in 45, 12 finer (8/16). NGC ID# 23UU, PCGS# 5484

**1876-CC Quarter Dollar, MS66
Attractive Peripheral Color**

- 3687 1876-CC MS66 NGC. Briggs-Unlisted.** Small CC. After the limited Carson City quarter dollar mintages of the first few years, production spiked substantially upward, with numerous high-grade survivors. Beginning in 1875, most Carson City coins are much more plentiful than earlier-dated issues. This beautiful Premium Gem is fully lustrous with bold design details and satin surfaces, enhanced by gold, blue, and iridescent border toning. Census: 10 in 66, 2 finer (8/16). NGC ID# 23V3, PCGS# 5502

- 3688 1877 MS65 PCGS. Briggs 2-C.** Heavy die clashing on both sides suggests the Briggs 2-C variety, but from an earlier die state without the broken patch from the obverse shield. Mottled olive-gray toning covers both sides with iridescent colors showing through the semireflective fields. Multiple faint die cracks encircle the margins. An unabraded Gem quarter, pleasing and original, sharply struck despite the rusted dies. NGC ID# 23V5, PCGS# 5504

- 3689 1877 MS65 PCGS. CAC. Flynn-RPD-001.** The bases of the 7s in the date are lightly repunched. Lovely golden-brown and forest-green toning alternates across this well struck Gem. Smooth save for minor obverse field grazes. NGC ID# 23V5, PCGS# 5504

- 3690 1891 MS65 PCGS.** A dozen years of scant mintages of Philadelphia quarters came to an end in 1891, when close to four million pieces were produced. This lustrous Gem is lightly clashed but essentially void of abrasions. Russet-red and forest-green toning is extensive but not comprehensive. NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

- 3691 1873 No Arrows PR63 Cameo PCGS. Briggs 1-A.** The Closed 3 logotype was used for all No Arrows proof quarters. This Select Cameo example displays a bold strike and deeply mirrored fields. Milky-gold toning masks scattered hairlines that limit the grade. Population: 5 in 63 Cameo, 29 finer (8/16). NGC ID# 23X6, PCGS# 85572

- 3692 1874 Arrows PR64 PCGS. Briggs 5-D.** The final year of the short-lived Arrows, Motto type, first adopted in 1873 when the Mint converted to the metric system. This well struck and unmarked Choice proof has pearl-white centers and a blush of peach-red toning near the rims. NGC ID# 23XS, PCGS# 5575

- 3693 1878 PR64 PCGS. CAC. Briggs 4-D.** Type Two Reverse. Beautifully patinated lavender-red, sun-gold, and sea-green. The strike is sharp except on the fletchings. An outstanding representative of the proof production of 800 pieces. NGC ID# 23XA, PCGS# 5579

- 3694 1878 PR65 Cameo NGC. Briggs 4-D.** Tiny areas of subtle, silver-gray cloudiness in the obverse fields have little effect on this brilliant Gem's profound contrast. The razor-sharp devices are beautifully frosted, and the mirrors are potent. Larry Briggs (1991) says of this date: "Proof issues were very sloppily made." This piece is an obvious exception. Census: 8 in 65 Cameo, 8 finer (8/16). Ex: *Houston Signature* (Heritage, 12/2008), lot 1249; *Long Beach Signature* (Heritage, 2/2009), lot 1117; *Long Beach Signature* (Heritage, 9/2009), lot 597. NGC ID# 23XA, PCGS# 85579

- 3695 1883 PR65 Cameo PCGS. CAC.** The sharply detailed design elements of this charming Gem are richly frosted, creating intense cameo contrast with the deeply mirrored fields. Attractive shades of greenish-gold toning enhance the well-preserved surfaces. Population: 19 in 65 (2 in 65+) Cameo, 17 finer. CAC: 8 in 65, 9 finer (8/16). NGC ID# 23XF, PCGS# 85584

1887 Quarter, PR66 Cameo
Iridescent Patina

- 3696 1887 PR66 Cameo PCGS. CAC.** Ex: Simpson. The Mint limited quarter dollar output to 10,000 circulation strikes and 710 proofs in 1887, as none were needed for circulation. Proofs often stand in for their business-strike counterparts, which are can be difficult to obtain in high grades. This splendid Premium Gem proof shows eye-catching Cameo contrast uninhibited by the iridescent toning that shrouds each side. Colors include orange, rose, and blue. Population: 5 in 66 Cameo, 3 finer. CAC: 3 in 66, 3 finer (8/16). NGC ID# 23XK, PCGS# 85588

1888 Quarter, PR66 Cameo
Marvelous Toning, Flashy Fields

- 3697 1888 PR66 Cameo PCGS. CAC.** Ex: Simpson. Reflective surfaces flash beneath a layer of peach-orange, lavender-rose, and magenta toning, allowing for considerable field-device contrast throughout this Premium Gem Cameo quarter. The CAC endorsement is well-deserved. The 1888 had a low total mintage of 10,833 pieces, 832 of which represented proof strikes. Population: 8 in 66 Cameo, 1 finer. CAC: 3 in 66, 1 finer (8/16). NGC ID# 23XL, PCGS# 85589

1891 Quarter, PR67
One Proof Finer at PCGS

- 3698 1891 PR67 PCGS.** The obverse of this magnificent Superb Gem Seated Liberty quarter is deeply toned in shades of blue and green, while the reverse displays a much lighter lavender and gold patina. The fields are brightly reflective under the toning. The strike is sharper than usual for the issue, which often lacks detail because the dies were excessively polished or too widely spaced. Only 600 proofs were minted, and PR67 survivors are very rare. Population: 4 in 67, 1 finer (8/16).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 3606. NGC ID# 23XP, PCGS# 5592

BARBER QUARTERS

1893-O Quarter, MS65 Prooflike
The NGC Coin Explorer Plate Coin

- 3699 1893-O MS65 Prooflike NGC.** Were it not for the O mintmark, this Gem 1893-O quarter might be mistaken for a proof. By three grade points, it is the finer of two pieces designated as Prooflike by NGC (8/16). Even non-Prooflike coins are rare this well-preserved. The strike is razor-sharp save for on star 11, which appears to have been struck through a filled die. A blush of light golden toning warms the modestly contrasted surfaces. Census (non-Prooflike pieces): 18 in 65 (1 in 65 ★), 9 finer (8/16). NGC ID# 23XX, PCGS# 5605

- 3700 1906 MS66+ PCGS. CAC.** Quarter dollar production dwindled to 3.6 million coins on the East Coast in 1906, continuing a four-year downward trend. The issue is accessible through Gem condition and becomes rare at the Premium Gem level. Glistening mint luster combines with a thin layer of violet patina and splashes of olive iridescence on this Premium Gem example. The obverse is a shade deeper in tone than the nearly brilliant reverse. Stars 11 to 13 lack full centers, but the portrait is well-defined. A touch of high-point incompleteness occurs over the eagle. A virtually pristine representative. Population: 25 in 66 (2 in 66+), 2 finer. CAC: 8 in 66, 1 finer (8/16). NGC ID# 23Z5, PCGS# 5642

- 3701 1911-S MS66 NGC.** Concentric bands of green-gold, ocean-blue, and deep violet toning surround dusky central hues of amber-gold on the obverse, while the reverse displays a rich blend of sea-green and olive-gold colors. The strike is well-executed, even on the problematic right (facing) shoulder of the eagle, and radiant underlying mint luster delivers just the right amount of luminance to the clean surfaces. Census: 58 in 66 (3 in 66+), 9 finer (8/16). NGC ID# 23ZR, PCGS# 5661

1913 Barber Quarter, MS65
Better Date in High Grade

- 3702 1913 MS65 PCGS. CAC.** The 1913 Barber quarter is a slightly better date, particularly elusive in Mint State. This Gem CAC-endorsed example displays well-struck design elements with satiny luster and an overlay of tan-gray toning. There are no significant abrasions, and eye appeal is pleasing for the grade. Finer coins are rarely seen. Population: 31 in 65 (1 in 65+), 10 finer. CAC: 7 in 65, 4 finer (8/16). NGC ID# 23ZU, PCGS# 5664

- 3703 1913-S Good 4 NGC.** The low mintage of just 40,000 pieces makes the 1913-S a key issue among Barber quarters in all grades. This is a pleasing Good-4 example with natural old-silver color and smooth wear but no distracting marks. The rims blend into the legends in a few areas, yet the motifs are well-defined for the grade. NGC ID# 23ZW, PCGS# 5666

3704 1916-D MS66 PCGS. Intense silver-white luster beams from every angle of this brilliant Premium Gem 1916-D. Soon supplanted by the Standing Liberty design, the final branch mint Barber quarter is always in demand. This example is sharply struck and frosty. A few faint die cracks wander across both sides, and some hair-thin horizontal lines are visible under magnification on Liberty's cap. NGC ID# 2426, PCGS# 5674

3705 1916-D MS66 PCGS. CAC. The Denver Mint focused on quarters in 1916 but not on other denominations — most notably the Mercury dime, which was at once a sensational rarity. The quarters, on the other hand, are anything but rare, although they are challenging in the highest Mint State grades. This Premium Gem example displays patchy olive-gold and deep-gray toning over an exceptionally sharp strike. A few faint lines on the portrait are well-hidden in the toning. CAC endorsed, PCGS reports just 16 numerically finer examples (8/16). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

1900 Barber Quarter, PR67 Cameo Vivid Multicolor Toning

3706 1900 PR67 Cameo PCGS. The design elements of this delightful Barber quarter exhibit razor-sharp definition and a rich coat of mint frost that creates intense cameo contrast with the deeply reflective fields. The impeccably preserved surfaces are enhanced by spectacular shades of golden-brown, cerulean-blue, and magenta toning. Population: 13 in 67 (1 in 67+) Cameo, 4 finer (8/16). NGC ID# 242F, PCGS# 85686

3707 1903 PR66 Cameo PCGS. CAC. Proofs of this era were typically struck with an all-brilliant finish, but this impressive Premium Gem displays frosty texture on the sharply detailed design elements, providing bold cameo contrast with the reflective fields. Vivid shades of lime-green and violet toning blanket the unmarked surfaces. Population: 11 in 66 Cameo, 20 finer. CAC: 4 in 66, 20 finer (8/16).
Ex: Long Beach Signature (Heritage, 6/2013), lot 3400. NGC ID# 242J, PCGS# 85689

3708 1904 PR65 NGC. CAC. Attractive shades of pale gold and lavender toning enhance the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and deeply mirrored fields underneath. Census: 61 in 65 (3 in 65+), 74 finer. CAC: 8 in 65, 10 finer (8/16). NGC ID# 242K, PCGS# 5690

1908 Quarter, PR67 Colorful Toning

3709 1908 PR67 NGC. Although plentiful in the absolute sense, the 1908 proof Barber quarter is rarely seen in Superb Gem condition. This attractively toned example displays multiple shades of color ranging through sky-blue, gold, russet, crimson, mint, and violet. The eagle's right (facing) talons are slightly soft, but the obverse is sharp. A hint of cameo contrast is seen on each side through the rich patina. Census: 23 in 67 (3 in 67★), 6 finer (8/16). NGC ID# 242P, PCGS# 5694

1915 Barber Quarter, Toned PR67 Low-Mintage, Late-Date Proof

3710 1915 PR67 NGC. This reflective Superb Gem proof displays pleasing blue, pink, and gray patina on each side over immaculately preserved, fully struck surfaces with excellent eye appeal. Although a late-date issue, only 450 pieces were struck in proof format. Census: 14 in 67 (2 in 67★), 5 finer (8/16). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

3711 1917 Type One MS66 Full Head PCGS. As is a refreshing hallmark of this available Type One issue, this Premium Gem 1917 Standing Liberty quarter displays sharp detail throughout with vibrant luster. There are no severe abrasions, and each side displays uniform yellow-gold toning. NGC ID# 242Z, PCGS# 5707

3712 1917-D Type One MS66 Full Head PCGS. CAC. Soft, satiny luster glows beneath cream-golden toning that blankets much of this Premium Gem Type One Denver coin. Tinges of russet and amber also appear around the borders. The coin is sharply struck throughout the relief elements, and only a single small tick on Liberty's shoulder appears to limit the grade. PCGS has seen 26 Superb Gems finer (8/16). NGC ID# 2432, PCGS# 5709

3713 1920 MS66+ PCGS. CAC. Vibrant luster and original olive-gold and light russet toning give this Plus-graded Premium Gem 1920 quarter its eye appeal. Weakness on Liberty's temple prevents a Full Head grade, while the date and shield rivets are similarly ill-defined. Worthy of consideration by the collector who finds Full Head pieces to be out of reach. NGC ID# 243E, PCGS# 5734

3714 1920 MS66 Full Head PCGS. 30th Anniversary Green Label Holder. This Full Head Premium Gem is sharp throughout Liberty's head, the shield rivets, the stars, the date, and the eagle. Satiny luster shows light champagne color, and there are no significant abrasions. Population: 41 in 66 (4 in 66+) Full Head, 7 finer (8/16). NGC ID# 243E, PCGS# 5735

- 3715 1921 MS63 NGC.** Shimmering frost radiates over untuned surfaces. The shield lines and rivets are nearly complete, although the head is softly impressed. The eagle, date, and stars are sharp. There are no singular blemishes on this Select 1921 quarter, making it quite appealing for the grade. NGC ID# 243H, PCGS# 5740

**1926 Quarter, MS66 Full Head
Better Date in High Grade**

- 3716 1926 MS66 Full Head PCGS.** The 1926 is a conditionally elusive issue in high-grade Full Head, and examples are rarely seen finer than the present Premium Gem. This piece displays bold design elements amid softly frosted champagne luster. Bits of russet and deep violet toning are seen in the obverse recesses and along the lower reverse border. The shield rivets remain incomplete, despite the desired head detail. Population: 47 in 66 (6 in 66+) Full Head, 3 finer (8/16). NGC ID# 243R, PCGS# 5755

- 3717 1928-S MS67 PCGS. CAC.** This spectacular Superb Gem displays impeccably preserved, brilliant surfaces, with radiant mint luster on both sides. The design elements are well-detailed, with just a touch of the usual softness on Liberty's head and the eagle's wing. Population: 13 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (8/16). NGC ID# 243Z, PCGS# 5770

**1929-S Quarter, MS67 Full Head
Tied for Finest at PCGS, Blazing Luster**

- 3718 1929-S MS67 Full Head PCGS.** The 1929-S is arguably to the most plentiful San Francisco issue in Full Head, although such coins are conditionally rare in MS67 and unknown finer at PCGS. This glittering coin displays brilliant, frosty mint luster with a few tiny bits of russet toning near the right reverse border. The shield rivets and the leading edge of the eagle's left (facing) wing are soft, but Liberty's head is bold. Population: 17 in 67 Full Head, 0 finer (8/16). NGC ID# 2444, PCGS# 5777

- 3719 1930 MS66+ Full Head PCGS.** A bold Full Head and frosty, well-preserved surfaces are the chief attributes of this high-end Full Head 1930 quarter. Olive-gold toning spreads over both sides in varying densities. A couple of tiny ticks on Liberty's shin and outstretched arm prevent a full MS67 grade. NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

**1932-S Washington Quarter, MS65
Important First-Year Key**

- 3720 1932-S MS65 PCGS. CAC.** The 1932-S Washington quarter is a low-mintage key from the first year of the design. This impressive Gem offers sharply detailed design elements and satiny mint luster on both sides. A few areas of golden-tan and amber toning are evident. PCGS has graded only four numerically finer examples (8/16). NGC ID# 2449, PCGS# 5792

- 3721 1934 Light Motto, FS-401, MS67 PCGS. CAC.** The *Cherrypickers'* reference lists varieties of the 1934 quarter with light, medium, and heavy mottos, all of which are highly elusive at the Superb Gem grade level. This piece represents the Light Motto variant, but is otherwise sharply detailed. Faint ice-blue and light golden hues intermingle across the heavily frosted surfaces, giving this high-end representative exceptional visual appeal. Population: 21 in 67 (3 in 67+), 0 finer. CAC: 13 in 67, 0 finer (8/16). NGC ID# 7JK9, PCGS# 146000 Base PCGS# 5794

- 3722 1935 MS67+ PCGS. CAC.** This Registry Set contender showcases virtually pristine surfaces that are aglow with satiny luster and lovely champagne toning. Boldly rendered motifs appear sharp even upon close examination, contributing to the outstanding eye appeal. Only a single coin is finer at PCGS (8/16). NGC ID# 244D, PCGS# 5797

- 3723 1936-S MS67 PCGS. CAC.** Ice-blue and sun-gold endow the obverse, along with a blush of cherry-red near LIBERTY. The reverse is close to brilliant. Lustrous and crisply struck with contact confined to a tick or two on Washington's neck. No examples of the 1936-S are numerically finer at either service. Population: 49 in 67 (3 in 67+), 0 finer. CAC: 17 in 67, 0 finer (8/16). NGC ID# 244J, PCGS# 5802

**1944 Quarter, Top-Grade MS67+
Registry Set Essential**

- 3724 1944 MS67+ PCGS. CAC.** Tied for the finest at PCGS and also at CAC, this high-end Superb Gem 1944 Washington quarter displays a sharp strike and satiny, unabraded mint luster. A blush of golden toning spreads over each side, adding to the visual appeal. A must-have Registry Set acquisition. Population: 99 in 67 (15 in 67+), 0 finer. CAC: 32 in 67, 0 finer (8/16). NGC ID# 2458, PCGS# 5824

- 3725 1954-D MS67 PCGS. CAC.** This spectacular Superb Gem displays impeccably preserved surfaces, under dusky shades of sea-green, lavender-gray, and amber toning. Sharply detailed design elements and satiny luster add to the exceptional quality. Population: 18 in 67 (1 in 67+), 0 finer. CAC: 11 in 67, 0 finer (8/16). NGC ID# 43PC, PCGS# 5856

PROOF WASHINGTON QUARTERS

- 3726 1940 PR67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the fields are deeply reflective, if slightly hazy in places. The surfaces are impeccably preserved and show a few hints of greenish-gold toning. PCGS has graded only three numerically finer examples (8/16). NGC ID# 27HT, PCGS# 5979 Base PCGS# 5972
- 3727 1940 PR67+ PCGS. CAC.** This Plus-graded example with CAC endorsement approaches the finest certified 1940 quarters seen by PCGS. The glassy-mirrored surfaces display a faint speckling of deep-umber toning, yet a flashy silver sheen prevails to the unaided eye. A Registry Set candidate of the highest order. Population: 37 in 67+, 3 finer. CAC: 69 in 67, 5 finer (8/16). NGC ID# 27HT, PCGS# 5979 Base PCGS# 5972
- 3728 1953 PR68+ Cameo PCGS.** This magnificent Plus-graded PR68 specimen exhibits razor-sharp design elements with a rich coat of mint frost that creates bold Cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 80 in 68 (5 in 68+) Cameo, 2 finer (8/16). NGC ID# 248Y, PCGS# 85985
- 3729 1956 PR69 Deep Cameo PCGS.** Quite an extraordinary coin and one that we were surprised to see such an early date on. At first glance, it looks like one of the mass-produced cameo proofs from the 1980s or 1990s. Brilliant throughout with strong cameo contrast on each side. Population: 47 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 27J2, PCGS# 95988
- 3730 1968-S PR69 Deep Cameo PCGS.** Glassy, jet-black fields frame frosted motifs on each side. The resulting Deep Cameo contrast gives this near-perfect Washington quarter proof compelling eye appeal. Brilliant with occasional blushes of gold patina. Population: 34 in 69 Deep Cameo, 0 finer (8/16). NGC ID# 2495, PCGS# 96000

EARLY HALF DOLLARS

- 3731 1794 O-101a, T-7, High R.3 — Countermarked — NGC Details. Good.** Everything is well-defined for the grade with exception of the date area, which is worn smooth except for the ghost of a 4 that confirms the 1794 date. The letters "G.F.G" are deeply counterstamped vertically on the portrait, a style often seen from gunsmiths, arms inspectors, and blacksmiths in the early 1800s. The reverse is well-detailed except for pitting opposite the counterstamp. Pleasing old-silver color covers both sides. Unlisted in the Brunk reference.
Ex: Coin Galleries (Stack's, 2/1991), lot 2170.
From The Hamilton Collection, Part III.

1795 O-105 Half Dollar, Fine 12 Early Die State

- 3732 1795 2 Leaves, O-105, T-25, High R.3, Fine 12 NGC.** Tompkins Die State 1/3. This is a lightly abraded example of the somewhat available O-105 variety, making it an ideal representative of the Flowing Hair type. Pleasing silver-gray surfaces show deep grayish-blue border toning and light-gray motifs. The raised elements are nicely outlined for the grade, and the eye appeal is excellent. Struck from an apparently early state of the obverse die, while the reverse die is in its later state.
From The Hamilton Collection, Part III. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

- 3733 1795 2 Leaves, O-107a, T-31, R.5 — Reverse Scratched — NGC Details. Fine.** The heavy bisecting reverse crack, between 2 and 8 o'clock, is diagnostic for Overton-107a. A nicely detailed example of the introductory Flowing Hair type. The reverse exhibits numerous thin scratches, and the cream-gray surfaces are mildly glossy. A few thin marks are noted near stars 2 through 4. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

1795 Flowing Hair Half, VF Details O-108a, Two Leaves, Late Die State

- 3734 1795 2 Leaves, O-108a, T-17, R.4 — Improperly Cleaned — NGC Details. VF.** Tompkins Die State 4/3. From a 1990 Superior auction, where it was described as "perhaps suitable for a high grade type set or one for the variety hound." Now in an NGC holder, the designated cleaning is of little consequence for the grade level. The surfaces are glossy beneath the bluish-gray toning. A glass reveals small marks and a few planchet pits, but they are tiny and far less visible in-hand. Struck from the late die stage with numerous peripheral die cracks on both sides. Toned-over adjustment marks are noted across the central reverse.
Ex: Thomas S. Chalkley Collection (Superior, 1/1990), lot 3413.
From The Hamilton Collection, Part III. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

1795 Half Dollar, O-110a, VG10

- 3735 1795 2 Leaves, O-110a, T-21, R.3, VG10 NGC.** Tompkins Die State 3/3. In late die stages, the O-110a (T-21) displays a pair of parallel die cracks that are among the most spectacular of the Flowing Hair series. This example is from a middle state of the dies, with a bold initial crack and just the beginnings of the accompanying second crack. Smoothly worn, natural golden-gray toning blankets both sides of this early half. The motifs are complete except at the date, which is weak at the bottom and faint on the 5.
Ex: Dallas Auction (Heritage, 12/1986), lot 499.
From The Hamilton Collection, Part III. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

**1795 Flowing Hair Half, VF20
O-110a, T-21, Late Die State**

3736 1795 2 Leaves, O-110a, T-21, R.3, VF20 PCGS. Two arcing die cracks at the upper right obverse immediately identify this die marriage. These cracks are spaced closely together. One crack begins at the border over the R, and curves through the right obverse field to star 11. Another crack begins at the border to the TY, and curves through the field so star 10. This example exhibits rich pewter-gray and steel toning with weakness below the date. A few old scratches and surface marks are consistent with the grade. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

3737 1795 2 Leaves, O-117, T-3, R.4 — Obverse Scratched — NGC Details. Fine. The upper left obverse field has a pair of thin marks, perhaps made by a 19th century finder unfamiliar with the Flowing Hair type. This nicely detailed example has tan-brown and cream-gray fields and motifs. The borders exhibit deeper gunmetal shades. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

3738 1801 O-101, T-2, R.3, VG10 PCGS. The 1801 half dollar is an elusive date regardless of die variety. This O-101 example displays astounding eye appeal for the grade. Blatantly original patina displays stark circulation-cameo contrast between the light gray motifs and deeply colored fields. The latter have blended olive-gray, lavender, and amber-orange toning. Wear is even, although some usual strike weakness is seen to the upper right of the eagle's head. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1802 Draped Bust Half Dollar, VF25
O-101, T-1, Only Dies for the Date**

3739 1802 O-101, T-1, R.3, VF25 NGC. Bits of deep-gray toning cling to sheltered areas across the silver-gray surfaces of this scarce early issue. Faint hair-thin lines are visible with a glass. Just 29,890 pieces were struck, making the second-year of the Draped Bust design a key to assembling a date set, equal in challenge to the similarly low-mintage 1801. Census: 14 in 25, 59 finer (8/16). Ex: H.W. Blevins Collection (Superior, 6/1998), lot 3062. From The Hamilton Collection, Part III. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

3740 1805/4 O-101, T-4, R.3 — Improperly Cleaned — NGC Details. XF. Tompkins Die State 1/1, struck from perfect dies. Last seen at auction as part of the James D. Brilliant Collection, where this piece was uncertified. It is now in an NGC holder with the designation XF Details from an old cleaning that occurred prior to 1992. There are no hairlines or other obvious signs of cleaning other than some unexpected glossiness. Golden-gray toning deepens to grayish-blue at the margins, with small grade-consistent marks and sharp definition on the motifs. A faint pinscratch is noted from the edge past I of UNITED to the shield center. Ex: James D. Brilliant Collection (Bowers & Merena, 1/1992), lot 49. From The Hamilton Collection, Part III.

**1805 O-106 Draped Bust Half, Pleasing VF20
Double Struck, First Strike Off-Center**

3741 1805 O-106, T-13, High R.3, VF20 NGC. The first strike was rotated and off-center, then mostly effaced by a second strike that was on center. Remnants of the initial strike appear on both sides of the coin, particularly around the date on the obverse and throughout the upper reverse. Attractive old-silver toning deepens to umber-gray at the borders. The O-106 variety is a somewhat scarce 1805 variety, confirmed by 4 berries on the reverse including a lone stemless berry above the branch. This example apparently circulated for a long period of time despite the Mint error, apparently not noticed by the general public until discovered by a fortunate collector. From The Hamilton Collection, Part III.

**1806/5 O-101 Draped Bust Half, AU Details
Knobbed Top 6 Over 5, Large Stars**

3742 1806/5 O-101, T-6, R.3, — Improperly Cleaned — NGC Details. AU. Tompkins Die State 4/2. Struck from a late stage of the obverse die, but only a middle state of the reverse. Sharply defined overall, the evidence of a past cleaning is minimal and there are no distracting hairlines or other impairments. Traces luster remain beneath slate-gray toning that yields to a thin band of brownish-gold at the rims. Prominent die clashing exists on both sides, but marks from transport or circulation are few and the fields are smooth. A worthwhile example of the 1806 overdate for the perceptive bidder. Ex: A Bernard Shore Collection (Superior, 1/1988), lot 1739. From The Hamilton Collection, Part III.

**1806 O-115a Draped Bust Half Dollar, VF Details
Original Surfaces, Slight Planchet Indent, 15% Off Center**

- 3743** 1806 Mint Error, Off-Center Strike, Pointed 6, Stem, O-115a, T-17, R.2, — Damaged — NGC Details. VF. Tompkins Die State 4/3. Struck 15% off-center to the northeast on the obverse, and a similar offset to the southeast on the reverse. A scarce Draped Bust half error, a terrific find for the error collector as well as for any Bust half variety specialist. Smoothly worn with original warm-gray surfaces display sharp definition on both sides. The date is fully visible. This coin shows moderate wear yet few marks, suggesting it may have been a pocket piece for at least part of its time in circulation. The O-115a (T-17) variety shows repunching of the 6 in the date, but its off-center strike is the main attraction. The Damage noted on the holder is a small indent/bulge on the raw planchet edge at 7 o'clock on the obverse, perhaps from the out-of-color strike, of no consequence in this context.
From The Hamilton Collection, Part III.

BUST HALF DOLLARS

**1809 O-102a Half Dollar, MS64
High Condition Census Example**

- 3744** 1809 Normal Edge, O-102a, R.1, MS64 NGC. CAC. The edge variety is hidden by the holder, but the O-102a variety is known for a normal edge while the earlier die state O-102 often has the XXX experimental edge. A row of incuse pointed segments appears above the eagle's head, while the U is broadly recut. A and M of AMERICA nearly touch, with the A beneath the left serif of M. Star 13 is a bit further from the curl than on the otherwise similar O-101 obverse. Regardless of variety, 1809 halves are very scarce in near-Gem or finer grades. This Choice example displays pleasing light, iridescent toning that deepens at the margins. There are no significant marks, while the strike is needle-sharp on the stars and throughout the raised motifs. Housed in an early generation NGC holder (no barcode, no hologram) and CAC endorsed, this coin has been unseen at auction for at least 28 years.
Purchased from Ellesmere Numismatics (7/1988).
From The Hamilton Collection, Part III. NGC ID# 24ES, PCGS# 39391 Base PCGS# 6092

- 3745** 1809 III Edge, O-107, R.3, AU50 PCGS. Glimpses of golden-brown toning visit the borders of this mostly brilliant Bust half. Marks are moderate and substantial luster remains. A dull die lump between 50 and C helps attribute the scarce Overton-107. An early die state without the many obverse cracks seen on O-107a. NGC ID# 24ES, PCGS# 39383 Base PCGS# 6094

- 3746** 1811/10 O-102, R.4 — Improperly Cleaned — NGC Details. Unc The O-102 variety of the “18 dot 11” overdate is from a later state of the dies, where the dot is (allegedly) a mere remnant of an underdigit. Numerous crossbars extend into the right wing beyond the shield edge to confirm the variety. We last sold this coin as lot 684 of our 1988 Fall Long Beach Sale as part of an uncertified two-coin lot, where it was described as AU55/55 with an obverse rim bruise at 8 o'clock. The finely granular surfaces retain considerable mint luster beneath faint golden-gray toning. Somewhat weakly struck at the peripheries as normal for the O-102, where the milling is often a trace or none at all.
From The Hamilton Collection, Part III. NGC ID# 24EV, PCGS# 39422 Base PCGS# 6099

- 3747** 1811 Small 8, O-110, R.1, MS61 PCGS. The date slants left on O-110, and the AM in AMERICA are joined at the bases. This plentiful variety serves well for type or date purposes in Mint condition. The present piece displays well-struck motifs and satiny luster. Sea-green and lavender peripheral hues surround warm champagne centers. NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

**1811 Half Dollar, MS62
Small 8, O-110**

- 3748** 1811 Small 8, O-110, R.1, MS62 PCGS. Overton-110 shows the date slanting left and AM(ERICA) touching at the base. Soft mint luster shines through the stone-gray toning that covers both sides in their entirety. This Uncirculated half dollar exhibits raised stars with mostly clear radials, razor-sharp detail on the hair curls, and crisply rendered feathers. Minute marks are generally hidden by the rich patina. NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

- 3749** 1812 Large 8, O-103, R.1 — Improperly Cleaned — NGC Details. AU. Overly bright from an old cleaning, this brilliant-silver O-103 example retains much of its frosty luster. It remains as it appeared when sold 28 years ago, there described as “Untoned with considerable amounts of mint lustre visible on both sides” with the notation “ANACS graded About Uncirculated 50/50 on 10-28-81.” Areas of die clashing are readily apparent on the exposed surfaces, with a sharp strike and few marks. In a new NGC holder.
Ex: Lee and Shaffer Collections (Superior, 9/1988), lot 4304.
From The Hamilton Collection, Part III. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1812 O-105a Half Dollar, MS64
Heavily Cracked Obverse Die**

3750 1812 Large 8, O-105a, R.2, MS64 PCGS. CAC. Struck from worn and shattered dies, this O-105a example displays myriad obverse die cracks including major ones through the left-hand stars and in the date area. A heavy break fills the bottom loop of 8 and travels from the edge through the entire right-side portrait before crossing the forehead at the hairline and extending to the milling at star 6. The reverse is cracked and worn with the legend pulled to the margins and the milling nearly gone. Lustrous, golden-gray toning drapes both sides and strong definition remains on the central elements despite the late die state.

From The Hamilton Collection, Part III. NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

3751 1812 Large 8, O-108a, R.2, AU55 PCGS Secure. Most of the dentilation is faded on this late-die-state coin, which shows considerable die erosion around the borders. The central devices are well-defined, but the stars lack central details. Some soft, frosty luster illuminates smooth, golden-gray surfaces. NGC ID# 24EW, PCGS# 39454 Base PCGS# 6100

3752 1814 O-104a, R.2, MS63 PCGS. Numerous die cracks and a wide space between 50 and C confirm status as Overton-104a. Light straw-gold toning adorns lustrous and unabraded surfaces. A small flan flaw on the cheek provides an identifier. Certified in a green label holder.

From The Hamilton Collection, Part III. NGC ID# 4G8D, PCGS# 39479 Base PCGS# 6105

3753 1814 O-109, R.2, AU58 NGC. A split hair curl beneath the L in LIBERTY is among the chief identifiers of this available die pairing. This near-Mint example is struck from heavily clashed dies, showing virtually complete outlines of the eagle on the obverse and Liberty's portrait on the reverse. The satin surfaces display some luster amid smooth, lavender-gray and olive-gold coloration. NGC ID# 24F3, PCGS# 39486 Base PCGS# 6105

**1815/2 O-101 Half Dollar, Fine 12
Lowest Mintage of the Bust Half Series**

3754 1815/2 O-101, R.2, Fine 12 NGC. The economic toll of the War of 1812 extended beyond the official end of hostilities and reached well into 1815, with both silver and gold bullion in short supply. A severe shortage of circulating coinage only deepened when the Mint caught fire in early 1816, destroying its planchet-making machinery. Just 47,150 half dollars were struck in 1815. Utilizing an overdated 1812 obverse die, the dies were pushed past their normal limits. This smoothly worn survivor is ideal for the Fine 12 grade, with few surface marks and pleasing warm-gray color. The devices remain well-defined, although struck from multiply clashed dies.

Ex: H. W. Blevins Collection (Superior, 6/1988), lot 3279.

From The Hamilton Collection, Part III. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

3755 1815/2 O-101a, R.3 — Obverse Repaired — NGC Details. VF. With a production of just 47,150 pieces, the 1815/2 half is by far the lowest mintage of the long-running series. This dove-gray example displays deep-gray accents, particularly on the reverse. At least three areas of tooling or repair are visible on the central obverse, in both the left and right fields and beneath the ear on the portrait.

From The Hamilton Collection, Part III. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

3756 1817 O-109, R.2, MS63 PCGS. Richly toned in ice-blue and reddish-umber shades, this O-109 example is razor-sharp on the stars and the central motifs, lacking detail only at the eagle's talons, branch stem, and arrow fletchings. Bright mint luster shines through the dramatic patina. Both the O in OF and the C in AMERICA are broadly recut. Star 13 sits far from the curl, its outer point aligned with the edge of the nearest dentil. Housed in the green label PCGS holder from time of purchase, this is a likely Condition Census coin of stunning eye appeal.

Purchased from Winthrop Coin (8/1992).

From The Hamilton Collection, Part III. NGC ID# 24F6, PCGS# 39501 Base PCGS# 6109

3757 1817 O-111a, R.1, AU55 NGC. Only a trace of high point wear separates this Choice About Uncirculated O-111a half from a full Mint State designation, since there are no serious abrasions or marks to mention. Bright mint luster remains at the margins and creeps into protected areas of the central motifs, which show sharp definition. Multiple die cracks on the reverse and die clashing on both sides confirm a late state of the dies. The eye appeal of this richly toned piece is exceptional.

From The Hamilton Collection, Part III. PCGS# 39505 Base PCGS# 6109

3758 1818 O-104a, R.3, MS61 NGC. Iridescent cobalt-blue and lavender-brown toning dominates this coruscating and crisply struck Bust half dollar. Minimally abraded and attractive. Several distinctive obverse die cracks attribute Overton-104a, along with a die lump below the space between the RI in AMERICA.

From The Hamilton Collection, Part III. NGC ID# 4FKU, PCGS# 39518 Base PCGS# 6113

3759 1818 O-115a, High R.4, XF45 PCGS. CAC. The obverse die is shattered on this terminal die state example, showing the heavy bisecting from near the second 8 in the date, across Liberty's portrait, to the rim near star 7, accompanied by circular cracks in the left field, across Liberty's bust, and branching off of the first crack above the date. This coin is nonetheless well-struck and boldly detailed with hints of luster in the protected peripheral regions. Both sides are deeply patinated in multiple shades of olive-gold, forest-green, crimson, and lavender-gray. NGC ID# 24F9, PCGS# 39535 Base PCGS# 6113

3760 1820/19 Curl Base 2, O-102, R.1, AU53 NGC. Intense toning — possibly from long storage in a kraft envelope — reveals reddish-gold and cobalt-blue shades that permit traces of silver luster to shine throughout both sides. A sharp strike remains despite a touch of high point wear. The O-102 variety is a collector favorite for its bold two-digit overdate, with the 1 and 9 sharply visible beneath the small Curl Base 2 and 0. This About Uncirculated example offers strong eye appeal for those who like attractive, original toning.
Ex: Public Auction Sale (Stack's, 3/1991), lot 419 as raw Choice XF.
From The Hamilton Collection, Part III. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

3761 1821 O-107, R.3, MS62 NGC. Really an exceptional example for the grade, with a razor-sharp strike and "crusty" original, golden-gray toning. Mint luster glows brightly from the protected areas and borders. The steely smooth fields and crisp devices show only a few faint lines, with no marks needing individual mention. A scarce variety, with star 7 pointing to the front of the cap.
Ex: Washington/Baltimore Coin Convention (Vintage Auctions, 2/1989), lot 563.
From The Hamilton Collection, Part III. NGC ID# 24FF, PCGS# 39586 Base PCGS# 6128

3762 1823 Patched 3, O-102, R.4, AU50 PCGS. The "Patched 3" obverse shows a lump of metal in the joint of the 3, added by Mint employees on a die that showed the 3 nearly severed in this location. Overton-102 is the scarcer of two die marriages that employ this "patched" obverse. The present AU representative displays an even strike and bright silver surfaces with some luster in the peripheral fields. NGC ID# 24FJ, PCGS# 39622 Base PCGS# 6133

3763 1823 O-104, R.3, MS63 PCGS. CAC. The profile is broadly strike-doubled. This is a lightly toned, Select Uncirculated example of the moderately scarce O-104 variety. The digits of the date are close together and the 2 is significantly lower than the surrounding 8 and 3. On the reverse, the lowest horizontal shield line extends beyond the edge, forming a knob. The C in 50 C. is recut inside the upper curve. Sharply struck, this coin ranks in the middle of the Condition Census for the variety. CAC endorsed in a first generation PCGS holder.
Purchased from "Rarities" 3/1987.
From The Hamilton Collection, Part III. NGC ID# 24FJ, PCGS# 39607 Base PCGS# 6131

3764 1823 O-105, R.1 — Double Struck — XF40 NGC. Both sides show the effects of the double strike, skewed slightly one strike from the other. A prominent center dot in a space by itself on the shield confirms the O-105 variety. Both Overton variety collectors and Mint error collectors embrace Bust half errors such as this coin. Easily visible to the unaided eye, a glass reveals both the direction and skew of the doubled images throughout both sides. The piece apparently circulated either undetected or without numismatic notice for many years, now smoothly worn with warm-gray toning.
From The Hamilton Collection, Part III.

3765 1823 O-112, R.1, MS62 NGC. CAC. The Tall 3 in the date is a distinguishing characteristic of the O-112, as is the extension of line 1 of vertical shield stripe 6 to the fourth horizontal crossbar. Amber-orange and pale-blue toning surrounds lilac-silver centers, which display a sharp strike and strong doubling on Liberty's profile. CAC endorsed in an early generation (pre-barcode) NGC holder.
Purchased from Allstate Coin Company (6/1989).
From The Hamilton Collection, Part III. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

3766 1823 O-112, R.1, MS63 PCGS. Apple-green and lime-gold color drapes this lustrous and unabraded Bust half. Each side has a few minute dark freckles. The coin is sharply struck save for about half of the right-side stars. Liberty's profile is strike doubled. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

1824 O-113 Half Dollar, MS64 Condition Census Quality

3767 1824 O-113, R.1, MS64 PCGS. CAC. A wormlike die defect above the eagle's left wing aids in the attribution process. Design detail is fully rendered on the obverse, while the reverse is not quite as well-defined. Gorgeous shades of purple, blue, and gold progress from the rims to the centers on each side, explaining the wonderful visual quality and CAC approval sticker. A marvelous Condition Census half dollar. NGC ID# 24FK, PCGS# 39634 Base PCGS# 6137

3768 1825 O-105, R.2, MS63 PCGS. CAC. Light to medium golden-brown and jade-green toning accompanies this lustrous and lovely Bust half dollar. Marks are absent and the eye appeal is superior. Liberty's profile is double struck. Encapsulated in an old green label holder.
From The Hamilton Collection, Part III. NGC ID# 24FL, PCGS# 39651 Base PCGS# 6142

3769 1825 O-113, R.1, MS62 PCGS. Blazing, mint-fresh-looking luster rolls over mostly clean fields on this Mint State 1825 type coin. Light grazes on Liberty's cheek appear to be all that limit the grade, but even so, the visual appeal is far beyond what is expected for the MS62 level. The peripheral stars are uniformly soft, but the central devices show sharp detail. NGC ID# 24FL, PCGS# 39660 Base PCGS# 6142

3770 1826 O-106, R.3, MS64 NGC. Iridescent toning features olive, rose, and peach-gold shades on both sides of this near-Gem O-106 half — a somewhat scarce variety, known for a double bottom-left serif on R of AMERICA, with RI joined at the base. An extension of Liberty's hair strand into the base of L in LIBERTY on the headband confirms the obverse. Both the Steve Herrman and Donald Parsley Condition Census rankings show MS64 coins prominent in the listings, albeit this coin is not shown since it has been unseen in the market for more than 20 years. Housed in a prior generation NGC holder.
From The Hamilton Collection, Part III. NGC ID# 4ENF, PCGS# 39673 Base PCGS# 6143

3771 1827 Square Base 2, O-128, Low R.4, MS61 PCGS. The stars are fairly well defined on this Mint State Capped Bust type coin, and the central devices are bold. There are no individually significant abrasions, only light handling marks that limit the grade. Dusky lavender-gray, blue, and champagne hues blanket both sides. NGC ID# 24FN, PCGS# 39727 Base PCGS# 6144

3772 1827 Square Base 2, O-128, Low R.4, MS62 PCGS. The central devices are well-struck, although the peripheries show metal flowlines and there is some weakness below the eagle and on the stars. This champagne-toned Mint State example displays pleasing eye appeal for the grade with minimal signs of contact. NGC ID# 24FN, PCGS# 39727 Base PCGS# 6144

3773 1827 Square Base 2, O-129, Low R.4, MS63 PCGS. This is a scarce die pairing for the 1827 date. Some 29 obverse dies and 34 reverse dies produced 49 die pairings in 1827 according to the Overton reference. This one is O-129, with a jointed L in PLURIBUS diagnostic of the reverse and flatness of stars on the left (particularly stars 5, 6, and 7) diagnostic for the obverse.

Those interested in this bust half only for its quality and eye appeal will appreciate the sharp strike and the colorful, album-style toning. Golden-gray centers blend into rose, russet, and turquoise peripheral hues. Liberty's drapery folds, clasp, and hair curls are sharp. The eagle is fully feathered with a touch of softness on the right (facing) talons. The scroll is complete. Soft luster is pervasive on both sides of the coin. The O-129 variety has an R.4 rating, with this MS63 example likely one of the half-dozen finest of the variety. NGC ID# 24FN, PCGS# 39728 Base PCGS# 6144

**1828 O-109 Half Dollar, MS64
Large 8s, Sharp Strike**

3774 1828 Square Base 2, Large 8s, O-109, R.3, MS64 NGC. Overton-109 is distinctive for the recutting inside the upper loops of the 8s, showing the shadow of an earlier, smaller logotype. The present Choice example displays bright satin luster over brilliant interiors, with deep amber, blue, and sea-green around the borders. A few light grazes on Liberty's cheek and in the field prevent a Gem designation. Seldom seen finer. NGC ID# 24FR, PCGS# 39763 Base PCGS# 6150

3775 1828 Square Base 2, Small 8s, Large Letters, O-112, R.3, MS63 NGC. CAC. Two groups of die lines near the bust tip are characteristic of the O-112 early die state. This lustrous and beautiful half dollar has light ocean-blue, lilac, and golden-brown peripheral toning. Only incidental contact is present. Certified in a prior generation holder.

From The Hamilton Collection, Part III. NGC ID# 24FR, PCGS# 39766 Base PCGS# 6151

3776 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, MS62 PCGS. Ex: Frederick Collection. A splendid representative with stunning pale rose, gold, and blue toning over frosty mint luster. The reverse is cracked through the tops of UNITED STATES and above OF AM to represent a late state of the dies. Destined for a fine collection of Capped Bust half dollars. NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

3777 1830 Small 0, O-101, R.1, MS63 PCGS. CAC. The primary pick-up point for this O-101 Small 0 variety is the A in STATES, which is recut on the outside left, and with a vertical die defect within the A. Vertical line 3 of stripe 3 extends below the shield. Golden-gray toning with lilac overtones reveals full mint luster beneath the attractive patina. Sharply struck, housed in a green label holder with CAC endorsement.

From The Hamilton Collection, Part III. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**1830 Half Dollar, Near-Gem
Small 0, O-103**

3778 1830 Small 0, O-103, R.1, MS64 PCGS. The first A in AMERICA and the 5 in the denomination are both recut to the left on this collectible variety. A short die line connects the center arrowhead to the border. This satiny representative is deeply patinated olive-green and tobacco-brown with glimpses of cobalt-blue and fire-red at the margins. Well struck except for the stars. Liberty's profile is lightly strike doubled.

Ex: Orlando FUN Signature (Heritage, 7/2011), lot 3613; Pittsburgh Signature (Heritage, 10/2011), lot 3696; Long Beach Signature (Heritage, 9/2013), lot 3789. NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

**1830 Small 0 Half Dollar, MS64
Condition Census O-106 Representative**

3779 1830 Small 0, O-106, R.2, MS64 PCGS. The tail of the C in the denomination is recut. Mint-green and ice-blue toning adheres to the borders, melding to lavender and gold patina over the interior portions of this readily appealing Choice Uncirculated half dollar. The stars exhibit complete centers and the eagle's wingtips are bold, while Liberty's curls and the lower reverse display moderate indistinctness. This piece qualifies for Stephen Herrman and Donald Parsley's Condition Census. NGC ID# 4DC3, PCGS# 39815 Base PCGS# 6156

3780 1830 Small 0, O-116, R.2, MS63 PCGS. Rich dove-gray and autumn-brown patina encompasses this satiny and nicely struck Select Bust half. Nicely struck and minimally marked. A late die state with the stars drawn to the rim. NGC ID# 24FU, PCGS# 39827 Base PCGS# 6156

3781 1831 O-109, R.1, MS62 PCGS. Caramel-gold toning dominates this coruscating representative, though the left obverse field has a hint of ocean-blue patina. Marks are confined to faint contact on the cheek and the reverse field above the eagle's beak. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

1832 Half Dollar, O-103, MS64
Small Letters Type Coin

3782 1832 Small Letters, O-103, R.1, MS64 PCGS. A die lump on the drapery fold below the clasp and recutting on the upright of the 5 in the denomination identify this available variety. The present coin is sharply struck and lustrous with uniform greenish-gold toning over mostly unabraded surfaces. Finer 1832 half dollars are scarce, regardless of variety. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

3783 1833 O-102', R.1, AU58 NGC. Houck's Panacea Countermark, HT-141, B-779. This attractive, near-Mint O-102' half crosses over to many collecting interests, appealing to specialists in Hard Times tokens and collectors of classic counterstamps as well. Jacob Houck was a Baltimore, Maryland dry goods dealer who expanded into the patent medicine business. In 1834, he started selling his bottled panacea, advertised as prepared solely from vegetable matter. (No information was given whether that vegetable matter was fermented or not.) Retailing at \$1.50 per bottle, the tonic was popular at the time and was still sold as late as the 1850s, although the latest-known counterstamps are on coins dated 1845. This Bust half is perhaps one of two 1836 halves listed in the Brunk reference. The loaf-shaped counterstamp on this example is fully struck (not always the case), with even the apostrophe visible in HOUCK'S. *From The Hamilton Collection, Part III.* NGC ID# 24FX, PCGS# 39888 Base PCGS# 6163

3784 1833 O-108, R.1, MS63 PCGS. Medium golden-brown centers are framed by aquamarine borders. The fields exhibit clash marks but appear unabraded. The strike shows minor blending on the curls. Peripheral elements are drawn to the edge, confirming the late die state. NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

1833 O-114 Half Dollar, MS64
Vibrant Obverse Patina

3785 1833 O-114, R.2, MS64 PCGS. The reverse is brilliant, but the obverse displays rich lavender-red, orange-gold, and aquamarine patina across the lower border. The portrait high points are dove-gray. Lustrous and unabraded with exceptional eye appeal. An unusually late die state with the tops of UNITED and AMERICA blending into the reverse rim. NGC ID# 24FX, PCGS# 39903 Base PCGS# 6163

1834 O-102 Half Dollar, MS64
Large Date, Large Letters

3786 1834 Large Date, Large Letters, O-102, R.1, MS64 PCGS. This Large Date, Large Letters variant features recutting on 83. O-102 is a collectible variety with the finest known examples in MS66. This near-Gem falls just shy of qualifying for the Condition Census. Lovely patina in shades of gold, blue, and lavender confirms the originality of this piece. Luminous luster enhances the visual appeal. Population for the variety: 2 in 64 (1 in 64+), 1 finer (8/16). NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

3787 1834 Large Date, Small Letters, O-104, R.2, MS63 PCGS. Deep dove-gray, walnut-brown, and forest-green toning dominates this original and unabraded Bust half dollar. The strike is typical but the eye appeal is impressive. NGC ID# 24FY, PCGS# 39908 Base PCGS# 6165

3788 1834 Large Date, Small Letters, O-105, R.1, MS64 PCGS. CAC. The 4 in the date is tall and recut at the bottom side of the crossbar, while the 1 sits low in relation to the 834 and is widely spaced. This near-Gem example currently ranks in a tie for fourth in the Condition Census according to Steve Herrman's listing as well as the Parsley reference. Reddish-gold and grayish-blue toning is lustrous and iridescent across frosty, nearly mark-free surfaces. The strike is first-rate. Housed in an old green label holder (from time of purchase) with CAC endorsement.
Ex: Allstate Coin Company (8/1991).
From The Hamilton Collection, Part III. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

1835 O-102 Half Dollar, MS64
Satin and Attractively Toned

3789 1835 O-102, R.3, MS64 PCGS. On this variety, there is an oval area between the curl and the headband, and the 5 of the date has a narrow, nearly straight top. The obverse features ocean-blue and sun-gold margins. The reverse margin displays olive-green and pumpkin shades. The design elements exhibit sharp definition, save for softness in the centrils of the upper-most stars. The reverse is smooth and lustrous, and the obverse is satiny and only faintly abraded.
Ex: Denver Signature (Heritage, 8/2006), lot 3310. NGC ID# 24FZ, PCGS# 39928 Base PCGS# 6168

3790 1835 O-105, R.1, MS62 NGC. Recutting on star 4 is the clearest attribution marker. Tan patina blankets this Uncirculated Capped Bust half dollar. The strike is incomplete around the legends, and (PL)URIBU(S) is indistinguishable. Softly lustrous and attractive. NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

3791 1835 O-106, R.1, MS62 PCGS. Gold CAC. The 1 in the date leans sharply to the right and the 5 is noticeably recut outside of the upright to identify the O-106 obverse, and the reverse confirms with a short tine off the left side of the eagle's neck. A sharp Mint State example of obvious originality and above-average surface quality, silver luster prevails at the centers with intermittent peach-gold and blue toning in the fields and along the margins. This coin received the CAC gold seal signifying a finer grade is warranted, currently housed in an old green label holder.

Purchased from Numismatic Consultants.

From The Hamilton Collection, Part III. NGC ID# 24FZ, PCGS# 39932 Base PCGS# 6168

3792 1835 O-107, R.1, MS62 PCGS. A coruscating powder-blue, golden-brown, lavender-red, and pearl-gray Capped Bust type coin. Marks are minimal, and the strike is bold except on the upper stars. An extended right shield tip is an identifier for the collectible Overton-107 die pairing. NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

3793 1836 Lettered Edge, O-113, R.2, MS61 NGC. This coin last appeared at auction in 1988, where it was purchased in raw form with the simple description, "O.113. Lettered edge. Double outline to clasp. A scarce variety. About Uncirculated, nicely struck, gray and iridescent toning." Richly toned with glossy, semireflective surfaces and only a few tiny marks, the strike is sharp with reddish-gold and gunmetal-blue shades dominating both sides.

Ex: The 400 Sale (Stack's, 1/1988), lot 1074.

From The Hamilton Collection, Part III. NGC ID# 4EW7, PCGS# 39948 Base PCGS# 6169

REEDED EDGE HALF DOLLAR

3794 1839-O GR-1, R.1, VF25 PCGS. The mintmark is recut northeast. This is the most often seen die pair for the 1839-O, comprising about 95% of known examples. This well-circulated half dollar has light gray surfaces with even friction over the devices. Wispy marks are apparent in the fields. A challenging final-year issue. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

3795 1839 No Drapery, WB-101, XF45 PCGS. Hints of gold toning appear on the pewter-gray surfaces of this debut issue in the Seated half dollar series, the only date of the No Drapery variant, and highly popular among type collectors for that reason. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

3796 1839 With Drapery, WB-102, MS63 PCGS. Although similarly scarce in the absolute sense, the 1839 With Drapery Seated half dollar is seen slightly more often in Mint State than its No Drapery counterpart. This Select example displays a razor-sharp strike and minimal abrasions for the grade. The obverse is softly frosted, while the reverse shows semiprooflike fields. Light golden toning warms both sides. Population: 11 in 63, 21 finer (8/16). NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232

1841 Seated Liberty Half, MS63 Unusually Sharp Strike

3797 1841 WB-101 MS63 PCGS. From a mintage of 310,000 pieces, the 1841 Seated Liberty half dollar is an elusive issue in all Mint State grades. Although many examples of this date are softly struck on Liberty's head and the eagle's leg, this coin is sharply detailed throughout. The lightly marked surfaces radiate satiny mint luster, under attractive shades of golden-brown and lavender toning. Population: 8 in 63, 8 finer (8/16). NGC ID# 24GR, PCGS# 572007 Base PCGS# 6236

1842 WB-101 Small Date Half Dollar, MS64 Large Letters, Reverse of 1842

3798 1842 Small Date, Large Letters, WB-101, MS64 PCGS. Attractive multicolor toning blankets both sides of this near-Gem 1842 half, which exhibits a Small Date obverse paired with a Large Letters reverse of 1842. The rarity of high Mint State pieces from the 1840s is well-known by Seated half specialists, but the true scarcity is often unrecognized by the wider collecting public. This piece is likely tied for a spot within the Condition Census for the type, with sharply struck motifs and natural color that ranges from gunmetal-blue and sea-green hues to ruby-red and straw-gold toning. A few of the right-hand stars lack some definition, but overall the coin is Choice with eye appeal that suggests an even higher grade. Population: 6 in 64, 2 finer (8/16). NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

1842-O Half Dollar, WB-101, AU50
Elusive Small Date, Small Letters Example

- 3799 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, AU50 ANACS.** The lack of a crosslet on the 4 in the date confirms the variety, as do the beginnings of a die crack on the reverse between AL in HALF. Curiously, the Small Letters reverse was also used as one reverse on some 1841-O Seated halves, but the die crack on the 1841-O's is more advanced, confirming that they were struck *after* the 1842-O's. Seated half dollar experts Wiley and Bugert write of this issue, "WB-101 is extremely scarce in all grades (but especially above XF) and it is one of the key varieties of the entire series." Considerable mint luster remains on the silver-gold surfaces while coppery patina surrounds the peripheral devices of this attractive piece, which is probably near the lower end of the Condition Census.

Ex: ANA Signature (Heritage, 8/2007), lot 836. NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

- 3800 1844-O Doubled Date, FS-301, WB-103, Die Pair 22, R.4, Fine 15 NGC.** Among the most famous die varieties of the Seated half dollar series, listed in the *Guide Book* and displayed on the cover of the classic 1993 Wiley-Bugert reference. The date was initially entered much too high, then repunched in the proper position. An evenly worn, lightly abraded, and moderately hairlined silver-gray example. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

- 3801 1849-O WB-101, Die Pair 7, R.3, MS62 NGC. CAC.** Ex: The Rev. Dr. James G.K. McClure Collection. Two large die lumps — one on the rock to the left of Liberty's hand, the other near Liberty's left knee — join two diagnostic die cracks on the obverse to confirm an early die state. The reverse displays a splendid die crack from the rim through the second A of AMERICA into the eagle's wing near the shield edge. Lustrous silver-gray surfaces show sharp definition on the central elements but weakness at several obverse star centers and Liberty's topmost hair strands. CAC endorsed for eye appeal and quality. Census: 4 in 62, 13 finer. CAC: 2 in 62, 6 finer (8/16). NGC ID# 24HF, PCGS# 572073 Base PCGS# 6263

1849-O WB-101 Seated Half, MS64
Only Two Finer Coins at PCGS

- 3802 1849-O WB-101, Die Pair 6, R.3, MS64 PCGS.** The obverse die shows heavy rust lumps on the portrait and shield. Bright silver luster dominates some streaky tan-gold toning that courses across the obverse, yet the fields are reflective and a sharp strike defines the star centers and Liberty's hair strands. The reverse is equally well-struck and deeply toned in a more prevalent distribution of the same toning, with gunmetal-blue shades added to the mix. Only a few tiny marks account for the near-Gem designation. Population (all varieties): 8 in 64, 2 finer (8/16). NGC ID# 24HF, PCGS# 572073 Base PCGS# 6263

- 3803 1850 Repunched Date, WB-102, MS61 NGC.** The 0 is repunched northwest. This is a high-attrition issue with a mintage of 227,000 coins. Brightly untoned surfaces offer full star centers, clear sandal detail, and delineated olive leave veins. Wispy marks are peppered uniformly throughout. Census: 5 in 61, 24 finer (8/16). NGC ID# 24HG, PCGS# 572075 Base PCGS# 6264

- 3804 1854 Arrows, WB-101, MS63 NGC.** Nearly 3 million half dollars were struck by the Philadelphia Mint in 1854, with many of the dies pushed to their limits. This example shows sharp definition on the elements and slight reflectivity in the fields despite multiple die cracks and minor die clashing on both sides. Deep iridescent toning features gold and lilac-gray hues amid strong and plentiful mint luster beneath the rich patina. Census: 34 in 63 (2 in 63+), 44 finer (8/16). NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

1854-O WB-101 Arrows Half, MS65
Crumbled Obverse Die, Filled 54 in Date

- 3805 1854-O Arrows, WB-101, Die Pair 37, Lloyd-905, R.3, MS65 NGC.** This is one of the most intriguing die varieties for the 1854-O issue. It is the sole use of a reverse die that exhibits extensive, heavy die lines, particularly around the peripheral legends, while the obverse is heavily deteriorated around the figure of Liberty and shows extensive crumbling around the date. The present example is well-struck, with satiny luster that displays soft golden hues around the margins. Light contact on the high points of Liberty precludes a finer grade. Census (all varieties): 13 in 65, 10 finer (8/16). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

- 3806 1860-O Type One Reverse, WB-101, Die Pair 1, R.2, MS64 PCGS. CAC.** A middle die state example, clashed on Liberty's lap but not yet cracked radially through the D in DOLLAR. This sharp near-Gem displays luminous lavender-gray luster with warm golden hues emerging from the recesses. There are no mentionable abrasions. Population: 40 in 64 (2 in 64+), 24 finer. CAC: 3 in 64, 9 finer (8/16). PCGS# 572137 Base PCGS# 6300

- 3807 1865 MS63 PCGS.** A truly underrated issue in Mint State grades, this 1865 half dollar has champagne toning over its reflective fields and sharp design elements. NGC ID# 24JF, PCGS# 6313 Base PCGS# 6313

PROOF SEATED HALF DOLLARS

1873 No Arrows Half, Colorful PR64 WB-102, Closed 3

3808 1873 No Arrows PR64 NGC. CAC. WB-102. Ex: Rev. Dr. James G.K. McClure. Glittering, mirrored fields display vibrant reflectivity and attractive coloration. Sea-green and steel-blue shades hug the rims, while ruby-red accents float over gold-toned fields. The frosted central devices exhibit medium contrast despite the rich patina. A Choice proof in all regards — an exceptional, original example of the Closed 3, No Arrows design. A razor-sharp strike exists except for the usual blending at the eagle's left (facing) ankle, one of 600 proofs struck for the type. Census: 30 in 64, 42 finer. CAC: 4 in 64, 11 finer (8/16). NGC ID# 27U8, PCGS# 6431

3809 1877 PR64 Cameo PCGS. CAC. Cameo proof 1877 Seated half dollars are seldom seen in any grade. This CAC-approved near-Gem displays light golden toning overall with a blush of rust-orange along the left obverse border. The strike is sharp, and contrast is pleasing. Population: 14 in 64 (3 in 64+) Cameo, 7 finer. CAC: 3 in 64, 2 finer (8/16). NGC ID# 27UC, PCGS# 86438

3810 1878 PR64 PCGS. CAC. Sharply struck and lightly toned, pale blue accents visit both sides of this peach-gold proof. More scarce than its mintage suggests in business strike format, the 1878 proofs were struck in larger quantity than the previous year and near-Gem or finer pieces are somewhat more obtainable. This Choice example carries the CAC endorsement for quality and eye appeal, an important vote in its favor. Population: 51 in 64, 21 finer. CAC: 5 in 64, 2 finer (8/16). NGC ID# 27UD, PCGS# 6439

3811 1883 PR64 PCGS. CAC. Faint reddish-gold toning on both sides yields to a thin band of blue at the reverse rim. A nicely preserved, near-Gem proof with problem-free surfaces and a sharp strike. Slight blending on Liberty's hair strands a few scattered, tiny marks are noted but the overall eye appeal is impressive. NGC ID# 27UJ, PCGS# 6444

1883 Half Dollar, PR64 Deep Cameo Incredibly Eye-Appealing

3812 1883 PR64 Deep Cameo PCGS. Deep Cameo examples of the 1883 Seated half dollar are rare in all grades, and the present Choice example is numerically in the most affordable condition. In terms of eye appeal, there is nothing that this starkly contrasted, champagne-toned proof does not offer. The strike is razor-sharp, and the motifs are thickly frosted atop jet-black fields. A few stray marks are hardly noticed. Population: 7 in 64 (2 in 64+) Deep Cameo, 5 finer (8/16). NGC ID# 27UJ, PCGS# 96444

3813 1887 PR64 PCGS. CAC. One of 710 proofs struck, this sharp example displays a deeply mirrored obverse with faint blue rim toning. The blue accents are more extensive on the reverse, tempering the reflectivity — although both sides radiate a pleasing orange-gold glow. In both business strike format and proofs, the 1887 ranks among the scarcest of the late-date Seated halves. CAC endorsed at this near-Gem level. Population: 58 in 64, 37 finer. CAC: 4 in 64, 14 finer (8/16). NGC ID# 27UN, PCGS# 6448

BARBER HALF DOLLARS

3814 1894 MS64 PCGS. Pale ivory-gray patina accompanies a hint of pale blue at the extreme rims of this nicely preserved and sharply struck near-Gem Barber half. More than 1.1 million examples of this issue were produced for circulation, but most did just that — circulated extensively, and even the average certified survivor is only Choice XF-AU. The strike on this piece is admirably bold, up to and including the usually problematic upper-right shield corner. Population: 30 in 64 (1 in 64+), 38 finer (8/16). NGC ID# 24LN, PCGS# 6468

1895-S Barber Half Dollar, MS64

3815 1895-S MS64 PCGS. CAC. This pleasing Choice specimen exhibits well-detailed design elements and well-preserved surfaces, under shades of lavender-gray, amber and greenish-gold toning. Satiny mint luster shines through the patina, adding to the considerable eye appeal. Population: 35 in 64, 17 finer. CAC: 3 in 64, 7 finer (8/16). NGC ID# 24LU, PCGS# 6473

1900-S Half Dollar, Strong MS64

3816 1900-S MS64 PCGS. David Lawrence (1991) writes that the 1900-S half dollar (2.5 million pieces) is surprisingly scarce in Mint State. This near-Gem displays coruscating luster and dappled golden-tan, russet, and grayish-blue patina. The design elements are crisply defined, except for minor softness in the upper right corner of the shield. Wispy handling marks on Liberty's cheek and neck and in the right obverse field define the grade. Population: 21 in 64, 13 finer (8/16).

Ex: Dallas Signature (Heritage, 7/2006), lot 2446; Long Beach Signature (Heritage, 9/2006), lot 1979. NGC ID# 57PC, PCGS# 6488

3817 1901 MS65 PCGS. CAC. The 1901 is one of the surprises in the Barber half series. With a mintage of 4.2 million pieces it should be common in all grades, but the issue is a condition rarity at the Gem level. This is a sharply struck example that is toned in medium density shadings of gray, lilac, and rose. There are no reportable abrasions on either side. Population: 17 in 65 (3 in 65+), 7 finer. CAC: 4 in 65, 4 finer (8/16). NGC ID# 24MC, PCGS# 6489

**1906-D Barber Half Dollar, MS65
Condition Rarity in Finer Grades**

3818 1906-D MS65 PCGS. CAC. The 1906-D Barber half dollar claims a substantial mintage of more than 4 million pieces but few survivors grade as high as MS65, and finer coins are very rare. This impressive Gem exhibits well-detailed design elements, with a touch of the usual softness on the shield point and eagle's wing nearby. The well-preserved surfaces radiate vibrant mint luster under iridescent shades of golden-brown and lavender toning. Population: 15 in 65, 10 finer. CAC: 5 in 65, 6 finer (8/16). NGC ID# 24MV, PCGS# 6505

3819 1907 MS65+ PCGS. CAC. A high-end Gem Barber type coin with shimmering satin luster that displays splashes of olive-gold toning. Hints of lavender and mint-green iridescence accent the remaining surfaces. Moderate strike weakness appears on the right (facing) side of the eagle's body, the talons, and the fletchings, but the obverse is sharply struck. Finer pieces are exceedingly rare. Population: 40 in 65 (2 in 65+), 8 finer. CAC: 6 in 65, 6 finer (8/16). NGC ID# 24MY, PCGS# 6508

**1907 Barber Half Dollar, MS66
Registry Set Contender**

3820 1907 MS66 PCGS. CAC. As with most issues in the Barber half dollar series, the 1907 becomes conditionally rare above MS65. This frosty example is Registry Set quality. Exceptional preservation emerges from beneath warm champagne toning with a few russet flecks near the borders. The eagle's right (facing) wing junction is predictably weak, although the obverse is better defined. Population: 5 in 66 (1 in 66+), 1 finer. CAC: 4 in 66, 2 finer (8/16). NGC ID# 24MY, PCGS# 6508

3821 1908 MS65 NGC. A dip in the mintage of 1908 half dollars compared to the higher mintages of the 1907 and 1909 issues does not translate to any meaningful difference in market value, yet the scant population in Gem and finer condition suggests it should. This frosty example displays pale golden-gray toning and soft mint luster throughout. The shield corner is sharp, with only slight merging of the details on the eagle's talon and arrow fletchings. Census: 11 in 65, 5 finer (8/16). NGC ID# 24N4, PCGS# 6512

**1908-D Half Dollar, MS66+
Amazing Color**

3822 1908-D MS66+ PCGS. CAC. Examples of this Denver issue with original patina, satiny luster, and bold strike definition can be obtained with minimal searching, though coins as fine as this Premium Gem are very rare. Design detail is about as strong as one may hope to find with well-struck fletchings and talons, and good detail on the right shield-wing juncture. Marvelous lime-green, golden-orange, lavender, and magenta toning graces each side. Population: 15 in 66 (4 in 66+), 4 finer. CAC: 11 in 66, 3 finer (8/16). NGC ID# 24N5, PCGS# 6513

3823 1908-O MS65 PCGS. The right side of the reverse is much sharper than usually seen on this New Orleans issue, which was struck in large quantities (more than 5.3 million pieces struck) with the dies often used beyond their normal limit. The obverse shows an interesting bi-level break at the neck point, yet the strike is sharp on the portrait and stars. Fulsome silver luster covers the centers, while tan and reddish-gold accents add eye appeal. Population: 38 in 65, 37 finer (8/16). NGC ID# 24N6, PCGS# 6514

3824 1911-D MS65 PCGS. A dusting of lavender and blue-gray toning accents the Gem-quality surfaces of this 1911-D Barber half dollar. The obverse is well-struck with a hint of reflectivity in the fields. The reverse shows typical weakness on the eagle's right (facing) wing junction and talons and on the fletchings. Population: 25 in 65 (1 in 65+), 13 finer (8/16). NGC ID# 24NE, PCGS# 6522

3825 1911-S AU58 NGC. A set of Barber halves in AU condition is a challenging goal but one that is attainable with perseverance and patience. This near-Mint 1911-S would fit nicely in such a set. Nice luster remains over frosty, pale-gray surfaces with glints of gold. A semikey issue in the series as demonstrated by the low certified population. Census: 11 in 58, 35 finer (8/16). NGC ID# 24NF, PCGS# 6523 Base PCGS# 6523

3826 1912-D MS66 PCGS. CAC. Though slightly over 2.3 million half dollars were struck at Denver in 1912, the date was not saved in quantity, and today it is a condition rarity at the MS66 level. This is just such a coin, lustrous with gold and pink-purple borders and more silver centers. Population: 16 in 66 (3 in 66+), 1 finer. CAC: 13 in 66, 0 finer (8/16). NGC ID# 24NH, PCGS# 6525

**1912-S Barber Half Dollar, MS65
Light Natural Toning**

3827 1912-S MS65 NGC. Low-intensity shades of champagne-gold and lavender toning visit the well-preserved surfaces of this impressive Gem, with vibrant mint luster and sharply detailed design elements underneath. Overall eye appeal is outstanding. From a nominal mintage of 1.3 million pieces. Census: 7 in 65, 8 finer (8/16). NGC ID# 24NJ, PCGS# 6526

3828 1913 MS62 NGC. The 1913 gains in stature seemingly every year since no great influx of Mint State coins has entered the market over the past decade. Lustrous and frosty, this silver-gray example shows deeper accents around the raised devices and only a few tiny marks. The strike is sharp on the obverse but characteristically weaker at the shield junction and at the eagle's lower extremities. Census: 12 in 62, 35 finer (8/16). NGC ID# 24NK, PCGS# 6527

3829 1915-D MS65 PCGS. The 1915-D Barber half dollar is relatively available in Gem condition for a member of this series, but its very ubiquity makes it ideal for type collectors to snatch up nice examples such as this piece. Both sides display satin luster, the obverse largely untuned (and showing a nice sharp strike) with flecks of charcoal near the rim, and the reverse opening up into generous pale sage, charcoal, and silver-ochre patina. The right shield border is solidly struck as well. PCGS reports only 21 numerically finer (8/16). NGC ID# 24NS, PCGS# 6533

1915-S Barber Half Dollar, MS66 Final Year of Design

3830 1915-S MS66 PCGS. This final-year San Francisco issue is rare in MS66 and extremely so any finer. The present coin displays frosty luster and lightly mottled golden toning. The strike is soft the eagle's right (facing) talons and wing junction, but the obverse is better defined. There are no bothersome abrasions. Finer pieces, when found, are usually out of reach for most collectors. Population: 10 in 66, 2 finer (8/16). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

1893 Barber Half Dollar, PR65 Cameo

3831 1893 PR65 Cameo PCGS. The design elements of this attractive Gem are sharply detailed in most areas, with just a touch of localized softness on the shield point and adjacent area of the eagle's wing. The surfaces are well-preserved and the fields are deeply reflective, with noticeable field/device contrast, under delicate shades of pale gold toning. Population: 18 in 65 Cameo, 28 finer (8/16). NGC ID# 24NV, PCGS# 86540

1898 Barber Half Dollar, PR66 Vivid Multicolor Patina

3832 1898 PR66 PCGS. CAC. Only 735 proof Barber half dollars were struck in 1898. Vivid shades of autumn-gold and lavender toning blanket the impeccably preserved surfaces of this impressive Premium Gem, with sharply detailed design elements throughout and outstanding eye appeal. Population: 27 in 66, 10 finer. CAC: 5 in 66, 4 finer (8/16). NGC ID# 24P2, PCGS# 6545

1900 Half Dollar, PR65 Cameo, Light Golden Patina

3833 1900 PR65 Cameo PCGS. CAC. The obverse features minimally toned centers with golden patina around the rims. The other side shows a uniform layer of light gold color. Each side is boldly contrasted, and the reverse undoubtedly borders on Deep Cameo contrast. Demand for proofs was higher at the turn of the century, as 912 proof half dollars were struck in 1900. Population: 24 in 65 (2 in 65+) Cameo, 29 finer. CAC: 5 in 65, 27 finer (8/16). NGC ID# 24P4, PCGS# 86547

3834 1902 PR64 PCGS. An attractive Choice proof from a mintage of 777 pieces, this coin exhibits sharply detailed design elements and deeply reflective fields, but not quite enough contrast for the Cameo designation. The well-preserved surfaces display a few hints of greenish-gold toning. NGC ID# 24P6, PCGS# 6549

3835 1903 PR64 PCGS. A razor-sharp strike is among the many outstanding attributes of this near-Gem proof 1903 Barber half dollar. Modest field-device contrast is observed on each side, and only a few minor hairlines on the obverse limit the grade. The interiors are brilliant, while the peripheries show hints of reddish-russet and blue toning. NGC ID# 24P7, PCGS# 6550

1910 Barber Half Dollar, PR65 Cameo Only 551 Pieces Struck

3836 1910 PR65 Cameo PCGS. This impressive Gem offers sharply detailed design elements, aside from some localized softness on the shield point, and deeply reflective fields that create unusual Cameo contrast with the frosty devices. The virtually unmarked surfaces display dappled highlights of autumn-gold and violet toning. Population: 8 in 65 Cameo, 11 finer (8/16). NGC ID# 24PE, PCGS# 86557

- 3837 1914 PR65 NGC.** With a low mintage of 380 pieces, the 1914 proof Barber half dollar is more available than one might expect, but examples at the Gem level are nonetheless quite scarce. The present coin displays sharp detail, with brilliant reflective fields and a blush of pale champagne toning on both sides. Overall visual appeal is excellent. Census: 33 in 65, 53 finer (8/16). NGC ID# 24PJ, PCGS# 6561

WALKING LIBERTY HALF DOLLARS

1916 Walking Liberty Half, MS65 Excellent Luster and Toning

- 3838 1916 MS65 PCGS. CAC.** This first-year Walking Liberty half dollar displays luminous mint luster with iridescent champagne toning over each side. The strike is sharp throughout, but a few tiny ticks on Liberty's leg and neck prevent a Premium Gem designation from PCGS. Nonetheless, finer coins are scarce. CAC: 41 in 65, 32 finer (8/16). NGC ID# 24PL, PCGS# 6566
- 3839 1916-D MS64 PCGS.** Satiny silver-white luster characterizes each side of this near-Gem 1916-D Walking Liberty half dollar. The design elements are sharply rendered, and there are no individually significant abrasions. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-D Walking Liberty Half, MS66 First-Year, Branch Mint Issue

- 3840 1916-D MS66 PCGS.** A delightful Premium Gem from the first year of the Walking Liberty design, with well-detailed design elements and vibrant mint luster throughout. The virtually pristine surfaces show a few hints of golden-tan and lavender toning. Overall eye appeal is exceptional. Population: 68 in 66 (1 in 66+), 3 finer (8/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567
- 3841 1916-S MS63 PCGS.** First-year Walking Liberty half dollars were saved to a sizeable extent, and they can still be found with patience through MS64 despite having the fourth-lowest mintage in the series (508,000 coins). Soft, frosty mint luster emanates from the all-brilliant surfaces of this lovely Select coin. Well-struck with minimal marks for the grade. NGC ID# 24PN, PCGS# 6568
- 3842 1916-S MS63 PCGS.** An attractive Select specimen from the first year of the design, this coin offers well-detailed design elements and lightly marked surfaces, with vibrant mint luster on both sides. Eye appeal is quite strong for the issue. NGC ID# 24PN, PCGS# 6568

1916-S Half Dollar, MS64 Better Branch Mint Date

- 3843 1916-S MS64 PCGS.** A better date in high grade and highly popular due to its first-year status, the 1916-S Walker is among the most important acquisitions in the early part of the series. This near-Gem representative offers a sharp strike and soft, satiny mint luster cast in warm golden toning. Finer examples will prove to be elusive quarries. NGC ID# 24PN, PCGS# 6568
- 3844 1917-D Obverse MS63 PCGS.** The earlier Obverse Mintmark variant of the 1917-D Walker. This Select example displays bright, untuned satin luster and well-defined motifs. A few minor grazes in the fields and on the central devices limit the grade but pose minimal distraction. NGC ID# 24PR, PCGS# 6570
- 3845 1917-D Obverse MS64 PCGS.** Warm golden toning appears over vibrant luster on each side of this Choice Obverse Mintmark 1917-D half. The strike is impressively sharp, and the only mentionable abrasions are a few trivial marks on Liberty's lower gown. Housed in a first generation holder. Finer examples are scarce. NGC ID# 24PR, PCGS# 6570
- 3846 1917-D Obverse MS64 PCGS.** This attractive Choice example displays the popular obverse mintmark, which was moved to the reverse later in the year. The design elements are well-detailed and the lightly toned, lustrous surfaces are well-preserved throughout. NGC ID# 24PR, PCGS# 6570
- 3847 1917-D Reverse MS62 PCGS.** Satiny mint luster is completely untuned on this Mint State 1917-D Reverse Mintmark half dollar. The strike is razor-sharp on all of the usual soft points, including Liberty's head and branch hand and the eagle's trailing leg. Some faint hairlines and minor ticks are the only grade-limiting factors. NGC ID# 24PS, PCGS# 6571

1917-D Walking Liberty Half Dollar, MS64 Reverse Mint Mark

- 3848 1917-D Reverse MS64 PCGS.** This satiny MS64 example displays light golden toning and minimal abrasions for the grade. Impressive sharpness is seen throughout Liberty's figure and the central eagle. The 1917-D Reverse Mintmark half dollar is collectible in MS64 but scarce any finer, with just 54 such coins certified by PCGS (8/16). NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, MS64
Reverse Mintmark**

- 3849 1917-D Reverse MS64 PCGS.** The 1917-D Reverse Mintmark half dollar is elusive but still accessible in MS64, while finer pieces will be out of reach for many enthusiasts. This near-Gem example displays well-struck motifs and satiny, golden-toned mint luster. There are no singular abrasions that distract the viewer. PCGS lists 54 numerically finer submissions (8/16). NGC ID# 24PS, PCGS# 6571

**1917-D Reverse Walking Liberty Half, MS64
Scarcer Than Its Obverse Mintmark Counterpart**

- 3850 1917-D Reverse MS64 PCGS. CAC.** In the upper levels of Mint State the 1917-D Reverse is scarcer than its Obverse Mintmark counterpart even though the mintage is significantly higher for the Reverse coins. Apparently the novelty of the mintmark on the obverse and its being dropped midway through 1917 caused many to set aside those coins. Magnification brings out occasional wisps of russet on both sides of this near-Gem Walker, and an impressive strike leaves strong definition on the design features. A few light obverse marks prevents Gem status. NGC ID# 24PS, PCGS# 6571

- 3851 1917-S Reverse MS64 PCGS.** Frosty luster glows with warm golden toning on this Choice example, revealing few abrasions. The strike is a trifle soft on Liberty head and branch hand, as well as the central eagle. Finer representatives are elusive. NGC ID# 24PU, PCGS# 6573

- 3852 1917-S Reverse MS64 PCGS.** Luminous golden luster graces each side of this near-Gem example, illuminating boldly rendered design elements. Daubs of deep violet, forest-green, and crimson color appear around the peripheries. There are no bothersome abrasions, and eye appeal is excellent for the grade. NGC ID# 24PU, PCGS# 6573

- 3853 1917-S Reverse MS64 PCGS.** Overall, 1917-S Reverse Mintmark half dollars are more available than those with an Obverse Mintmark. They are, however, scarce in Choice condition, and Gems are generally beyond the means of most collectors. Radiant brilliance is the primary hallmark of this splendid representative. A few luster grazes limit the grade, and the strike is characteristically incomplete. PCGS has seen 64 finer submissions (8/16). NGC ID# 24PU, PCGS# 6573

- 3854 1917-S Reverse MS64 PCGS.** A well-struck, satiny Choice example of this early Walker issue. Traces of light golden toning appear on each side. The fields are well-preserved, but a few abrasions are seen on Liberty's leg, shoulder, and head. Struck during a late die state with a couple of interesting die chips in Liberty's lower gown near her trailing foot. NGC ID# 24PU, PCGS# 6573

- 3855 1918 MS64 PCGS.** This is a fully struck near-Gem with bright, untuned luster and excellent eye appeal. A few faint lines seen beneath a loupe limit the grade but hardly affect the visual presentation. Finer examples of this early Walker issue are infrequently seen. NGC ID# 24PV, PCGS# 6574

**1918 Half Dollar, MS65
Delicately Toned and Frosty**

- 3856 1918 MS65 PCGS.** Faint wisps of ice-blue are interspersed throughout the softly glowing champagne surfaces of this Gem 1918 Walking Liberty half dollar. The strike is impressively sharp on Liberty's head and branch hand, and there are no severe abrasions. The 1918 is elusive in this condition and rarely seen finer — PCGS has certified only nine higher-grade examples (8/16). NGC ID# 24PV, PCGS# 6574

- 3857 1918-D MS61 NGC.** A fully lustrous early Walking Liberty half dollar with delicate champagne toning over the obverse and reverse surfaces. NGC ID# 24PW, PCGS# 6575

- 3858 1918-D MS62 PCGS.** This impressively well-struck 1918-D half dollar displays full definition of Liberty's branch hand. Luster is bright and satiny with no discernible toning. Some marks in the right obverse field and on Liberty's figure determine the grade. NGC ID# 24PW, PCGS# 6575

**1918-D Half, MS63
Better Date in High Grade**

- 3859 1918-D MS63 PCGS.** At the MS63 level, the 1918-D is a relatively affordable early Walker. It is one that costs a fraction of the price of a Gem. The central design elements of this piece are not fully brought up but seldom are on '18-D halves. The mint luster displays light, even gray-rose toning over each side. Ex: *Long Beach Signature* (Heritage, 6/2013), lot 4160. NGC ID# 24PW, PCGS# 6575

**1918-D Walking Liberty Half, MS64
Seldom Seen in Higher Grades**

3860 1918-D MS64 PCGS. With a mintage of 3.8 million pieces, the 1918-D Walking Liberty half dollar is a scarce issue in grades above MS64. This attractive Choice example displays well-detailed design elements and lightly marked, lustrous surfaces, with speckled highlights of greenish-gold toning. PCGS has graded 31 numerically finer examples (8/16). NGC ID# 24PW, PCGS# 6575

3861 1918-S MS64 PCGS. With only 36 finer examples seen by PCGS (8/16), this Choice 1918-S Walker offers tremendous value for the budget-conscious collector. Liberty's branch hand and the eagle's trailing leg show moderate weakness, as usual, but the remarkably clean fields balance the visual appeal. Warm olive-gold toning appears over each side. NGC ID# 24PX, PCGS# 6576

3862 1918-S MS64 PCGS. Typical of the 1918 issue from the San Francisco Mint, this Choice 1918-S half dollar shows central weakness on each side, but the clean fields and frosty luster balance the eye appeal. PCGS has seen only 36 numerically finer submissions (8/16). NGC ID# 24PX, PCGS# 6576

3863 1918-S MS64 PCGS. Glowing, frosty luster and a blush of golden toning give this Choice 1918-S Walker tremendous visual appeal. Minor strike weakness on Liberty's branch hand and the eagle's trailing leg is not unusual for the issue. Abrasions are minimal. PCGS lists 36 numerically finer submissions (8/16). NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, Golden-Toned MS64

3864 1918-S MS64 PCGS. CAC. This well-preserved Choice example is among the finer 1918-S half dollars that can be readily obtained by collectors. Gems are scarcely seen and require a significantly higher numismatic budget. This piece is well-struck, with satiny, golden-toned luster. A single mark on Liberty's cheek is the only abrasion of note. PCGS lists only 36 finer representatives (8/16). NGC ID# 24PX, PCGS# 6576

1919 Half Dollar, Bold MS63

3865 1919 MS63 PCGS. Pale gold patina near the left obverse and upper reverse border is the sole indication of color throughout this otherwise brilliant Select half dollar. A pinpoint-sharp strike defines the devices on each side. The lower portion of Liberty's drapery has a single reeding mark that acts as a pedigree identifier. This is a highly appealing early Walker from a low mintage of 962,000 coins. NGC ID# 24PY, PCGS# 6577

**1919 Half Dollar, MS63
Well-Preserved for the Grade**

3866 1919 MS63 PCGS. This iridescently toned Select 1919 Walker is frosty and surprisingly well-preserved for the grade. Some irregular russet overtones appear in the right obverse field, while the remainder of each side shows champagne and pale lavender-blue hues. The 1919 is a better date in Uncirculated condition than its mintage of 962,000 pieces would suggest. NGC ID# 24PY, PCGS# 6577

**1919-S Half Dollar, Untoned AU55
Challenging Early Date**

3867 1919-S AU55 PCGS. The 1919-S population is fairly evenly spread out across the various circulated grade levels, though more coins appear in VF in any other condition. The average certified example grades fractionally higher than VF35, attesting to the overall scarcity of this early S-mint issue. This Choice AU Walker is fully brilliant with good detail and light blending. Liberty's head shows a couple of small marks. NGC ID# 24R2, PCGS# 6579

1919-S Half Dollar, MS62
Appealing for the Grade

- 3868 1919-S MS62 NGC.** The central obverse and reverse are typically weak on this lustrous specimen, with sharper peripheral details. Both sides have frosty silver surfaces beneath dusky olive and pale gold toning. A few surface marks on each side are consistent with the grade.
Ex: Central States Signature (Heritage, 4/2012), lot 4727. NGC ID# 24R2, PCGS# 6579

1920-D Walking Liberty Half, AU58
Challenging Issue In Higher Grades

- 3869 1920-D AU58 NGC.** The 1920-D Walking Liberty half dollar is a challenging issue in Mint State grades, making attractive near-mint specimens, like the present coin, a good balance of quality and value. This impressive specimen shows just a trace of wear on the sharply detailed design elements and the pleasingly toned surfaces are remarkably free of large or distracting abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 24R4, PCGS# 6581

- 3870 1920-S MS62 PCGS.** Lustrous and unusually appealing for the grade, this Mint State 1920-S Walking Liberty half displays dusky champagne-gray toning over lightly marked surfaces. Slight strike weakness on Liberty's branch hand is typical of this issue. NGC ID# 24R5, PCGS# 6582

1921 Half Dollar, Unc Details
Sharply Struck Series Key

- 3871 1921 — Cleaning — PCGS Genuine. Unc Details.** The Philadelphia Mint reduced half dollar output to 246,000 coins in the midst of a postwar recession. That total is second-lowest only to the 1921-D, ensuring its status as a key to the Walking Liberty series. This pinpoint-sharp example lacks even the slightest trace of friction, but the surfaces have been brightened by cleaning. NGC ID# 24R6, PCGS# 6583

- 3872 1923-S AU55 PCGS. CAC.** This impressive Choice AU specimen displays well-detailed design elements and vibrant mint luster, with light shades of champagne-gold toning at the periphery. NGC ID# 24R9, PCGS# 6586

- 3873 1923-S AU58 PCGS.** A lovely example in AU58, a highly popular collector grade for the early years of the series. This near-Mint example has virtually full silver luster with untoned surfaces and excellent eye appeal. NGC ID# 24R9, PCGS# 6586

1923-S Half Dollar, Lightly Toned MS63
Conditionally Scarce Issue

- 3874 1923-S MS63 PCGS.** Golden-gray and lavender hues blend over each side with vibrant, softly frosted luster emanating from beneath the light patina. Liberty's head is well-detailed, while the strike shows softness on the branch hand, eagle's breast, and leg feathers. Minimally marked with a spot of darker toning between TY in LIBERTY. The San Francisco Mint was the sole facility to produce half dollars in 1923, and the issue is recognized as a conditionally scarce date in the series. NGC ID# 24R9, PCGS# 6586

- 3875 1927-S MS62 PCGS.** Irregular golden toning appears on each side of this frosty 1927-S half dollar. Light grazes in the fields and moderate strike weakness on the central regions of the devices limit the grade, but pleasing eye appeal prevails. NGC ID# 24RA, PCGS# 6587

1927-S Half Dollar, MS64
Elusive in Better Grades

- 3876 1927-S MS64 PCGS.** Wisps of gold toning accent satiny mint luster on this otherwise brilliant near-Gem 1927-S half dollar. There are no significant abrasions, although considerable strike weakness on Liberty's hand and thigh and on the eagle's trailing leg likely contributes to the grade. Finer 1927-S half dollars will be out of reach for the casual collector. NGC ID# 24RA, PCGS# 6587

**1928-S Half Dollar, MS63
In-Demand California Issue**

- 3877 1928-S MS63 PCGS.** This San Francisco emission is scarce across the Uncirculated grade spectrum. Yet, any collector looking to complete a date set will require an example of the 1928-S, as this was the only issue put out by any of the United States mints that year. Weak strikes tend to plague the 1928-S, but softness is limited to the branch hand and the eagle's trailing leg on this brilliant Select offering. Minute ticks are clustered within the drapery. NGC ID# 24RB, PCGS# 6588

**1928-S Half Dollar, MS63
Eye-Appealing Variegated Patina**

- 3878 1928-S MS63 PCGS.** Variegated toning on both sides includes hues of amber, gold, rose, and pale ice-blue near the rims, scattered in a lovely array. A few small marks and moderate strike weakness in the centers contribute to the grade, but this Select better-date half dollar offers lots of eye appeal for collectors.
Ex: *Houston Signature* (Heritage, 11/2012), lot 4040. NGC ID# 24RB, PCGS# 6588

**1929-D Walker, Delicately Toned MS66
Seldom Seen Finer**

- 3879 1929-D MS66 PCGS. CAC.** Just over a million pieces were produced for this Denver issue, which shares a history with the great stock market crash preceding the Great Depression. Gem examples are sometimes available, but finer pieces, such as this MS66 coin, are seldom offered. Delicate blue, violet, and peach overtones grace lustrous, softly frosted surfaces. Liberty's head is well-defined, although her branch hand is slightly soft, as is typical of this issue. A distinctly attractive coin, ideal for the collector who appreciates pastel toning. Population: 69 in 66 (2 in 66+), 1 finer. CAC: 20 in 66, 1 finer (8/16). NGC ID# 24RC, PCGS# 6589

- 3880 1933-S MS64 PCGS.** This attractive Choice specimen displays sharp definition on all design elements, with clear separation between Liberty's finger and thumb on the wreath hand. The well-preserved, lustrous surfaces show a few hints of greenish-gold toning and overall eye appeal is outstanding. NGC ID# 24RE, PCGS# 6591

- 3881 1934-S MS64 PCGS. CAC.** Pleasing shades of greenish-gold, lavender, and amber toning visit the well-preserved surfaces of this attractive Choice specimen. The design elements are sharply detailed and vibrant mint luster shines through the patina. NGC ID# 24RH, PCGS# 6594

- 3882 1934-S MS65 PCGS.** Well-defined in all areas and highly lustrous as all S-mint Walkers typically are. The surfaces are primarily brilliant with an edging of golden-brown toning on each side. The 1934-S is rarely seen in Gem condition with no objectionable marks on either side.

Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1542. NGC ID# 24RH, PCGS# 6594

- 3883 1935-D MS65 PCGS.** Pastel straw-gold patina graces this lustrous and minimally marked Great Depression Gem. The strike is bold except on the fingers of the branch hand. Certified in a green label holder. NGC ID# 24RK, PCGS# 6596

- 3884 1935-D MS66 PCGS.** Bright luster radiates from the silvery surfaces of this Premium Gem that has russet patination clinging to portions of the margins. The gown lines are well-defined as are the eagle's breast feathers and those on its left (facing) leg. Liberty's head and branch hand, however, reveal the weakness typical of this issue. This is a well-preserved coin. PCGS reports no pieces numerically finer (8/16). NGC ID# 24RK, PCGS# 6596

- 3885 1935-S MS65 NGC.** This lustrous and attractive Gem offers light powder-blue and caramel-gold toning. The cheek and branch hand show the customary incompleteness but the skirt lines are close to full. Eye appeal is outstanding. NGC ID# 24RL, PCGS# 6597

**1936-D Half Dollar, MS67
None Certified Finer**

- 3886 1936-D MS67 PCGS.** The tops of the date digits are slightly incomplete, but the strike is razor-sharp elsewhere, including Liberty's branch hand. Close inspection shows essentially immaculate fields that radiate vibrant, satiny luster. Totally brilliant surfaces give this Superb Gem a lovely Mint-fresh appearance. Population: 38 in 67 (2 in 67+), 0 finer (8/16). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

- 3887 1936-S MS66+ PCGS.** Thick, frosty brilliant-white luster rolls over the exceptionally well-preserved fields of this high-end Premium Gem, producing stellar visual appeal. The strike is slightly soft on Liberty's branch hand and the eagle's trailing leg, but this is not distracting. PCGS lists only 11 finer representatives (8/16). NGC ID# 24RP, PCGS# 6600

- 3888 1937 MS67 PCGS. CAC.** This impressive Superb Gem is sharply detailed in all areas, save for the slightest touch of the usual softness on the eagle's leg. The impeccably preserved surfaces radiate vibrant mint luster and show hints of pale gold toning. PCGS has graded five numerically finer examples (8/16). NGC ID# 256A, PCGS# 6601

3889 1937-D MS67 NGC. This magnificent Superb Gem offers razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. Census: 36 in 67 (1 in 67+, 1 in 67★), 1 finer (8/16). NGC ID# 24RS, PCGS# 6602

3890 1938-D MS65 PCGS. Other than on Liberty's branch hand, this Gem 1938-D Walker is well-defined. Satiny luster shows light champagne toning overall along with flakes of russet near the upper obverse border. A few small ticks seen beneath a loupe are not out of line for the grade. NGC ID# 24RV, PCGS# 6605

3891 1938-D MS66 PCGS. This sharply detailed Premium Gem exhibits impeccably preserved surfaces with vibrant mint luster on both sides. A few hints of greenish-gold and lavender toning add to the outstanding eye appeal. PCGS has graded 45 numerically finer examples (8/16). NGC ID# 24RV, PCGS# 6605

3892 1938-D MS66 PCGS. Brilliant, satiny luster characterizes this high-end 1938-D Walking Liberty half dollar. A few tiny grazes in the right obverse field are masked by swirling die polish lines that appear throughout the fields on each side. This piece is slightly soft on Liberty's branch hand and the eagle's trailing leg, as usual for the date. NGC ID# 24RV, PCGS# 6605

3893 1939-D MS67 NGC. This lustrous and virtually immaculate Superb Gem is lightly toned in lilac and sun-gold shades. Only the branch hand lacks a precise strike. The blatant originality of the frosty "skin" is immediately apparent. Encased in a former generation holder. Census: 78 in 67 (1 in 67+, 1 in 67★, 1 in 67+★), 2 finer (8/16). Ex: *Beverly Hills Signature (Heritage, 11/2011), lot 3711.* NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

3894 1939-S MS67 PCGS. The availability of the 1939 through MS66 makes it ideal for type representation. Superb Gems are scarce. Light golden patina drapes practically pristine surfaces. Frosty luster shines through to delicate overlay. A well-struck Walker that ranks among the finest examples at PCGS (8/16). NGC ID# 24RY, PCGS# 6608

3895 1939-S MS67 PCGS. CAC. A scarce CAC-approved Superb Gem example of this San Francisco issue, among the finest at PCGS (8/16). A hint of iridescent champagne toning graces the frosty, mint-fresh luster, while a loupe fails to reveal even trivial contact. Eye appeal is exceptional. NGC ID# 24RY, PCGS# 6608

1940 Half Dollar, MS68

Nearly Flawless

3896 1940 MS68 NGC. Faint blue and green overtones tint this brilliant, nearly flawless 1940 Walking Liberty half dollar. Liberty's head, branch hand, and upper gown are well-struck, as are the eagle's leg feathers. Singular imperfections remain discrete even under a high-power lens. An ideal fit for a first-rate type set. Census: 21 in 68 (3 in 68★), 1 finer (8/16). NGC ID# 24RZ, PCGS# 6609

3897 1941-D MS67+ NGC. The 1941-D is readily found through MS67, but coins with an added Plus designation are truly rare. Most collectors would consider finer examples unattainable. Daubs of golden-tan patina adorn brilliant, satiny surfaces. Well-struck with good central detail. NGC reports three coins finer (8/16). NGC ID# 24S4, PCGS# 6612 Base PCGS# 6612

3898 1941-S MS66+ PCGS. CAC. A ring of peripheral golden-russet patina includes glints of blue-green and magenta color. The other areas are fully frosted and brilliant. This amazing Plus-designated and CAC-endorsed Premium Gem offers exquisite preservation. The branch hand and skirt lines are typically incomplete. There are nine finer examples at PCGS (8/16). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

3899 1946-S MS67 PCGS. Trumpet Tail S Mintmark. Immaculately preserved surfaces and rich, frosty luster are hallmarks of this Superb Gem 1946-S Walker. Vivid obverse border toning in shades of amber-orange, gold, and olive-green surround champagne interiors. Strike weakness is confined to Liberty's branch hand and the eagle's trailing leg plumage. Population: 76 in 67 (4 in 67+), 0 finer (8/16). NGC ID# 24SL, PCGS# 6629

1947 Half Dollar, MS67 Unknown in Higher Grades

3900 1947 MS67 PCGS. Liberty's branch hand boasts full thumb separation on this impressive Superb Gem half dollar. An overlay of translucent golden-russet patina blankets brilliant surfaces that show vibrant underlying luster. The Mint struck nearly 4.1 million Walking Liberty halves in the series' final year of issue. Examples very scarcely survive so fine and are unknown in higher grades. Population: 67 in 67 (4 in 67+), 0 finer (8/16). NGC ID# 24SM, PCGS# 6630

1947-D Half Dollar, MS67 Tied for Finest at PCGS

3901 1947-D MS67 PCGS. Other than a single MS68 coin at NGC, the 1947-D comes no finer than MS67 at either service. This is a splendid Superb Gem example, with bold and frosty mint luster and a strike that exceeds many coins of similar grade. A speckling of olive-gold accents joins faint gold and lilac hues for great eye appeal. Abrasions or marks are a non-issue across the smooth and attractive surfaces. Population: 38 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 5ESK, PCGS# 6631

PROOF WALKING LIBERTY HALF DOLLARS

3902 1936 PR64+ NGC. The 1936 revival of proof coinage was little-noted at the time and only 3,901 of the proof half dollars were sold. This higher-end near-Gem has quality flash under a thin layer of gold patina that richens to golden along parts of the margins. Liberty's branch hand has a fully rounded thumb. NGC ID# 27V4, PCGS# 6636

**1937 Walking Liberty Half Dollar, PR67+
Exceptionally Well-Preserved**

3903 1937 PR67+ PCGS. The PCGS Plus designation is an important confirmation of the obvious quality of this lightly toned and smoothly reflective Superb Gem proof. The 1937 Walker has the second-lowest mintage of the proof series, but it only becomes truly scarce in the finest grades such as this glowing example. Faint iridescence hides beneath a speckling of golden-gray patina, with the glassy mirrors revealed when viewed at an advantageous angle. The strike is razor-sharp. Population: 17 in 67+, 10 finer (8/16). NGC ID# 5ESS, PCGS# 6637

3904 1939 PR67 PCGS. The first trait to catch one's eye when viewing this coin is the unfathomable depth of mirroring on each side. Then the bright reddish patina that encircles the obverse. Just a splendid coin from a mintage of only 8,808 proofs. NGC ID# 5ESU, PCGS# 6639

3905 1939 PR67 NGC. CAC. This better-date proof Walker has brightly mirrored fields that serve to enhance the rich autumn-leaves toning seen over each side. A beautiful proof example of this always-popular and highly collectible series. NGC ID# 5ESU, PCGS# 6639

3906 1942 PR67+ PCGS. CAC. Wow, what a coin. This would be perfect for a toned type set. Each side is encircled in rich iridescence and the fields are deeply reflective. Exceptional quality and eye appeal. NGC ID# 282G, PCGS# 6642

3907 1942 PR68 NGC. A splendidly well-preserved example of the final issue in the proof Walking Liberty half dollar series. The strike is full throughout, and the obverse exhibits subtle field-device contrast. Essentially brilliant interiors are accented by amber-gold and russet toning around the outer obverse periphery. NGC lists seven numerically finer proofs (8/16). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

3908 1953-S MS67 PCGS. Rarely does the 1953-S appear so well-preserved, and no examples are reported finer at the leading grading services. The centers are frosty and brilliant. Specks of russet, blue, and magenta patina hug the lower-right obverse border. Population: 29 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 24T8, PCGS# 6666

3909 1953-S MS67 PCGS. CAC. 30th Anniversary Green Label Holder. This top-grade 1953-S Franklin half is well-preserved and frosty, although lacking slightly on the sharpness of the bell. The obverse displays champagne toning with deeper russet, crimson, and other colors around the border. The reverse has a brilliant center with dusky russet-amber and gold around the margins. Population: 29 in 67 (1 in 67+), 0 finer. CAC: 19 in 67, 0 finer (8/16). NGC ID# 24T8, PCGS# 6666

3910 1953-S MS67 PCGS. CAC. 30th Anniversary Green Label Holder. This frosty Superb Gem is among the finest 1953-S halves certified, as PCGS has not seen a Full Bell Lines example above MS66. The strike lacks definition only on the lower bell, and the preservation is outstanding. The obverse showcases delightful russet borders around a ribbon of rainbow interior color with a champagne center. The reverse is nearly brilliant. Population: 29 in 67 (1 in 67+), 0 finer. CAC: 19 in 67, 0 finer (8/16). NGC ID# 24T8, PCGS# 6666

3911 1959 Doubled Die Reverse, FS-801, MS66 Full Bell Lines PCGS. Type One Reverse. Although undesignated as such on the PCGS insert, the die doubling on E PLURIBUS UNUM and the right bell hanger is undeniable. Light almond-gold, sea-green, and autumn-brown toning adorns the reverse of this lustrous and well struck high grade half dollar. The obverse is essentially brilliant. NGC ID# 24TJ, PCGS# 145434 Base PCGS# 86676

3912 1960 MS66+ PCGS. This spectacular Plus-graded Premium Gem Franklin half dollar offers well-detailed design elements and well-preserved, lustrous surfaces, with highlights of greenish-gold and lavender toning. Population: 35 in 66 (2 in 66+), 1 finer (8/16). NGC ID# 24TL, PCGS# 6678

3913 1962 MS65 Full Bell Lines PCGS. A blush of light golden toning warms the radiantly lustrous surfaces of this Gem Full Bell Lines 1962 Franklin half. This strike is sharp, and there are only a few minor surface grazes seen. PCGS lists 14 numerically finer submissions (8/16). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

**1950 Half Dollar, PR66 Cameo
Brilliant and Starkly Contrasted**

3914 1950 PR66 Cameo PCGS. The debut proof Franklin half dollar issue is challenging in Cameo above PR65. This starkly contrasted Premium Gem proof has few superiors. The design elements are fully brought up above glimmering, blacked-out fields that are devoid of mentionable flaws. Eye appeal is abundant. Population: 64 in 66 (5 in 66+) Cameo, 20 finer (8/16). NGC ID# 27VA, PCGS# 86691

3915 1953 PR67+ Cameo PCGS. CAC. A sharp full strike complements stark white-on-black contrast on each side of this high-end Superb Gem Cameo 1953 proof half dollar. This Registry-grade Franklin exhibits liquidlike mirroring in the fields and satiny luster on the devices. PCGS has recorded 15 finer Cameos (8/16). NGC ID# 27VD, PCGS# 86694

3916 1957 PR68 Deep Cameo PCGS. The sharply detailed, heavily frosted design elements of this spectacular Franklin half dollar contrast profoundly with the deeply mirrored fields and the brilliant surfaces are impeccably preserved. Population: 79 in 68 Deep Cameo, 3 finer (8/16). NGC ID# 24TX, PCGS# 96698

3917 1959 PR68 Cameo NGC. CAC. The deeply reflective fields of this magnificent Franklin half dollar contrast boldly with the sharply detailed, frosty design elements to produce a stunning cameo effect. The impeccably preserved surfaces add to the incredible eye appeal. NGC has graded six numerically finer examples (8/16). NGC ID# 27VJ, PCGS# 86700

KENNEDY HALF DOLLARS

3918 1964-D/D FS-501 MS66 PCGS. 30th Anniversary Green Label Holder. The mintmark is plainly repunched on this *Cherrypickers'* variety, being one of the more obvious repunched mintmark varieties for this issue. The present coin is frost-white and lustrous with sharp motifs and unabraded surfaces. Finer 1964-D Kennedy halves are seldom offered. A high-end example of this popular variety. NGC ID# 24U3, PCGS# 146076 Base PCGS# 411633

3919 1968-D MS67 PCGS. 30th Anniversary Green Label Holder. This Registry-grade Superb Gem 1968-D Kennedy half dollar ranks among the finest certified of the issue. Satiny, virtually untuned luster merges with modest reflectivity in the fields, and there are no distracting abrasions. The strike is full. Population: 35 in 67, 0 finer (8/16). NGC ID# 24U7, PCGS# 6711

3920 1968-D MS67 PCGS. The obverse of this Superb Gem has light silver at the center, with lovely violet, green, and iridescent toning. Aside from trivial gold toning splashes, the reverse is fully brilliant. Both sides have full satin luster and excellent eye appeal. Population: 35 in 67, 0 finer (8/16). NGC ID# 24U7, PCGS# 6711

**1984-D Kennedy Half Dollar, MS67+
Single Finest Certified at PCGS**

3921 1984-D MS67+ PCGS. Rick Tomaska calls the 1984-D Kennedy half dollar "a very rare coin in MS67." This Plus-graded Superb Gem is destined for the finest collection or Registry set, with impeccably preserved, lustrous surfaces that show attractive highlights of pale gold and lavender toning. Housed in a new 30th Anniversary green label holder. Population: 15 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 24V5, PCGS# 6746

EARLY DOLLARS

**1795 Flowing Hair Dollar, B-1, BB-21, VG10
Popular Blundered Date Variety**

3922 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VG10 NGC. The central design elements of this piece remain boldly outlined, but the obverse rims are worn nearly smooth. The blue-steel and gray patina is enlivened by subtle hints of gold when tilted in the light. The two berries inside the lower right wreath on the reverse, combined with the first star barely touching the bottom curl on the obverse identifies this popular variety. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, Fine 12
Three Leaves, B-5, BB-27**

3923 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 ANACS. Bowers Die State III. Stone-gray and electric-blue toning embrace this desirable, crown-sized early silver type coin. The slightly glossy surfaces are little-abraded save for a cluster of thin marks near the right (facing) wing — some of which are remnant adjustment marks — and a bit of pinpoint pitting in the obverse fields. The left wing retains much of its initial detail. Housed in an early generation ANACS holder. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

3924 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VG8 NGC. Steel-gray motifs are accompanied by aquamarine and golden-brown fields. The glossy surfaces are lightly abraded aside from a small reverse rim nick at 5 o'clock. The first Draped Bust variety, yet collectible in the present grade.
Ex: Donald E. Bently Collection (Heritage, 2/2014), lot 3582. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

3925 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Repaired — NGC Details. VF. Bowers Die State I. The right obverse field is smoothed, as is the reverse exergue, and the reverse field near 1 o'clock. The stone-white surfaces are somewhat bright and lightly granular. B-14 was likely the first Draped Bust variety of any denomination.
From The Hamilton Collection, Part III. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, VF20
Off Center Bust, B-14, BB-51**

3926 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF20 PCGS. Bowers Die State I. Likely the first Draped Bust die marriage, given the Mint lesson learned about the correct positioning of the Liberty device. This cream-gray representative shows even wear and lacks any relevant post-strike abrasions. Adjustment marks at the obverse center are of mint origin. Both sides display parallel hairlines.
Ex: Long Beach Signature (Heritage, 6/2005), lot 6584. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1797 Large Letters Dollar, Fine 15
9x7 Stars, B-1, BB-73**

- 3927** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, Fine 15 NGC. Bowers Die State IV. Both the obverse and reverse surfaces show advanced die cracks, but the cracks do not display the shattered and bulged state that signals the terminal stage of the reverse die. The BB-73 Large Letters variant was struck both in 1797 and 1798, with this coin likely struck in 1797 according to its die state. Light, silver-gray toning with lilac and pale-gold highlights covers both sides of this Choice Fine coin. A number of small, Mint-made planchet defects appear at the rims but do not affect the grade.
From The Hamilton Collection, Part III. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 Large Eagle Dollar, XF40
Pointed 9, B-29, BB-119**

- 3928** 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, XF40 NGC. The famous Obverse 13 with distinct die crack network in the date area, paired with a reverse that has the F in OF over the left half of the cloud below rather than the edge. Glimmers of luster enliven lightly worn surfaces toned in gold, rose, and gray shadings. A rim bump is noted near the left upright of the U in UNITED on the reverse. NGC ID# 24X6, PCGS# 40036 Base PCGS# 40018

- 3929** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2 — Improperly Cleaned — NGC Details. XF. Bowers Die State II. Glimmers of luster emerge from the curls and plumage of this pearl-gray early dollar. The fields are delicately hairlined, but the coin will please most collectors. The reverse die is misaligned a few degrees toward 7:30, with weakness on UNITED due to the absence of a protective rim.
From The Hamilton Collection, Part III. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

- 3930** 1799 7x6 Stars, B-12, BB-160, R.3 — Improperly Cleaned — NGC Details. VF. Bowers Die State I. A rare “prime” die state without any cracks along the left obverse. The majority of B-12 dollars are Die State III. This powder-blue and stone-gray example is somewhat glossy but offers pleasing definition. We note a diagonal line on the right obverse field, a hair-thin line near TES OF, and a slight reverse rim knock at 5 o’clock.
From The Hamilton Collection, Part III. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**Pleasing 1799 7x6 Stars Dollar
B-12, BB-160, XF40**

- 3931** 1799 7x6 Stars, B-12, BB-160, R.3, XF40 PCGS. Die State III. Star 1 is further away from the lowest hair curl than on the similar B-9, BB-166 obverse, and stars 11-13 are tightly bunched up. The reverse has no berries, and the U in UNITED is missing its upper left serif. In this advanced die state, a die crack extends both left and right from the 1 in the date, while a second crack joins the first 9 with the 7 and second 9. This is a pleasing, original powder-gray piece that has appeal suggestive of a slightly higher grade. Muted luster is still present under a glass, and the fields reveal some iridescent color. No adjustment marks are visible, and much pleasing detail appears on each side. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**1799 Draped Bust Dollar, Attractive XF40
7x6 Stars, B-11, BB-161**

- 3932** 1799 7x6 Stars, B-11, BB-161, R.3, XF40 NGC. Deep-blue border toning frames golden-gray surfaces to form a natural, attractive patina that retains traces of mint luster despite 20 points of wear. The strike remains bold throughout. We note a small rim bump at 6 o’clock on the reverse. The BB-161 is a so-called “No Berries” variety, joining BB-160 as the two die pairs that have lost their berries due to lapping and relapping of the dies.
From The Hamilton Collection, Part III. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**Choice XF 7x6 Stars 1799 Dollar
B-10, BB-163**

- 3933** 1799 7x6 Stars, B-10, BB-163, R.2, XF45 PCGS. A desirable and high-end example of this popular die pair, an ideal coin for the type collector who prefers strongly toned examples. Violet-gray light spots mark the worn high points, while the rest of this well struck piece has rich gunmetal-blue and green shadings. Minimally abraded and delightful. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

- 3934** 1799 7x6 Stars, B-22, BB-168, R.4, VG10 PCGS. Bowers Die State III. The scarce Bolender marriage with a heavy bisecting horizontal break across the reverse. A cream-gray and powder-blue example with unexpectedly sharp details on the reverse. A few faded thin marks are noted on the starry field above the eagle's head. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

1800 B-8, BB-188 Dollar, VF30
Excellent Coloration and Detail

- 3935** 1800 B-8, BB-188, R.4, VF30 PCGS. Bowers Die State IV. The coloration of this midgrade BB-188 dollar is especially pleasing, olive-gray and tan-gold toning in the fields with lighter hues over the worn relief elements. The strike is sharp, and bold detail remains on the devices. There are no adjustment marks, and the only mentionable flaws are a few light marks on Liberty's neck and cheek. Visual appeal exceeds expectations. NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887

- 3936** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Obverse Damage — NGC Details. VF. Bowers Die State III. A field mark near the ribbon and a pinscratch on the left obverse field correspond to the NGC designation. Otherwise, this is an attractive almond-gold and stone-gray silver dollar. The portrait displays moderate wear but traces of luster linger in design recesses.
From The Hamilton Collection, Part III. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

- 3937** 1800 AMERICA!, B-19, BB-192, R.2, Fine 15 PCGS. Bowers Die State IV. A charming silver-gray example of the popular AMERICA! Guide Book variety, named after the mint-made die scratch beneath the eagle's claw. Well defined for the designated grade, and relevant marks are confined to a subtle obverse rim ding at 6:30.
Ex: Long Beach Signature (Heritage, 2/2010), lot 1273. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

- 3938** 1800 B-13, BB-193, R.3, VG10 PCGS. Bowers Die State III. A delightful circulation cameo with problem-free surfaces and even wear. The worn devices have medium tan-gray coloration, while the fields display vivid aquamarine, sea-green, olive-gold, blue, and lavender-gray toning. Eye appeal is outstanding for the grade. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

- 3939** 1800 12 Arrows, B-17, BB-196, R.1, Fine 15 NGC. Bowers Die State IV. The sea-green, orange-red, and steel-gray toning is especially prominent on the reverse. Marks are confined to a brief line below the third cloud. Portions of the obverse field are moderately granular.
Ex: 400 Sale (Stack's, 1/1988), lot 779.
From The Hamilton Collection, Part III. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

- 3940** 1801 B-4, BB-214, R.4 — Double Struck, Improperly Cleaned — NGC Details. VF. Bowers Die State III. Evidence of the rotated double strike is subtle, but traces of the 80 in the date from the first impression is apparent near the 0 in the date. A nicely defined pearl-gray early dollar with a patch of hairlines above the arrowheads and a few hair-thin marks on the central obverse.
Ex: Long Beach Sale (Kagin's, 2/1987), lot 1135.
From The Hamilton Collection, Part III.

1802/1 Silver Dollar, AU Details
Narrow Date, B-1, BB-231

- 3941** 1802/1 Narrow Date, B-1, BB-231, R.4 — Spot Removals — NGC Details. AU. Bowers Die State II. Mint luster remains beneath a thin veil of gold-gray toning on this sharply struck Narrow Date dollar. The overdate is clear. Light wear on the high points joins a few minor field abrasions, with die clashing visible on the obverse as normally seen for the late die state. Small areas of struck-in grease above and below Liberty's hair ribbon remain despite efforts to remove them, resulting in NGC's decision not to assign a numeric grade.
Ex: ANA Mid-Winter Auction (Heritage, 2/1987), lot 800.
From The Hamilton Collection, Part III. NGC ID# 24XC, PCGS# 40091 Base PCGS# 40090

1802 Draped Bust Dollar, AU Details
Narrow Date, B-6, BB-241

- 3942** 1802 Narrow Date, B-6, BB-241, R.1 — Improperly Cleaned — NGC Details. AU. Bowers Die State III. Disconnected curls at the back of Liberty's head suggest lapping of the dies, a late die state of this Narrow Date variety. The main design elements are sharply struck and well-defined on this AU Details coin, which displays deep gunmetal-blue and reddish-gold toning across both sides. While the toning may hide a light cleaning, the deep patina is attractive and all of the devices are sharply defined. A tiny rim bump above M of AMERICA is the sole mark to note.
From The Hamilton Collection, Part III. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

- 3943** 1803 Large 3, B-6, BB-255, R.2 — Improperly Cleaned — NGC Details. VF. Bowers Die State II. This wheat-gold and stone-gray Heraldic Eagle type coin is somewhat bright from a wipe, and shows smoothing on the field near the U in UNITED. All letters in E PLURIBUS UNUM are readable, and no marks are consequential.
From The Hamilton Collection, Part III. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

- 3944 1843 AU58 PCGS. CAC.** This near-Mint 1843 Seated dollar would serve well as a No Motto type coin, showing partially lustrous fields and bold, barely worn design elements. Other than a few daubs of lavender and bluish border toning, this piece displays dusky champagne-silver surfaces. The reverse has a scattering of small flecks that are not overly obtrusive. NGC ID# 24YD, PCGS# 6929

1845 Seated Liberty Dollar, AU58 Rare Issue in Higher Grades

- 3945 1845 AU58 PCGS. OC-1.** A slightly better 1840s issue in high grade, boasting a small 24,500-coin mintage. This example is nearly Uncirculated and displays remnants of luster in the fields. Both sides are cast in lavender-gray and gold toning, and a swirling grease mark (as struck) stretches over the upper reverse. The strike is slightly soft on the eagle's left (facing) leg and upper wing edge. Population: 13 in 58, 20 finer (8/16). NGC ID# 24YF, PCGS# 6931
- 3946 1860-O MS60 NGC. OC-5.** This is a highly collectible type coin from one of the most available issues in the Seated dollar series. An incomplete impression at the upper obverse is expected from a New Orleans product, but the reverse is strongly defined throughout. Entirely brilliant with scattered marks. NGC ID# 24Z3, PCGS# 6950
- 3947 1861 — Reverse Improperly Cleaned — NGC Details. AU. OC-4.** Osburn/Cushing Die State b/a. Die lines from the dentils near 5 o'clock confirm the variety. The reverse field is hairlined and typically abraded, but this lightly toned Civil War Seated dollar has ample luster and minimal wear. NGC ID# 24Z4, PCGS# 6951

1865 Seated Dollar, AU58 High-Attrition Issue

- 3948 1865 AU58 NGC. OC-2.** The second of four die pairs known to have struck 46,500 Seated dollars in 1865 shows a die chip in the unfinished area under Liberty's chin. Survivors are scarce in any condition, as most coins were shipped to South America, where they suffered a high rate of attrition. This near-Mint dollar has dusky gray patina over each side that deepens near the protected areas. The strike is good, and wispy marks are peppered throughout. Census: 7 in 58, 25 finer (8/16). NGC ID# 24Z8, PCGS# 6955

1871 Seated Liberty Dollar, MS63 Rich Original Toning

- 3949 1871 MS63 PCGS. OC-1.** The 1871 is one of the more available Seated dollars, undoubtedly because of its mintage of more than 1 million coins. Each side has rich layers of gray-lavender-golden toning, and the strike details are strong throughout. Only held back from a higher grade by a few small abrasions on the lower reverse. Population: 45 in 63, 64 finer (3/16). NGC ID# 5DNV, PCGS# 6966

1871 Seated Liberty Dollar, MS64 Popular Type Coin

- 3950 1871 MS64 PCGS. OC-12.** Osburn-Cushing Die State a/b. Beautiful blue, gold, and magenta patina invigorates both sides of this nicely preserved late-series Seated dollar, showing some silver-gray color remaining in the central obverse. The sharp strike complements a relative paucity of abrasions, although some reeding marks appear on Liberty's midsection and scattered smaller abrasions occur elsewhere. An extremely attractive example for type or date-set purposes. Population: 55 in 64 (3 in 64+), 7 finer (8/16). NGC ID# 5DNV, PCGS# 6966

PROOF SEATED DOLLAR

- 3951 1862 PR61 NGC. OC-P1.** The proof mintage of 550 pieces was delivered using two die pairs. OC-P1 and OC-P2 are distinguished by the slight extension of the first vertical shield stripe into the horizontal lines. This brilliant and fully struck specimen exhibits noticeable cameo contrast, especially on the reverse. NGC ID# 252G, PCGS# 7005

TRADE DOLLARS

1873 Trade Dollar, MS64 Excellent First-Year Type Coin

3952 1873 MS64 PCGS. CAC. Vibrant mint luster and light golden-tan toning grace the surfaces of this attractive Choice Trade dollar, from a mintage of 396,900 pieces. The design elements are sharply detailed and the fields display only scattered minor contact marks. Population: 52 in 64 (3 in 64+), 16 finer. CAC: 10 in 64, 3 finer (8/16). NGC ID# 252W, PCGS# 7031

3953 1875-S Type One Reverse MS64 PCGS. Large S. By the end of 1875, the San Francisco Mint had struck more than 4.4 million Trade dollars, the majority of which were sent across the Pacific to East Asia. Many were also released into domestic circulation. Survivors are scarce in Choice condition and border on rare in MS65. The surfaces of this near-Gem dollar feature considerable brilliance intermixed with splashes of golden and gunmetal-blue patina. Frosty luster abounds over each side. The strike definition is bold, aside from incompleteness on Liberty's head and a few stars. PCGS has graded 42 numerically finer examples (8/16). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

3954 1876-CC Type One Obverse, Type Two Reverse, Chop Mark AU53 PCGS. Tall CC. A solitary chop mark on Liberty's knees creates a granular area on the eagle's left (facing) wing. A lightly abraded Centennial year Carson City type coin that exhibits dusky dove-gray and chestnut-gold toning. PCGS# 87042 Base PCGS# 7042

3955 1876-CC Doubled Die Reverse, FS-801, Chop Mark, AU50 PCGS. The popular and scarce *Cherrypickers'* variety with impressive die doubling beneath the eagle's branch, right wingtip, and beak. This lightly abraded cream-gray example has been to the Orient, where it received a single chop mark on Liberty's upper legs. PCGS# 77042 Base PCGS# 7042

3956 1876-S Type One Obverse, Type One Reverse, MS63 NGC. Large S. Dusky olive-gray toning embraces coruscating and crisply struck surfaces. The reverse is well preserved, while the obverse field has a few minor marks, and a couple of small spots are concealed west of the L in LIBERTY. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

3957 1876-S Type One Obverse, Type One Reverse, MS63+ PCGS. Large S. Shades of greenish-gold and lavender toning blanket the lightly marked surfaces of this Plus-graded Select specimen, with well-detailed design elements and satiny mint luster underneath. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

3958 1877-S MS62 PCGS. Large S. Vibrant cartwheel sheen illuminates this sharply struck and minimally toned Trade dollar type coin. Marks are chiefly confined to a cluster of field marks near Liberty's knees. From the usual "smooth tail back feathers" hub. NGC ID# 253E, PCGS# 7046

3959 1877-S MS64 PCGS. Large S. A generous mintage of more than 9.5 million Trade dollars was accomplished at the San Francisco Mint in 1877. This attractive Choice example features sharply detailed design elements and well-preserved, lustrous surfaces, with vivid hints of greenish-gold and turquoise toning. Housed in a green label holder. PCGS has graded 40 numerically finer examples (8/16). NGC ID# 253E, PCGS# 7046

1878-CC Trade Dollar, AU Details Final-Year Key Date

3960 1878-CC — Cleaning — PCGS Genuine. AU Details. The Carson City Mint struck the final batch of Trade dollars in 1878 (97,000 coins) before turning its attention to the production of Morgan dollars later that year. The 1878-CC Trade dollar is highly desirable across all grade levels as the key date among circulation strikes. This bright dollar has AU sharpness, though both sides show the effects of an improper cleaning. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

3961 1880 PR61 PCGS. Third proof-only issue from the Philadelphia Mint, in 1880 1,987 proof Trade dollars were produced. This is a mostly brilliant example that shows hairlines on each side. The only streak of color is a dash of russet connecting stars 4 and 5 on the obverse. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR64 Cameo High-Demand Proof-Only Issue

3962 1880 PR64 Cameo NGC. From a generous proof-only mintage of 1,987 pieces, the 1880 Trade dollar was the object of intense speculation at the time of issue. This attractive Choice example exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. A few minor hairlines in the field are all that prevent an even higher grade. Census: 59 in 64 Cameo (3 in 64+), 78 finer (8/16). NGC ID# 27YS, PCGS# 87060

End of Session Two

SESSION THREE

PATTERNS

1850 Annular Cent Pattern in Billon
Judd-119, PR63

- 3963** 1850 One Cent, Judd-119 Original, Pollock-134, Low R.6 PR63 PCGS. The annular cent pattern, with a largish hole in the middle. The obverse displays the denomination CENT at the top, the date 1850 at the bottom, two rosettes at the sides, and a perforation in the center. The reverse, in the process of shattering and showing heavy die cracks, has the inscriptions USA (the curious U not parallel to the rim) and ONE TENTH SILVER around. Struck in billon (10% silver, 90% copper) with a plain edge and medal turn. Gray patina is seen over each side with bright, underlying silver-rose surfaces. Housed in a first-generation holder. NGC ID# 2A57, PCGS# 11511

1851 'Ring Cent' in Copper
Judd-129, PR63 Red and Brown

- 3964** 1851 One Cent, Judd-129 Original, Pollock-153, Low R.7 PR63 Red and Brown PCGS. The patterns Judd-127 through Judd-131 were an early proposed solution to the problem of an oversized copper cent. A billon piece that contained one-tenth silver was suggested, and patterns were struck with and without perforated centers and in various alloys. Judd-129 was struck in copper with medal turn and has a central perforation, which classifies it as an original striking. About a dozen pieces are known. This piece retains significant original red luster that is slightly mellowed by bluish patina in the fields. Housed in a first-generation holder. NGC ID# 32XS, PCGS# 11551

1855 Flying Eagle Cent in Bronze
Judd-168, PR63 Brown

- 3965** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Brown PCGS. Thirteen stars surround an eagle that is flying slightly upward, similar to the Christian Gobrecht/Titian Peale flying eagle design for the Gobrecht dollars (and soon the Flying Eagle cents). The reverse design is similar to the issued large cent. The diameter is intermediate between the large cents struck for commerce in 1855 and the small cents that were first produced in 1856. Struck in bronze with a plain edge. Struck from heavily clashed dies. Although labeled Brown, this piece shows significant underlying mint red on each side. A darker discolored area is noted on the reverse at the rim between 11 and 12 o'clock. Housed in a first-generation holder. NGC ID# 29AG, PCGS# 11720

1858 Copper-Nickel Flying Eagle Cent Pattern
Judd-204, PR63

- 3966** 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR63 PCGS. Anthony Paquet's small flying eagle motif is paired with an ornamental shield and oak wreath reverse. Struck in copper-nickel with a plain edge. The fields are uncommonly bright and reflective for a copper-nickel product. Die striations are especially notable in the reverse fields. Light tan-rose color overall. Just a few hairlines limit the grade. Housed in a first-generation holder. NGC ID# 29BK, PCGS# 11871

1858 Indian Cent in Copper-Nickel
Judd-213, Pollock-258, PR63

3967 1858 Indian Cent, Judd-213, Pollock-258, Snow-PT22, R.5, PR63 PCGS. The obverse is the Indian type as issued in 1859, but dated 1858. The reverse is the same as used on Flying Eagle cents. The Broad Bust Point, Centered Date, Low Leaves Pollock and Snow subvariety of Judd-213. Struck in copper-nickel with a plain edge. Several copper-nickel variants were struck for the Indian cent in 1858, but only two used the adopted broad wreath on the reverse. This is a sharply defined example with shallow mirroring in the fields. Light reddish patina covers each side. Housed in a first-generation holder. NGC ID# 29BV, PCGS# 11897

1866 Washington Five Cents in Nickel
Judd-461, PR64

3969 1866 Five Cents, Judd-461, Pollock-535, R.5, PR64 PCGS. A bust of George Washington faces right on the obverse, UNITED STATES OF AMERICA surrounds, and the date is below. The reverse features the denomination 5 CENTS within a laurel wreath with IN GOD WE TRUST above. Washington's eye is die doubled. Struck in nickel with a plain edge. The George Washington obverse device is a popular one with collectors, and approximately three dozen pieces are known. The fields are surprisingly bright for a nickel proof and they shine forcefully through the even, light reddish patina seen over each side. Housed in a first-generation PCGS holder. NGC ID# 29K7, PCGS# 60656

1864 'Transitional' Half Dollar in Copper
Judd-392, PR64 Red and Brown

3968 1864 Half Dollar, Judd-392, Pollock-460, R.7, PR64 Red and Brown PCGS. Struck from the regular obverse die, and paired with the regular reverse die of 1866 with the motto above the eagle. Struck in copper with a reeded edge. These so-called transitional half dollars used the With Motto reverse, but were actually produced in the late 1860s through the early 1870s. About a dozen copper pieces are known. The obverse and reverse of this piece each present dramatically different look. The obverse shows bright orange-red mint luster beneath slightly mellowed brownish patina. The reverse, on the other hand, is cobalt-blue with one swatch of red color over the letters in UNITED. Housed in a first-generation PCGS holder. NGC ID# 29HE, PCGS# 70563

1866 Shield Nickel in Copper
Judd-508, PR63 Brown

3970 1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR63 Brown PCGS. Struck from a regular obverse die of the 1866 Shield nickel, while the reverse suggests the No Rays design that was produced for circulation the following year. Struck copper with a plain edge. Also produced in copper or bronze and one piece in white metal. The nickel pieces are the most frequently seen; while this copper example is one of only an estimated dozen believed to exist. The color scheme seen here is quite dramatic with lime-green fields and reddish-brown devices. The devices appear to hold significant mint frost and absent the color would undoubtedly show a cameo effect. Housed in a first-generation holder. NGC ID# 29L7, PCGS# 60704

1867 Five Cent Longacre Pattern in Aluminum, Judd-561, PR64

3971 1867 Five Cents, Judd-561, Pollock-622, R.5, PR64 PCGS. The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting in the hair in front of the ribbon are four large stars. The Chief Engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. This unusual design was struck in copper and aluminum with both plain and reeded edges. USPatterns.com notes that 100 pieces of Judd-561 are believed to have been struck, according to J. Colvin Randall. This would make the Judd-561 one of the more obtainable aluminum patterns and an excellent entry point for the collector interested in these unusual patterns. Housed in a first-generation holder. NGC ID# 29M4, PCGS# 60771

1867 Five Cent Pattern in Nickel
Judd-566, PR64

- 3972** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR64 PCGS. The obverse features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. Struck in nickel with a plain edge. Several five cent patterns were produced based on the three cent nickel design. This obverse / reverse combination was also struck in copper. The fields are shallowly mirrored, as seen on numerous nickel products. The fields are also lightly striated. Each side shows just a hint of color, and there are a few tiny contact marks present. Housed in a first-generation holder. NGC ID# 29M9, PCGS# 60776

1867 Five Cent Pattern in Nickel
Judd-570, 7 Distant From Curl, PR63

- 3973** 1867 Five Cents, Judd-570, Pollock-638, R.5, PR63 PCGS. A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA is around the periphery with the date below. The top of the 7 is distant from the curl. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge. Two varieties are known of this pattern, one with the 7 close to the curl and the other (as seen here) distant. Pale aqua-blue and gray patina evenly covers each side and the fields are bright and reflective. Housed in a first-generation holder. NGC ID# 29MB, PCGS# 60780

1868 Cent Pattern in Nickel
Judd-605, PR63

- 3974** 1868 One Cent, Judd-605, Pollock-670, R.5, PR63 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the laurel wreath. Struck in nickel with a plain edge. Produced in nickel, copper, and aluminum; the nickel pieces (as seen here) are the most frequently encountered. Light gray patina covers both sides with a few tiny flyspecks on the obverse. Housed in a first-generation holder. NGC ID# 29UU, PCGS# 60817

1868 Five Cents Pattern in Nickel, Wide Border
Judd-624, PR64

- 3975** 1868 Five Cents, Judd-624, Pollock-693, Low R.6, PR64 PCGS. Struck on a broad, slightly oversized five cent planchet with an wide border around each side. The obverse is a larger variant of the three cent nickel design, while the reverse has 5 CENTS in the center surrounded by a laurel wreath. Struck in nickel with a plain edge. This obverse / reverse combination was struck in nickel, copper and aluminum. The nickel pieces are the most frequently encountered, and it is estimated that 2-3 dozen examples may exist of this wide-border variant. The fields are brightly reflective in spite of the moderate streaky reddish-gray patina seen over each side. Housed in a first-generation holder. NGC ID# 29NF, PCGS# 60841

1868 Five Cents in Nickel
Judd-633, High Date Variant, PR64

- 3976** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR64 PCGS. The obverse design resembles the adopted three cent nickel, but on a larger planchet, with minor design modifications appropriate to the increased diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. The High Date variant (Pollock-705). Struck in nickel with a plain edge. The surfaces are gray-brilliant and the fields are moderately reflective. This appears to be a nicer coin than the grade would indicate. Housed in a first-generation holder. NGC ID# 29NN, PCGS# 60851

**1869 Standard Silver Dime in Silver
Judd-703, Richly Toned PR64**

- 3977 1869 Standard Silver Ten Cents, Judd-703, Pollock-782, High R.6, PR64 PCGS.** Standard Silver design with the head of Liberty facing right with a diadem in her hair, motto below, and UNITED STATES OF AMERICA above. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel, with STANDARD SILVER 1869 around the margin. Struck in silver with a plain edge. Produced in silver, copper, and aluminum and with both edge treatments. The silver pieces are the most frequently seen. The fields on this piece are bright and at the right angle shine forcefully through the otherwise substantial deep blue and rose toning seen over each side. Housed in a first-generation holder. NGC ID# 28N9, PCGS# 60928

**1869 SIL. / NIC. / COP. Ten Cents in Copper
Judd-717, PR64 Brown**

- 3978 1869 Ten Cents, Judd-717, Pollock-797, Low R.7, PR64 Brown PCGS.** The obverse is a Seated Liberty with no date below, while the reverse has abbreviations SIL. / NIC. / COP. over a dated exergue. Struck in copper with a reeded edge. This pattern was also struck in the mysterious Roulz's Alloy (formerly believed to be Koulz's Alloy). The fields show heavy die striations which yield brightness over each side. Deep blue patina covers most of each side with reddish-gray toning surrounding the devices. Housed in a first-generation holder. NGC ID# 29RZ, PCGS# 60943

**1869 Standard Silver Quarter in Silver
Judd-734, Bright and Contrasted PR63**

- 3979 1869 Standard Silver Quarter Dollar, Judd-734, Pollock-815, Low R.6, PR63 PCGS.** Liberty wears a headband inscribed LIBERTY in raised letters and a star at the front, facing right. A plain ribbon gracefully flows through Liberty's hair and across her shoulders. UNITED STATES OF AMERICA is at the upper rim, with IN GOD WE TRUST in a ribbon below. The reverse features 25 / CENTS within an oak and laurel wreath, with STANDARD SILVER above and the date, 1869, below. Struck in silver with a plain edge. Struck in silver, copper and aluminum with both plain and reeded edges. The Judd-734 is one of the more frequently encountered of these pairings. The surfaces are brilliant with deeply reflective fields and noticeably contrasting devices. A few minor contact marks account for the grade. Housed in a first-generation holder. NGC ID# 29SJ, PCGS# 60961

**1869 Aluminum Standard Silver Half
Judd-758, PR63**

- 3980 1869 Standard Silver Half Dollar, Judd-758, Pollock-842, Low R.7, PR63 PCGS.** Liberty faces right, with UNITED STATES OF AMERICA above her and IN GOD WE TRUST in a scroll below. The reverse features 50 CENTS inside a wreath, with STANDARD SILVER above and 1869 below. Struck in aluminum with a reeded edge. Fewer than a half dozen pieces are known in this metal / edge combination. A couple of spots of oxidation on the obverse and light hairlining account for the grade. Housed in a first-generation holder. NGC ID# 29T9, PCGS# 60988

**1870 Standard Silver 10 Cent, PR61
Judd-837, Silver, Reeded Edge**

- 3981 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR61 NGC.** This Standard Silver design depicts a small bust of Liberty facing right. Her cap shows three stars. The reverse exhibits a corn and cotton wreath with the denomination and date inside. The remaining statutory legends occupy the obverse margin and upper reverse border. Struck in silver with a reeded edge. A well struck and unblemished specimen with dove-gray, golden-brown, and ice-blue toning. NGC ID# 94FK, PCGS# 61081

1870 Standard Silver Dime in Silver
Judd-837, PR63

- 3982** 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR63 PCGS. The obverse features a bust of Liberty right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with three stars. On the reverse, the denomination 10 CENTS and the date 1870 are crowded inside a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a reeded edge. A fairly common Standard Silver issue when found in silver; scarcer in copper and aluminum. The surfaces are bright with just the slightest hint of rose patina. Deeply mirrored. Housed in a first-generation holder. NGC ID# 94FK, PCGS# 61081

1870 Standard Silver Ten Cent, PR65
Judd-849, Silver, Reeded Edge

- 3983** 1870 Standard Silver Ten Cents, Judd-849, Pollock-956, R.5, PR65 NGC. CAC. This Standard Silver design shows a bust of Liberty facing right with UNITED STATES OF AMERICA above and IN GOD WE TRUST below. The reverse has 10 CENTS and the date in the center, surrounded by a wreath of cotton and corn with STANDARD above. Struck in silver with a reeded edge. The fields exhibit rich peach-gold toning. The borders are ocean-blue. Hints of lavender-red also emerge. The strike is sharp and no grade-limiting detractors are apparent. Struck from rotated dies. NGC ID# 29VS, PCGS# 61093

1870 Standard Silver Ten Cents in Silver
Judd-855, PR64

- 3984** 1870 Standard Silver Ten Cents, Judd-855, Pollock-935, High R.6, PR64 PCGS. The obverse has a representation of Liberty facing right with the statutory legend above and the motto below. The reverse has a small wreath around the denomination, with STANDARD SILVER above and the date below. This piece is struck in silver with a reeded edge, but the pattern was also struck in silver, copper, and aluminum with plain and reeded edges. Only a dozen or so pieces are known in this metal / edge combination. Light reddish patina covers each side with slight accents of lilac. NGC ID# 29VY, PCGS# 61099

1870 Standard Silver Ten Cent, PR62
Judd-861, Silver, Reeded Edge

- 3985** 1870 Standard Silver Ten Cents, Judd-861, Pollock-949, High R.6, PR62 NGC. On the obverse the head of Liberty wears a diadem with a plain ribbon encircling her hair; the reverse has 10 CENTS in the center surrounded by a thick oak and laurel wreath with STANDARD SILVER 1870 at the margin. Struck in silver with a reeded edge. The crisply struck and minimally abraded surfaces are pleasing for the designated grade. Originally patinated sky-blue and chestnut-gold. NGC ID# 26JT, PCGS# 61105

1870 Standard Silver Quarter in Copper
Judd-879, PR64 Brown

- 3986** 1870 Standard Silver Quarter Dollar, Judd-879, Pollock-976, High R.6, PR64 Brown PCGS. William Barber's Seated Liberty rendition, paired with an undated Standard Silver reverse die. The placement of Liberty's head and cap affects the spacing of the obverse stars. Struck in copper with a plain edge. Fewer than a dozen examples are known in this metal / edge combination. This is a richly patinated example with the primary colors sea-green and bright rose. Housed in a first-generation holder. NGC ID# 29WM, PCGS# 61123

1870 Seated Quarter in Copper
Judd-885, PR63 Red and Brown

- 3987** 1870 Quarter Dollar, Judd-885, Pollock-983, R.6-7, PR63 Red and Brown PCGS. The obverse depicts a William Barber portrait of Liberty seated left with thirteen stars around the periphery and the date 1870 below. The reverse is the same used to produced regular issue 1870 Seated quarters. Struck in copper with a plain edge. Struck in silver, copper, and aluminum. There are fewer than a dozen pieces known in copper and with a plain edge. Bright red surfaces are interrupted by blue in the fields. Housed in a first-generation holder. NGC ID# 29WT, PCGS# 71129

1870 Standard Silver Quarter in Silver
Judd-894, PR58

- 3988** 1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR58 PCGS. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. This relatively common pattern was struck with thin and thick planchets. This is a thin planchet variant. Slight friction from handling is seen on each side, and light rose-gray toning is present overall. NGC ID# 29X2, PCGS# 61138

1870 Standard Silver Quarter in Silver
Judd-906, PR64

- 3989** 1870 Standard Silver Quarter Dollar, Judd-906, Pollock-994, Low R.7, PR64 PCGS. This Standard Silver design depicts a bust of Liberty facing right on the obverse. Liberty's cap is ornamented with three stars and a ribbon with the inscription LIBERTY, the motto IN GOD WE TRUST is on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in silver with a reeded edge. The fields are deeply reflective and serve to highlight the rich reddish-coppery patina that lightly covers each side. Housed in a first-generation holder.
Ex: 80th Convention Auction Sale (Stack's, 8/1971), lot 436, flip included. NGC ID# 29XD, PCGS# 61150

1871 Five Cents in Aluminum
Judd-1052, Bright PR64

- 3990** 1871 Five Cents, Judd-1052, Pollock-1186, Low R.7, PR64 PCGS. The obverse repeats a familiar pattern with the devices closely resembling that on the adopted three cent nickel, and the reverse has a backward V in the center with CENTS below, surrounded by a laurel wreath. Struck on a regular sized planchet and struck in aluminum with a plain edge. Also struck in nickel and copper. The aluminum surfaces are bright and unoxidized with deeply mirrored fields. Housed in a first-generation holder. NGC ID# 2A2N, PCGS# 61311

1896 Federal Shield Nickel in Aluminum
Judd-1772, PR63

- 3991** 1896 Five Cents, Judd-1772, Pollock-1989, High R.6, PR63 PCGS. This 1896 pattern design features a large shield in the center of the obverse with crossed poles behind and a large ribbon across the center of the shield. The reverse has a large numeral 5 with CENTS in small letters below, surrounded by a curved olive sprig. Struck in aluminum with a plain edge. The 9 in the date is recut. These 1896 patterns are an understudied area just waiting for some numismatist to explore. For instance, Pollock states there are four alloys of aluminum used for the Judd-1772. What are they? Which one is this? The surfaces are bright and the fields deeply mirrored on this piece with contrasting mint frost over the devices. However, there are numerous planchet flakes, cracks, and voids present that surely figured into the grade of this coin decades ago. Housed in a first-generation holder. NGC ID# 2AMD, PCGS# 62226

GOLD DOLLARS

- 3992** 1849 No L, D-1, Normal Stars, MS63 NGC. Most easily attributed by the widely repunched star below the bust truncation. The surfaces are bright and lustrous with a hint of reddish patina over the otherwise yellow-gold color. Sharply defined throughout with minimal abrasions.
From The Twelve Oaks Collection, Part II PCGS# 521670 Base PCGS# 7501
- 3993** 1849-O Open Wreath MS62+ NGC. Variety 1. The Variety 1 reverse shows the mintmark high, with the R in DOLLAR and the ME in AMERICA recut. As a date, the 1849-O gold dollar is elusive in Mint State. This Plus-graded, collector-friendly example is well-struck and displays satiny green-gold luster. There are no significant abrasions as only some light hairlines in the fields prevent a finer grade.
From The Twelve Oaks Collection, Part II NGC ID# 25BE, PCGS# 7508

1849-O Gold Dollar, MS63
Popular Initial New Orleans Issue

3994 1849-O Open Wreath MS63 NGC. Variety 2. Struck in substantial numbers (215,000 pieces), approximately 0.5% survive today in all grades. The 1849-O is relatively easy to locate in lower grades, but MS63 and finer pieces can be a challenge. This is a sharply defined example that shows green-gold tinted surfaces. Light abrasions are peppered over each side, and good mint luster is seen throughout. Census: 49 in 63 (1 in 63+), 50 finer (8/16). NGC ID# 25BE, PCGS# 7508

3995 1850-C — Improperly Cleaned — NGC Details. AU. Variety 1. Only 6,966 pieces were struck of the 1850-C gold dollar, second lowest in overall rarity of all C-mint dollars (second only to the 1859-C). The strike on this piece is much stronger than normally encountered and it also lacks the usual granularity of most surviving examples. Each side is lightly hairlined and there is a small dig to the right corner of the serif of the 1 in the denomination. *From The Twelve Oaks Collection, Part II* NGC ID# 25BG, PCGS# 7510

3996 1851-C AU55 PCGS. Variety 3. The 1851-C is the most frequently encountered of all nine Charlotte Type One gold dollars. Probably somewhere between 750 and 1,000 pieces may still exist in all grades. This is an attractive, still partially lustrous example that displays smooth surfaces with yellow-gold centers and rich reddish patina around the margins. NGC ID# 25BL, PCGS# 7514

3997 1853-C AU53 NGC. Variety 1. Perhaps 200 to 300 examples of the 1853-C gold dollar survive, according to Doug Winter's estimation. This AU example displays natural olive-gold patina with coppery overtones here and there. The coin is well-detailed with problem-free surfaces. *From The Twelve Oaks Collection, Part II* NGC ID# 25BV, PCGS# 7522

1853-C Gold Dollar, AU55
Exceptionally Strong Strike

3998 1853-C AU55 NGC. Variety 1. Only 11,515 gold dollars were struck at the Charlotte branch mint in 1853. Examples are very scarce in Choice AU and near-Mint grades, becoming downright rare in Uncirculated condition. This AU55 gold dollar is exceptionally strong for an issue notorious for its poor impressions. The stars display full centers, and the hair curls and wreath elements are clearly delineated. Both L's in DOLLAR are razor-sharp. Khaki-gold hues dominate minimally marked surfaces. NGC ID# 25BV, PCGS# 7522

1853-D Gold Dollar, AU50
Appealing Greenish-Gold Patina

3999 1853-D AU50 NGC. Not surprisingly, only a single variety is known for this Dahlonega gold dollar, thanks to the low mintage of just 6,583 pieces. Examples finer than XF are scarce but obtainable, making the issue a favorite of branch mint gold specialists and type collectors alike. A typically weak strike on Liberty's hair is offset by generally sharp peripheral elements. Appealing smooth, greenish-gold patina is reminiscent of an old gold watchcase. *From The Twelve Oaks Collection, Part II* NGC ID# 25BW, PCGS# 7523

4000 1855 Type Two MS61 ANACS. A beautiful orange-gold representative of the briefly issued Small Head type. The reverse field is clashed, but abrasions are minimal for the designated grade. Well struck for a Type Two gold dollar, particularly on the date and forehead curls. Certified in an ANA cache holder. NGC ID# 25C4, PCGS# 7532

4001 1855-C — Reverse Damage — NGC Details. AU. Variety 1. This is a scarcer variety that is most easily attributed by the second 5 in the date located directly beneath the A in DOLLAR. Only 9,803 pieces were struck, and apparently none were well-defined in the centers. This piece is especially weak. The surfaces are bright reddish-gold, and the reverse damage is primarily seen on the rim at 5 o'clock, but there are also several digs on the right side of the wreath. *From The Twelve Oaks Collection, Part II* NGC ID# 25C5, PCGS# 7533

1859-C Gold Dollar, AU53
Only 5,235 Coins Minted

4002 1859-C AU53 NGC. Variety 1. The only known variety for the date. The 1859-C has the single lowest mintage among all Charlotte gold dollars and represents the final issue of that denomination from the North Carolina mint. Orange and green-gold surfaces show typically rendered devices with incompleteness on the denomination and around the borders. Wispy abrasions are unsurprising. Census: 9 in 53, 66 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 25CM, PCGS# 7552

4003 1869 MS62+ NGC. Post-Civil War gold mintages at Philadelphia remained at low levels for many years. That Mint produced just 191,440 gold coins, and they were mostly double eagles. Gold dollar production amounted to 5,900 coins, and that was the second highest of the six denominations. This lovely Mint State piece has brilliant orange-gold luster with frosty surfaces and strong design definition. Census: 19 in 62+, 30 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 25D5, PCGS# 7568

**1883 Gold Dollar, MS67
High-End Type Coin**

- 4004 1883 MS67 PCGS.** Mintages of gold dollars in the 1880s were low but the number of saved pieces was high, with relatively large populations in higher grades at PCGS and NGC. The 1883 is a type collector's dream coin, with one of the higher mintages of the decade at 10,800 pieces and many coins available in Gem or finer condition. This Superb Gem is lustrous and attractive with a sharp strike. PCGS reports just 13 numerically finer examples (8/16). NGC ID# 25DM, PCGS# 7584

- 4005 1885 MS64 Prooflike NGC.** The 1885 gold dollar is elusive with a Prooflike designation from NGC. This near-Gem example displays sharp motifs amid the reflective fields. A few stray lines and marks are all that limit the grade. Census: 10 in 64 (1 in 64+) Prooflike, 11 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25DP, PCGS# 77586

- 4006 1889 MS65 NGC.** This final-year issue is popular among type collectors. The present Gem example displays frosty yellow-gold luster with lovely rose-gold overtones on each side. There are no significant surface imperfections. Eye appeal is excellent.
From The Twelve Oaks Collection, Part II NGC ID# 25DU, PCGS# 7590

- 4007 1889 MS65 NGC.** Satiny wheat-gold luster has a lovely blend of mint and rose hues in the fields amid glimpses of reflectivity. This sharp Gem 1889 gold dollar is devoid of serious imperfections and offers exceptional type coin appeal.
From The Twelve Oaks Collection, Part II NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, MS67
Even Reddish Patina Throughout**

- 4008 1889 MS67 NGC.** Final year of issue and one of the most available dates in the series. The 1889 is also one of the best-produced date in the series. Thus, it is very popular with type collectors. The surfaces on this piece show soft, frosted mint luster and even, deep reddish patina. The strike is complete in all areas and there are no obvious abrasions, as one would expect from a coin in this superlative condition. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

- 4009 1887 — Mount Removed — PCGS Proof Genuine. Unc Details.** Evidence of the mount removal is mostly hidden by the holder tabs. This proof 1887 gold dollar is fully detailed and reflective, with bright yellow-gold surfaces. Scattered hairlines on each side are as expected for a coin previously held in a jewelry mount. NGC ID# 25EX, PCGS# 7637

CLASSIC QUARTER EAGLES

- 4010 1834 AU55 NGC. Breen-6140, Variety 3, R.4.** Variety 3 is rarest among the four known 1834 Classic quarter eagle marriages. It is the only variety for the year without a tongue inside the eagle's beak. This is an originally toned orange-red example. The centers show moderate inexactness of strike, and a pair of thin marks are noted near the E in UNITED. NGC ID# 25FS, PCGS# 7692

**1838-C Classic Quarter Eagle, AU Details
First Year of Issue From the Charlotte Mint**

- 4011 1838-C — Improperly Cleaned — NGC Details. AU. Variety 20.** First year of issue from the Charlotte mint and one of only 7,880 coins produced. Doug Winter estimates 150-200 examples have survived in all grades. This is a pale yellow-gold piece that is softly struck over the high points of the devices. Numerous small, but individually insignificant abrasions are peppered across the surfaces, as one would expect from this issue.
From The Twelve Oaks Collection, Part II NGC ID# 25FZ, PCGS# 7697

LIBERTY QUARTER EAGLES

- 4012 1845-D — Improperly Cleaned — NGC Details. AU. Variety 6-J.** The 1845-D is a moderately scarce issue in the Dahlonega series with an estimated 200-250 pieces believed extant in all grades. This example is lightly hairlined and bright yellow-gold as a result. The normally seen noticeable surface marks are limited to pinscratch-sized abrasions in the fields. Moderate striking softness is seen over the high points of the design.
From The Twelve Oaks Collection, Part II NGC ID# 25GX, PCGS# 7738

**1847-C Quarter Eagle, AU55
Ideal North Carolina Type Coin**

- 4013 1847-C AU55 NGC. Variety 1.** All 1847-C quarter eagles show a die line that passes through stars 12 and 13. With a mintage of 23,226 coins, this is far and away the most available Charlotte two and a half dollar issue for type purposes. Specialists with an eye for originality should appreciate this Choice AU piece, showing deep shades of orange and green-gold. The 1847-C was well-made, as evidenced by the bold curls, stars, and feathers here. NGC ID# 25H6, PCGS# 7745

- 4014 1848-D —Improperly Cleaned — NGC Details. AU. Variety 10-N.** The 1848-D is one of the more frequently encountered D-mint two and a halves, and it is often used for type purposes. Just a bit of high-point weakness is noted on each side. The surfaces are bright, as expected, from cleaning but luster can still be easily found around the devices on each side.
From The Twelve Oaks Collection, Part II NGC ID# 25HC, PCGS# 7751

**1850 Quarter Eagle, MS63+
Elusive in Any Mint State**

- 4015 1850 MS63+ PCGS. CAC.** The 1850 quarter eagle was minted in large quantity for the denomination — 252,923 pieces were struck, most of which circulated to the extent that Uncirculated pieces are seldom encountered. This coin is the sole Plus-graded piece by PCGS at the MS63 level. The greenish-gold color suggests a California origin of the bullion, while the frosty and lustrous surfaces show only a few light abrasions for the Select level. The motifs are well-struck with minor blending on the hair bun and the eagle's right (facing) talon. Few pieces are finer than this high-end example. Population: 18 in 63 (1 in 63+), 4 finer (8/16). NGC ID# 25HG, PCGS# 7755

- 4016 1850-C — Improperly Cleaned — NGC Details. AU. Variety 2.** The rarer of the two die marriages. The mintmark is centered over the fraction bar instead of the numerator. This wheat-gold Charlotte representative has a slight reverse rim bump at 7 o'clock, but is otherwise attractive despite an unobtrusive cleaning. A scant 9,148 pieces were produced. NGC ID# 25HH, PCGS# 7756

**1851-C Quarter Eagle, AU53
Rich Orange-Gold Color**

- 4017 1851-C AU53 NGC. Variety 1.** Rich orange-gold color and olive accents deliver excellent eye appeal throughout this minimally circulated Charlotte quarter eagle, one of 14,923 two and a half dollar gold coins minted in North Carolina in 1851. The strike is generally strong for a branch mint product, and small abrasions are undistracting. Census: 15 in 53, 48 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25HM, PCGS# 7760

**1861 New Reverse Quarter Eagle
Full-Fledged Gem, Scarce This Fine**

- 4018 1861 New Reverse, Type Two, MS65 NGC.** The huge mintage of more than 1.2 million pieces makes it easy to undervalue the 1861 in high grade. In truth, it is a premier selection for type if it can be had for anything close to the historical market price. Only faint, isolated areas of die clashing interrupt the smooth, finely textured and frosty surfaces that radiate cartwheel luster on this sharply struck coin. Wheat-gold color displays a greenish tinge when rotated in light. Remarkably few pieces are certified in finer grades. Census: 25 in 65 (1 in 65+, 2 in 65+★), 4 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25JX, PCGS# 7794

**1887 Quarter Eagle, MS63 Prooflike
Rare With Such Bold Reflectivity**

- 4019 1887 MS63 Prooflike NGC.** The number of designated Prooflike examples of the 1887 can be counted on one hand, an issue that is already highly elusive in Select and finer grades from a small mintage of 6,160 pieces (regardless of surface format). The present coin could easily be mistaken for a proof if not for some tiny ticks and a curious area of planchet roughness beneath the denomination. The strike is sharp over attractive, rich-gold surfaces. Census: 3 in 63 Prooflike, 2 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25LB, PCGS# 77839

- 4020 1888 MS64 PCGS.** The 1888 is somewhat elusive in all grades, as only 16,001 coins were minted. This lustrous near-Gem features appealing honey-gold surfaces. Well-struck with faint central softness. Population: 59 in 64 (2 in 64+), 27 finer (8/16). NGC ID# 25LC, PCGS# 7840

1888 Quarter Eagle, MS65
Attractive, Frosty Mint Luster

- 4021 1888 MS65 NGC.** This Gem 1888 has a jewel-like quality seldom seen in the Liberty Head quarter eagle series, a “look” that perhaps appears more often among high-grade gold dollars. Finely textured, frosty surfaces capture the light and return it in multiples from the coruscated fields. Orange and rose accents hover around the raised elements to enliven the greenish-gold coloration. The strike delivers full details, while marks are limited to a few faint, hair-thin grazes and the occasional orange alloy fleck. Census: 30 in 65 (2 in 65+), 6 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25LC, PCGS# 7840

- 4022 1891 Doubled Die Reverse, FS-801, MS64 NGC.** The reverse is dramatically die doubled on the peripheral legend, denomination, arrowheads, and the right edge of the eagle’s silhouette. This doubling is seen on virtually all 1891 quarter eagles, per the *Cherrypickers’* reference. This Choice example is conditionally scarce, and few finer coins are known. The strike is sharp. Frosty green-gold luster reveals no mentionable abrasions. Census: 39 in 64 (2 in 64+), 11 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# BLFZ, PCGS# 145709 Base PCGS# 7843

- 4023 1896 MS65 PCGS.** PCGS estimates that 3,000 of the 19,000 quarter eagles struck in 1896 are extant. The issue is very scarce in Gem condition and rare any finer. Booming luster cascades over light yellow-gold surfaces. Fully struck. NGC ID# 25LL, PCGS# 7848

- 4024 1896 MS65 NGC.** Sharply struck with meticulous preservation, this outstanding Gem displays frosty wheat-gold coloration with dramatic eye appeal. The strike is razor-sharp, and a single tiny nick on the eyebrow is the only mark on Liberty’s portrait. A great coin for the grade. Census: 61 in 65 (1 in 65+, 1 in 65 ★), 34 finer (8/16). NGC ID# 25LL, PCGS# 7848

- 4025 1901 MS65 NGC.** A fully struck Gem, this 1901 Liberty quarter eagle exhibits trivial copper toning spots and scattered, grade-consistent marks on its brilliant and frosty yellow surfaces.
From The Twelve Oaks Collection, Part II NGC ID# 25LS, PCGS# 7853

- 4026 1902 MS66 NGC.** A sharp strike and frosty wheat-gold mint luster deliver abundant visual appeal on this Premium Gem 20th century type coin. A solitary graze on Liberty’s cheek appears to be all that prevents an even higher grade.
From The Twelve Oaks Collection, Part II NGC ID# 25LT, PCGS# 7854

- 4027 1904 MS66 NGC.** This Premium Gem 1904 quarter eagle is sharply struck with radiant lemon-gold luster and no abrasions that are detectable to the unaided eye. The 1904 quarter eagle is a popular type-coin issue, particularly in the MS66 and MS67 grades.
From The Twelve Oaks Collection, Part II NGC ID# 25LV, PCGS# 7856

- 4028 1904 MS66 NGC.** A lack of significant abrasions complements frosty yellow-gold luster on this Premium Gem type coin, while the design elements rise sharply above the luminous fields. A few tiny copper alloy spots are seen on each side, not particularly noticeable.
From The Twelve Oaks Collection, Part II NGC ID# 25LV, PCGS# 7856

- 4029 1905 MS66 PCGS.** Brilliant, mint-fresh luster adorns this Premium Gem 1905 quarter eagle, delivering exceptional eye appeal. The design elements are sharp and thoroughly illuminated by the radiant cartwheel effect. There are no mentionable abrasions or alloy spots.
From The Twelve Oaks Collection, Part II NGC ID# 267S, PCGS# 7857

- 4030 1905 MS66 NGC.** Eye appeal befits the grade on this radiant Premium Gem type coin. A couple of hazy alloy spots are seen in the right obverse field, but there are no mentionable abrasions. Frosty, mint-fresh yellow-gold luster illuminates each side.
From The Twelve Oaks Collection, Part II NGC ID# 267S, PCGS# 7857

- 4031 1905 MS66 NGC.** Softly frosted green-gold luster illuminates well-preserved surfaces on this sharp Premium Gem. A small coppery alloy spots near star 2 on the obverse affirms the originality of the surfaces.
From The Twelve Oaks Collection, Part II NGC ID# 267S, PCGS# 7857

1905 Two and a Half, MS67
Dazzling Eye Appeal

- 4032 1905 MS67 PCGS.** The 1905 is notorious for copper stains, but this example is exceptionally free of alloy spots. Frosty and brilliant with dense mint luster, the jewel-like surfaces of this Superb Gem will be hard to exceed in quality or eye appeal. Olive-gold highlights grace the margins, the medium-gold base color glitters with virtually no distractions. The strike is needle-sharp. Population: 88 in 67 (6 in 67+), 4 finer (8/16). NGC ID# 267S, PCGS# 7857

- 4033 1906 MS66 PCGS.** Finer 1906 quarter eagles are elusive, particularly at PCGS. This Premium Gem example displays frosty yellow-gold luster and sharp devices, offering strong visual appeal. Suitable for type representation.
From The Twelve Oaks Collection, Part II NGC ID# 7JW8, PCGS# 7858

- 4034 1906 MS66 NGC.** The obverse of this Premium Gem displays frosty lemon-gold luster, while the reverse has prooflike mirroring in the fields. A sharp strike and exceptional preservation are common to both sides, delivering excellent visual appeal.
From The Twelve Oaks Collection, Part II NGC ID# 7JW8, PCGS# 7858

- 4035 1906 MS66 NGC.** This is a sharply struck coin, although incredibly faint parallel die striations are seen in the planchet when viewed with a loupe. The fields are satiny and exhibit spiraling luster. There are no severe abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 7JW8, PCGS# 7858

- 4036 1907 MS66 NGC.** This is a well-struck final-year Liberty Head quarter eagle with a degree of surface quality that is ideal for type representation. There are no mentionable abrasions, and eye appeal is outstanding.
From The Twelve Oaks Collection, Part II NGC ID# 2688, PCGS# 7859

- 4037 1907 MS66 NGC.** Satiny yellow-gold luster is largely undisturbed as it illuminates the fields and sharp devices of this Premium Gem final-year Liberty Head quarter eagle. The availability of this date in high grade makes it popular among type collectors.
From The Twelve Oaks Collection, Part II NGC ID# 2688, PCGS# 7859

- 4038 1907 MS66 NGC.** A sharp strike and frosty yellow-gold luster deliver excellent eye appeal on this Premium Gem 1907 Liberty quarter eagle. A loupe reveals faint die polishing lines in the fields, mainly on the reverse. An ideal piece for type representation.
From The Twelve Oaks Collection, Part II NGC ID# 2688, PCGS# 7859

**1907 Liberty Quarter Eagle, MS67
Only One Numerically Finer at PCGS**

- 4039 1907 MS67 PCGS.** Final year of the long-lived Coronet series of quarter eagles. This is a splendid type coin that is devoid of any mentionable or noticeable abrasions. The mint luster is bright and frosted. The impression is full at the peripheries but slightly soft in the centers, the only flaw we see on this magnificent coin. Population: 90 in 67 (4 in 67+), 1 finer (8/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 3255. NGC ID# 2688, PCGS# 7859

INDIAN QUARTER EAGLES

- 4040 1908 MS65 PCGS.** The eagle's wing shows the diagnostic softness from incomplete engraving of the design, although the strike is razor-sharp. This Gem first-year Indian quarter eagle displays softly frosted green-gold luster without significant abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 288Y, PCGS# 7939

- 4041 1909 MS63+ NGC.** A hint of bluish-green toning appears on the satiny yellow surfaces of this Select Mint State piece. Both sides display full cartwheel luster and excellent design definition.
From The Twelve Oaks Collection, Part II NGC ID# 288Z, PCGS# 7940

- 4042 1909 MS63 PCGS. CAC.** This CAC-approved type coin is sharply struck throughout, and the satiny green-gold surfaces show minimal abrasions for the grade. A quite appealing mid-level Uncirculated example of this collectible issue. NGC ID# 288Z, PCGS# 7940

- 4043 1909 MS64 PCGS.** Sharp design elements complement softly frosted yellow-gold mint luster that is free of significant abrasions. A few stray lines in the fields are all that preclude a full Gem grade. Eye-appealing and original.
From The Twelve Oaks Collection, Part II NGC ID# 288Z, PCGS# 7940

- 4044 1909 MS64 NGC.** Satiny green-gold luster, characteristic of this issue, illuminates the surfaces. The design elements are sharply struck, and visual appeal is excellent. A few small marks behind the eagle's head are all that limit the grade.
From The Twelve Oaks Collection, Part II NGC ID# 288Z, PCGS# 7940

- 4045 1909 MS64+ PCGS. CAC.** This delightful Choice Mint State 1909 Indian quarter eagle features a bold strike and frosty yellow luster. Microscopic copper toning spots attest to its originality. NGC ID# 288Z, PCGS# 7940

- 4046 1910 MS64 NGC.** Frosty wheat-gold luster gives this Choice 1910 Indian quarter eagle pleasing visual appeal, while a few faint alloy discolorations attest to the originality of the surfaces. The strike is sharp, and there are no significant abrasions. NGC ID# 2892, PCGS# 7941

- 4047 1910 MS64 NGC.** Particularly well-preserved for the grade, this near-Gem 1910 Indian quarter eagle displays satiny yellow-gold luster and well-struck design elements. The fields are especially clean and attractive. Ideal for type purposes.
From The Twelve Oaks Collection, Part II NGC ID# 2892, PCGS# 7941

- 4048 1910 MS64 NGC.** Sharp devices and original, softly frosted yellow-gold luster gives this Choice 1910 quarter eagle excellent eye appeal. A few trivial field grazes determine the grade but are unseen by the naked eye. A small rim bump is detected at 8 o'clock on the reverse.
From The Twelve Oaks Collection, Part II NGC ID# 2892, PCGS# 7941

- 4049 1910 MS64+ NGC.** Clean fields and luminous yellow-gold luster gives this high-end near-Gem the eye appeal that demands a Plus designation. The devices are well-struck, and the type coin appeal is abundant.
From The Twelve Oaks Collection, Part II NGC ID# 2892, PCGS# 7941

- 4050 1910 MS64+ PCGS. CAC.** Glimmering luster issues from wonderfully preserved rose-gold surfaces. The hair knot and shoulder tip display strong detail, and the fields are inarguably high-end for the technical assessment. Eye appeal is fantastic. NGC ID# 2892, PCGS# 7941

1911 Indian Quarter Eagle, MS65

- 4051 1911 MS65 NGC.** Despite the ample mintage of 704,000 pieces, the 1911 Indian quarter eagle is scarce in MS65 condition, and very rare in finer grades. This well-preserved orange-gold specimen exhibits sharply detailed design elements and vibrant mint luster throughout. NGC has graded seven numerically finer examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KR6, PCGS# 7942

- 4052 1911-D — Improperly Cleaned — NGC Details. AU.** Strong D. This piece is razor-sharp and satiny with bright yellow-gold luster. There are no major abrasions, although light hairlines appear beneath a loupe and confirm a light cleaning. An affordable but still-pleasing example of this key date.
From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, AU55
Key to the Series, Strong D**

- 4053 1911-D AU55 PCGS.** Strong D. The Denver Mint is responsible for a number of 20th century key dates, including the 1914-D Lincoln cent, 1916-D Mercury dime, and 1937-D Three-Legged nickel, but perhaps the most famous among them is the 1911-D quarter eagle. This issue claims the lowest mintage in the series — only 55,680 coins. Appealing yellow and reddish-gold color adorns this lightly circulated two and a half. The strike is bold with softness confined to the eagle's shoulder. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D Mintmark**

- 4054 1911-D AU58 NGC.** The mintmark on this 1911-D is bold enough to see at arm's length. The rest of the motifs are sharp as well, with nearly full feather definition remaining on the headdress and the eagle's shoulder. Scattered tiny marks and field chatter determine the near-Mint grade, visible with a glass. Attractive straw-gold color retains much soft mint luster.
From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D, Nice Color and Surfaces**

- 4055 1911-D AU58 NGC.** A hint of rub on the eagle's shoulder and on the high points of the headdress account for the near-Mint State grade, yet the fields are notably free of marks and the overall surface quality is excellent. Struck with the Strong D dies, the mintmark is bold. Mint luster remains to enhance the attractive, medium-gold color of this key series issue.
From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, Unc Details
Series Cornerstone**

- 4056 1911-D — Improperly Cleaned — NGC Details. Unc.** Strong D. The 1911-D Indian quarter eagle is justly famous for its low mintage of 55,600 pieces. This attractive specimen offers sharply detailed design elements and pleasing orange-gold surfaces that are remarkably free of large or distracting surface marks. Glimmers of original mint luster are evident throughout, despite the noted cleaning.
From The Twelve Oaks Collection, Part II NGC ID# 7KR7, PCGS# 7943

- 4057 1912 MS63 PCGS.** Frosty, original surfaces display luminous orange-gold luster on this Select 1912 Indian quarter eagle. The design elements are sharp throughout, and the only mentionable abrasions are a few marks in the reverse field behind the eagle. NGC ID# 7KR8, PCGS# 7944

- 4058 1912 MS64 PCGS.** A remarkably attractive example for the Choice grade level, this green-gold 1912 Indian quarter eagle displays sharp motifs and largely unabraded fields. Only a few stray lines on the reverse prevent Gem classification. Higher-grade coins are elusive and pricey.
From The Twelve Oaks Collection, Part II NGC ID# 7KR8, PCGS# 7944

- 4059 1912 MS64 NGC.** This is a well-struck, satiny near-Gem with wheat-gold patina and only a few small ticks that limit the grade. The 1912 is an available type-coin issue in this grade but becomes scarce at the Gem level.
From The Twelve Oaks Collection, Part II NGC ID# 7KR8, PCGS# 7944

**1912 Quarter Eagle, MS64+
Exceptional Quality**

- 4060 1912 MS64+ PCGS. CAC.** The 1912 is readily available in lower grades thanks to a generous mintage of 616,000 coins, but high-end Mint State examples are among the most challenging coins to locate in the Indian Head series. Vibrant luster and rose-gold color draw the eye, while crisp strike characteristics hold the attention of the viewer. A small mark over the eagle's head is the only one worthy of mention. Seldom seen finer. NGC ID# 7KR8, PCGS# 7944

1912 Two and a Half, MS64+

4061 1912 MS64+ PCGS. CAC. 30th Anniversary Green Label Holder. A charming caramel-gold near-Gem. The strike is sharp save for inexactness near the tips of the lower headdress feathers. Marks are limited to unobtrusive contact on the upper right field. As nice as can be secured without paying a five-figure price. NGC ID# 7KR8, PCGS# 7944

4062 1914 MS62 PCGS. Some scattered, minor contact marks define the grade of this attractive MS62 Indian quarter eagle. The design elements are well-detailed, and the orange-gold surfaces retain almost all of their original mint luster. NGC ID# 7KRA, PCGS# 7946

4063 1914 MS63 NGC. A brilliant light yellow example of this low-mintage date, this Select Mint State piece survives from a production of only 240,000 pieces. This one is nicely detailed and attractive. NGC ID# 7KRA, PCGS# 7946

4064 1914 MS63 NGC. Frosty, original orange-gold luster yields hints of rose and olive-green throughout the fields and recesses. A few stray surface marks determine the grade, and slight strike weakness is seen on the lower headdress feathers.
From The Twelve Oaks Collection, Part II NGC ID# 7KRA, PCGS# 7946

4065 1914 MS63 NGC. Fresh, frosty luster gives this Select 1914 Indian quarter eagle excellent eye appeal for the grade, while the fields are devoid of bothersome abrasions. The strike is well-executed. The elusiveness of this issue in higher grades makes the present coin highly appealing to the budget-conscious enthusiast.
From The Twelve Oaks Collection, Part II NGC ID# 7KRA, PCGS# 7946

4066 1914 MS63 NGC. The 1914 is a better date in high grade, widely sought-after. This collectible MS63 example displays bold devices and satiny straw-gold luster. Light field grazes limit the grade but hardly reduce the visual appeal to the naked eye.
From The Twelve Oaks Collection, Part II NGC ID# 7KRA, PCGS# 7946

1914 Two and a Half, Sharp MS64
Great Eye Appeal

4067 1914 MS64 NGC. Aside from the 1911-D, the 1914 quarter eagle claims the low-mintage honors among the other Indian Head quarter eagles. Just 240,000 pieces were struck. This is a Choice Uncirculated example, softly lustrous with a razor-sharp strike and only a few tiny marks. Less granular in surface texture than most 1914s, the eye appeal is strong with distinctive straw-gold color and rose overtones. NGC reports just 49 numerically finer examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRA, PCGS# 7946

1914 Indian Quarter Eagle, MS64+
Seldom Encountered in High Grade

4068 1914 MS64+ NGC. A smallish mintage of 240,000 pieces accounts for the elusive nature of the 1914 Indian quarter eagle in high grade. This Plus-graded Choice example exhibits sharply detailed design elements and vibrant mint luster on both sides, with lightly marked orange-gold surfaces and excellent eye appeal. NGC has graded 49 numerically finer examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRA, PCGS# 7946

4069 1914-D MS64 NGC. This attractive Choice example displays sharply detailed design elements and vibrant mint luster throughout. A few minor contact marks, mostly in the reverse field, determine the grade. NGC has graded 46 numerically finer examples (8/16). NGC ID# 2899, PCGS# 7947

4070 1914-D MS64 PCGS. A delightful Choice specimen of one of the scarcer issues in the Indian quarter eagle series, this sharply detailed example displays especially vibrant mint luster and well-preserved yellow-gold surfaces. PCGS has graded 51 numerically finer examples (8/16). NGC ID# 2899, PCGS# 7947

4071 1914-D MS64 PCGS. Just one grade point finer, and this Denver issue is among the top three key dates in the series. The present near-Gem 1914-D quarter eagle displays well-struck design elements and satiny wheat-gold luster. There are no obtrusive abrasions. PCGS has seen 51 numerically finer submissions (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 2899, PCGS# 7947

4072 1914-D MS64 NGC. The 1914-D Indian quarter eagle is an elusive issue in grades above MS64. This attractive Choice specimen exhibits sharply detailed design elements and lustrous, lightly marked orange-gold surfaces. NGC has graded 46 numerically finer examples (8/16). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, Vibrant MS64
Seldom Found Finer

4073 1914-D MS64 PCGS. CAC. The 1914-D takes third place behind the 1911-D and 1914 on the list of the most challenging dates in the series. Mint luster is incredibly vibrant throughout this Choice two and a half dollar gold piece, delivering eye-catching visual quality. The mintmark is clear, though die buckling occurs around the borders. A loupe reveals a handful of inconsequential flecks. PCGS shows 51 finer submissions (8/16). NGC ID# 2899, PCGS# 7947

- 4074 1915 MS64+ NGC.** This high-end Choice 1915 quarter eagle displays luminous yellow-gold luster and softly frosted surfaces. The strike is well-executed, and there are no bothersome abrasions. A suitable budget-friendly date or type representative.
From The Twelve Oaks Collection, Part II NGC ID# 7KRC, PCGS# 7948
- 4075 1925-D MS65 PCGS.** 30th Anniversary Green Label Holder. Incredibly frosty, eye-catching mint luster glows in varying shades of orange, tangerine, mint, and peach-yellow on this Gem Indian quarter eagle type coin. Other than some minor weakness on the lower headdress feathers, there are no distractions. PCGS lists only 36 numerically finer representatives (8/16). NGC ID# 7KRD, PCGS# 7949
- 4076 1925-D MS65 PCGS.** 30th Anniversary Green Label Holder. Frosty peach-gold luster produces deeper orange hues in the fields of this Gem 1925-D type coin. The lower headdress feathers show strike weakness, as is often seen on this issue. The surfaces are devoid of mentionable abrasions. There are 36 finer submissions at PCGS (8/16). NGC ID# 7KRD, PCGS# 7949
- 4077 1925-D MS65 PCGS.** Impressively frosty, original mint bloom gives this Gem Indian quarter eagle type coin impeccable visual appeal. The strike is sharp, and neither side displays noticeable abrasions. The availability of the 1925-D in MS65 and its usually strong visual appeal make it a favorite date for the collector seeking a single series type coin. PCGS lists 36 numerically finer submissions (8/16). NGC ID# 7KRD, PCGS# 7949
- 4078 1925-D MS65 PCGS.** The frosty golden luster of this Gem 1925-D quarter eagle just glows from every angle, illuminating well-struck motifs and particularly clean fields. Hints of peach and tangerine color add to the eye appeal. It is difficult to imagine a visually finer example in this grade. PCGS lists only 36 numerically finer representatives (8/16). NGC ID# 7KRD, PCGS# 7949
- 4079 1925-D MS65 PCGS.** Splendid original mint luster gives this Gem 1925-D glowing yellow-gold surfaces. The frosty fields show only a few scant marks, none of which are obtrusive. The lower headdress feathers are slightly soft, but the strike is otherwise well-executed.
From The Twelve Oaks Collection, Part II NGC ID# 7KRD, PCGS# 7949
- 4080 1925-D MS65 NGC.** Original, frosty mint luster delivers glowing fields on this Gem 1925-D quarter eagle. Tangerine and pale green-gold hues adorn the fields and highlight the recessed devices. The strike is sharp. Fewer than 100 finer submissions are recorded by NGC and PCGS combined (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRD, PCGS# 7949
- 4081 1925-D MS65 NGC.** A sharp strike and luminous yellow-gold luster deliver excellent eye appeal on this Gem 1925-D example. The fields show only a few insignificant grazes. The 1925-D is a favorite type-coin issue, although pieces grading finer than the present MS65 example are scarce.
From The Twelve Oaks Collection, Part II NGC ID# 7KRD, PCGS# 7949
- 4082 1925-D MS65 NGC.** Peach, wheat, and mint-gold hues adorn the frosty, original surfaces of this Gem 1925-D quarter eagle. The strike is sharp, and the visual appeal is plenty strong enough for type representation. NGC lists 56 numerically finer submissions (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRD, PCGS# 7949
- 4083 1926 MS65 NGC.** Frosty wheat-gold mint luster adorns this Gem 1926 quarter eagle, an outstanding type coin. Examples are available in this grade but seldom seen finer. This piece displays well-struck motifs and minimal abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 7KRE, PCGS# 7950
- 4084 1926 MS65 NGC.** Bright yellow-gold luster illuminates satiny surfaces on this Gem 1926 quarter eagle. The strike is sharp, and a small reed mark near star 4 is the only mentionable abrasion. A small coppery alloy spot is seen on the chief's neck, and a couple of others appear on the lower eagle. NGC lists 22 finer examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRE, PCGS# 7950
- 4085 1926 MS65 NGC.** Frosty, mint-fresh luster shimmers over minimally marked surfaces on this Gem 1926 quarter eagle. The headdress and eagle are sharply defined, and eye appeal is outstanding. NGC lists only 22 numerically finer representatives (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRE, PCGS# 7950
- 4086 1926 MS65 NGC.** An impressive Gem, this Indian quarter eagle exhibits fully brilliant and frosty yellow luster with sharp design definition. A few minuscule marks prevent a higher grade. NGC has only certified 22 numerically finer examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 7KRE, PCGS# 7950
- 4087 1927 MS65 PCGS.** 30th Anniversary Green Label Holder. Rich orange-red toning encompasses this satiny and well struck Gem. Glimpses of khaki-green are also prevalent. The fields exhibit a few delicate marks, but the eye appeal is undeniable. NGC ID# BUTL, PCGS# 7951
- 4088 1927 MS65 NGC.** Particularly frosty, luminous mint luster adorns the original yellow-gold surfaces of this Gem example, illuminating well-struck design elements. There are no bothersome abrasions, only a few minor grazes. NGC has seen just 10 numerically finer submissions (8/16).
From The Twelve Oaks Collection, Part II NGC ID# BUTL, PCGS# 7951
- 4089 1927 MS65 NGC.** Frosty, original wheat-gold luster displays a couple of faint alloy spots on the upper headdress, while the fields are devoid of all but the most minimal abrasions. The strike is well-executed, and visual appeal is pleasing. NGC reports 10 MS66 coins finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# BUTL, PCGS# 7951
- 4090 1927 MS65 NGC.** The luster on this Gem 1927 quarter eagle is phenomenal, especially for an Indian Head coin. Glowing lemon-yellow and golden hues adorn the minimally marked fields, shimmering when rotated beneath a light. Only 10 coins are finer at NGC, all in MS66 (8/16).
From The Twelve Oaks Collection, Part II NGC ID# BUTL, PCGS# 7951
- 4091 1928 MS65 NGC.** A bold strike and brilliant light yellow surfaces characterize this Gem Indian quarter eagle. An important piece that is rarely exceeded with just 19 numerically finer NGC certified examples (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 289E, PCGS# 7952

THREE DOLLAR GOLD PIECES

- 4092 1854 AU58 NGC.** Substantial field luster remains on this near-Mint 1854 three dollar gold piece. The strike is razor-sharp, and only slight high-point friction appears over the motifs. There are no severe abrasions. An outstanding first-year type coin.
From The Twelve Oaks Collection, Part II NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar, XF45
Colorful and Better Struck Than Usual

- 4093 1854-O XF45 NGC. Variety 1.** Struck from unlapped dies, and scarcer as such. There were 24,000 pieces struck of the 1854-O, and survivors are much easier to acquire than the other southern mint three dollar struck this year, the 1854-D (whose mintage is but a fraction of that of the 1854-O). The otherwise yellow-gold surfaces display accents of reddish patina, especially around the outer devices. Softly struck over the high points, as always, but showing no obvious or detracting abrasions. NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar Gold, AU50
Scarce in Almost Uncirculated Grades

- 4094 1854-O AU50 NGC. Variety 2.** Struck from lapped dies, as usually seen, with slight loss of details on the lower reverse devices. While there are an estimated 400-500+ pieces believed extant, AU and finer pieces are decidedly rare. Only 48-56 AU pieces are believed known. This is a bright piece with the usual small abrasions scattered over each side, but only a couple of medium-sized marks present. NGC ID# 25M5, PCGS# 7971
- 4095 1856 AU53 NGC.** Medium yellow-gold coloration characterizes each side of this AU 1856 three dollar type coin, while tinges of original luster are tucked along the protected edges of the devices. The wreath bow is weak as usual, although the remaining design elements show adequate sharpness despite light high-point wear. NGC ID# 25M8, PCGS# 7974
- 4096 1856 AU55 NGC.** Although scarcer in high grade than more famous common dates such as the 1854, 1874, and 1878, the 1856 three dollar gold is yet collectible as a type coin, boasting one of the more "substantial" mintages of the series (26,010 pieces). The present Choice AU example is well-struck and delightfully retains about half of its original mint luster. Medium yellow-gold coloration appears throughout the lightly worn areas. NGC ID# 25M8, PCGS# 7974
- 4097 1859 AU55 PCGS.** The rich yellow-gold surfaces of this Choice AU 1859 three exhibit distinct orange toning though the obverse legend. The fields are faintly reflective with minimal surface marks. NGC ID# 7K5K, PCGS# 7979

- 4098 1874 AU58 NGC.** Hints of frosty orange-gold luster emerge from the protected regions of the fields on this near-Mint type coin, complementing medium olive-gold patina over the lightly worn areas. The strike is above average, and there are no significant abrasions. NGC ID# 7KDE, PCGS# 7998
- 4099 1878 AU58 NGC.** This is a favorite three dollar gold issue for type purposes. The Mint struck 82,304 pieces in 1878, most of which survive across a variety of grade levels. Light yellow-gold color dominates this AU58 representative with complementary hues of peach and lavender. Frosty and well-detailed. NGC ID# 25MZ, PCGS# 8000
- 4100 1878 AU58 PCGS.** Shimmering field luster gives this near-Mint 1878 three dollar gold piece exceptional eye appeal for the grade, while a brush of friction over the high points of the devices precludes a Mint State designation. The yellow-gold surfaces are free of distractions.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000
- 4101 1878 AU58 PCGS.** A brush of high-point friction determines the grade, although ample luster remains in the protected regions. This shimmering near-Mint type coin exhibits typical weakness on the wreath bowknot but is well-struck elsewhere.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000
- 4102 1878 AU58 NGC.** A favorite common date, the 1878 three dollar gold is usually available in any grade desired and with strong eye appeal. This near-Mint coin is delightfully lustrous in the fields and has rich, original orange-gold coloration without distracting abrasions. The wreath bow is better-defined than usual. NGC ID# 25MZ, PCGS# 8000
- 4103 1878 MS61 PCGS.** Lustrous fields complement orange-gold patina on this Mint State 1878 three dollar gold piece. The strike is above-average for the type, and only light handling marks prevent a finer numeric designation.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000
- 4104 1878 MS62 NGC.** Frosty yellow-gold luster gives this Mint State 1878 three dollar gold piece excellent eye appeal for the MS62 grade level. Scattered light grazes prevent a finer numeric designation but are trivial. The bowknot on the reverse is the only point of notable strike weakness.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000
- 4105 1878 MS62 NGC.** Luminous straw-gold fields give this lower-end Mint State type coin moderate eye appeal, illuminating design elements that show weakness only on the wreath bowknot. There are no significant abrasions, although scattered lines serve to limit the grade.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000
- 4106 1878 MS62 NGC.** A few scattered abrasions and hairlines determine the grade of this 1878 three dollar gold piece, although the appeal is pleasing to the naked eye. Shimmering yellow-gold luster emerges from the fields. The wreath bowknot is weak as usual, but the remainder of the design is well-defined.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, Attractive MS63
Vibrant Gold Coloration**

- 4107 1878 MS63 NGC.** Minted in large quantity, the 1878 threes never found the public eager for gold redemptions in exchange for paper currency as the Mint expected. Coins languished — unwanted and Uncirculated — in teller drawers and bank vaults. This Select Uncirculated example appears as fresh as the day it left the Mint. A few faint grazes and tiny marks account for the grade, yet the eye appeal exceeds expectations with vibrant sun-gold coloration and a sharp strike.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS63
Shimmering Luster, Sharp Strike**

- 4108 1878 MS63 NGC.** An ideal representative of the three dollar type — coruscated, minimally marked, and sharply struck with reddish-orange and lilac highlights over the brightly lustrous rich-gold coloration. A Select Uncirculated example, the sole limiting factor is a hair-thin pinscratch from E of AMERICA to the headband. The 8s in the date are recut inside the top loops, and die doubling shows at ARS of DOLLARS.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS63
Glittering, Minimally Marked Type Coin**

- 4109 1878 MS63 NGC.** Lustrous, wheat-gold color dominates both sides of this Select Uncirculated 1878. The large 82,304-piece mintage never circulated to any great extent, and many Mint State pieces survive. The Bowers reference estimates 8,000 to 10,000 Uncirculated examples are known. Few survivors will compare with the remarkably unabraded surfaces and brilliant mint luster of this Select coin. Only some high point incompleteness of strike is noted on Liberty's hair and on the wreath.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS63
Soft, Frosted Mint Luster**

- 4110 1878 MS63 NGC.** The 1878 is the most frequently seen of all three dollar gold pieces. It is also the best-produced, making it the logical choice for type collectors. This example displays soft, frosted mint luster with light reddish patina and minimal abrasions. The strike is above-average with the only obvious softness on the bowknot on the lower reverse, almost universally found so.
From The Twelve Oaks Collection, Part II NGC ID# 25MZ, PCGS# 8000

CLASSIC HALF EAGLE

**1836 Classic Head Five, AU58+
Second Head, Large Date, McCloskey 2-B**

- 4111 1836 AU58+ PCGS.** Breen-6509, McCloskey 2-B, R.4. Second Head, Large Date. Just a whisper from full Mint State, this high-end About Uncirculated example displays all the benefits of the top of its grade level with none of the distractions often found on lower-end Uncirculated coins. Pleasing yellow-gold patina shows a greenish tinge and nearly full mint luster remains. The strike is far sharper than normal, worth a strong premium for that factor alone. This coin is the sole AU58 with the Plus designation at PCGS (8/16). NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

- 4112 1843-D Small D —Improperly Cleaned — NGC Details.** XF. Variety 9-F. Much scarcer than the usually seen Medium D variant, and one of only two varieties known for the year. The mintmark size gives an element of scarcity and collectibility that is otherwise lacking in this type coin D-mint five dollar. The surfaces are reddish-tinted yellow-gold and there are numerous small to medium-sized abrasions scattered over each side. Slightly overbright from cleaning.
From The Twelve Oaks Collection, Part II

- 4113 1844-D XF40 NGC.** Variety 11-G. The 1844-D is a collectible half eagle issue from the Dahlonega Mint, suitable for the collector seeking a single D-mint representative from this period. The present coin shows bold detail for the grade with original green-gold coloration that allows hints of luster in the fields. There are a few scattered grazes but no singular abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 25T9, PCGS# 8221

4114 1845-D VF30 PCGS. Variety 13-H. Here is a pleasing midgrade Dahlonga half eagle, suitable for type or date purposes. The 1845-D is among the more plentiful D-mint fives from this period. The present example shows light chatter and grade-consistent wear. Each side exhibits pleasing olive-gold patina. NGC ID# 25TC, PCGS# 8224

4115 1845-D XF45 NGC. Variety 13-H. The 1845-D is just about as plentiful as the 1844-D overall, at least within the context of Dahlonga half eagles. Attractive examples are elusive. This Choice XF coin displays bold detail and bright yellow-gold surfaces with moderate chatter.

From The Twelve Oaks Collection, Part II NGC ID# 25TC, PCGS# 8224

4116 1845-D — Improperly Cleaned — NGC Details. AU. Variety 13-H. The mintage of 90,629 pieces is a good indicator (in this case) for the availability of the 1845-D five dollar. This example is just a bit too bright to be original, but isolated pockets of mint luster can still be seen around some of the devices. Sharply struck throughout. Moderately abraded.

From The Twelve Oaks Collection, Part II NGC ID# 25TC, PCGS# 8224

1846-D/D Five Dollar, AU53 Repunched D, Guide Book Variety

4117 1846-D/D AU53 NGC. Variety 17-J. The 1 in the date is high. The mintmark was initially punched too high and too far right, and the second impressed was better centered. Each side is mostly light yellow-gold with occasional olive accents and clear signs of circulation in the form of minor blending and myriad marks. Liberty's portrait and the eagle are well-struck.

From The Twelve Oaks Collection, Part II NGC ID# 25TH, PCGS# 8229

1846-D/D Half Eagle, AU53 Repunched Mintmark, Strongly Struck

4118 1846-D/D AU53 NGC. Variety 16-J. The 1 in the date is low. The 1846-D/D is more available than its Normal Mintmark counterpart. Winter estimates that 200 to 250 examples of the former survive compared to 175 to 225 of the latter. To be sure, both issues are challenging in any grade. This AU53 Georgia half eagle is bright yellow-gold with a hint of semiprooflikeness in the fields. Each side offers strongly struck motifs and a surprising degree of flashy luster.

From The Twelve Oaks Collection, Part II NGC ID# 25TH, PCGS# 8229

4119 1850-C Weak C AU53 NGC. Variety 4. The 1850-C half eagle is elusive in the AU grade range. The weak mintmark on this piece is diagnostic of the variety and is not a strike issue. Liberty's portrait and the eagle on this piece are sharp. Each side exhibits scattered surface chatter, as usual for the issue, with pleasing yellow-gold coloration.

From The Twelve Oaks Collection, Part II NGC ID# 25U2, PCGS# 98244 Base PCGS# 8244

4120 1851-D — Filed Rims — Genuine PCGS. AU Details. Variety 30-V. A rare die marriage that can be identified at arm's length by the date placement. The first 1 touches the bust and the second 1 is distant from the bust, unlike the other three 1851-D varieties. This lemon-gold Dahlonga five appears unimpaired upon first glance, but close inspection reveals rim irregularities near the date, AMERICA, and stars 5 to 8.

4121 1852 MS61 PCGS. No Motto half eagles are universally scarce-to-rare in Mint State, although the 1852 is among the few that can be acquired for type collections with limited searching and a budgeted pocket book. This coin has original olive-gold coloration with flashes of orange-gold luster in the fields. The strike is sharp, and scattered abrasions determine the grade. Ideal for the collector seeking an old-time look on a Mint State type coin. NGC ID# 2Y7R, PCGS# 8250

4122 1853-D Large D — Improperly Cleaned — NGC Details. AU. Variety 35-X. The 1853-D is the most frequently encountered and most frequently used for type among all D-mint fives. The 35-X variety, however, is scarce. The surfaces are just a bit brighter than one might wish for, with otherwise even reddish-gold coloration. Two long die cracks on the reverse give the appearance of pie-shaped wedges. A shallow scratch is also seen on the lower portion of the reverse.

From The Twelve Oaks Collection, Part II NGC ID# 25UF, PCGS# 8255

1854-D Half Eagle, AU55 Weak D, CAC-Endorsed

4123 1854-D Weak D AU55 NGC. CAC. Variety 37-DD. The recently discovered Weak D variety is very scarce, as is any example of the 1854-D half eagle in Choice AU condition with original orange-gold surfaces. Strike detail is typical for the issue with bold stars and well-defined centers. The borders are far stronger than usual. Overall, this a lovely representative that should draw the attention of those who appreciate originality. Census (Weak D): 3 in 55, 5 finer. CAC: 2 in 55, 1 finer (8/16). NGC ID# 25UL, PCGS# 98258 Base PCGS# 8258

4124 1855-D Large D — Reverse Scratched — NGC Details. AU. Variety 38-CC. Scarce and underappreciated, only 125-150 pieces are believed known today in all grades, the vast majority of 1855-D fives survive in the VF-XF grade range. The surfaces still retain significant traces of mint luster around the devices. As always, the centers are weakly struck. Marred by an X that was scratched in the field above and to the right of the eagle's head.

From The Twelve Oaks Collection, Part II NGC ID# 25US, PCGS# 8263

4125 1857-S AU50 PCGS. A richly detailed yellow-gold example of this early and lower mintage San Francisco issue. The strike is good, and the margins and motifs offer pockets of bright luster. Field abrasions are distributed. Certified in a green label holder. NGC ID# CBET, PCGS# 8275

4126 1858-C — Improperly Cleaned — NGC Details. AU. Variety 1. This caramel-gold Charlotte No Motto five is hairlined but displays minimal wear. A retained lamination near the first two stars is of mint origin. The strike is fairly sharp for the facility, though the hairbun is incompletely impressed. NGC ID# CLAK, PCGS# 8277

4127 1859-C XF45 NGC. Variety 2. A luminous apricot-gold example with comparatively few abrasions. All 1859-C fives have indistinct definition on the eagle, due to an improperly annealed reverse die. Variety 2 closely resembles Variety 1, but has a diagonal die line below the 5 in the date, and the 8 has large openings, among other minor differences. NGC ID# 25VC, PCGS# 8281

4128 1859-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 44-HH. Only 10,366 pieces were struck of the 1859-D and yet it is more frequently encountered, especially in higher grades, than one might expect. This is a well-defined example with bright yellow-gold surfaces that show minimal evidence of cleaning. There are, however, two surface defects that need to be noted. One appears to be a planchet lamination that is placed diagonally below the ear of Liberty; the other is a scrape on the reverse through the olive leaves below the I in UNITED.
From The Twelve Oaks Collection, Part II NGC ID# 25VD, PCGS# 8282

1860-D Liberty Half Eagle, XF45 Low-Mintage Branch Mint Issue

4129 1860-D Medium D, Variety 46-GG, XF45 NGC. With a surviving population of 225-275 examples, the 1860-D Liberty half eagle is somewhat more available than its low mintage of 14,635 pieces would suggest, but still a scarce issue in all grades. This Choice XF specimen shows some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces show traces of original mint luster.
From The Twelve Oaks Collection, Part II NGC ID# 25VH, PCGS# 8286

4130 1861 AU58 PCGS. CAC. This CAC-endorsed near-Mint 1861 half eagle shows just about as much luster in the fields as many lower-end Uncirculated pieces. The strike is sharp, and the surfaces show original olive-gold coloration. Moderate chatter on each side is not unusual for the grade. Suitable for type purposes. NGC ID# 25VK, PCGS# 8288

4131 1861 MS61 PCGS. Among No Motto dates, the 1861 half eagle is one of the most available in Mint State, making it a popular type coin. This lower-end Uncirculated piece displays sharp detail and frosty yellow-gold luster. Moderate surface chatter on each side accounts for the grade. NGC ID# 25VK, PCGS# 8288

1861-C Half Eagle, AU Details Popular, Final-Year Issue From Charlotte

4132 1861-C — Improperly Cleaned — NGC Details. AU. Variety 1. Always of interest to collectors because of its final-year status and because some of these pieces were struck under Confederate control (but it is unclear which ones). The 1861-C is also a low-mintage issue. Curiously, it is better struck than the previous two dates from this mint. This is a well-defined example with brighter-than-usual surfaces. Very few of the normally heavy marks are seen on either side. A small smooth area is seen below the M in AMERICA.
From The Twelve Oaks Collection, Part II NGC ID# 25VL, PCGS# 8289

4133 1868 AU50 NGC. A few scattered but grade-consistent marks appear on the surfaces of this rare gold issue, surviving from a circulation-strike mintage of just 5,700 coins. Delicate peripheral orange toning accents the straw-gold surfaces. Census: 5 in 50, 31 finer (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 25W5, PCGS# 8315

4134 1873 Closed 3 MS62 PCGS. CAC. This orange-gold scarcer date representative is well-struck aside from blending on the eagle's neck plumage. The obverse has moderate field marks. Original luster envelops each side. Housed in a green label holder. Population: 20 in 62, 19 finer. CAC: 3 in 62, 4 finer (8/16).
Ex: ANA Signature (Heritage, 10/2012), lot 5914. NGC ID# 25WK, PCGS# 8329

4135 1874-CC — Scratches — NGC Details. XF. Variety 1-C. Only 125-135 examples are believed extant out of the mintage of 21,198 pieces. The surfaces seen here are bright yellow-gold and there is notable softness in the center of the obverse. However, significant mint luster remains. Several scratches are located to the right of the eagle's (facing) wing.
From The Twelve Oaks Collection, Part II NGC ID# 25WP, PCGS# 8334

1876-CC Liberty Half Eagle, AU Details Elusive, Low-Mintage Issue

4136 1876-CC — Reverse Improperly Cleaned — NGC Details. AU. Variety 1-A. Among all half eagles of the Carson City Mint the 1876-CC claims the lowest mintage, at a meager 6,887 pieces. The surviving population numbers 80-90 examples in all grades. This coin exhibits AU sharpness on the design elements and the pleasing orange-gold surfaces are lightly abraded, but the original mint luster on the reverse is dimmed, due to the noted cleaning.
From The Twelve Oaks Collection, Part II NGC ID# B5SN, PCGS# 8340

- 4137 1880-S MS64+ PCGS. CAC.** Scarce in MS64, the 1880-S Liberty half eagle is very rare in finer grades. This sharply detailed Plus-graded Choice example offers well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded two numerically finer examples (8/16). NGC ID# 25XC, PCGS# 8353

**1888 Five Dollar Gold, MS64
Underappreciated Series Rarity**

- 4138 1888 MS64 PCGS.** Both the 1888 and 1889 Philadelphia half eagles are overlooked scarcities in the series, joining the 1890 with low mintages and very few coins in Choice Uncirculated or finer conditions. While a few small marks are scattered across the surfaces of this near-Gem 1888, there are no heavy marks as normally encountered for the issue. Original honey-gold surfaces show rich mint frost with strong underlying luster. The strike is sharp and the natural eye appeal is extraordinary. Population: 3 in 64, 1 finer (8/16). NGC ID# 25XX, PCGS# 8372

- 4139 1888-S MS62 PCGS.** From a mintage of 293,900 pieces, the 1888-S Liberty half eagle is seldom encountered in Mint State grades. This MS62 example offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. Population: 32 in 62, 8 finer (8/16). NGC ID# B2B6, PCGS# 8373

**1891-CC Half Eagle, MS62
Ideal Type Selection**

- 4140 1891-CC MS62 NGC. CAC. Variety 1-A.** The 1891-CC is the most-available of the Carson City half eagles and one of the best-produced, too, providing type collectors an ideal representative the famous branch mint as well as a suitable example of the denomination. This coin is frosty and lustrous with relatively few abrasions and marks for the grade. The strike is consistently sharp across the attractive, rich-gold surfaces. NGC ID# 25Y5, PCGS# 8378

- 4141 1893 MS62 Prooflike NGC.** A sharply struck pumpkin-gold example with reflective fields and distributed moderate abrasions. As of (8/16), NGC has certified just three 1893 fives as Prooflike, one at the MS61 level and two in the present grade. NGC ID# 25YA, PCGS# 78383

- 4142 1894-S MS61 NGC.** Probably 25 to 30 1894-S half eagles (55,900 coins struck) survive in Mint State. This piece offers frosty luster over lightly abraded green and rose-gold surfaces. The strike is a bit soft, but this remains a great example of an underrated condition rarity. Census: 13 in 61, 10 finer (8/16). NGC ID# 25YG, PCGS# 8389

- 4143 1899 MS65+ PCGS.** The 1899 Liberty half eagle is a rare issue in grades above MS65. This Plus-graded Gem offers well-detailed design elements and well-preserved orange-gold surfaces, with subtle satiny mint luster. PCGS has graded 20 numerically finer examples (8/16). NGC ID# 25YS, PCGS# 8398

- 4144 1900 MS65 PCGS.** This delightful Gem exhibits sharply detailed design elements throughout, with well-preserved orange-gold surfaces and radiant mint luster on both sides. PCGS has graded just 11 numerically finer examples (8/16). NGC ID# 25YU, PCGS# 8400

- 4145 1901-S MS65 PCGS.** A sharp strike complements frosty yellow-gold luster on this Gem 1901-S half eagle type coin. A small graze in the right reverse field is all that prevents an even finer grade. Higher-end examples of this popular 20th century type-coin issue are elusive.

From The Twelve Oaks Collection, Part II NGC ID# 25YX, PCGS# 8404

- 4146 1906-D MS65 NGC.** The mintmark leans sharply to the left on this example. This first-year Denver Mint half eagle exhibits a bold strike and frosty yellow-gold luster with full brilliance. Census: 66 in 65 (1 in 65+), 8 finer (8/16).

From The Twelve Oaks Collection, Part II NGC ID# 25ZA, PCGS# 8414

INDIAN HALF EAGLES

- 4147 1908 MS64 PCGS.** A lovely example for the first-year type collector, this Choice Mint State 1908 Indian half eagle exhibits pleasing surfaces and brilliant yellow-gold surfaces with frosty mint luster. NGC ID# 28DE, PCGS# 8510

- 4148 1908-D MS63 NGC.** This first-year Indian half eagle had a modest 148,000 coin mintage at Denver. This Select Mint State survivor exhibits wispy steel-blue toning on its satiny yellow surfaces. Both sides host myriad minuscule surface marks. NGC ID# 93KW, PCGS# 8511

- 4149 1908-D MS63 NGC.** Satiny orange-gold luster delivers pleasing visual appeal on this Select 1908-D half eagle. Light, scattered abrasions determine the grade. This piece shows minor strike weakness on the lower headdress feathers, not unusual for the issue.

From The Twelve Oaks Collection, Part II NGC ID# 93KW, PCGS# 8511

- 4150 1908-D MS63 NGC.** As the debut Denver issue of the Indian Head type, the 1908-D half eagle is tremendously popular among type collectors. This Select example is within the grasp of budget-restricted enthusiasts, showing satiny orange-gold luster and only light abrasions. The lower headdress feathers exhibit moderate weakness.

From The Twelve Oaks Collection, Part II NGC ID# 93KW, PCGS# 8511

- 4151 1908-D MS63 NGC.** Weakly struck on the lower headdress feathers, this Select Mint State 1908-D Indian five is otherwise well-defined. Satiny peach and olive-gold hues illuminate the fields and reveal a few minor abrasions that determine the grade.

From The Twelve Oaks Collection, Part II NGC ID# 93KW, PCGS# 8511

- 4152 1908-D MS63 NGC.** Satiny and original with olive-gold and peach-orange hues, this Select 1908-D Indian half eagle displays pleasing eye appeal for the grade. Light, scattered abrasions prevent a finer numeric assignment. Although not as common as its Philadelphia counterpart, the 1908-D Indian five is nonetheless available for type purposes through MS64.

From The Twelve Oaks Collection, Part II NGC ID# 93KW, PCGS# 8511

- 4153 1908-D MS63 NGC.** Well-struck with satiny mint luster and rich orange-gold hues, this Select example is quite appealing for the grade. A few small marks on the chief's cheek are all that prevent near-Gem status.

From The Twelve Oaks Collection, Part II NGC ID# 93KW, PCGS# 8511

- 4154 1908-S AU58 NGC.** An attractive near-Mint specimen from the first year of the design, with just a trace of high-point wear on the sharply detailed design elements and lightly abraded orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 65K3, PCGS# 8512

4155 1908-S AU58 NGC. A splendid near-Mint example of the first Indian half eagle struck at the San Francisco Mint. This piece has frosty and highly lustrous yellow-gold surfaces with only a trace of rub on the high points. Trivial marks are expected at the grade level but the eye appeal is finer than many certified in higher grades.
From The Twelve Oaks Collection, Part II NGC ID# 65K3, PCGS# 8512

4156 1909 MS64+ PCGS. The 1909 Indian half eagle is a scarce issue above the MS64 grade level. This Plus-graded Choice example offers sharply detailed design elements in most areas, with just a touch of softness on the eagle's shoulder. The lustrous orange-gold surfaces are well-preserved and attractive. NGC ID# 28DH, PCGS# 8513

4157 1909-D MS64 PCGS. Wisps of greenish hue appear throughout wheat-gold surfaces on this near-Gem 1909-D Indian half eagle. The strike is sharp, and abrasions are surprisingly minimal. Eye appeal surpasses expectations for the grade.
From The Twelve Oaks Collection, Part II NGC ID# 28DJ, PCGS# 8514

4158 1909-D MS64 NGC. A sharp, lustrous near-Gem, this 1909-D Indian half eagle possesses strong visual appeal for the grade and satiny peach-gold luster. Light, scattered ticks on the obverse determine the grade. Finer pieces are elusive.
From The Twelve Oaks Collection, Part II NGC ID# 28DJ, PCGS# 8514

4159 1909-D MS64 NGC. Although undeniably plentiful and popular for type purposes, the 1909-D half eagle is nonetheless elusive in Gem condition. This near-Gem example remains accessible by the average collector but possesses above-average quality and appeal. The strike is sharp, and the surfaces exhibit smooth, satiny golden luster. A linear mark in front of the eagle's head is the only mentionable abrasion.
From The Twelve Oaks Collection, Part II NGC ID# 28DJ, PCGS# 8514

4160 1909-D MS64 NGC. Satiny wheat-gold luster and a sharp strike combine to give this near-Gem 1909-D half eagle an excellent visual impression. Abrasions are minimal. The 1909-D is a readily available date, often seen in type collectors' cabinets.
From The Twelve Oaks Collection, Part II NGC ID# 28DJ, PCGS# 8514

4161 1909-D MS64 NGC. Sharp motifs complement luminous yellow-gold mint luster on this Choice 1909-D half eagle, while grade-limiting abrasions are light and minimal in number. The '09-D is a plentiful issue in this grade, ideal for type representation.
From The Twelve Oaks Collection, Part II NGC ID# 28DJ, PCGS# 8514

4162 1910-S MS62 NGC. The eagle and headdress both have sharply delineated feathers on this Mint State 1910-S half eagle, while the satiny yellow-gold fields reveal surprisingly minimal contact. The 1910-S is a better date in Uncirculated condition, and the present example is attractive for the grade. NGC lists 34 numerically finer submissions (8/16).
From The Twelve Oaks Collection, Part II NGC ID# 28DN, PCGS# 8519

4163 1911 MS64 NGC. Softly frosted green-gold luster delivers wonderful visual appeal on this Choice 1911 Indian Head five, revealing only a few minor surface marks. Well-defined motifs further contribute to the presentation. Finer representatives are elusive.
From The Twelve Oaks Collection, Part II NGC ID# 28DP, PCGS# 8520

4164 1911 MS64+ PCGS. This near-Gem 1911 Indian half eagle is an extraordinary piece and an important condition rarity. PCGS has only certified 68 finer pieces (8/16). This pristine half eagle has frosty yellow luster and pristine surfaces. NGC ID# 28DP, PCGS# 8520

1911-D Indian Half Eagle, AU58 Seldom Encountered in High Grade

4165 1911-D AU58 PCGS. From a low mintage of 72,500 pieces, the 1911-D Indian half eagle is one of the most challenging issues of the series in high grade. Unlike its famous quarter eagle counterpart, the elusive nature of this issue is seldom appreciated, outside of series specialists. This sharply detailed near-Mint example is lightly worn and lightly abraded and retains much original mint luster. NGC ID# 28DR, PCGS# 8521

4166 1911-S MS63 PCGS. The 1911-S is collectible in this grade but rarely encountered finer. The present Select representative displays well-rendered motifs and satiny yellow-gold luster. Scattered lines limit the grade in the absence of significant abrasions.
From The Twelve Oaks Collection, Part II NGC ID# 25ZM, PCGS# 8522

1913-S Indian Five, MS62 Elusive Issue in Finer Grades

4167 1913-S MS62 PCGS. Gold coins were still often seen in circulation in the Western United States before World War I and the 1913-S Indian half eagle was an issue that served its intended purpose well in that era. It is not too difficult to locate a lower Mint State example in today's market, but high-grade coins are rare. This well-detailed MS62 specimen exhibits vivid orange-gold surfaces with vibrant mint luster and only minor signs of contact. PCGS has graded 69 numerically finer examples (8/16). NGC ID# 25ZP, PCGS# 8526

4168 1914 MS63 NGC. Nothing more than a few stray lines prevents a finer grade on this Select 1914 Indian five. The strike is sharply impressed, and each side exhibits luminous straw-gold luster with fairly clean fields. The 1914 becomes increasingly elusive above this grade level.
From The Twelve Oaks Collection, Part II NGC ID# 28DU, PCGS# 8527

4169 1914 MS63 PCGS. Well-struck devices rise from the recessed interior of the satiny green-gold planchet on this Select 1914 Indian half eagle. Light field marks are all that limit the grade. For the MS63 level, this 1914 offers a high degree of appeal.
From The Twelve Oaks Collection, Part II NGC ID# 28DU, PCGS# 8527

4170 1914 MS63+ NGC. Softly frosted honey-gold mint luster gives this high-end Select 1914 half eagle excellent eye appeal for the grade. The coin is well-struck, and there are no significant abrasions. A few subtle alloy discolorations (mint made) are seen around portions of the reverse periphery.
From The Twelve Oaks Collection, Part II NGC ID# 28DU, PCGS# 8527

- 4171 1915 MS64 PCGS.** The 1915 Indian half eagle is a very scarce issue in grades above MS64. This attractive Choice example is sharply detailed throughout, with lightly marked orange-gold surfaces and vibrant mint luster on both sides. PCGS has graded 53 numerically finer examples (8/16). NGC ID# 28DX, PCGS# 8530

LIBERTY EAGLES

- 4172 1846/5-O XF45 PCGS. Variety 3.** PCGS questions the overdate status of this popular variety, which shows extra metal within the loops of the six. Nevertheless, both NGC and the *Guide Book* list this as an overdate. The present example is in the rare early die state with repunching evident on the top of the mintmark. The coin is well-detailed with some prooflike surface remaining in the protected regions of the fields. Elsewhere the surfaces have light chatter. NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595
- 4173 1846/5-O XF45 PCGS. Variety 3.** Ex: The Blue Hill Collection. PCGS has some doubts about whether the artifact under the final digit in the date is actually a 5, but both NGC and the *Guide Book* list this variety as an overdate. Some light wear shows on Liberty's hair and the eagle's claws and the still-lustrous orange-gold surfaces show a number of minor abrasions on both sides. Population: 18 in 45, 32 finer (8/16). NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595
- 4174 1861 — Improperly Cleaned — NGC Details. AU.** The 1861 ten is a popular date among type collectors. This AU-level coin shows a light cleaning but nonetheless retains hints of luster and pleasant appeal. Scattered abrasions include an old scratch between the UN in UNITED. The design elements are well-defined.
From The Twelve Oaks Collection, Part II NGC ID# 2647, PCGS# 8633

1885 Liberty Eagle, MS64
Conditionally Rare Any Finer

- 4175 1885 MS64 PCGS.** An incredible condition rarity with a combined PCGS and NGC population of only 16 coins in MS64 and just four finer (8/16). This frosty and highly lustrous specimen exhibits brilliant yellow surfaces that have faint pinkish overtones. An impressive example destined for a high-grade, specialized collection of Liberty eagles. Population: 13 in 64, 1 finer (8/16). NGC ID# 266D, PCGS# 8706
- 4176 1888 MS61 PCGS. CAC.** The 1888 Liberty eagle is a scarce issue in Mint State. This MS^1 example exhibits well-detailed design elements and the orange-gold surfaces show the expected number of minor contact marks on both sides, with traces of original mint luster. Population: 60 in 61, 55 finer. CAC: 5 in 61, 9 finer (8/16). NGC ID# 266V, PCGS# 8712
- 4177 1888 MS62 PCGS.** The design elements of this attractive MS62 example are well-detailed, with just a touch of softness on the eagle's claws. The vivid orange-gold surfaces exhibit satiny mint luster and some scattered minor contact marks. Population: 47 in 62, 8 finer (8/16). NGC ID# 266V, PCGS# 8712
- 4178 1888-S MS63 PCGS.** An unlisted doubled die variety with the spread most apparent on the first two stars. A well struck apricot-gold representative. The lustrous surfaces exhibit abrasions consistent with the third-party grade. Conditionally rare any finer. NGC ID# 266M, PCGS# 8714

- 4179 1893-S MS63 PCGS. CAC.** This MS63 S-mint eagle grades a full three points higher than the typical example seen at the leading grading services. The visual quality and originality of this piece are exceptional. Each side is orange-gold overall with lovely rose and green accents. Light marks are expected. Population: 61 in 63 (1 in 63+), 4 finer. CAC: 5 in 63, 1 finer (8/16). NGC ID# 2674, PCGS# 8728

- 4180 1894 MS64 PCGS.** Sharp devices reside amid frosty yellow-gold luster on this Choice 1894 Liberty eagle. Light, scattered abrasions determine the grade. Although collectible in this grade, the 1894 is rarely seen finer, as PCGS has certified just a single such coin (8/16). NGC ID# 2675, PCGS# 8729
- 4181 1897 MS64 PCGS.** A gorgeous peach-gold example. Marks are nearly absent, though a small strike-through between star 1 and the 1 in the date denies classification as a Gem. Well struck, lustrous, and rare any finer. NGC ID# 26CH, PCGS# 8737
- 4182 1899-S MS63 PCGS.** Sweeping luster and a bold strike characterize this green-gold branch mint eagle. The field beneath the wings is moderately marked, but overall, the surfaces are pleasing for the Select level. NGC ID# 267L, PCGS# 8744
- 4183 1900-S MS62 PCGS.** The 1900-S eagle is a scarce issue in Mint State. This collectible MS62 representative displays sharp devices and lustrous yellow-gold fields. Scattered abrasions limit the grade, but none are individually bothersome. Population: 34 in 62, 23 finer (8/16). NGC ID# 42AN, PCGS# 8746
- 4184 1900-S MS62 PCGS. CAC.** According to the PCGS Population Report, the 1900-S is the rarest post-1896 Liberty ten dollar issue in Uncirculated grades. This well struck green-gold representative displays obverse abrasions consistent with the MS62 level. Population: 34 in 62, 23 finer. CAC: 3 in 62, 1 finer (8/16). NGC ID# 42AN, PCGS# 8746

- 4185 1901-O MS62 PCGS. Variety 3.** The design elements of this pleasing MS62 specimen are sharply detailed, aside from a touch of softness on star 13. The light orange-gold surfaces retain much original mint luster, despite a number of grade-consistent contact marks on both sides. The 1901-O Liberty eagle is very scarce in finer grades. NGC ID# 267R, PCGS# 8748
- 4186 1902 MS63 PCGS.** A challenging Select example of this underrated Philadelphia issue, showing bold design elements and frosty yellow-gold luster. Scattered light abrasions are not overly detracting. PCGS has seen only 23 numerically finer representatives (8/16). NGC ID# 267T, PCGS# 8750

1902-S Liberty Ten, MS65
Seldom Encountered Finer

- 4187 1902-S MS65 NGC.** The 1902-S Liberty eagle claims a mintage of 469,500 pieces, but examples in MS65 condition are seldom encountered. This delightful Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces add to the outstanding eye appeal. NGC has graded 12 numerically finer examples (8/16). NGC ID# 267U, PCGS# 8751
- 4188 1903 MS64 PCGS.** This caramel-gold near-Gem has a crisp strike and is free from any mentionable marks. Among the lower mintage Philadelphia issues from the waning years of the series, and a better date in the present quality. Population: 47 in 64 (2 in 64+), 8 finer (8/16). NGC ID# 267V, PCGS# 8752

**1903-S Liberty Eagle, MS65
Challenging This Fine**

4189 1903-S MS65 PCGS. A sharp strike and frosty yellow-gold luster define the eye appeal of this Gem 1903-S ten. There are no significant abrasions, only a few light grazes in the fields that determine the grade. The 1903-S is scarce in this grade and rarely seen finer. Population: 65 in 65 (6 in 65+), 29 finer (8/16). NGC ID# 267X, PCGS# 8754

4190 1904 MS64 PCGS. A lovely olive-gold representative. The well struck surfaces display vibrant luster. Marks are minimal aside from an abrasion below the A in STATES. A fairly low mintage Philly issue, and scarce relative to the 1901 and 1907. Population: 50 in 64 (1 in 64+), 3 finer (8/16). NGC ID# 267Y, PCGS# 8755

4191 1905-S MS62 PCGS Secure. The 1905-S is a challenging issue in Mint State. This accessible MS62 example displays a sharp strike and vibrant yellow-gold luster. Scattered abrasions are evenly distributed over each side. Population: 49 in 62 (1 in 62+), 14 finer (8/16). NGC ID# 2683, PCGS# 8758

4192 1905-S MS62 PCGS. Scattered small- and medium-sized abrasions are consistent with the grade, the largest on the obverse being a straight scrape past star 7. The reverse also shows numerous abrasions, but both sides boast attractive orange-gold luster and an ample strike. Population: 49 in 62 (1 in 62+), 14 finer (8/16). NGC ID# 2683, PCGS# 8758

INDIAN EAGLES

4193 1907 No Motto MS61 NGC. This brightly lustrous, sharp No Motto 1907 Indian Head type coin offers immediate appeal, and scattered, grade-limiting abrasions are of secondary notice. The overall quality is above-average for the grade.
From The Twelve Oaks Collection, Part II NGC ID# 28GF, PCGS# 8852

4194 1907 No Motto MS62 PCGS. Satiny yellow-gold luster illuminates moderately abraded surfaces on this No Motto 1907 Indian eagle type coin. The devices are well-struck, providing pleasing eye appeal for the grade. NGC ID# 28GF, PCGS# 8852

**1908-D No Motto Eagle, MS62
Peach and Green-Gold Coloration**

4195 1908-D No Motto MS62 PCGS. A total of 210,000 Indian Head eagles were manufactured at the Colorado branch mint during the first six months of 1908. After July 1, all coins featured the motto IN GOD WE TRUST on the reverse. The 1908-D No Motto is elusive in lower Mint State grades, and finer coins are very scarce. Satin luster issues from peach and green-gold surfaces that show a typical strike. Marks are well-hidden for the most part. NGC ID# 28GH, PCGS# 8854

4196 1908 Motto MS63 PCGS. A pleasing Select example from the first year of the Motto design, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 28GJ, PCGS# 8859

**1908 Motto Eagle, MS64
Sharp Sun-Gold Luster**

4197 1908 Motto MS64 PCGS. CAC. It took some Congressional clout, but Theodore Roosevelt eventually acquiesced to pressure and the Motto was added in front of the eagle's breast on the majority of 1908 Indian tens. This radiant example combines a sharp strike with vivid sun-gold color and bold cartwheel luster. The portrait is clear of all but a tiny tick near the mouth, with a few faint grazes in the field below star 1 but no marks of real significance. A stunning near-Gem with CAC endorsement. NGC ID# 28GJ, PCGS# 8859

4198 1908-D Motto MS62 PCGS. This debut With Motto Denver Indian eagle displays satiny surfaces with soft yellow-gold luster. The strike is well-rendered throughout. A pair of small abrasions on Liberty's cheek are the only mentionable surface flaws. NGC ID# 28GK, PCGS# 8860

4199 1909 MS63 PCGS. A sharp strike and rich yellow-gold luster are the hallmarks of this Select 1909 Indian eagle. Light abrasions determine the grade but have little effect on the eye appeal. Finer examples of this slightly better Philadelphia issue are elusive. NGC ID# 28GM, PCGS# 8862

4200 1909-D MS61 NGC. With a moderately low mintage of slightly more than 121,000 pieces, the 1909-D ten is challenging in Uncirculated condition. This collectible lower-end example is well-struck and lustrous. Heavily abraded surfaces are expected for the grade. NGC ID# 28GN, PCGS# 8863

4201 1909-D MS62 PCGS. A scarce and underrated issue in the ten dollar Indian series. This is an attractive example with subdued satiny mint luster, even orange-gold color, a strong strike, and few obvious marks. NGC ID# 28GN, PCGS# 8863

4202 1909-S MS61 PCGS. Complete mint frost covers each side, but the orange-gold surfaces are peppered with numerous small abrasions. Sharply defined on each side, with just a touch of softness on Liberty's hair. NGC ID# 28GP, PCGS# 8864

1910 Ten Dollar, Upper End Near-Gem

4203 1910 MS64+ PCGS. The finely granular surfaces are lustrous and only minutely marked, while cartwheel mint luster enhances the green-gold color. The strike is sharp throughout, an abiding feature of nearly all 1910 eagles and one of the reasons the issue is favored by type collectors. This example approaches Gem quality. A tiny nick on Liberty's cheek and another on the rim between stars 2 and 3 are grade-consistent and minor. Population: 10 in 64+, 96 finer (8/16). NGC ID# 28GR, PCGS# 8865

4204 1910-S MS61 NGC. In Mint State, the 1910-S Indian eagle is scarcer than its mintage of 811,000 pieces would suggest. This MS61 example is representative of what most budget-conscious collectors will acquire. The coin is well-struck and lustrous with yellow-gold surfaces. The only downfall is the scattering of grade-appropriate abrasions over each side. NGC ID# 268D, PCGS# 8867

4205 1911 MS64+ NGC. A Plus-graded Choice example of this popular early series issue, with sharply detailed design elements and lustrous reddish-gold surfaces that show only minor signs of contact. NGC ID# 28GT, PCGS# 8868

1911-D Indian Head Ten Dollar, AU55 Series-Low Mintage

4206 1911-D AU55 PCGS. A mintage of 30,100 coins, the lowest production total in the series, makes this one of the most elusive Indian Head ten dollar gold issues. Light wheat-gold surfaces retain traces of satin luster. The two lowest headdress feathers show razor-sharp detail, while the forecurls and shoulder tip exhibit a hint of merging. Thin marks occur over each side. NGC ID# 28GU, PCGS# 8869

1911-S Indian Eagle, AU58 Low-Mintage Branch Mint Issue

4207 1911-S AU58 PCGS. Only the faintest trace of high-point wear is evident on this attractive near-Mint specimen, with strongly impressed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces are remarkably free of large or distracting abrasions. From a mintage of just 59,850 pieces, the 1911-S is scarce in Mint State grades. NGC ID# 28GV, PCGS# 8870

1913-S Ten Dollar, AU58 Ideal Collectible Grade

4208 1913-S AU58 PCGS. The 1913-S is among the five most elusive dates in Saint-Gaudens' Indian Head eagle series to locate in Mint State. This borderline-Uncirculated ten dollar gold piece is the perfect alternative for the discerning collector on a budget. Friction is nearly indistinguishable without close inspection, and frosty luster remains vibrant. Yellow-gold surfaces exhibit scattered marks, though they are far less prominent than one might expect. NGC ID# 28GZ, PCGS# 8874

4209 1914-D MS63 PCGS. Greenish accents complement the rose-gold color that dominates this satiny Select eagle. Shallow marks are lightly scattered over each side. A bit of high-point incompleteness is typical for the 1914-D, which is scarcely found finer. NGC ID# 28H3, PCGS# 8876

4210 1914-D MS63 PCGS. Wispy pink toning appears on the light yellow surfaces of this Select Mint State 1914-D Indian eagle. A pleasing piece with full cartwheel luster and minimal scattered marks. NGC ID# 28H3, PCGS# 8876

4211 1916-S AU58 NGC. CAC. The amount of luster on this near-Mint 1916-S Indian eagle rivals that on many lower-end Mint State pieces, although slight friction over the eagle's shoulder appropriately determines the AU58 grade. A CAC green label has been duly awarded. This piece is well-struck and smooth without distractions. NGC ID# 28H7, PCGS# 8880

4212 1926 MS64 NGC. CAC. Smooth and brilliant yellow-gold surfaces exhibit full cartwheel mint luster on this lovely Indian eagle. Scattered marks prevent an even higher grade to this outstanding type coin. NGC ID# 28H9, PCGS# 8882

4213 1932 MS64 NGC. A frosty and highly lustrous near-Gem, this lovely example is an ideal candidate for a 20th century gold type collection. NGC ID# 28HB, PCGS# 8884

4214 1932 MS64 NGC. CAC. This sharply detailed Choice Mint State 1932 Indian eagle exhibits frosty and highly lustrous yellow surfaces with excellent aesthetic appeal. NGC ID# 28HB, PCGS# 8884

4215 1932 MS64 NGC. CAC. An important opportunity for type collectors and gold enthusiasts, as this is the only collectible US gold piece from the 1930s. This Choice Mint State representative exhibits frosty orange-gold luster. NGC ID# 28HB, PCGS# 8884

4216 1932 MS64 NGC. CAC. A satiny near-Gem, this 1932 Indian ten exhibits faint orange overtones on its frosty and fully lustrous yellow-gold surfaces. NGC ID# 28HB, PCGS# 8884

4217 1932 MS64 NGC. CAC. Both sides of this attractive Choice Mint State 1932 Indian eagle exhibit frosty and highly lustrous yellow-gold surfaces with excellent eye appeal. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

4218 1850 — Graffiti — PCGS Genuine. XF Details. Like most Type One double eagles, this first-year specimen shows a large number of minor abrasions on the typical orange-gold surfaces, and some questionable marks in the lower-right obverse field and on Liberty's cheek may be interpreted as graffiti. Light wear shows on the well-detailed design elements and traces of original mint luster cling to protected areas. NGC ID# 268F, PCGS# 8902

1851-O Twenty Dollar, AU Details Popular Type One Southern Gold Issue

4219 1851-O — Improperly Cleaned — NGC Details. AU. Variety 2. The 1851 is one of the few available O-Mint double eagles from the 1850s, yet it is far scarcer than the 1851 Philadelphia issue. This example is a little bright, but there are no other overt signs of cleaning. Numerous small marks and field chatter occupy fields that at one time were prooflike, with the reflectivity still visible in protected areas. Appealing medium-gold color remains.

**1852 Liberty Double Eagle, AU55
Natural Surfaces**

- 4220 1852 AU55 PCGS.** The surfaces of this About Uncirculated double eagle are as honest as the day is long. No stranger to rough handling, areas of field chatter and bagmarks join a "dirty gold" patina that speaks to the coin's originality. The abrasions and marks are only skin-deep, while the underlying strike remains sharp. Attractive, brassy-gold color prevails for Choice eye appeal. NGC ID# 268K, PCGS# 8906

**1852 Liberty Double Eagle, AU55
Lustrous and Colorful**

- 4221 1852 AU55 PCGS.** An attractive Choice AU specimen of this popular Type One double eagle issue, with just a slight trace of wear on the well-detailed design elements and lightly abraded orange-gold surfaces. Both sides retain much of their original mint luster and overall eye appeal is outstanding. NGC ID# 268K, PCGS# 8906

**1852/1852 Twenty Dollar, AU50
FS-301, Reddish-Gold Color**

- 4222 1852/1852 FS-301 AU50 NGC.** All four date digits are clearly repunched north, a characteristic found on approximately 5% to 10% of survivors. The 1852 Type One double eagle is well-produced as a whole and popular for type purposes. This minimally circulated reddish-gold twenty offers full radial lines and bold detail elsewhere despite trace amounts of friction. Partial luster remains near the recesses. The fields are predictably marked. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

- 4223 1853 VF35 PCGS.** Smooth surfaces and rich honey-gold color characterize this Choice VF 1853 double eagle. With a mintage of more than 1.2 million pieces, this Gold Rush-period Philadelphia issue is available for type purposes. This example has a few minor marks on Liberty's neck. NGC ID# 268M, PCGS# 8908

**1853 Twenty Dollar
Lustrous AU58**

- 4224 1853 AU58 NGC.** Although not struck to the same extent as the 1851 and 1852 issues, the 1853 did see a total production well in excess of 1 million coins, and examples are obtainable with a bit a patience at the current grade level. This straw-gold piece is lustrous and close to Mint State. Minor friction on Liberty's hair bun and the eagle's wingtips combine with small abrasions to limit the grade. NGC has seen 59 higher-graded coins (8/16).
Ex: West Palm Beach FL Signature (Heritage, 7/2009), lot 1948.
NGC ID# 268M, PCGS# 8908

**1857-S Liberty Double Eagle, AU58
Vibrant Luster and Color**

- 4225 1857-S AU58 PCGS.** Like most Type One Liberty double eagles, the 1857-S was once very rare in high grade. Fortunately, the recovery of the treasure from the S.S. *Central America* yielded a large number of attractive specimens, making the 1857-S a favorite choice of type collectors. This lightly worn and lightly abraded near-Mint example offers pleasing orange-gold surfaces that retain much original mint luster. NGC ID# 2696, PCGS# 8922

- 4226 1860 XF45 PCGS.** Remnants of luster in the protected regions of the fields on this Choice XF 1860 double eagle provide substantial eye appeal for the grade. The original olive-gold surfaces are only lightly marked, and the design elements are bold. Much less often seen than the 1861 and the shipwreck San Francisco issues. NGC ID# 269D, PCGS# 8929

**1860-S Twenty Dollar, AU50
Above-Average Appeal**

- 4227 1860-S AU50 NGC.** Medium S. More than a half million twenty dollar gold coins were struck at the California branch mint in 1860. The facility was only in its seventh year of operation, and the double eagles produced tend to show below-average detail, myriad bagmarks, and have lackluster surfaces. The appeal of this AU50 example is far better than usual. The stars are bold, and Liberty's hair is strong for a Type One representative. Although the eagle's wingtips are soft and small marks appear over each side, the overall effect is undeniably pleasing. NGC ID# 269F, PCGS# 8931

4228 1861 XF45 PCGS. This Choice XF Type One twenty has a wheat and khaki-gold obverse, while the reverse shows light straw-gold color over the leftmost areas and reddish-orange hues over the rightmost surfaces. Both sides show myriad abrasions. NGC ID# 269G, PCGS# 8932

4229 1861 AU53 NGC. A brass-gold AU representative of this popular type-coin issue, showing hints of luster remaining in the protected regions of the fields. A few bits of grease on each side of the planchet, although this contributes to the old-time appeal of the coin. NGC ID# 269G, PCGS# 8932

**1861-S Twenty Dollar, AU53
Type One San Francisco Example**

4230 1861-S AU53 NGC. Medium S. Most of the 768,000 double eagles struck at the S-mint in 1861 with the usual reverse lettering circulated extensively on the West Coast. Many were also sent overseas to Europe, where examples still turn up from time to time. Moderately abraded surfaces showcase eye-catching rose and green-gold hues. The recesses retain glints of original mint luster, and the motifs are typically impressed. NGC ID# 269K, PCGS# 8935

**1863-S Double Eagle, Pleasing AU55
Orange-Gold Coloration**

4231 1863-S AU55 PCGS. Small S Mintmark. A certain segment of the collecting community prefers their gold coins to be overtly original in appearance and only lightly circulated. This is such a Choice coin, with ample remaining mint luster and strong definition on the devices. The fields show light marks but none to really distract the eye, while the overall visual impact is impressive. Orange accents shine from the borders. NGC ID# 269R, PCGS# 8940

**1865-S Twenty Dollar, AU55
Interesting Die Cracks Throughout**

4232 1865-S AU55 NGC. Small S. Spindly die cracks congregate around the date and travel through the right-hand stars, while significant breaks around the reverse legends suggest a terminal die state. The devices are characteristically defined for a Type One twenty. Splendid green and reddish-gold color adorns each side. This predictably abraded Choice AU double eagle has much to admire for beginners and advanced collectors alike. NGC ID# 269V, PCGS# 8944

**1869-S Liberty Head Twenty, AU58
Lustrous, Rose-Gold Surfaces**

4233 1869-S AU58 NGC. Small Squat S. The obverse of this lustrous near-Mint double eagle shows bold detail on the portrait, softening over the stars. The eagle's feathers and shield are razor-sharp. Each side features light rose-gold color and a trace of rub, barely perceptible without a loupe. Small grazes occur throughout, but none of them are singular in nature. The 1869-S claims mintage of nearly 700,000 coins. Anything finer than AU58 coin this is very scarce. NGC ID# 26A6, PCGS# 8956

**1870-S Twenty Dollar, AU58
Prohibitive in Better Condition**

4234 1870-S AU58 NGC. Small Squat S. The majority of 1870-S double eagles at the leading grading services fall within the XF-AU range, but those at the upper end of that spectrum are scarce. Mint State coins are seldom seen, realizing prices that keep most collectors at bay when they do appear on the market. This is an optimal collectible grade. Each side retains radiant luster and good detail. Rose and green-gold surfaces display myriad abrasions. NGC ID# 26A9, PCGS# 8959

1872 Liberty Twenty, AU58
Very Scarce Type Two Example

4235 1872 AU58 PCGS. Seldom seen above XF condition, the 1872 had a small mintage of just 251,850 pieces. Uncirculated pieces are notably scarce. This near-Mint State example is minimally abraded with considerable semiprooflike reflectivity in the fields. The strike remains sharp on the motifs. Attractive orange-gold coloration with plentiful mint luster survives on both sides. This is a great Type Two example for the perceptive type or series collector. NGC ID# 26AD, PCGS# 8963

4236 1872-S — Obverse Damage — NGC Details. Unc. Micro S, one of three mintmark sizes encountered on this conditionally challenging Type Two issue. The present piece has a narrow vertical scratch on the cheek, but the apricot-gold surfaces do not show any other mentionable marks. NGC ID# 26AF, PCGS# 8965

1873 Liberty Double Eagle, MS60
Underrated Closed 3 Variant

4237 1873 Closed 3 MS60 PCGS. Much rarer than the Open 3 variety, the Closed 3 double eagle made up only a small portion of the 1.7 million-piece mintage in 1873. Even MS60 coins (such as this one) are very scarce. Full cartwheel mint luster flows across the lightly abraded surfaces. The coin retains its Mint-fresh look despite the scuffs and some deep, dirty-gold accents. Underrated for the importance of the Closed 3 type and the scarcity of original-surface survivors. Population: 23 in 60, 28 finer (8/16). NGC ID# 26AL, PCGS# 8966

4238 1873 Open 3 MS62+ NGC. CAC. One of the most available Type Two issues, and an issue collectors often turn to for type purposes. While frequently encountered up to MS62, availability drops off dramatically above that. With a Plus designation, this piece is visually very close to an MS63 and a higher price level. Even, reddish-tinted surfaces show thick mint frost and a few marks in the left obverse field. NGC ID# 26AL, PCGS# 8967

1873-S Liberty Twenty, MS61
Popular Closed 3 Type

4239 1873-S Closed 3 MS61 PCGS. Although the design was changed early in the year to include the Open 3 in the date, it was some time before the new dies arrived at the San Francisco Mint. As a result, most of the double eagle coinage from the Western facility shows the older Closed 3 punch in the date. This well-detailed Mint State specimen exhibits attractive orange-gold surfaces with vibrant mint luster and the minimum number of minor contact marks for the grade. Housed in a green label holder. PCGS has graded 29 numerically finer examples (8/16). NGC ID# 26AL, PCGS# 8969

1873-S Double Eagle, AU58
Scarce Open 3 Variety

4240 1873-S Open 3 AU58 NGC. Small Squat S. Green and peach-gold shades intermix throughout this Open 3 1873-S double eagle, the scarcer of two variants for the issue. Although the motifs are incompletely brought-up, frosty luster enlivens each side and generates excellent eye appeal. Scattered abrasions are consistent for a Type Two double eagle in this grade. NGC ID# 26AM, PCGS# 8979

4241 1874 AU58 NGC. A luster break on the left obverse field prevents this orange-gold AU58 double eagle from achieving an Uncirculated assessment. Excellent eye appeal and a crisp impression are added attributes of this Type Two twenty from a mintage of 366,780 coins. NGC ID# 26AN, PCGS# 8970

1874-CC Twenty Dollar, AU Details
Suitable Branch Mint Type Coin

4242 1874-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A. A few telltale fine lines exist in the obverse fields and surrounding a struck-in grease streak that was minimized on the reverse. Still, substantial appeal remains on both sides of this popular Carson City double eagle. High point wear and small marks do not interfere with areas of prooflikeness at the margins.

1874-S Liberty Double Eagle, MS61
Vivid Color, Vibrant Luster

- 4243 1874-S MS61 PCGS.** Despite the ample mintage of 1.2 million pieces, the 1874-S Liberty double eagle is a very scarce issue in grades above MS61. This attractive Mint State specimen exhibits sharply detailed design elements and vibrant mint luster throughout, with vivid orange-gold surfaces that minimize the scattering of minor contact marks that account for the technical grade. (8/16). NGC ID# 26AR, PCGS# 8972

1874-S Twenty, MS61
Block S, Lustrous and Original

- 4244 1874-S MS61 PCGS.** Block S. Two mintmark styles are known for this Type Two issue, which is seldom encountered any finer. The lustrous and original surfaces are khaki-gold aside from blushes of pink-rose toning. The obverse exhibits moderate marks, but the reverse is only lightly abraded. NGC ID# 26AR, PCGS# 8972

1875-CC Twenty Dollar, XF40
Previously Undocumented Variety

- 4245 1875-CC XF40 NGC. Variety 8-B.** This is a previously undocumented marriage of these dies — the sixth use of this common reverse and the second of this less often seen obverse. The coin shows light, even wear and pleasing orange-gold patina. Luster remains in the protected peripheral fields, and a couple of small reed marks on Liberty's cheek and in front of the mouth are the only mentionable abrasions. NGC ID# 26AT, PCGS# 8974

- 4246 1875-S MS61 NGC.** Boldly struck design elements reside amid frosty yellow-gold fields on this Mint State 1875-S double eagle, delivering strong eye appeal. A few light grazes prevent a finer grade but are not overly distracting. This Type Two San Francisco issue is somewhat scarce in finer condition. NGC ID# 26AU, PCGS# 8975

- 4247 1877-S MS61 NGC.** Frosty rose-gold luster shows greenish-gold hues on this Mint State 1877-S Liberty Head twenty. The strike is sharp, and light, scattered abrasions are not overly distracting. Eye appeal is pleasing for the grade. NGC ID# 254B, PCGS# 8984

- 4248 1878 MS61 PCGS.** At least two different reverse doubled die varieties are known on 1878 double eagles. Neither is listed in *Cherrypickers'*, or in the two Bowers references to the series, but the varieties are well known among specialists. The present example shows nice doubling on TWENTY DOLLARS, with a lesser spread apparent on UNITED STATES OF. The lustrous apricot-gold surfaces display a few obverse areas of golden-brown and cobalt-blue patina. NGC ID# 26B3, PCGS# 8985

- 4249 1878-S MS61 PCGS. CAC.** A yellow-gold representative that has a good strike and the expected number of small abrasions. For this issue, the MS61 grade provides the optimal balance of scarcity and cost. NGC ID# 338K, PCGS# 8987

1880 Double Eagle, AU55
Scarce, Overlooked P-Mint Issue

- 4250 1880 AU55 NGC.** Khaki and reddish-gold patina colors surfaces that display bold devices and a hint of rub over the high points of the design. Field chatter is in line with the Choice AU assessment. The 1880 claims a mintage of 51,420 coins and had long been overlooked. Collectors now realize just how scarce this Philadelphia issue is, especially with good eye appeal. NGC ID# 26BA, PCGS# 8992

- 4251 1880-S AU58 PCGS.** Tall S. A pumpkin-gold and lime-green near-Mint representative. The well struck surfaces exhibit nearly unbroken cartwheel luster, and are less abraded than expected given the coin's brief service in Old West commerce. NGC ID# 26BB, PCGS# 8993

- 4252 1881-S MS61 PCGS. CAC.** Ex: Teich Family Collection. CAC-endorsed and eye-appealing for the grade, this lower-end Mint State 1881-S double eagle boasts vibrant cartwheel luster and rich lemon-gold coloration. Light surface chatter is all that limits the grade. Finer examples are elusive.
 Ex: *Dallas Signature* (Heritage, 3/2013), lot 8284. NGC ID# 26BD, PCGS# 8995

1890 Twenty Dollar, MS62
Elusive CAC-Approved Example

- 4253 1890 MS62 PCGS. CAC.** Mint State examples of the 1890 double eagle are elusive and primarily grade in the MS60 to MS62 range. Finer coins are rarely seen. This MS62 example remains accessible for most enthusiasts and boasts the added appeal of the CAC endorsement. The strike is sharp, and original cartwheel luster illuminates the fields in frosty yellow-gold hues. Scattered abrasions determine the grade. CAC: 21 in 62, 2 finer (8/16). NGC ID# 26BX, PCGS# 9013

- 4254 1899 MS64+ PCGS.** Available in MS64, the 1899 double eagle becomes conditionally scarce at the Gem level. This Plus-designated near-Gem showcases frosty orange-gold luster and sharp devices. A few light marks on Liberty's cheek preclude the MS65 assignment. PCGS lists 27 finer representatives (8/16). NGC ID# 26CM, PCGS# 9035

**1902-S Liberty Twenty, MS63
Seldom Encountered in Finer Grades**

- 4255 1902-S MS63 NGC.** The attractive yellow and orange-gold surfaces of this pleasing Select specimen are lightly marked, with vibrant mint luster and a single diagonal alloy streak in the right obverse field. The design elements are sharply detailed and overall eye appeal is outstanding. The 1902-S Liberty double eagle is very scarce in finer grades. NGC ID# 26CV, PCGS# 9042

- 4256 1903 MS64 PCGS.** The 1903 is not nearly as available as the following year's issue. Only 287,200 double eagles were struck in 1903 compared to 6.2 million in 1904. Frosty luster abounds over yellow-gold surfaces with copper alloy spots across the obverse. The reverse has the look of a higher-graded coin. NGC ID# 26CW, PCGS# 9043

- 4257 1904 MS64+ PCGS.** This high-end near-Gem has undeniable prooflike tendencies. Reflective fields generate partial contrast against fully struck relief elements. Well-preserved surfaces barely miss out on qualifying for a full Gem assessment, but that does not affect the overall appeal. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65
Vivid Color and Luster**

- 4258 1904 MS65 PCGS.** From a mintage of more than 6.2 million pieces, the 1904 Liberty double eagle is available in high grade and a favorite choice of type collectors. This delightful Gem is sharply detailed throughout, with vivid orange-gold surfaces and vibrant mint luster on both sides. No mentionable distractions are evident. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Lustrous and Eye-Appealing**

- 4259 1904 MS65+ NGC.** Collectors and investors alike flock to the 1904 Liberty double eagle for its availability in high grade with strong eye appeal. But above MS65, even this issue becomes elusive. The present Plus-designated Gem rides the fence between affordability and conditional scarcity. The strike is sharp, and the frosty yellow-gold surfaces are beautifully preserved. Liberty's cheek is particularly clean. NGC ID# 26CY, PCGS# 9045

SAINT-GAUDENS DOUBLE EAGLES

- 4260 1907 Arabic Numerals MS64 PCGS.** Superior mint luster and bright orange-gold color. A few small ticks widely distributed over each side are all that prevent an even higher grade. Nice looking coin. NGC ID# 26F5, PCGS# 9141

**1907 Double Eagle, MS65
Arabic Numerals, First-Year Type**

- 4261 1907 Arabic Numerals MS65 PCGS.** This Gem first-year type coin offers completely delineated columns on the Capitol and clear fingers on the torch hand. Elements of rose and green accent light honey-gold surfaces over which coruscating luster rolls. Small marks hidden within the drapery, feathers, and, to a lesser extent the fields, define the grade. NGC ID# 26F5, PCGS# 9141

- 4262 1908 No Motto MS65 PCGS.** An ideal No Motto type coin, this Gem double eagle offers softly lustrous, medium yellow-gold surfaces and uniformly strong strike detail. Marks are scant and unobtrusive. A couple of small alloy spots occur on the obverse. NGC ID# 26F6, PCGS# 9142

- 4263 1908-D No Motto MS64 PCGS.** Short Rays Obverse. A lustrous caramel-gold example. Only lightly abraded except for moderate scuffs on the drapery below the torch. Scarcer than the Philadelphia No Motto variety in better Mint State grades. NGC ID# 26F7, PCGS# 9143

- 4264 1909-S MS64+ PCGS. CAC.** 30th Anniversary Green Label Holder. The availability of this San Francisco issue declines significantly above MS64. The present Plus-graded coin displays a sharp strike and satiny yellow-gold luster. A few stray marks are not out of line for the grade. CAC-approved and appealing. NGC ID# 26FE, PCGS# 9153

- 4265 1911 MS63 PCGS.** The pleasing orange-gold surfaces of this attractive Select specimen are lightly marked and the design elements are well-detailed, with just a touch of softness on the Capitol. Frosty mint luster adds to the considerable eye appeal. NGC ID# 26FK, PCGS# 9157

4266 1911-D MS65+ PCGS. CAC. A suitable Gem-quality type coin for the collector seeking to stray from the better-known common dates such as the 1924 and 1927. The strike is sharp, and each side displays frosty orange-gold luster. The Plus designation/CAC green label combination is difficult to pass up. NGC ID# 26FK, PCGS# 9158

4267 1914-D MS65 NGC. A lustrous lemon-gold Gem with a pleasing strike and impressively unmarked surfaces. Although collectible in the present grade, the 1914-D is a costly acquisition any finer. Certified in a former generation holder. NGC ID# 26FT, PCGS# 9165

1923-D Saint-Gaudens Twenty, MS66+ Frosty Type Coin

4268 1923-D MS66+ PCGS. Generous eye appeal dominates this high-end Premium Gem 1923-D Saint-Gaudens type coin. A few minor grazes below Liberty's right (facing) arm and on the knee are all that prevent an even finer grade. The strike is sharp, and frosty wheat-gold luster glows on the surfaces. Finer examples of this date are scarce. NGC ID# 26G6, PCGS# 9176

4269 1926 MS65 PCGS. Its availability in high grade makes the 1926 Saint-Gaudens double eagle a popular choice with type collectors. This attractive Gem displays sharply detailed design elements and vibrant mint luster on both sides, with well-preserved orange-gold surfaces and outstanding eye appeal. NGC ID# 26GD, PCGS# 9183

1927 Double Eagle, MS66 Coruscating Luster

4270 1927 MS66 PCGS. The 1927 is one of three later date Philadelphia issues that are often represented in type sets, along with the 1924 and 1928. Coruscating luster rolls over this rose-gold Premium Gem double eagle. Other desirable qualities include careful preservation and good strike detail, though a touch of blending is noted over the Capitol. A loupe is required to bring microscopic flecks into view. There are 20 higher-graded submissions at PCGS (8/16). NGC ID# 26GG, PCGS# 9186

CALIFORNIA FRACTIONAL GOLD

4271 1853 Liberty Round 50 Cents, BG-428, R.3, MS64 PCGS. An accessible Period One round half dollar made by Antoine Louis Nouzillet. This example is high-end for the issue and conditionally rare as such. The strike is sharp on the obverse and slightly weak on the central reverse. Bright yellow-gold surfaces exhibit satiny luster without detracting abrasions. Population: 6 in 64, 1 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 2BKK, PCGS# 10464

1871 BG-717 California Gold, MS67 Octagonal Liberty 25 Cents

4272 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 NGC. This extraordinary Superb Gem exhibits bold details and frosty luster with brilliant yellow-gold surfaces. This is an impressive example of the craftsmanship of Frontier, Deviercy & Co. Census: 5 in 67 (1 in 67★), 0 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 2BMU, PCGS# 10544

4273 1872 Liberty Head Octagonal 25 Cents, BG-725, High R.5, MS66 PCGS. As of (8/16), the single-finest PCGS-certified example of the die marriage. NGC has yet to certify any above the MS65 level. A flashy sun-gold Premium Gem with minor incompleteness of strike at the centers. Smooth aside from minor imperfections near the denominator and the D in DOLLAR. A scarce "Large Liberty Head" Frontier & Bellemere variety. NGC ID# 2BN7, PCGS# 10552

4274 1852 Indian Octagonal 25 Cents, BG-799U, High R.5, MS66 Prooflike NGC. The (8/16) NGC Census records just seven examples of BG-799U, and only one piece (graded MS67 Deep Prooflike) is certified finer. This flashy lemon-gold Premium Gem has a good strike and exemplary surfaces. Mint-made "ghosts" from the stars are prominent near the top of the wreath. NGC ID# BNKL, PCGS# 710647

4275 1880 Indian Octagonal 25 Cents, BG-799X, R.3, MS66 Prooflike NGC. This octagonal quarter dollar issue is attributed to maker F.H. Noble of Chicago. The present Premium Gem is in the later die state, showing the wreath bow recut. The prooflike fields and yellow-gold color are hallmarks of the variety. This piece is well-struck and is tied with three others as the finest Prooflike coin at NGC (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# BNLL, PCGS# 710650

4276 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS66 Deep Prooflike NGC. A prominently mirrored and unabraded lemon-gold example. This Christopher Ferdinand Mohrig variety always has a crudely formed date. Portions of the wreath are indistinct, as reworked by the engraver from the reverse's prior BG-868 appearance. Census: 3 in 66 Deep Prooflike, 1 finer as 67 Prooflike (8/16). NGC ID# 2BV2, PCGS# 910730

**1859 BG-902 Liberty Octagonal Half
MS67, Single Finest at PCGS**

4277 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS67 PCGS. A well struck and essentially flawless orange-red representative. The fields are semiprooflike. Frontier, Deviercy & Co. was the maker. PCGS rarely assigns the MS67 grade to California small denomination gold. As of (8/16), PCGS has certified 123 examples of BG-902, but only the present piece has attained the MS67 level, with none finer. NGC ID# 2BVW, PCGS# 10760

4278 1876 Indian Octagonal 50 Cents, BG-953, R.5, MS65 Deep Prooflike NGC. Type Two, No CAL reverse. An elusive Period Two octagonal half dollar made by Christopher Mohrig of San Francisco. This example is among the finest Deep Prooflike pieces certified. The strike is even and sharp, and the mirrored fields display pleasing cameo contrast on each side. There are no distractions. Census: 3 in 65 Deep Prooflike, 0 finer (8/16). *From The Twelve Oaks Collection, Part II* NGC ID# 2BXP, PCGS# 910811

4279 1859 Liberty Round 50 Cents, BG-1002, High R.4, MS66 PCGS. Die State I without the die cracks and extensive rust seen on later examples. The sun-gold surfaces are semiprooflike and void of distractions. Issued by Frontier, Deviercy & Co. Population: 6 in 66, 0 finer (8/16). NGC ID# 2BYB, PCGS# 10831

4280 1876/5 Indian Octagonal Dollar, BG-1129, R.4, MS64 PCGS. A moderately scarce Period Two octagonal dollar struck by Christopher Mohrig of San Francisco, yellow-gold plated on a baser core, per the Breen-Gillio reference. The strike is even and well-executed on the wreath and portrait. Prooflike fields add to the visual appeal. Elusive this fine. Population: 16 in 64, 2 finer (8/16). NGC ID# 2C3X, PCGS# 10940

GSA DOLLARS

4281 1881-CC GSA MS66 NGC. CAC. VAM-3. Caramel-gold and ocean-blue toning graces the upper and right-side portions of the obverse. The remainder of this lustrous coin remains white. The strike is crisp except on the bow and stems of the wreath. The obverse field is practically pristine. A box is included, without certificate. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

1882-CC GSA Dollar, MS66+

4282 1882-CC GSA MS66+ NGC. CAC. Light butter-gold toning visits the right obverse field, but the rest of this lustrous high grade Carson City type coin remains brilliant. The strike is intricate and the preservation is exceptional. The fields exhibit minor clash marks. The box and certificate of GSA issue accompany the lot. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

4283 1883-CC GSA MS65 Prooflike NGC. VAM-5. This sharply struck Gem is brilliant and exhibits vibrant luster. The fields are refreshingly free from abrasions, and the cheek shows only unimportant contact. The early die state of VAM-5 with a dash below the second 8 in the date. No box or certificate accompanies. NGC ID# 254H, PCGS# 518870 Base PCGS# 7145

**1883-CC VAM-5B GSA Dollar
MS66 Prooflike**

4284 1883-CC GSA MS66 Prooflike NGC. VAM-5B. A snow-white GSA Carson City Premium Gem. The fields are flashy and the reverse is exceptionally devoid of marks. The reverse field is smooth save for minor contact beneath the wings. An early die state of VAM-5B with a remnant of a dash below the second 8 in the date. No box or certificate is included. NGC ID# 254H, PCGS# 518870 Base PCGS# 7145

4285 1883-CC GSA MS65 Deep Mirror Prooflike NGC. VAM-5B. A brilliant Gem that boasts exemplary white-on-black cameo contrast. The strike is good and no marks are worthy of mention. No box or certificate is included. VAM-5B is a middle die state of VAM-5, with the clash marks of VAM-5A lapped away, and the clash marks of VAM-5C yet to occur. NGC ID# 254H, PCGS# 518871 Base PCGS# 97145

4286 1884-CC GSA MS66+ PCGS. VAM-7A. Light straw-gold toning adorns lustrous and boldly struck surfaces. Well preserved despite unobtrusive marks above Liberty's eye. The later and extensively cracked die state of VAM-7. No box or certificate accompanies the lot. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

4287 1885-CC GSA MS66 NGC. CAC. VAM-3. Light chestnut toning visits this lustrous and sharply struck high grade GSA dollar. The reverse is remarkably unabraded, and the obverse is also exquisite a solitary tick on the chin and a few faint mint-made roller marks on the right field. The lowest mintage of the Carson City Morgan issues. Without box or certificate. *Ex: Long Beach Signature (Heritage, 2/2011), lot 4175.* NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

4288 1885-CC GSA MS64 Deep Mirror Prooflike NGC. CAC. VAM-3. A nicely struck and brilliant Gem. Frosty motifs rise above glassy fields. A loupe confirms scattered minor contact. An undesignated late die state of VAM-3 that no longer shows die fill within the loops of the mintmark. Without a box or certificate. NGC ID# 254M, PCGS# 518877 Base PCGS# 97161

1890-CC VAM-6 GSA Dollar, MS62

- 4289 1890-CC GSA MS62 NGC. VAM-6.** Light silver-gray toning visits this lustrous and well struck silver dollar. The fields are surprisingly unabraded, though the cheek exhibits minor marks. A scarce GSA issue despite a reported mintage of more than 2.3 million pieces. The flag of the 1 is repunched north. A box accompanies, with unnumbered certificate. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

MORGAN DOLLARS

- 4290 1878 8TF Diagonal In 8, 8 Tailfeathers, VAM-17, MS65 PCGS.** A readily available variety, with LIBERTY doubled and slight doubling visible on the stars. A diagonal die chip in the lower loop of the 8 is diagnostic. The obverse is radiantly toned in luminescent shades of pink, orange, blue, and violet, while the reverse is two-toned in brilliant white and tangerine-orange. An overall sharp strike reveals a clean cheek and neck on Liberty and only a few inconsequential field marks for the assigned Gem grade. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4291 1878 8TF Doubled Date, VAM-18, MS65 PCGS.** VAM-18 shares the same dramatically doubled head die as VAM-20, showing the spread plainly on the date, stars, E PLURIBUS UNUM, and LIBERTY. The tail die on VAM-18 is also dramatically doubled, most plainly so on the peripheral legends, wreath, and IN GOD WE TRUST. This Gem example is razor-sharp and frosty. The obverse displays brilliant luster with a crescent of rainbow toning along the upper border, while the reverse is almost consumed in multicolor ribbons. NGC ID# 253H, PCGS# 133819 Base PCGS# 7072
- 4292 1878 8TF Eight Tailfeathers, Doubled Date, VAM-20, MS65 PCGS.** A Hot 50 Variety. It is a wonder this variety is not among the Top 100 — The obverse is dramatically die doubled on the date, stars, neck truncation, LIBERTY, and E PLURIBUS UNUM. The reverse is also die doubled, most obviously on the wreath, peripheral legends, and the arrows. This Gem example displays vibrant luster with a hint of champagne color. The strike is sharp, and there are no significant abrasions. The reverse fields show mild reflectivity. NGC ID# 253H, PCGS# 133821 Base PCGS# 7072
- 4293 1878-CC MS65 PCGS.** A nearly flawless and highly lustrous Gem, this debut Carson City Morgan dollar features brilliant and untuned silver surfaces with wonderful eye appeal. NGC ID# 253M, PCGS# 7080
- 4294 1878-CC MS65 PCGS.** Impressive golden-brown, lilac-red, and navy-blue toning enriches portions of the borders, most prominently within PLURIBUS, STATES, and ONE. Lustrous and well struck. The first Carson City Morgan dollar issue is surprisingly collectible in better Mint State grades. NGC ID# 253M, PCGS# 7080
- 4295 1878-CC MS65+ PCGS. CAC.** Virtually brilliant centers display strongly struck motifs surrounded by beautiful specks of gold, blue, teal, and purple toning around the borders. An overlay of thick, frosty luster heightens the visual appeal of this high-end Gem, rightfully acknowledged as such by PCGS and CAC. NGC ID# 253M, PCGS# 7080
- 4296 1878-CC MS64 Prooflike PCGS. CAC.** Original, frosty “skin” dresses the devices of this near-Gem Prooflike 1878-CC Morgan dollar, while the fields exhibit a dazzling balance of reflectivity and cartwheel luster. Cameo contrast appears on each side. The strike is sharp, and abrasions are minimal. Neither side exhibits mentionable toning. NGC ID# 253M, PCGS# 7081

- 4297 1878-CC MS63 Deep Mirror Prooflike PCGS.** A razor-sharp strike complements the thick, frost-white luster that illuminates the central devices. The fields are also untuned and exhibit deep mirroring. Light, scattered ticks limit the grade but pose minimal distraction. Deep Mirror Prooflike examples of this inaugural Carson City Morgan are highly sought-after. NGC ID# 253M, PCGS# 97081

- 4298 1878-S MS66+ PCGS. CAC.** Diagonal roller marks appear across each side. This brilliant, partially prooflike dollar is strongly impressed with terrific visual appeal. The first-year 1878-S is collectible through Premium Gem, but examples are seldom found so nice. PCGS and CAC report 36 and 15 submissions finer, respectively (8/16). NGC ID# 253R, PCGS# 7082

- 4299 1878-S MS66+ PCGS. CAC.** This Plus-graded Premium Gem Morgan dollar represents the first year of the design, an important consideration for branch mint type collectors. The design elements are sharply detailed and the well-preserved surfaces show a mix of vibrant mint luster and prooflike reflectivity. PCGS has graded 36 numerically finer examples (8/16). NGC ID# 253R, PCGS# 7082

1879-CC Morgan Dollar, MS61 VAM-3, Capped Die Variety

- 4300 1879-CC Capped Die, VAM-3, Top 100, MS61 PCGS.** A Top 100 Variety. The Large over Small CC mintmark shows an awkward attempt to efface the overpunching that characterizes the Capped Die variety. Multiple die chips surround the engraver's crude efforts. Otherwise, the fields and devices are remarkably free of marks or abrasions. Frosty surfaces display soft luster and a strike that is sharp except for the usual over-ear incompleteness. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088
- 4301 1879-S Reverse of 1878 MS64+ PCGS. CAC.** A Top 100 Variety. The elusive Reverse of 1878 variant, seldom seen in Gem condition. This high-end MS64 coin displays radiant luster and partially reflective fields. The obverse has mottled sun-orange toning, the reverse lighter champagne. Liberty's cheek is surprisingly clean. NGC ID# 253W, PCGS# 7094
- 4302 1879-S Reverse of 1878, VAM-4, MS64 PCGS.** A Top 100 Variety. Rich apple-green and golden-brown toning embraces this coruscating and crisply struck Choice silver dollar. Marks are minimal and the eye appeal is compelling. The 1879-S is a plentiful date, but a supermajority of pieces are the Third Reverse subtype. Examples with the Reverse of 1878 are scarce, despite more than a dozen such die marriages. NGC ID# 253W, PCGS# 133856 Base PCGS# 7094
- 4303 1879-S Reverse of 1878, VAM-51, MS63 Prooflike PCGS.** A Top 100 Variety. A die line within the right (facing) wing helps attribute this challenging Reverse of 1878 die marriage. The brilliant fields are prominently mirrored, and contrast with frosty motifs. The strike is sharp, and the left obverse displays minor marks. NGC ID# 253W, PCGS# 40999 Base PCGS# 7095
- 4304 1880-CC 8 Over High 7, VAM-5, MS65 PCGS.** A Top 100 Variety. The obvious 7 underdigit in the date on VAM-5 makes this variety among the top Morgan VAMs known. Traces of champagne color accent this Gem example, while the fields exhibit a hint of reflectivity around well-struck design elements. Liberty's cheek shows a single small mark upon close examination. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1880-CC Dollar, MS65+
8/7, Reverse of 1878**

- 4305 1880-CC 8/7, Reverse of 1878, VAM-7, MS65+ PCGS Secure.** A Hit List 40 Variety. Reverse of 1878. Double neck clashes, Clashed n. Technically VAM-7A, although the late die state is not noted on the holder. The Reverse of 1878 makes this a popular variety, while the remnants of an underdigit 7 below the second 8 adds to the appeal. Brilliant-white with intense frosty luster, this minimally marked Carson City Gem is sharply struck and extremely well-preserved to earn the PCGS Plus distinction. A few tiny toning flecks are noted near U of UNUM to pedigree the piece. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

- 4306 1880-CC MS66 PCGS.** This delightful Premium Gem exhibits well-detailed design elements and virtually pristine surfaces, with a few hints of greenish-gold toning. Vibrant mint luster on both sides adds to the outstanding visual appeal. PCGS has graded 34 numerically finer examples (8/16). NGC ID# 2542, PCGS# 7100

**1880-CC Silver Dollar, MS66+
Semiprooflike Fields**

- 4307 1880-CC MS66+ PCGS.** Semireflective fields give this high-end Premium Gem 1880-CC Morgan dollar excellent visual appeal, which complements the clean cheek on Liberty and the well-defined high points of the design. Traces of light champagne toning appear on each side. Finer examples of this early Carson City Morgan are rarely encountered (8/16). NGC ID# 2542, PCGS# 7100

- 4308 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS65 PCGS. CAC.** Frosty, glowing mint luster delivers strong eye appeal on this Gem 1880-CC Morgan, with neither side exhibiting mentionable toning. The coin is well-struck and without significant abrasions. Only a single graze on Liberty's jaw prevents a Premium Gem designation. CAC-endorsed in a green label holder. PCGS# 41142 Base PCGS# 7100

- 4309 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS66 PCGS.** The obverse of this Premium Gem is toned in bands of golden-brown, lilac, sky-blue, sea-green, and yellow-rose. In contradiction, the reverse has only a faint champagne hue. Both sides of this eye-appealing coin have sharp design features and frosty surfaces. PCGS has only certified 34 finer pieces (8/16).
Ex: *Central States Signature* (Heritage, 4/2008), lot 2612; *Summer FUN Signature* (Heritage, 6/2008), lot 1303. PCGS# 41142 Base PCGS# 7100

- 4310 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS.** A Top 100 Variety. An "ear" on the upper-left outside corner of the second 8 in the date is the hallmark of this overdate variety. The coin is well-struck and mostly brilliant, showing golden toning only around the outer reverse periphery. A few light grazes on Liberty's cheek are all that limit the grade. NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

- 4311 1880-S MS67+ PCGS.** Medium S. Booming luster, an exacting strike, and virtually mark-free surfaces confirm status as a Superb Gem. Close to brilliant, though the reverse displays hints of silver-gray, and we note a few small freckles of obverse brown patina. NGC ID# 2544, PCGS# 7118

- 4312 1880-S MS67+ PCGS. CAC.** Large S. Beautiful arcs of yellow-gold, ruby-red, sky-blue, and apple-green congregate across the left obverse border of this lustrous Superb Gem. The reverse is untuned save for a generous peripheral band of golden-brown. Splendidly preserved and well-struck.
Ex: *October Signature* (Heritage, 10/2009), lot 939. NGC ID# 2544, PCGS# 7118

- 4313 1880-S MS67+ PCGS. CAC.** Captivating, mint-fresh luster rolls in dazzling cartwheels around this untuned and unabraded 1880-S silver dollar. The strike is sharp, and the type coin appeal is superb. It is difficult to envision an aesthetically finer 1880-S Morgan in this grade. NGC ID# 2544, PCGS# 7118

- 4314 1880-S MS67+ PCGS. CAC.** Medium S. A peripheral band of orange-red toning frames the brilliant fields and devices. This CAC-endorsed Superb Gem exhibits profound eye appeal with frosty devices and radiant fields. The strike is bold, and only inconsequential grazes determine the grade. NGC ID# 2544, PCGS# 7118

- 4315 1880/9-S MS67 PCGS. CAC. VAM-11.** A Hot 50 Variety. Some die polishing lines inside the 0 in the date and a few artifacts on the digit itself identify this popular *Guide Book* variety. Well-detailed and impeccably preserved, this lustrous Superb gem offers terrific visual appeal. Population: 60 in 67 (7 in 67+), 3 finer. CAC: 22 in 67, 3 finer (8/16). NGC ID# 2544, PCGS# 7122

- 4316 1881 MS66 PCGS.** Shades of magenta, golden-brown, and lavender toning visit the impeccably preserved surfaces of this impressive Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded five numerically finer examples (8/16). NGC ID# 2546, PCGS# 7124

- 4317 1881 MS66 PCGS.** Although plentiful in lower grades, the 1881 Morgan dollar becomes elusive in Premium Gem condition and is rarely seen better. This brilliant, silver-white coin displays a sharp strike and unmarked surfaces. PCGS records five numerically finer submissions (8/16). NGC ID# 2546, PCGS# 7124

- 4318 1881-CC MS66 PCGS. VAM-2.** A well struck Carson City Morgan that boasts vibrant luster and only a wisp of golden patina. The fields are splendidly smooth and the portrait shows only incidental contact. NGC ID# 2549, PCGS# 7126

- 4319 1881-CC MS66 PCGS. CAC.** This spectacular Premium Gem offers sharply detailed design elements throughout, and the well-preserved surfaces radiate vibrant mint luster and outstanding eye appeal. A few hints of pink and pale gold toning enhance the overall presentation. NGC ID# 2549, PCGS# 7126

- 4320 1881-CC MS64 Deep Mirror Prooflike NGC. CAC.** The portrait and eagle are fully struck and covered in a thick layer of frost. Amazingly contrasted with deeply reflective fields. Surprisingly clean for the grade. Housed in a former generation holder with a green approval sticker. NGC ID# 2547, PCGS# 97127

- 4321 1881-S MS67+ PCGS.** 30th Anniversary Green Label Holder. This is a spectacularly well-preserved Morgan type coin, showing razor-sharp motifs and radiant cartwheel luster. The satiny surfaces display subtle reflectivity in the fields, and there are no abrasions of note. Visual appeal is outstanding. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, Dazzling MS68
Uncollectible Finer**

- 4322 1881-S MS68 PCGS.** A spectacular type coin and an almost unsurpassed example of the 1881-S dollar, this high-end Superb Gem displays dazzling, frosty mint luster that cartwheels freely around glowing fields. The strike is sharp, and there are no abrasions. PCGS has seen two numerically finer submissions, NGC none (8/16). NGC ID# 2549, PCGS# 7130

- 4323 1882 MS66 PCGS.** This sharply detailed Premium Gem exhibits virtually pristine surfaces, with vibrant mint luster on both sides and pleasing highlights of golden-tan and lavender toning. PCGS has graded 10 numerically finer examples (8/16). NGC ID# 254A, PCGS# 7132

- 4324 1882 MS66+ PCGS.** This sharply defined Premium Gem is an exquisite beauty with delicate peripheral gold toning around part of the obverse and reverse, with the balance brilliant and untuned on both sides. Sharply struck with frosty silver surfaces. PCGS has only certified 10 finer examples (8/16). NGC ID# 254A, PCGS# 7132

**1882 Morgan Dollar, MS65
Deep Mirror Prooflike Specimen**

- 4325 1882 MS65 Deep Mirror Prooflike PCGS.** The well-preserved surfaces of this impressive Gem show dramatic prooflike reflectivity in the fields, contrasting profoundly with the sharply detailed, richly frosted design elements. A few hints of golden-tan toning are evident on both sides. Population: 34 in 65 (1 in 65+) Deep Mirror Prooflike, 1 finer (8/16). NGC ID# 254A, PCGS# 97133

- 4326 1882-CC MS65 Deep Mirror Prooflike NGC.** This sharp Gem displays considerable cameo contrast with warm halo peripheral toning in lovely golden hues. The mirroring in the fields is excellent. Only a few trivial grazes on Liberty's jaw prevent an even finer Deep Prooflike grade. NGC ID# 254B, PCGS# 97135

- 4327 1882-O MS65 PCGS.** The obverse of this Gem is deeply colored with a mix of purple, green, magenta, and yellow, while the reverse is toned only around the perimeter. A sharply struck example with no distracting abrasions. Finer examples are scarce.
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4226. NGC ID# 254C, PCGS# 7136

- 4328 1882-O/S Recessed, VAM-4, MS64 PCGS Secure.** A Top 100 Variety. Untoned, satiny mint luster gives this Choice VAM-4 example excellent eye appeal. A few minor grazes on Liberty's cheek prevent a Gem designation, although none are particularly noticeable to the unaided eye. The eagle's breast and the hair above Liberty's ear show strike weakness, as usual for this date. The overmintmark feature is clear. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

- 4329 1882-S MS67+ PCGS.** The 1880-S, 81-S, and 82-S Morgan dollars are encountered in high grades more often than any other issues of the Morgan dollar series, and these pieces are invariably well-struck and highly lustrous with satiny silver surfaces. This example is no exception with untuned silver surfaces and hints of field reflectivity. PCGS has only certified 60 numerically finer pieces (8/16). NGC ID# 254F, PCGS# 7140

- 4330 1883-CC MS66+ PCGS. CAC.** The scarcity of finer 1883-CC dollars and the delightful multicolor toning on the obverse make this lustrous Plus-graded Premium Gem highly appealing. There are no mentionable abrasions, and the strike is boldly rendered. NGC ID# 254J, PCGS# 7144

**1883-CC Dollar, MS67
Exceptional Carson City Type Coin**

- 4331 1883-CC MS67 PCGS.** Smooth and frosty, this brilliant Superb Gem example makes an ideal representative for Carson City type. Liberty's cheek is clean and glows with pearlescent silver luster, while the fields are entirely free of all but the most innocuous grazes. The strike is suitably sharp for the MS67 grade, with only five pieces graded numerically finer (8/16). NGC ID# 254J, PCGS# 7144

**1883-CC Silver Dollar, MS67
VAM-8, Repunched Date**

- 4332 1883-CC MS67 NGC. VAM-8.** A desirable high grade Carson City type coin. Dramatic jade-green, plum-red, and golden-brown toning dominates the left obverse and visits the upper left reverse margin. Well struck and lustrous. A lens reveals minor facial marks obscured by the rich colors. The 18 in the date is repunched. NGC ID# 254J, PCGS# 7144

- 4333 1883-CC MS65+ Deep Mirror Prooflike PCGS. CAC.** Struck from clashed, heavily polished dies with fully mirrored fields and frost-white, bold design elements. A few stray marks are almost unnoticed in light of the stark white-on-black contrast. Finer Deep Mirror Prooflike 1883-CC dollars will be difficult to locate. NGC ID# 254H, PCGS# 97145

**1883-CC Dollar, MS66 Deep Mirror Prooflike
Incredible Black-and-White Contrast**

4334 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC. The 1883-CC was released en masse during the 1970s, and many of the coins distributed display Prooflike or Deep Mirror Prooflike surfaces. Premium Gem DMPL dollars are scarcely seen but inevitably appealing when found. This piece is completely brilliant with jet-black fields and thickly frosted motifs. Softness over the centers is expected. PCGS reports two Deep Mirror Prooflike submissions finer. CAC: 23 in 66, 0 finer (8/16). NGC ID# 254H, PCGS# 97145

4335 1883-S MS62 PCGS. Thoroughly lustrous fields and well-struck design elements are the hallmarks of this Mint State semikey Morgan dollar. Scattered abrasions limit the grade, as expected. Both sides display dusky lavender-gold toning. NGC ID# 254K, PCGS# 7148

**1883-S Dollar, Lustrous MS64
S-Mint Condition Rarity**

4336 1883-S MS64 ANACS. This is a highly lustrous Choice dollar from an issue that is notoriously difficult to find in high grades. The extreme centers are sharp, as are other other motifs. Brilliant interiors progress outward toward peripheries that exhibit daubs of golden-orange color. Rarely seen finer. Housed in a small size holder. NGC ID# 254K, PCGS# 7148

**1884 Morgan Dollar, MS67
Exceptional Surfaces, Visually Impressive**

4337 1884 MS67 PCGS. A tinge of reddish-gold toning deepens to russet and gunbarrel-blue shades at the borders of this razor-sharp Superb Gem dollar. While the 1884 Philadelphia issue is readily available in lesser grades, the MS67 level is grudgingly granted by either service, and finer coins are virtually unobtainable. This smoothly lustrous coin is nearly mark-free and visually impressive. Population: 59 in 67 (9 in 67+), 3 finer (8/16). NGC ID# 254L, PCGS# 7150

**1884-CC Silver Dollar, MS67
Dramatic Crescent Toning**

4338 1884-CC MS67 PCGS. Occasionally — but not often — 1884-CC dollars are available with distinctive and attractive, naturally acquired toning from long years of vault storage. This example displays a wide crescent of earthy shades including forest-green, cerulean-blue, plum-red, and amber-orange. The nearly unmarked fields are reflective and semiprooflike in bold contrast to the heavily frosted central motifs. PCGS reports just three numerically finer coins (8/16). NGC ID# 8BBF, PCGS# 7152

**1884-CC Dollar, Near-Prooflike MS67
Exceptional Carson City Example**

4339 1884-CC MS67 PCGS. The surfaces are reflective and prooflike in most areas, but enough residual mint frost exists to preclude the Prooflike designation. Still, this is a stone-solid Superb Gem, with a pinpoint-sharp strike over the ear and across the eagle's breast. Abrasions are few and far between. Blazing brilliant-white, the silver surfaces display nearly unlimited eye appeal. PCGS and NGC combined show just four numerically finer pieces (8/16). NGC ID# 8BBF, PCGS# 7152

4340 1884-CC MS66 Prooflike PCGS. 30th Anniversary Green Label Holder. The exceptional preservation and refreshing, untuned, cameo-contrasted surfaces of this Premium Gem Prooflike Carson City Morgan yield tremendous visual appeal. The strike is razor-sharp, and there are no significant distractions. Only a single Prooflike Superb Gem is finer at PCGS (8/16). NGC ID# 254M, PCGS# 7153

4341 1884-S AU58 NGC. Due to the scarcity and correspondingly high cost of Mint State 1884-S dollars, many collectors seek to acquire this date in AU58. The present such coin is fully detail and shows only the briefest points of rub on the high parts of the design while retaining virtually full luster in the fields. There are no significant abrasions, and each side displays light golden toning. NGC ID# 254P, PCGS# 7156

4342 1884-S AU58 PCGS. Grayish-violet and gold toning appear over both sides of this near-Mint 1884-S Morgan dollar. This is an important opportunity due to the scarcity of Mint State examples. The surfaces have nearly full satin luster beneath the toning, with a trace of rub on the high points. NGC ID# 254P, PCGS# 7156

4343 1884-S AU58 PCGS. Lightness of strike on the eagle's breast and above Liberty's ear is slightly exaggerated by a brush of high-point friction, although this near-Mint 1884-S dollar remains vibrantly lustrous in the fields. Neither side is significantly toned, and abrasions are minimal for the grade. NGC ID# 254P, PCGS# 7156

4344 1884-S AU58 PCGS. Radiant luster remains in the fields of this near-Mint 1884-S silver dollar, while slight friction appears over the high points of the satiny devices. Light marks on Liberty's cheek are as expected for the grade. This semikey-date Morgan is mostly brilliant with a hint of pale champagne color. NGC ID# 254P, PCGS# 7156

4345 1884-S AU58 NGC. Just the slightest trace of actual wear shows on the well-detailed design elements of this attractive near-Mint specimen and the pleasing surfaces are lightly abraded, aside from a thin scratch on Liberty's cheek. Shades of golden-brown and lavender toning visit the surfaces and traces of original mint luster remain intact. NGC ID# 254P, PCGS# 7156

4346 1884-S AU58 PCGS. Radiant cartwheel luster persists in the fields of this near-Mint 1884-S dollar, while the satiny devices show a trace of high-point friction. Wisps of light champagne toning are present, although the coin appears brilliant at first glance. This semikey issue is elusive any finer. NGC ID# 254P, PCGS# 7156

4347 1884-S AU58 PCGS. Light butter-gold patina visits the margins of this partly lustrous silver dollar. Small marks are scattered, consistent with brief circulation. The 1884-S is a famous conditional rarity, seldom encountered in Uncirculated grades. NGC ID# 254P, PCGS# 7156

4348 1885 MS66 Deep Mirror Prooflike NGC. The sharply detailed design elements of this spectacular Premium Gem have a thick coat of mint frost that contrasts boldly with the deeply reflective fields. The surfaces are well-preserved and show subtle hints of pale gold toning. Census: 55 in 66 (2 in 66+, 2 in 66 ★, 1 in 66+★) Deep Mirror Prooflike, 5 finer (8/16). NGC ID# 254R, PCGS# 97159

4349 1885-CC MS66 PCGS. This impressive Premium Gem exhibits sharply detailed design elements, with some spidery die cracks through the peripheral devices on both obverse and reverse. The impeccably preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, Frosty MS66+ Seldom Seen in Higher Grades

4350 1885-CC MS66+ PCGS. CAC. The 1885-CC is a popular Morgan dollar issue due to its low mintage of 228,000 pieces. Nonetheless, enough representatives surfaced in the GSA sales of the early 1970s that the date is usually available for collectors. This is a conditionally elusive Plus-graded Premium Gem, showing a bold strike and frosty, untuned mint luster. A few faint grazes in the left obverse field prevent an even finer grade. NGC ID# 254S, PCGS# 7160

4351 1885-CC Doubled Dash, VAM-4, MS65 PCGS. A Hot 50 Variety. VAM-4 shows clashing on both sides and a thick "dash" below the second 8 in the date. Two faint die lines near the RIB in PLURIBUS should not be mistaken by the novice for hairline scratches. This dazzling, frosty Gem displays radiant cartwheel luster with hints of golden toning emerging from the peripheries. A few minor grazes on the cheek are all that limit the grade. NGC ID# 254S, PCGS# 133999 Base PCGS# 7160

1885-O Dollar, MS66 Deep Mirror Prooflike Conditionally Scarce

4352 1885-O MS66 Deep Mirror Prooflike PCGS. Near the top end of the Deep Mirror Prooflike population, this Premium Gem 1885-O Morgan dollar displays a bold strike and deeply mirrored fields with considerable cameo contrast on each side. A few light marks are seen, along with a hint of champagne border toning. Population: 49 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer (8/16). NGC ID# 254T, PCGS# 97163

4353 1885-S/S VAM-6 MS65 PCGS. A Top 100 Variety. The mintmark is boldly recut on this popular VAM variety, with a secondary serif plainly visible to the left of the primary lower loop. The strike is sharp, and radiant cartwheel luster spirals around each side. Grade-limiting flaws are faint and trivial, as are a few traces of light golden toning. NGC ID# 254U, PCGS# 133901 Base PCGS# 7164

4354 1886 Doubled Arrows, VAM-17, MS67+ PCGS. CAC. A Top 100 Variety. 30th Anniversary Green Label Holder. VAM-17 is most notable for the doubled arrow shafts and fletchings on the reverse. This high-end Superb Gem displays a sharp strike and vibrant cartwheel luster. The upper obverse margin showcases deep midnight-blue and charcoal-plum toning that is bordered along its lower edge by a ribbon of rainbow color. The remainder of the obverse and the entire reverse exhibit light champagne toning. PCGS lists only eight finer 1886 dollars (8/16). NGC ID# 254V, PCGS# 133904 Base PCGS# 7166

4355 1886-O MS62 PCGS. An essentially brilliant example that boasts booming luster and surprisingly few marks. The centers show minor inexactness of strike. The 1886-O is best known for its rarity as a Gem, but is also scarce in any Uncirculated grade, despite a generous mintage. NGC ID# 254W, PCGS# 7168

4356 1886-O MS62+ PCGS. CAC. Frosty original luster delivers strong eye appeal on this Plus-graded 1886-O silver dollar. The strike is razor-sharp, and scattered, grade-limiting abrasions are minor. The 1886-O was heavily melted, reducing its Mint State availability to the point of making this issue a conditional semikey. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63 Optimal Uncirculated Collector Grade

4357 1886-O MS63 PCGS. One of the challenging O-Mint condition rarities, the 1886-O seldom comes "nice." This brilliant and lustrous example bucks the trend, with a sharp strike and minimally marked surfaces for the MS63 level. Despite a mintage of more than 10 million pieces, the Select Uncirculated grade is seldom surpassed and it is the optimal collecting grade for most Uncirculated sets. NGC ID# 254W, PCGS# 7168

4358 1887 MS66 PCGS. Vivid yellow-gold, violet, and pine-green toning spread across the obverse of this Premium Gem example, while the reverse displays nothing more than a hint of pale champagne color. Frosty, radiant luster illuminates each side, and the strike is well-executed. There are no bothersome abrasions. Finer pieces are elusive in a PCGS holder. NGC ID# 27Y3, PCGS# 7172

1887 Morgan Dollar, MS66 Deep Mirror Prooflike Tied for Numerical Finest at Either Service

4359 1887 MS66 Deep Mirror Prooflike PCGS. The 1887 is moderately available in Deep Mirror Prooflike format, yet Premium Gem examples are very scarce and no coins have exceeded the MS66 level with deep mirrors at either PCGS or NGC (although each service reports a single Plus-graded coin). This example is deeply reflective, untuned, and nicely contrasted. The motifs are well-struck and the reflective fields show only the most minor chatter. A solitary abrasion exists at the lips and chin, but overall Liberty's cheek and neck are clear of marks and the portrait appears fully smooth and rounded in-hand. Population: 35 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (8/16). NGC ID# 254Y, PCGS# 97173

4360 1887-S MS65 PCGS. Collectible in MS65, the 1887-S Morgan dollar is rarely seen finer. This Gem displays vibrant, frosty luster beneath pastel shades of lavender, peach, and champagne toning. The coin is well-struck and appealing. PCGS has seen 32 numerically finer submissions (8/16). NGC ID# 2554, PCGS# 7180

4361 1888-O MS66 PCGS. Although not truly rare in MS66, this Premium Gem 1888-O Morgan is among the finest seen by PCGS (8/16). Other than slight weakness on the hair above Liberty's ear, the coin has unbroken eye appeal. Frosty, untuned luster is vibrantly present on each side. Liberty's cheek is notably clean. NGC ID# 2556, PCGS# 7184

1889 Morgan Dollar, MS66 Prooflike

4362 1889 MS66 Prooflike PCGS. A brilliant and impressively unabraded Premium Gem. The strike is good and the fields are flashy. The obverse die was lapped, apparent on the lowest relief portions of Liberty's hair. The base of the 1 in the date appears doubled, although the coin does not match the listed VAMs with that characteristic. NGC ID# 349P, PCGS# 7189

4363 1889-CC VF30 PCGS. This evenly worn slate-gray 1889-CC Morgan displays grade-consistent wear and smooth, pleasing surfaces. Hints of tannish color on the high points of the design affirms the originality of the patina. Faint hints of luster remain in the fields. *From The Twelve Oaks Collection, Part II* NGC ID# 2559, PCGS# 7190

4364 1889-CC VF30 PCGS. This midgrade 1889-CC dollar is well-detailed for the VF level, showing pleasant olive-gray toning that deepens toward the peripheries. Light surface marks are mostly hidden by the patina, and the eye appeal is pleasing for the grade. *From The Twelve Oaks Collection, Part II* NGC ID# 2559, PCGS# 7190

4365 1889-CC VF35 PCGS. Lightly marked surfaces show pleasing pewter-gray toning with hints of olive near the borders. Wear is even and light for the grade. The 1889-CC is the key to the Carson City short set and highly sought-after in all grades. *From The Twelve Oaks Collection, Part II* NGC ID# 2559, PCGS# 7190

4366 1889-CC VF35 PCGS. A sharp VF example with smooth, problem-free surfaces and medium olive-gray toning. Wear is even for the grade, and visual appeal exceeds expectations for the VF level. A finer 1889-CC silver dollar may not exist below XF. *From The Twelve Oaks Collection, Part II* NGC ID# 2559, PCGS# 7190

4367 1889-CC VF35 PCGS. The pleasant pewter-gray coloration of un-tampered-with circulated silver dollars gives this Choice VF 1889-CC excellent visual appeal. The design elements are well-defined, and the only notable blemish is an ages-old pinscratch below Liberty's throat. NGC ID# 2559, PCGS# 7190

4368 1889-CC — Edge Repair — PCGS Genuine. XF Details. The edge is partially concealed by the holder, and no repair is readily apparent, although the rim is raised near the ME in AMERICA. The reverse is mildly glossy, but this silver-gray key-date Carson City dollar would satisfy many collectors.

1889-CC Dollar, XF40 Collectible Problem-Free Example

4369 1889-CC XF40 PCGS. Only so many issues in American numismatics are instantly recognizable as key dates, and the 1889-CC dollar is among them. Bright gray surfaces yield traces of luster near the hidden areas. Merging occurs over the central parts of the design, but the impression remains clear overall. The reverse shows faint clash marks near the right wreath tip and die cracks through UN, the star, and ONE. Lightly abraded. *From The Twelve Oaks Collection, Part II* NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF40
Keystone Date Representative

- 4370 1889-CC XF40 PCGS.** Many 1889-CC dollars exhibit signs of extensive circulation. The average graded awarded by the leading certification services is VF30. This piece is a full ten points finer, showing strong hair curls and feathers despite friction over the extreme centers. Deep steel-gray patina colors this XF key date dollar, accented with gunmetal hues in the fields.
From The Twelve Oaks Collection, Part II NGC ID# 2559, PCGS# 7190

1889-CC Dollar, XF40
Low-Mintage, Heavily Melted

- 4371 1889-CC XF40 PCGS.** Rusty Goe has written that as many as 325,000 of the 350,000 Morgan dollars struck in Nevada in 1889 were melted, leaving one of the lowest surviving populations in the series. This XF dollar has seen a fair amount of circulation in the West, yet the major design elements maintain strong detail. Light gray toning dominates each side.
From The Twelve Oaks Collection, Part II NGC ID# 2559, PCGS# 7190
- 4372 1889-CC XF40 PCGS.** This important Carson City key shows just a touch of wear on the high points of the design, like the hair above the ear and eagle's breast. The lightly abraded surfaces show pleasing hints of golden-brown and lavender-gray toning. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Choice XF
Famous Nevada Key

- 4373 1889-CC XF45 PCGS.** The Carson City Mint had abstained from Morgan dollar production since 1885 when it recommenced operations in 1889. That year, the Nevada facility struck 350,000 dollars — one of the lowest totals in this is ever-popular series. Both sides show steel-gray patina with daubs of pale gold peripherally. Well-detailed, save for lightly worn centers. Clashing occurs near the tip of the right wreath. NGC ID# 2559, PCGS# 7190

- 4374 1889-CC — Smoothed — PCGS Genuine. AU Details.** Unnaturally bright due to a past cleaning, this AU-level 1889-CC Morgan dollar still possesses reflective fields and excellent detail. Light marks are scattered about, none particularly bothersome. This coin offers the budget-restricted collector a chance to acquire a sharply detailed example of the date.
From The Twelve Oaks Collection, Part II NGC ID# 2559, PCGS# 7190

- 4375 1889-S MS65 PCGS.** Dazzling frost-white luster cartwheels freely around untuned surfaces on this Gem 1889-S Morgan dollar. The strike is sharp, and a few faint grazes in the left obverse field are all that preclude an even finer grade. The 1889-S is available in MS65 but seldom seen finer. NGC ID# 255B, PCGS# 7194

- 4376 1889-S MS65 PCGS. CAC.** This is a high-quality piece, even for the Gem grade level. A couple of faint grazes above Liberty's eye and on the lowermost point of the neck truncation appear to be all that limit the grade; the cheek is pleasantly clean but shows a few faint roller marks on the lower jaw. Nonetheless, the high points of the eagle's breast and the hair above Liberty's ear are well-defined. The 1889-S Morgan is seldom seen finer. NGC ID# 255B, PCGS# 7194

- 4377 1890 MS64 Deep Mirror Prooflike PCGS.** The design elements of this impressive Choice example are well-detailed and richly frosted, while the lightly marked fields are deeply mirrored, creating intense field/device contrast. PCGS has graded 10 numerically finer examples (8/16). NGC ID# 3VX7, PCGS# 97197

- 4378 1890-CC MS64 PCGS. Ex: Carson City Collection.** The average 1890-CC dollar grades fractionally higher than AU55, but examples appear on the market with frequency through MS64. Anything finer is scarce. Frosty luster and original mint brilliance define this Choice representative. Roller marks and small ticks occur over Liberty's cheek. NGC ID# 255D, PCGS# 7198

- 4379 1890-CC MS64 PCGS Secure.** This attractive Choice Morgan dollar exhibits sharply detailed design elements and shows an extensive network of faint die cracks on both sides. The lightly marked surfaces radiate vibrant mint luster and overall eye appeal is outstanding. NGC ID# 255D, PCGS# 7198

1891 Morgan Dollar, MS65
Conditionally Very Rare Any Finer

- 4380 1891 MS65 PCGS.** Despite the mintage of more than 8.6 million pieces, the 1891 Morgan dollar is a scarce issue in MS65 condition, and finer examples are very rare. This attractive Gem exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ears, and well-preserved surfaces that radiate vibrant mint luster with outstanding eye appeal. PCGS has graded only three numerically finer examples (8/16). NGC ID# 255G, PCGS# 7204

1891 Morgan Dollar, MS65
Vivid Multicolor Toning

- 4381 1891 MS65 PCGS.** Iridescent shades of golden-brown and violet toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. Overall eye appeal is terrific. From a mintage of more than 8.6 million pieces, PCGS has graded only three numerically finer examples (8/16). NGC ID# 255G, PCGS# 7204

1891-CC Dollar, Brilliant Gem
Rare in Higher Grades

- 4382 1891-CC MS65 PCGS Secure.** Brightly lustrous surfaces remain brilliant with dappled specks of mauve patina across the obverse. That side is exceptionally clean, without any marks on the cheek and virtually pristine fields. The reverse displays light chatter on the breast and above the eagle's head. Clashing occurs between the right (facing) wing and the wreath. This late-date Carson City Gem is well-defined despite the usual central incompleteness. PCGS reports a paltry 35 submissions finer (8/16). NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65
Brilliant, Minimally Marked

- 4383 1891-CC MS65 PCGS.** Each side is nearly fully brilliant with the booming luster that specialists have come to expect from a Gem Carson City Morgan dollar. Struck from a lightly clashed reverse die. The portrait is virtually pristine with well-defined curls. PCGS lists 35 finer submissions (8/16).
Ex: Long Beach Signature (Heritage, 5/2003), lot 7610. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Elusive in Finer Grades

- 4384 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar is not too difficult to locate in MS65, but finer coins are rare. This impressive Gem exhibits sharply detailed design elements and well-preserved surfaces with vibrant mint luster and a few hints of golden-tan toning. PCGS has graded 35 numerically finer examples (8/16). NGC ID# 255H, PCGS# 7206

- 4385 1891-S MS65 PCGS.** Splashes of peach-gold and gunmetal patina near the edges surround frosty, brilliant centers on the obverse. The other side is fully patinated in rich violet and gold tones. This well-defined Gem would fit perfectly into a carefully assembled set of MS65 Morgan dollars. NGC ID# 255K, PCGS# 7210

1892 Morgan Dollar, Lustrous MS65
Impressive White Coin

- 4386 1892 MS65 PCGS.** The strike is above-average on this brilliant and frosty Gem, with only minor softness in the hair strands immediately above the ear. All else is sharp. A group of light marks on the jawline are minor and shallow, yet they are the only visible reason an even finer grade was not achieved. This is a white, Mint-fresh coin with flashy luster and great eye appeal. PCGS records only five numerically finer examples for the scarce issue (8/16). NGC ID# 255L, PCGS# 7212

- 4387 1892-CC MS63 PCGS.** Semireflective silver-white fields provide gleaming cartwheel luster on this penultimate-year Carson City Morgan dollar. Crisply struck with wispy marks and luster grazes crossing the cheek.
Ex: FUN Signature (Heritage, 1/2012), lot 7145. NGC ID# 255M, PCGS# 7214

- 4388 1893-CC XF40 NGC.** Deep olive-gray toning attests to the originality of this lightly circulated 1893-CC Morgan dollar. The design elements are bold, and the surfaces are smooth and problem-free. Although not a series key, this better date is among the more elusive issues in the Carson City short set.
From The Twelve Oaks Collection, Part II NGC ID# 255S, PCGS# 7222

- 4389 1893-CC XF45 NGC.** Luster remains in the fields of this bright and appealing 1893-CC dollar. Golden halo toning surrounds the outer peripheries, and high-point wear is minimal. Eye appeal far surpasses expectations for the grade.
From The Twelve Oaks Collection, Part II NGC ID# 255S, PCGS# 7222

4390 1893-S Good 4 PCGS. This is a well-worn example of the Morgan dollar key, but evenly so and with complete rims on each side. Pale tan-gray toning characterizes the surfaces, and the appeal is pleasing for the grade. Suitable for the collector seeking to complete a circulated, budget-friendly date and mintmark set.
From The Twelve Oaks Collection, Part II NGC ID# 255U, PCGS# 7226

4391 1893-S Good 6 NGC. VAM-2. The low mintage and early dispersal of the 1893-S have made it the key to the business strike Morgan dollar series. This collectible silver-gray representative has a slight obverse rim mark at 2 o'clock, but is free from any consequential abrasions. NGC ID# 255U, PCGS# 7226

4392 1893-S VG8 PCGS. Uniform battleship-gray color on each side of this evenly worn 1893-S dollar gives the coin excellent old-time appeal. The obverse rims are complete, and the reverse rims are bold. The devices show occasional interior detail in the hair curls and the eagle's wings.
From The Twelve Oaks Collection, Part II NGC ID# 255U, PCGS# 7226

4393 1893-S VG8 ANACS. VAM-1. A respectable cream-gray example of the rarest Morgan dollar regular issue. We note a small obverse rim knock at 4:30, but are no other detractors. All legends are clear, and the lower portions of the wings display plumage detail. NGC ID# 255U, PCGS# 7226

4394 1894 AU55 PCGS. Particularly bright silver-white surfaces retain moderate luster in the fields of this Choice AU 1894 Morgan dollar. The strike is well-executed, and high-point wear is light. Scattered abrasions are present, including a few heavy marks on the cheek.
From The Twelve Oaks Collection, Part II NGC ID# 255V, PCGS# 7228

4395 1894 AU58 PCGS. Lustrous and sharply struck, this Almost Uncirculated 1894 silver dollar displays appealing surfaces and a faint suggestion of light golden color. This challenging Philadelphia issue is widely sought-after due to its low mintage of 110,000 pieces.
From The Twelve Oaks Collection, Part II NGC ID# 255V, PCGS# 7228

4396 1894 AU58 NGC. Moderate luster remains in the fields of this near-Mint 1894 Morgan dollar, while the design elements are sharp and show only a brush of high-point friction. A small mark on Liberty's jaw is the only abrasion of note.
From The Twelve Oaks Collection, Part II NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS61
Elusive, Low-Mintage Philadelphia Issue**

4397 1894 MS61 NGC. Because of the lingering and widespread economic consequences of the Panic of 1893, the 1894 Morgan dollar claims the second-lowest mintage of the series, at 110,000 pieces. This impressive Mint State specimen exhibits well-detailed design elements and lustrous surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS62
Low-Mintage Philadelphia Issue**

4398 1894 MS62 NGC. The low mintage of 110,000 pieces never fails to attract legions of Morgan dollar specialists who believe the issue is underrated — especially when compared to the prior-year 1893-S, which has a nearly the same mintage (100,000 coins), yet carries a much higher market value. This originally toned 1894 displays pale-rose and powder-gray toning that deepens on the reverse to include forest-green shades. The strike is consistently sharp on both sides. NGC ID# 255V, PCGS# 7228

4399 1894-S MS63 PCGS. Vibrant luster rolls over this lightly abraded 1894-S silver dollar. The strike is sharp, and visual appeal is pleasing for the issue and grade. The coin is mostly brilliant save for a few wisps of russet toning on the obverse. NGC ID# 255X, PCGS# 7232

4400 1895-S AU53 PCGS. Original coloration reveals hints of luster in the protected regions of the fields, accenting light olive-gold toning. The About Uncirculated 1895-S silver dollar shows appropriate high-point friction and retains sharp detail. The 1895-S is a semikey in all grades, coming from a mintage of only 400,000 pieces. NGC ID# 255Z, PCGS# 7238

4401 1896-O MS62 PCGS. The design elements are unusually sharp for a New Orleans issue and the surfaces show fewer contact marks than the norm for this issue, which is usually seen with excessive bag marks. Pleasing shades of greenish-gold and lavender-gray toning add to the considerable eye appeal. NGC ID# 272U, PCGS# 7242

**1897 Morgan Dollar, MS66 Prooflike
No Numerically Finer Coins at PCGS**

4402 1897 MS66 Prooflike PCGS. The 1897 Morgan dollar is seldom encountered in MS66 condition, with prooflike surfaces. This delightful Premium Gem exhibits sharply detailed frosty design elements that seem to float on the deeply reflective fields. The well-preserved surfaces show hints of greenish-gold and pink toning. Population: 18 in 66 (2 in 66+) Prooflike, 0 finer (8/16). NGC ID# 2565, PCGS# 7247

4403 1897-O MS61 PCGS. Traces of light golden toning accent frosty, lustrous surfaces on this Mint State 1897-O silver dollar. The strike is sharp, and grade-limiting abrasions are expectedly scattered about. This is a better date in Uncirculated condition. NGC ID# 2565, PCGS# 7248

4404 1897-O MS61 NGC. A pleasing lower-end Mint State example of this slightly better New Orleans issue, showing frosty original luster and hints of light champagne toning. The coin is well-struck for the issue, and grade-limiting surface grazes are surprisingly unobtrusive. NGC ID# 2565, PCGS# 7248

4405 1897-O MS62 PCGS. An attractive MS62 Morgan dollar, with sharp definition on the design elements and lustrous surfaces that show a scattering of minor contact marks, none worthy of individual mention. A few hints of greenish-gold and lavender toning enliven the surfaces. NGC ID# 2565, PCGS# 7248

4406 1897-O MS62 PCGS. An important condition rarity in the Morgan dollar series, the 1897-O is normally found in circulated grades. This piece has brilliant silver surfaces with barely visible gold toning. A typical strike lacks hair detail over the ear. NGC ID# 2565, PCGS# 7248

4407 1897-S MS66 PCGS. CAC. A spectacular Premium Gem Morgan dollar, with impeccably preserved surfaces that show a mix of vibrant, satiny mint luster and prooflike reflectivity in the fields. The design elements are sharply detailed and frosty throughout and subtle hints of pale gold and lavender toning visit the surfaces. PCGS has graded 28 numerically finer examples (8/16). NGC ID# 2567, PCGS# 7250

1898 Silver Dollar, MS67 None Finer at PCGS or NGC

4408 1898 MS67 PCGS. The Mint set high standards of production in the late 1890s, and the 1898 issue was particularly well-made. This Superb Gem representative is virtually unmarked by coin-to-coin contact, frosty, and distinctively embellished with orange and blue toning accents that emphasize the brilliant, silver-white surfaces. The technical quality and dramatic eye appeal of this coin are amazing. None are finer at either service (8/16). NGC ID# 2568, PCGS# 7252

4409 1899 MS66 PCGS. The 1899 has a famously low production of 330,000 coins, rivaling the key date 1889-CC, though far more examples of this Philadelphia issue survive. Each side is almost totally brilliant, save for a thin veil of lavender and gold color. A couple of tiny grazes and ticks define the grade. PCGS shows 22 higher grading events (8/16). NGC ID# 256C, PCGS# 7258

4410 1900 MS66+ PCGS. CAC. Barely a few trivial grazes in unobtrusive locales keep this CAC-approved high-end Premium Gem from an MS67 designation at PCGS. The coin is well-struck and untuned with frosty cartwheel luster. The collector can appreciate Liberty's clean cheek and the unmarked fields. Finer examples of the 1900 Morgan dollar are scarce. NGC ID# 256F, PCGS# 7264

4411 1900-O MS66+ PCGS. CAC. A Plus-graded Premium Gem specimen of this popular branch mint issue, with sharp definition on all design elements and essentially brilliant, lustrous surfaces that show no mentionable distractions. Eye appeal is terrific. NGC ID# 256F, PCGS# 7266

1900-O Dollar, Untoned MS67 Glittering New Orleans Type Coin

4412 1900-O MS67 PCGS. The 1900-O never circulated to any meaningful extent. Most coins sat in storage before being released during the mid-20th century. Tens of thousands of examples survive in MS63 to MS65. The population drops off markedly in MS66, while Superb Gems are very scarce. This is a boldly struck and entirely brilliant New Orleans dollar with glittering luster over practically flawless surfaces. Great eye appeal. Population: 74 in 67 (4 in 67+), 0 finer (8/16). NGC ID# 256F, PCGS# 7266

4413 1900-OMS67 NGC. A boldly struck and essentially brilliant Superb Gem. The fields appear immaculate, and even Liberty's portrait has only trivial surface imperfections. Despite the reputation of the New Orleans Mint, the strike is crisp throughout. Neither NGC nor PCGS have certified any in numerically finer grades (8/16). Ex: *Central States Signature* (Heritage, 4/2008), lot 2972. NGC ID# 256F, PCGS# 7266

4414 1900-O MS66 Prooflike PCGS. Razor-sharp detail is uncommon among New Orleans dollars, but this Prooflike Premium Gem boasts bold hair and breast feather definition. The motifs stand out against reflective, carefully preserved fields. Population: 32 in 66 (2 in 66+) Prooflike, 0 finer (8/16). NGC ID# 256F, PCGS# 7267

1900-O/CC Dollar, MS66 VAM-10A, Top 100

4415 1900-O/CC VAM-10A MS66 PCGS. A Top 100 Variety. The base of both Cs in the Carson City mintmark are apparent, bookending the New Orleans mintmark. The late die state with a clashed N (from IN) on the obverse field near Liberty's neck. A brilliant Premium Gem with potent luster, a good strike, and exceptionally mark-free fields. The portrait displays only delicate contact. NGC ID# 256G, PCGS# 133962 Base PCGS# 7268

4416 1901 AU58 PCGS. Only the slightest trace of high-point wear shows on this attractive near-Mint specimen, and the lightly abraded surfaces retain much of their original mint luster. A few hints of golden-tan toning visit the essentially brilliant surfaces. NGC ID# 256J, PCGS# 7272

4417 1901-S MS64 PCGS. CAC. This brilliant San Francisco dollar has attractive, frosty luster and the minimal number of marks for the grade. The devices are crisply rendered. Glints of pale tan color appear sporadically. Encapsulated in a first generation holder with CAC approval. NGC ID# 256L, PCGS# 7276

4418 1902 MS66+ PCGS. CAC. A spectacular high-end Premium Gem example with blazing frost-white luster and a bold strike. Very little separates this piece from most Superb Gem examples, and a loupe is required to see any faint grazes. PCGS records 33 higher-grade representatives (8/16). NGC ID# 256M, PCGS# 7278

**1902-O Silver Dollar, MS66 Prooflike
Rarely Seen This Fine and Reflective**

4419 1902-O MS66 Prooflike PCGS. Satiny design elements seem to melt into the liquidlike fields of this Premium Gem Prooflike 1902-O Morgan dollar. The strike is sharp, and there are no mentionable abrasions. Prooflike examples of this New Orleans issue are elusive overall, but pieces grading this fine are genuinely rare. Population: 15 in 66 Prooflike, 1 finer (8/16). NGC ID# 256N, PCGS# 7281

4420 1903 MS64 Deep Mirror Prooflike NGC. The design elements of this attractive Choice example exhibit razor-sharp definition throughout and the fields are deeply mirrored. The surfaces show some minor scuffs and contact marks, none worthy of individual mention, and a few hints of greenish-gold and lavender toning add to the pleasing overall presentation. Census: 10 in 64 Deep Mirror Prooflike, 4 finer (8/16). NGC ID# 256R, PCGS# 97285

4421 1903-O MS66+ PCGS. CAC. A Plus-graded Premium Gem example of this erstwhile rarity, which surfaced unexpectedly in the Treasury releases of the 1960s. This impressive coin offers well-preserved, lustrous surfaces and sharply detailed design elements, with outstanding eye appeal. NGC ID# 256S, PCGS# 7286

4422 1904 MS65 PCGS Secure. CAC. Despite a mintage exceeding 2.7 million coins, the 1904 Morgan dollar is elusive in MS65 and rare finer. This CAC coin displays satiny luster and average strike sharpness. Both sides are lightly toned, the obverse showing lavender-gray, sea-green, and lemon-gold with the reverse being most champagne-gray. There are 27 finer coins at PCGS; CAC: 44 in 65, 6 finer (8/16). NGC ID# 256U, PCGS# 7290

**1904-O Silver Dollar, MS67
Among the Finest Seen**

4423 1904-O MS67 PCGS. A conditionally scarce 1904-O Morgan and among the finest certified by either leading service. This Superb Gem displays frosty, brilliant luster and astoundingly clean surfaces. Slight strike weakness on the eagle's breast and the hair above Liberty's ear is typical of the date. The 1904-O was once considered a rare issue in Mint State, although in 1962 the Philadelphia Mint released enormous numbers of the date that had been transferred from storage in New Orleans in 1929. The issue is now a plentiful type-coin date. Population: 48 in 67, 0 finer (8/16). NGC ID# 256V, PCGS# 7292

4424 1921-D MS66 PCGS. CAC. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster throughout. Some faint peripheral die cracks are evident on both sides. PCGS has graded 11 numerically finer examples (8/16). NGC ID# 256Y, PCGS# 7298

4425 1921-S MS65+ PCGS. CAC. Considered a common date in the absolute sense, the 1921-S Peace dollar becomes conditionally scarce in MS66. This Plus-graded Gem borders that level of quality, and to the unaided eye there is almost no perceptible difference. Frosty, untuned luster adorns each side, and Liberty's cheek is well cared for. The eagle's breast is typically weak, but the wreath is better-defined. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

4426 1884 PR61 PCGS. An attractive coin that, while displaying hairlines and scuffiness that accounts for the grade, is superior and sharp nonetheless. No mentionable toning is observed. Ex: New York Signature (Heritage, 6/2005), lot 6194. NGC ID# 272B, PCGS# 7319

1892 Dollar, Lightly Toned PR63

4427 1892 PR63 PCGS. Subtle contrast is discernible beneath light champagne toning on this Select 1892 proof dollar. This issue is often seen softly struck on the central high points, and the present coin is weak on the eagle's breast and the hair above Liberty's ear. Grade-limiting hairlines are minimal. NGC ID# 272M, PCGS# 7327

1893 Silver Dollar, PR63

4428 1893 PR63 PCGS. A deeply mirrored Select proof with minor strike weakness on the hair above Liberty's ear. Golden toning appears over each side, masking scattered hairlines. The reverse is starkly contrasted, although the obverse is less so and does not receive such a designation from PCGS. NGC ID# 272N, PCGS# 7328

**1893 Morgan Dollar, PR63
Only 792 Pieces Struck**

4429 1893 PR63 PCGS. From a nominal proof mintage of 792 pieces, this attractive Select example displays sharply detailed design elements and deeply reflective fields under delicate shades of pale gold toning. The surfaces show a few minor hairlines and contact marks that explain the grade. Population: 37 in 63, 82 finer (8/16). NGC ID# 272N, PCGS# 7328

- 4430 1894 PR55 PCGS.** Mirrored proof fields complement full detail on the devices on this Choice AU proof 1894 dollar. Colorful lavender and pale orange hues appear in the fields amid dominant olive-green and gold toning. Quite an appealing proof for this affordable grade level.
From The Twelve Oaks Collection, Part II NGC ID# 2577, PCGS# 7329

PEACE DOLLARS

- 4431 1921 MS65 PCGS.** Other than a few faint grazes on Liberty's cheek and the eagle's wing that appear at certain angles, this Gem High Relief Peace dollar is visually unmarred. A slight champagne hue graces the frosty surfaces, while there is expected weakness on the hair curls over Liberty's ear and on the corresponding high point of the eagle's wing. NGC ID# 2U4E, PCGS# 7356
- 4432 1922 MS66+ PCGS. CAC.** A stunning Premium Gem, this plentiful issue is rarely found finer, with only 29 higher grade pieces certified by PCGS (8/16). Both sides are brilliant and untuned with bright and frosty silver luster. NGC ID# 257C, PCGS# 7357
- 4433 1922-S MS65 PCGS.** Autumn-brown toning adorns the left obverse, but the rest of this lustrous Gem is stone-white. The strike is good and the fields are well preserved. The portrait displays minor contact. Despite a considerable mintage, the 1922-S becomes rare any finer. NGC ID# 257E, PCGS# 7359
- 4434 1922-S MS65 NGC.** Bright, frosted mint luster swirls around both sides of this well-produced dollar. The obverse is ... let's say it's brilliant. Mostly. The reverse, however, displays speckled russet toning, the specks evenly distributed across that side. NGC ID# 257E, PCGS# 7359
- 4435 1923-D MS65+ PCGS.** Brilliant and lustrous except for a faint speckling of olive-gold patina, this high-end Gem 1923-D is sharply struck with exceptionally appealing surfaces. A handful of tiny ticks are confined to the reverse fields, while Liberty's cheek is unblemished and the obverse fields are impressively smooth. Scarce any finer. Population: 16 in 65+, 103 finer (8/16). NGC ID# 257G, PCGS# 7361

1925 Peace Dollar Iridescent Superb Gem

- 4436 1925 MS67 PCGS.** Although many 1925 Peace dollars rested untouched for decades in Treasury vaults and the issue is more available in Mint State than in circulated conditions, Superb Gem examples are scarce and finer coins are nearly unobtainable. This beautifully struck and satin-smooth example displays iridescent hues throughout both sides with shades of peach-gold and aquamarine at the forefront. Only the tiniest of bagmarks interrupt the nearly mark-free fields and motifs. PCGS reports only a single numerically finer example (8/16). NGC ID# 257L, PCGS# 7365
- 4437 1925-S MS64+ PCGS.** A Plus-graded Choice example of this popular branch mint issue, with well-detailed design elements and well-preserved lustrous surfaces. PCGS has graded 41 numerically finer examples (8/16). NGC ID# 257M, PCGS# 7366

- 4438 1927 MS65 PCGS.** Light to medium almond-gold and powder-blue toning visits this lustrous and lower mintage Peace dollar. Nicely struck and free from consequential marks. Liberty's cheek and neck are particularly unabraded. NGC ID# 257S, PCGS# 7370
- 4439 1934 MS66 PCGS.** Wheat-gold and ice-blue shades encompass this sharply struck and lustrous Premium Gem. Both sides are impressively free from marks, with the obverse especially smooth. Only a couple dozen pieces have been certified finer by the two leading services. NGC ID# 257Y, PCGS# 7375

EISENHOWER DOLLARS

- 4440 1971-D MS67 PCGS.** Type One Reverse. Although the Denver Mint struck 68,587,424 dollars in 1971, the issue was seldom encountered in circulation, except in Nevada casinos. Most high grade examples likely originated in Mint Sets. The present remarkable Superb Gem offers booming luster and only a hint of wheat-gold toning. Population: 30 in 67, 0 finer (8/16). NGC ID# 2585, PCGS# 7407

1972 Eisenhower Dollar, MS66 Type One Reverse

- 4441 1972 Type One MS66 PCGS.** Sea-green and lemon-gold encompass the obverse. The reverse is predominantly powder-blue. Lustrous and well preserved with minor inexactness of strike on the eagle's breast and Eisenhower's jaw. The three subtypes of 1972 Ike dollars are distinguished by their arrangement of the Caribbean Islands relative to Florida. Population: 8 in 66, 0 finer (8/16). NGC ID# 2587, PCGS# 87409
- 4442 1972 Type Three MS66 PCGS.** Planet Earth is presented with Cuba partly left of Florida, the pick-up point to distinguish Type Three from its predecessors. A lustrous apple-green and pumpkin-gold Premium Gem. Ike's jaw lacks a full strike, but the reverse is essentially pristine. Population: 26 in 66, 0 finer (8/16). NGC ID# 2587, PCGS# 7409

1974-D Eisenhower Dollar, MS67 Superb Type Coin

- 4443 1974-D MS67 PCGS.** 30th Anniversary Green Label Holder. A spectacular Superb Gem that boasts essentially pristine fields, vibrant luster, and only a hint of butter-gold toning. As always seen on business strikes of the type, traces of the planchet surface are apparent on Eisenhower's cheek, strictly as made. Population: 24 in 67 (3 in 67+), 0 finer (8/16). NGC ID# 258E, PCGS# 7416

4444 1977 MS67 PCGS. An amazing Superb Gem, tied for the finest certified at PCGS or NGC, with exquisite champagne, gold, and blue toning on both sides. Only a small number of 1977 Eisenhower dollars survive so fine. Population: 19 in 67, 0 finer (8/16). NGC ID# 258M, PCGS# 7423

COMMEMORATIVE SILVER

4445 1893 Isabella Quarter MS65 PCGS. Fully struck with nearly mark-free surfaces and absolutely gorgeous variegated patina on both sides. A highly attractive Gem example of this early classic commemorative type.

Ex: *Long Beach Signature (Heritage, 9/2003)*, lot 9156. NGC ID# BYJ9, PCGS# 9220

1893 Isabella Quarter, MS66
Colorful Toning

4446 1893 Isabella Quarter MS66 PCGS. From a limited distribution of 24,214 pieces, this Premium Gem Isabella quarter is remarkably well-preserved. Satiny luster illuminates the sharp design elements, and each side is cast in old-time toning. Champagne interiors cede to deeper multicolor hues around the borders, delivering excellent visual appeal. Finer examples are scarcely seen. NGC ID# BYJ9, PCGS# 9220

4447 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. Impressive cartwheel sheen distinguishes this well-struck Lafayette dollar. Consistent, light tan-gold toning visits clean surfaces. This is the sole silver dollar commemorative type from the classic series, although the denomination became the standard for modern commemoratives beginning with the Olympic issues of 1983.

Ex: *Long Beach Signature (Heritage, 6/2006)*, lot 4354. NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, MS65
Attractively Toned and Lustrous

4448 1900 Lafayette Dollar MS65 NGC. DuVall 1-B. A Gem-graded type coin with satiny luster and bold design elements. The interiors show light golden toning, while the peripheries display deep sea-green, amber, and violet coloration. Lafayette dollars are in high demand as type coins but are also collected by die variety. This piece would serve well for both purposes. Finer examples are scarce. NGC ID# BYKW, PCGS# 9222

4449 1935-D Arkansas MS67 PCGS. This satiny Superb Gem looks at first glance to be entirely mark free. A high-powered loupe reveals inconsequential flecks on the reverse. Each side is brilliant with mottled crimson patina along the rims. Population: 54 in 67 (7 in 67+), 2 finer (8/16). NGC ID# BYF6, PCGS# 9234

4450 1935-S Arkansas MS67 PCGS. Silver-gray surfaces predominate against iridescent rim accents of amber and deep brown, just enough to enliven the excellent appearance. Among the few finest certified. Population: 23 in 67 (3 in 67+), 0 finer (8/16). NGC ID# BYF7, PCGS# 9235

4451 1936 Arkansas MS67 PCGS. CAC. Orange-red and forest-green toning accompanies design recesses. The high points and open fields are cream-gray. Careful inspection is required to locate unimportant obverse contact. Population: 16 in 67 (3 in 67+), 0 finer. CAC: 7 in 67, 0 finer (8/16). NGC ID# BYHX, PCGS# 9237

1938-S Arkansas Half Dollar, MS67
Among the Finest Certified

4452 1938-S Arkansas MS67 NGC. Arkansas commemorative half dollars were struck between 1935 and 1939, though they celebrated the state's 1836 centennial. The San Francisco Mint manufactured 3,156 examples in 1938, and this Superb Gem is among the eight finest-known representatives: five at NGC, three at PCGS (8/16). Glimpses of russet patina around the borders encircle dove-gray centers. Well-struck and impeccably preserved. NGC ID# BYFH, PCGS# 9247

4453 1939-D Arkansas MS67 PCGS. CAC. A blush of green-gold toning is noted near the Indian's profile, but the remainder of this coruscating Superb Gem is brilliant. An intricately struck and nearly unabraded example of this low mintage issue. Population: 12 in 67 (1 in 67+), 1 finer. CAC: 5 in 67, 0 finer (8/16). NGC ID# BYFK, PCGS# 9250

4454 1939-S Arkansas MS66 PCGS. CAC. The well-preserved surfaces of this impressive Premium Gem exhibit slightly subdued satiny mint luster and well-detailed design elements, under shades of lavender-gray and golden-tan toning. PCGS has graded 15 numerically finer examples (8/16). NGC ID# BYFL, PCGS# 9251

4455 1939-S Arkansas MS66 PCGS. CAC. Final date in the Arkansas series and a low-mintage issue with only 2,105 pieces struck. The bright satiny mint luster is unfazed by the usual numerous abrasions this issue is known for. A tiny planchet flake on the jawline is the only interruption in the surfaces. NGC ID# BYFL, PCGS# 9251

**1939-PDS Arkansas Half Dollar Set, MS66-66+
NGC-Certified and Beautifully Preserved**

4456 Arkansas 1939-PDS Set NGC. A well-matched set, individually housed in modern NGC slabs. Includes: **1939 MS66+**, sharp and frosty with golden toning that deepens around the obverse periphery; **1939-D MS66**, untouched surfaces display luminous luster with light golden toning that deepens over the reverse; **1939-S MS66**, exceptionally well-preserved for the grade with light golden toning very similar to that seen on the Denver piece in this set. The coins are collectively very attractive. A 1939-PDS set in finer condition would be nearly impossible to assemble, as the Philadelphia issue is prohibitively rare above MS66+. (Total: 3 coins) NGC ID# BYFJ, PCGS# 9252

4457 1936-D Cincinnati MS67 PCGS. The satiny surfaces display excellent preservation and show just scattered light dollops of pale pastel patina, allowing the top quality to be easily admired. The 1936-D Cincinnati is rarely seen in finer grades. Population: 57 in 67 (10 in 67+), 2 finer (8/16). NGC ID# BYCK, PCGS# 9284

4458 1922 Grant With Star MS64 NGC. The scarcer With Star variant of the Grant Memorial half dollar. This Choice example displays satiny yellow-gold surfaces with iridescence in the toning. The high point of Grant's hair is ill-defined, as usual. No major abrasions are present. NGC ID# BYPP, PCGS# 9307

4459 1922 Grant With Star MS64 PCGS. The small incuse star near the final A in AMERICA identifies the scarcer of the two Grant Memorial half dollar varieties. This Choice example displays satiny golden-gray luster with minimal signs of contact. The high point of Grant's hair is soft, as usual on this type. NGC ID# BYPP, PCGS# 9307

4460 1928 Hawaiian MS63 PCGS. A collectible Select example of this key classic commemorative issue, showing satiny luster with a hint of light champagne color. The strike is bold, and grade-limiting abrasions are not bothersome to the naked eye. Housed in a green label holder. NGC ID# BYGR, PCGS# 9309

4461 1935 Hudson MS66 PCGS. Dappled steel toning appears on the delicate champagne surfaces of this Premium Gem Hudson half dollar. An important opportunity as this issue is rarely found finer, with only 19 numerically better examples certified by PCGS (8/16). NGC ID# BYGS, PCGS# 9312

4462 1920 Maine MS67 PCGS. Jade-green and lavender toning visits the upper obverse and lower reverse, but a majority of this lustrous Superb Gem shows only light wheat-gold patina. The strike is sharp, and both sides display only incidental contact. Population: 47 in 67 (5 in 67+), 0 finer (8/16). NGC ID# BYGY, PCGS# 9326

4463 1921 Missouri MS65+ PCGS. CAC. This Plus-graded Gem offers well-preserved brilliant surfaces, with vibrant mint luster on both sides. The design elements are sharply detailed throughout and overall eye appeal is terrific. From a distribution of 15,428 pieces. NGC ID# BYH2, PCGS# 9330

4464 1921 Missouri 2x4 MS65 NGC. Satiny with luster qualities that are considerably above-average for this more challenging early commemorative. Bits of orange and russet iridescence about the obverse periphery are the only obvious toning, although delicate golden-gray accents can also be detected on the reverse. Ex: *Long Beach Signature* (Heritage, 6/2006), lot 4505. NGC ID# 2FE9, PCGS# 9331

4465 1923-S Monroe MS66 PCGS. A lovely Premium Gem with brilliant silver luster, toned over the right half of the obverse and reverse in a gold and iridescent display. Well-struck for the issue with frosty mint luster and pristine surfaces. PCGS has only certified seven numerically finer examples (8/16). NGC ID# BYH4, PCGS# 9333

4466 1915-S Panama-Pacific MS66 PCGS. CAC. Unlike other legislation, the Congressional Act dated January 16, 1915, specified that the Panama-Pacific coinage was to be struck at the San Francisco Mint. Most commemorative coinage bills specified the "Mints" of the United States. This Premium Gem is a remarkable example of the S-Mint Panama-Pacific coinage with frosty silver luster and pleasing peripheral greenish-gold toning. Some strike weakness is typical. NGC ID# BYHP, PCGS# 9357

**1915-S/S Panama-Pacific Half, MS66+
Uniformly Toned and Appealing**

4467 1915-S/S Panama-Pacific, FS-501, MS66+ PCGS. CAC. One of two repunched mintmark varieties for the issue, this high-end Premium Gem 1915-S Panama-Pacific half dollar shows the serif of an errant S to the right of the primary upper serif on the mintmark. The coin is well-struck and carefully preserved. Satiny mint luster illuminates champagne-gray toning with hints of greenish-blue and lavender. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

4468 1920 Pilgrim MS67 PCGS. With only a single coin finer at PCGS (8/16), this conditionally scarce Superb Gem Pilgrim Tercentenary half dollar is a must-have item for the active Registry Set assembler. The sharp strike and satiny fields are active in competing lavender-gray and olive-green hues, while the central reverse has additional rose-red toning. The visual appeal and originality are exceptional. Population: 58 in 67 (8 in 67+), 1 finer (8/16). NGC ID# BYHR, PCGS# 9359

4469 1926 Sesquicentennial MS65 PCGS. Delicate shades of pale gold and lavender toning enliven the well-preserved surfaces of this spectacular Gem, with sharply detailed design elements and vibrant mint luster throughout. PCGS has graded nine numerically finer examples (8/16). NGC ID# BYJ4, PCGS# 9374

4470 1925 Vancouver MS67 PCGS. Powder-blue, champagne-gold, and lavender toning allows considerable brilliant to shine through. A tick in the left obverse field is apparently the only grade-limiting blemish. Population: 65 in 67 (9 in 67+), 2 finer (8/16). NGC ID# BYJP, PCGS# 9399

4471 1925 Vancouver MS67 PCGS. The usual shades of blue, purple, and gold are present on each side of this Superb Gem half dollar, though abundant mint brilliance remains. Fully struck and readily appealing in both its technical and aesthetic quality. Population: 65 in 67 (9 in 67+), 2 finer (8/16). NGC ID# BYJP, PCGS# 9399

4472 1927 Vermont MS66+ PCGS. CAC. Incredible, bright mint luster is the primary focal point of this scarcer commemorative. Originally and lightly toned also. There are so few abrasions, and they are so small, that we wonder why PCGS didn't just go ahead a grade it MS65. NGC ID# BYJR, PCGS# 9401

4473 1946-S Booker T. Washington MS67+ PCGS. CAC. A blush of orange-gold toning blankets the reverse and spills over onto the upper obverse margin of this CAC-endorsed, Plus-graded example. The lower obverse has brighter silver-gray luster. This high-end 1946-S Booker T. Washington half is well-struck and devoid of mentionable abrasions. PCGS lists three finer examples (8/16). NGC ID# BYJU, PCGS# 9406

4474 1950-S Booker T. Washington MS67+ PCGS. CAC. Light to medium butter-gold and mauve toning adorns this lustrous and magnificently preserved Superb Gem. As always for the type, Washington's jaw retains glimpses of the planchet texture, as made. Population: 70 in 67 (6 in 67+), 0 finer. CAC: 54 in 67, 0 finer (8/16). NGC ID# BYK8, PCGS# 9422

4475 1952 Washington-Carver MS67 NGC. Attractive shades of champagne-gold and lavender toning enhance the impeccably preserved surfaces of this spectacular Superb Gem, with well-detailed design elements and vibrant mint luster throughout. Census: 39 in 67 (2 in 67+, 10 in 67★, 2 in 67+★), 1 finer (8/16). NGC ID# BYL3, PCGS# 9434

1953-S Washington-Carver Half Dollar Concentric Rainbow Toning, MS67

4476 1953-S Washington-Carver MS67 PCGS. The concentric rainbow toning that covers each side produces unsurpassed aesthetic appeal. Shades progress from orange and yellow at the borders to bluish-green and finally pale lavender over the centers. Nearly flawless technical quality matches the marvelous visual quality. Population: 14 in 67 (1 in 67+), 0 finer (8/16). NGC ID# 332B, PCGS# 9440

COMMEMORATIVE GOLD

4477 1903 Louisiana Purchase, Jefferson Gold Dollar MS65 PCGS. CAC. A pleasingly detailed and charming Jefferson gold dollar, luminous with pale straw-gold on the portrait and a richer yellow in the fields. Excellent overall eye appeal. NGC ID# BYLD, PCGS# 7443

4478 1903 Louisiana Purchase, Jefferson Gold Dollar MS65 PCGS. CAC. The pristine lemon-yellow surfaces of this delightful Gem show prooflike reflectivity throughout and the design elements are sharply detailed in all areas. Overall eye appeal is terrific. NGC ID# BYLD, PCGS# 7443

4479 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 NGC. A few moderate copper toning spots attest to the originality of this Premium Gem Jefferson gold dollar that was issued in connection with the 1904 St. Louis World's Fair. Both sides are brilliant with frosty orange-gold luster and sharp design motifs.
From The Twelve Oaks Collection, Part II NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Obverse

4480 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. From a distribution of 17,500 pieces, the 1903 Jefferson gold dollar is virtually unobtainable in grades above MS67. This delightful Superb Gem exhibits virtually pristine orange-gold surfaces, with vibrant mint luster on both sides. The design elements are sharply detailed and overall visual appeal is outstanding. PCGS has graded no coins in higher numeric grades (8/16). NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS67 Popular Jefferson Variant

4481 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. This satiny Superb Gem is seemingly flawless in regards to its surfaces, and when tilted beneath a light, the lemon-gold luster emits a lovely glow. The strike is bold. The 1903 Louisiana Purchase, Jefferson Head gold dollar is conditionally scarce in MS67, and finer pieces are unknown at PCGS (8/16). NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Obverse

4482 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. CAC. A conditionally scarce example and tied for the finest at PCGS (8/16), this Superb Gem Jefferson Head Louisiana Purchase gold dollar displays a sharp strike and outstanding yellow-gold luster. Some reflectivity is seen in the fields. This was one of two gold dollar issues struck in conjunction with the Louisiana Purchase Exposition, held in St. Louis in 1904. The following year, in 1905, the Lewis and Clark Centennial Exposition was held in Portland, Oregon, with its own issue of souvenir gold dollars. The two events coincided with the 100th anniversaries of Lewis and Clark's departure from St. Louis in 1804, to explore the Western North American continent, and the arrival of their expedition on the Pacific Coast in 1805. NGC ID# BYLD, PCGS# 7443

1904 Lewis and Clark Gold Dollar, MS65
Bright, Satiny Surfaces

4483 1904 Lewis and Clark Gold Dollar MS65 NGC. First year of a two-year issue. Both years are scarce; the 1904 is somewhat more available and the obvious choice for type purposes. This satin-surfaced Gem displays bright yellow-gold color with only the slightest abrasions present, none of which are notable. The strike details are uncommonly strong for this design type. NGC ID# BYLE, PCGS# 7447

4484 1905 Lewis and Clark Gold Dollar MS64 PCGS. Hints of orange toning appear on both sides of this brilliant yellow example featuring the famous exploring duo of Meriwether Lewis and William Clark, who could have been featured in the original episode of Discovery Channel's *Dual Survival*. NGC ID# BYLG, PCGS# 7448

4485 1915-S Panama-Pacific Gold Dollar MS66 NGC. Splendid peach-red and powder-blue toning encompasses this lustrous and well struck Premium Gem. One of two commemorative designs by Charles Keck; he was also responsible for the Vermont half dollar. Certified in a prior generation holder. NGC ID# BYLH, PCGS# 7449

1915-S Panama-Pacific Two and a Half
Attractive Near-Gem

4486 1915-S Panama-Pacific Quarter Eagle MS64 NGC. Part of a five-coin program struck in conjunction with the Panama-Pacific International Exposition, the 1915-S Panama-Pacific quarter eagle claims a small distribution total of 6,749 pieces. This impressive Choice example offers well-detailed design elements and well-preserved orange-gold surfaces that show slightly subdued mint luster on both sides. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS64
Bright, Orange-Gold Surfaces

4487 1915-S Panama-Pacific Quarter Eagle MS64 NGC. The Pan-Pac quarter eagle is a scarce and always-popular gold commemorative. Undoubtedly the design accounts for much of its popularity with the mythical hippocampus on the obverse and a reverse design that was adapted from an 1877 George Morgan pattern. This is a majestic quarter eagle that shows swirling die polish marks in the field, marks that further enhance the brightness on each side. Even orange-gold color. NGC ID# BYLP, PCGS# 7450

4488 1916 McKinley Gold Dollar MS66 PCGS. Satiny wheat-gold luster illuminates Premium Gem-quality surfaces on this McKinley Memorial gold dollar type coin. The design elements are sharp throughout, and the corresponding eye appeal is superb. Finer examples of the 1916 issue are elusive.

From The Twelve Oaks Collection, Part II NGC ID# BYLK, PCGS# 7454

4489 1917 McKinley Gold Dollar MS66 NGC. A lovely Premium Gem with brilliant light yellow surfaces, this piece exhibits sharp details and satin luster with exceptional eye appeal. NGC has only certified 58 numerically finer examples (8/16). NGC ID# BYLL, PCGS# 7455

4490 1922 Grant Gold Dollar, No Star, MS63 NGC. A light yellow example of the Grant No Star gold dollar that shares a design with the similar commemorative half dollar. Both denominations had No Star and With Star variants, and only differed in the denomination displayed on the obverse. NGC ID# BYLN, PCGS# 7458

4491 1922 Grant Gold Dollar, No Star, MS64 PCGS. The two varieties of Grant gold dollars are about equally rare in lower Mint State grades, but the No Star type is more difficult to locate in high grade. This sharply detailed Choice example offers lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# BYLN, PCGS# 7458

4492 1922 Grant Gold Dollar, No Star, MS66 NGC. An exemplary representative with coruscating luster and unabraded sun-gold surfaces. The strike is nearly full except on the tree trunk beside the house window frame, which is always soft. NGC ID# BYLN, PCGS# 7458

1922 No Star Grant Gold Dollar, MS67
None Finer at PCGS

4493 1922 Grant Gold Dollar, No Star, MS67 PCGS. This is an intricately struck Superb Gem No Star Grant gold dollar, showing frosty orange-gold luster and unabraded surfaces. The No Star variant is elusive this fine and unknown finer at PCGS (8/16). Laura Gardin Fraser prepared the designs for the Grant Memorial gold dollar and half dollar. NGC ID# BYLN, PCGS# 7458

**1922 Grant Gold Dollar, MS67
No Star Variant**

4494 1922 Grant Gold Dollar, No Star, MS67 NGC. CAC. The Grant No Star gold dollar had a distribution of just 5,016 pieces, an identical number to its With Star counterpart. Nonetheless, the No Star variant is somewhat scarce in high grade. This Superb Gem representative is boldly struck with satiny yellow-gold luster. Affirmed by the CAC endorsement, the surface quality is outstanding. Only six coins are numerically finer at NGC (8/16). NGC ID# BYLN, PCGS# 7458

4495 1922 Grant Gold Dollar, With Star, MS63 PCGS. A prominent copper toning spot at 5 o'clock on the obverse prevented a higher grade to this lovely Select Mint State commemorative gold dollar. This example displays brilliant satin luster and sharp design details. NGC ID# BYPS, PCGS# 7459

4496 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Blushes of peach toning overlie green-gold surfaces. Lustrous and evenly struck. A loupe reveals infrequent delicate contact. The final gold commemorative issue until 1984. NGC ID# 2FE9, PCGS# 7466

4497 1926 Sesquicentennial Quarter Eagle MS65 NGC. An exquisite Gem, this 150th anniversary commemorative quarter eagle has frosty yellow luster with lovely orange overtones.
From The Twelve Oaks Collection, Part II NGC ID# 2FE9, PCGS# 7466

4498 1926 Sesquicentennial Quarter Eagle MS65 NGC. An impressive Gem representative marking the 150th anniversary of American independence. This piece has brilliant yellow luster with faint traces of pale blue toning.
From The Twelve Oaks Collection, Part II NGC ID# 2FE9, PCGS# 7466

4499 1926 Sesquicentennial Quarter Eagle MS65 PCGS. A fully struck Gem Sesquicentennial type coin with frosty yellow-gold luster. There are no severe abrasions, and eye appeal is proportionately high. Finer examples of this issue may pose a challenge for the budget-conscious collector. NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

4500 1988 Silver Eagle MS70 NGC. Silver Eagle production declined by more than 50% between 1987 and 1988, when 5 million coins were struck. This is a technically flawless representative with brilliant surfaces and fully struck devices. A great Registry coin. NGC ID# 26J8, PCGS# 9816

4501 1989 Silver Eagle MS70 NGC. The 1989 Silver Eagle is extremely rare in MS70 at PCGS, and such coins are elusive in an NGC holder. This NGC coin displays a fully strike and shimmering silver luster over flawlessly preserved surfaces. NGC ID# 26JA, PCGS# 9826

4502 1989 Tenth-Ounce Gold Eagle MS70 NGC. The 1989 tenth-ounce Gold Eagle has one of the lowest MS70 populations in the series, stimulating intense competition between Registry Set builders. This pristine straw-gold coin is fully struck. A tiny alloy spot appears under Liberty's branch arm. NGC ID# 26KY, PCGS# 9828

4503 1989 Quarter-Ounce Gold Eagle MS70 PCGS. A brilliant Superb Gem with spectacular eye appeal, this perfect Mint State piece exhibits satin surfaces and brilliant yellow luster. Population: 48 in 70 (8/16). NGC ID# 26M5, PCGS# 9830

4504 1989 Quarter-Ounce Gold Eagle MS70 PCGS. This stunning and perfect Mint State 1989 quarter-ounce American Eagle gold piece has brilliant and satiny yellow-gold surfaces with extraordinary eye appeal. Population: 48 in 70 (8/16). NGC ID# 26M5, PCGS# 9830

4505 1989 Quarter-Ounce Gold Eagle MS70 PCGS. Splashes of orange and olive toning accent the brilliant yellow-gold surfaces of this boldly struck quarter-ounce gold Eagle. Several alloy spots are scattered over the obverse. Population: 48 in 70 (8/16). NGC ID# 26M5, PCGS# 9830

**1990 Tenth-Ounce Gold Eagle, MS70
Rarely Offered in Pristine Condition**

4506 1990 Tenth-Ounce Gold Eagle MS70 PCGS. The American Gold Eagle series has become extremely popular over the years, with demand for flawless MS70 representatives growing precipitously among Registry-minded enthusiasts. The 1990 tenth-ounce coins are exceedingly difficult to locate in perfect condition and command strong premiums when they do appear at auction. This piece radiates satiny mint luster from technically pristine surfaces. Fully struck. Population: 15 in 70 (8/16). NGC ID# 26KZ, PCGS# 9838

4507 1990 Tenth-Ounce Gold Eagle MS70 NGC. A perfect Mint State example, this diminutive gold bullion coin has brilliant yellow luster on its satiny surfaces. Census: 81 in 70 (8/16). NGC ID# 26KZ, PCGS# 9838

**1991 Half-Ounce Gold Eagle, MS69
Low-Mintage Bullion Issue**

4508 1991 Half-Ounce Gold Eagle MS69 NGC. A virtually perfect example of the last half-ounce Gold Eagle with a Roman numerals date, this coin offers fully struck design elements and vibrant mint luster on both sides. Eye appeal is tremendous. Only 24,100 pieces were struck. NGC has certified 82 finer examples (8/16). NGC ID# 26NC, PCGS# 9852

**1991 Half Ounce Gold Eagle, MS69
Final Roman Numerals Issue**

- 4509** 1991 Half-Ounce Gold Eagle MS69 NGC. The year 1991 was the last time the date on half-ounce Gold Eagles was expressed in Roman numerals. This spectacular specimen is fully struck, with vibrant mint luster and incredible orange-gold surfaces that are just one tick away from perfection. NGC has graded 82 finer examples (8/16). NGC ID# 26NC, PCGS# 9852

**1994 Silver Eagle, MS70
Second Lowest Mintage in the Series**

- 4510** 1994 Silver Eagle MS70 NGC. The 1994 Silver Eagle has the second-lowest mintage among all issues in the series with only 4.2 million pieces produced. The bright, satiny surfaces show brilliant centers while surrounded by pale olive patina in a wide band around the margins. Fully struck, of course. NGC ID# 26JL, PCGS# 9876

**1995-W Silver Eagle, PR69 Ultra Cameo
Modern-Day Rarity**

- 4511** 1995-W Silver Eagle PR69 Ultra Cameo NGC. This was the first Silver Eagle produced at the West Point Mint. Examples were only made available in 10th Anniversary sets. Merely 30,125 ensembles were sold, creating an instant modern-day rarity. Stark black-and-white contrast produces incredible visual appeal. An essentially pristine representative of the most important issue in the 30-year American Eagle series. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Deep Cameo
Key to the Proof Series**

- 4512** 1995-W Silver Eagle PR69 Deep Cameo PCGS. A superb, virtually perfect in every way example of the key proof Silver Eagle issue. This starkly contrasted white-on-black 1995-W Silver Eagle displays a full strike and splendid visual appeal. This issue's popularity comes from its small mintage of 30,125 pieces, examples of which at the time of issue could only be acquired through the purchase of expensive 10th Anniversary American Eagle bullion program proof sets. NGC ID# CFWX, PCGS# 9887

- 4513** 1995 Half-Ounce Gold Eagle MS69 NGC. A collectible, almost perfectly preserved example of the 1995 half-ounce Gold Eagle, showing a fully rendered strike. Semireflective fields deliver uncommonly strong visual appeal. Finer examples are seldom seen. NGC ID# 26NG, PCGS# 9892

- 4514** 1998 Quarter-Ounce Platinum Eagle MS70 PCGS. The design elements of this quarter-ounce Platinum Eagle are fully struck and brightly reflective, standing out boldly against the frosty textured fields. The surfaces are technically perfect and eye appeal is terrific. Population: 44 in 70 (8/16). NGC ID# 26SS, PCGS# 9766

**2000 Silver Eagle, MS70
West Point Issue**

- 4515** 2000 Silver Eagle MS70 NGC. Although struck without a mintmark, the 2000 Silver Eagle was produced at the West Point Mint. Proofs of this year continued to be produced in Philadelphia and bear the P mintmark. This perfectly preserved regular-issue coin is fully struck and essentially untuned. Seldom seen in this top-tier grade. NGC ID# 26JZ, PCGS# 9949 Base PCGS# 9969

- 4516** Four-Piece 2003 Gold Eagle Set MS70 NGC. The coins are identically graded in separate holders. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50**. All four coins are lustrous and fully struck with pristine fine-grained butter-gold surfaces. (Total: 4 coins)

- 4517** 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC. A stunning and perfect reverse proof with frosted fields and mirrored devices, the opposite of the usual Deep Cameo proof coinage. Fully brilliant yellow-gold surfaces and exceptionally attractive. NGC ID# 28ZH, PCGS# 89994

- 4518** Three-Coin 20th Anniversary 2006-W One-Ounce Gold Eagle Set NGC. The three pristine one-ounce \$50 gold eagles are housed in separate holders. The set includes a **reverse proof PR70, a regular proof PR70 Ultra Cameo, and an Uncirculated finish MS70**. All three coins are ideally graded and exhibit flawless, intricately struck surfaces. (Total: 3 coins) NGC ID# 28ZH, PCGS# 89994

- 4519 Four-Piece 2006 Platinum Eagle Set MS70 NGC.** The coins are separately housed in identically and ideally graded holders. The lot includes the **tenth-ounce \$10, quarter-ounce \$25, half-ounce \$50, and one-ounce \$100.** All coins are fully struck, immaculate, and unimprovable. (Total: 4 coins)
- 4520 Four-Piece 2007-W Gold Eagle Set PR70 Ultra Cameo NGC.** All four coins are housed in identically graded but separate Early Releases holders. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** Each coin is intricately impressed and displays essentially flawless sun-gold surfaces. (Total: 4 coins) NGC ID# 26R4, PCGS# 148083 Base PCGS# 148082
- 4521 Four-Piece 2007 Platinum Eagle Set MS70 NGC.** The quartet is individually housed in identically and ideally graded holders. The lot includes the **tenth-ounce \$10, quarter-ounce \$25, half-ounce \$50, and one-ounce \$100.** All four coins are pristine and precisely struck. (Total: 4 coins) NGC ID# 26UD, PCGS# 146928
- 4522 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A fully struck example with satiny luster and flawless preservation. The 2009 Ultra High Relief gold twenty dollar resurrects the reduced diameter, double thickness patterns of 1907 that so beautifully displayed Saint-Gaudens' beloved design. In keeping with the original, this popular modern issue shows a Roman numeral date. NGC ID# 26S4, PCGS# 407404
- 4523 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A fully struck, technically perfect example of this popular one-ounce gold bullion coin, a tribute to Augustus Saint-Gaudens' iconic design for the double eagle. Struck on a double-thick planchet with a 27 mm diameter, this piece is a faithful replica of the extremely rare pattern, Judd-1917, in the Smithsonian Institution. NGC ID# 26S4, PCGS# 407404
- 4524 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A fully struck, flawlessly preserved representative with semiprooflike surfaces and outstanding eye appeal. This one-year resurrection of Saint-Gaudens' ultra high relief double eagle design is highly sought-after by collectors. NGC ID# 26S4, PCGS# 407404
- 4525 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Saint-Gaudens Holder, MS70 PCGS.** A fully defined, semiprooflike example of this famous modern issue, struck in 24-karat gold and flawlessly preserved. This is the only ultra high relief representation of Saint-Gaudens' iconic design that is accessible by the average collector. NGC ID# 26S4, PCGS# 528563 Base PCGS# 407404
- 4526 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** This delightful, fully struck one-ounce bullion coin is just one tick away from perfection and the reflective fields have earned the coveted Prooflike designation. Struck on a 27 mm planchet, with twice the thickness of a standard one-ounce American Gold Eagle, this issue was inspired by the extremely rare gold patterns, Judd-1917, in the Smithsonian Institution. NGC ID# 26S4, PCGS# 506602

COINS OF HAWAII

- 4527 1883 Hawaii Half Dollar MS63 NGC.** Tan and gunmetal patina combines with areas of brilliance, typical of an original example of this Hawaii half dollar issue. The devices are a touch incomplete over the highest points, but gleaming mint frost and good preservation more than compensate for the moderate strike deficiency. The San Francisco Mint struck 700,000 coins. NGC ID# 2C5B, PCGS# 10991

ERRORS

1943 Lincoln Cent, AU50 Struck on a Silver Dime Planchet

- 4528 1943 1C Lincoln Cent — Struck on a Silver Dime Planchet — AU50 PCGS Secure.** Ex: Simpson. Most cents struck on dime planchets are highly conspicuous, since the color differs from the usual red to brown. But the 1943-dated cents were struck on zinc-plated steel planchets, and thus are similar in color to untoned silver dimes. The present wrong planchet error looks like a typical 1943 cent upon first glance, but it was in circulation only briefly before a sharp-eyed finder set it aside. The silver-gray surfaces are lightly marked and display minor high point wear. As expected of the slightly undersized flan, E PLURIBUS UNUM and the L in LIBERTY are very tight against the rims. Although the bronze 1943 cent is out of reach for most collectors, the present wrong planchet error is affordable.

1943-S Cent, AU50 on a Silver Dime Flan

- 4529 1943-S 1C Lincoln Cent — Struck on a Silver Dime Planchet — AU50 PCGS.** Few can afford to purchase a 1943-S cent on a bronze cent planchet, but a different off-metal error on the same issue is comparatively affordable. Since the color of a silver dime resembled the zinc-plated steel alloy in use during 1943, the present coin circulated briefly until someone noticed that IN GOD WE TRUST is partly off the flan. Lincoln's jaw shows light wear, and the fields display infrequent hair-thin test marks.

1920-Dated Buffalo Nickel, AU55 Struck on a Cent Blank

- 4530 1920-? Buffalo Nickel — Struck on a Cent Blank — AU55 NGC.** 3.1 grams, the expected weight of a Wheat cent. This wrong planchet mint error was struck aligned with the collar die at 7 o'clock. LIBERTY and FIVE CENTS are partly absent, and the mintmark location is off the flan. This olive-brown example circulated briefly before a sharp-eyed finder set it aside. A patch of wispy test marks are noted on the bison's flank.

1943-S Jefferson Nickel, AU55
Struck on a Cent Planchet

- 4531 1943-S Jefferson Nickel — Struck on a Steel Cent Planchet — AU55 PCGS.** Except for a few rare 1944-dated pieces, the zinc-plated steel cent alloy was in use only during 1943. Thus, off-metal Jefferson nickel “steelies” are rare, and our online auction archives (which date to 1993) show only a dozen or so prior appearances. The present example has fully struck centers and shows no sign of wear, although the unabraded surfaces are deeply oxidized. IN GOD WE and E PLURIBUS UNUM are partial, and exhibit stretching toward the rims.

1976-D Bicentennial Quarter
Struck on a Cent Flan, MS61 Red

- 4532 1976-D Bicentennial Quarter — Struck on a Cent Planchet — MS61 Red PCGS.** Quarters struck on cent planchets likely occur fairly regularly at the Mint, but most are detected by riddlers and destroyed. Not only did the present full Red wrong planchet error escape the Denver facility, but it is an example of the short-lived Bicentennial quarter type. Further, the Drummer and dual date are nearly completely present. The mintmark is on the obverse rim at 4 o'clock.

1999-P Delaware Quarter, MS64
Struck on an Experimental Planchet

- 4533 1999-P Delaware Quarter — Struck on an Experimental Planchet — MS64 PCGS.** The U.S. Mint apparently tested proposed manganese alloy planchets for the new “golden” Sacagawea dollar before dies for that design were available. Instead, 1999-P state quarter dies of similar diameter were used to strike a limited number of experimental planchet pieces. These are known for all five 1999 state designs (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut), and all are very rare. The present unabraded peach-gold and lime-green example has a small flan flaw above the date and slightly ragged proto-rims, as made.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 8364.

1999-P Pennsylvania Quarter, MS64
On an Experimental Planchet

- 4534 1999-P Pennsylvania Quarter — Struck on an Experimental Planchet — MS64 PCGS.** The manganese-brass planchets for the Sacagawea dollar become available during 1999, earlier than the dies for that design. The planchets were tested for their suitability for coinage, using Philadelphia dies for the five different state quarter designs. Examples of any design seldom appear. This lustrous green-gold example has excellent eye appeal. E PLURIBUS UNUM and UNITED exhibit stretching toward the rim, characteristic of a broadstrike.
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 8365.

1999-P New Jersey Quarter, MS68
On an Experimental Planchet

- 4535 1999-P New Jersey Quarter — Struck on an Experimental Planchet — MS68 PCGS.** Manganese alloy planchets for the newfangled “golden” dollar apparently arrived at the Philadelphia Mint before their intended target, the Sacagawea dollar dies. Mint workers instead tested the planchets using statehood quarter dies. Only a handful of examples are known for each of the five statehood types. The present piece has raised rims, and the peripheral legends are normally struck, without the stretching often encountered on the experimental planchet strikes. The well struck apricot-gold surfaces are immaculate and semiprooflike. The flan is mildly granular throughout E PLURIBUS UNUM, as made.

2000-P Sacagawea Dollar, MS66
Struck Over a 2000-P Maryland Quarter

- 4536 2000-P Sacagawea Dollar — Struck Over a 2000-P Maryland Quarter — MS66 NGC.** A lustrous and pristine double denomination mint error with light peripheral autumn-gold toning. The color and reeded edge provide the first indication of its error status. Close examination reveals ample remnants of the Maryland quarter undertype, including IN GOD WE TRUST and the Philadelphia mintmark below the baby, and the peak of the Maryland State House above the eagle's head.

1924 Double Eagle, MS65
Struck-Through Reverse

- 4537 1924 Saint-Gaudens Double Eagle — Struck-Thru Reverse — MS65 PCGS. The eagle's breast and upper leg are indistinct and recessed, where the coin was struck through a lump of debris. Many U.S. gold coins exhibit small strike-throughs, especially antebellum branch mint pieces, but large strike-throughs are highly unusual. This lustrous green-gold example is minimally abraded and would stir conversation at a club meeting.

SO-CALLED DOLLAR

1885 Dauphin County Centennial Medal
Struck In Silver, MS63 Deep Prooflike

- 4538 1885 Dauphin County, Pennsylvania Centennial Medal, Silver, HK-Unlisted, Raymond-154. MS63 Deep Prooflike NGC. The Dauphin County, Pennsylvania Centennial Medal was struck in white metal, bronze, and silver, with mintages ranging from 2,000 pieces in white metal to only 200 bronze medals. Silver examples are very rare, with just 50 pieces struck and perhaps as few as nine pieces actually sold. Pennsylvania pioneer John Harris is commemorated on the reverse by his handsome log cabin, while the obverse depicts the three great industries of Dauphin County — mining, manufacturing, and agriculture. It is believed the white metal and bronze pieces were manufactured by Peter L. Krider of Philadelphia, since P.L. KRIDER PHILA. appears on those medals in a panel beneath mining motif. The silver pieces do not show the Krider imprint, since they were likely struck at the Philadelphia Mint. Some researchers believe Chief Engraver William Barber cut the dies based on similarities to his So-Called dollar designs for Nevada and the Centennial Exposition (HK-19 and HK-20). This silver example is surely one of the finest known, with brilliant and deeply mirrored fields contrasting with frosted raised devices. A few thin, minor marks are noted in the fields. Edge lettering appears on this Select example, finely done, with the name THEODORE D. GREENWALT. His story is an interesting sidebar, although unrelated to the striking of the medal.

Major Greenwalt was one of eight Union Paymasters joined by eight pay clerks and an escort of 31 soldiers assigned to guard the transport of payroll aboard the steamer *Ruth*, which caught fire and sank on the Mississippi River near Cairo, Illinois on the night of August 4, 1863. A suspected Confederate incendiary device set fire to the vessel, with the loss of 26 lives and \$2.6 million of Union Army payroll. A Military Board of Inquiry later ruled it was an act of sabotage. By good fortune, Major Greenwalt was temporarily ashore when the *Ruth* went down.

20TH CENTURY TOKENS AND MEDALS

1947 Nobel Committee Medal, MS63 Gold Medallion for Physics

4539 1947 Nobel Committee 23K Gold Medal, MS63 NGC. 27 mm. 20 grams. The five members of the Nobel committees are tasked with the identification of a worthy laureate for the Nobel Prize in the various classes. With just five committee members, these medals were struck in minuscule quantities and are extremely rare today. Issued to committee members for Physics, this medal exhibits trivial contact marks in the fields and on the rims, with fully brilliant and lustrous yellow-gold surfaces. Nobel's portrait on the obverse, and the arms of the Academy of Sciences on the reverse are bold well-struck.

Sir Edward Victor Appleton investigated the upper atmosphere and discovered the so-called Appleton Layer. His discovery earned the 1947 Nobel Prize in Physics. The Appleton Layer is known today as the F region of the ionosphere, unaffected by atmospheric conditions, and therefore a dependable reflector of radio signals.

CERTIFIED MODERN PROOF SETS

1937 Proof Set, PCGS-Certified PR66-67 Original Coloration

4540 1937 Proof Set, PR66-67 PCGS. This set is well-matched for grade and eye appeal. All five pieces are PCGS-certified with original patina. Included are:

Cent PR66 Red. A gleaming copper-orange example with fully struck design elements. A single fleck is seen above the C in CENT.

Nickel PR66. Lovely champagne and pale lavender-blue hues adorn the mirrored surfaces, accentuating the sharp design elements.

Dime PR66. This fully struck Premium Gem displays liquidlike mirroring in the fields, covered in milky-gold toning. There are no contact marks.

Quarter PR66. Hints of lavender appear throughout the dusky champagne patina of this sharp proof, while the fields glimmer beneath a light.

Half Dollar PR67. The milky-gold toning of this Superb Gem proof is similar to that of the other silver pieces in this set, although the surface quality is even finer. The strike is fully impressed.

From The Twelve Oaks Collection, Part II (Total: 5 coins)

1938 PCGS-Certified Proof Set, PR65-66

4541 1938 Proof Set, PR65-66 PCGS. An all PCGS-certified proof set. Included are:

Cent PR65 Red. Full mint red color has a lovely accent of pale lilac along the left obverse rim. Deeply mirrored.

Nickel PR66. An exceptionally attractive proof. The surfaces appear at first to be brilliant, but when closely examined they reveal pale blue and rose patina.

Dime PR66. Streaks of gray patina are seen across the obverse, the reverse is slightly toned with the periphery slightly darker than the interior. Problem-free.

Quarter PR66. Hazy gray-golden surfaces with strong underlying mirrors in the fields.

Half Dollar PR66. Light, hazy gray-golden toning is seen over both the obverse and reverse. Problem-free surfaces and deeply mirrored. (Total: 5 coins)

4542 1939 Proof Set, PR66-67 PCGS. A high-grade set with well-matched toning among the silver coins. Included are:

Cent PR66 Red. Pumpkin-orange mirroring gives this piece splendid eye appeal, while a loupe reveals only a few tiny flecks. The strike is sharp.

Nickel PR67. Reverse of 1938. Reflective fields complement fully rendered design elements, while a dusting of light champagne toning appears over each side.

Dime PR67. A full strike delivers strong eye appeal along with reflective fields. Each side has dusky champagne toning.

Quarter PR66. Lightly toned in champagne hues. The strike is sharp, and there are no contact marks.

Half Dollar PR66. A sharp proof from fresh dies with fully mirrored fields and a splash of light milky-gold toning on each side.

From The Twelve Oaks Collection, Part II (Total: 5 coins)

1940 Proof Set, PR65-66

4543 1940 Proof Set, PR65-66 PCGS. A well-matched set. Included are:

Cent PR65 Red and Brown. Not exactly Red and Brown in the traditional sense, there is no actual brown present. Instead, the surfaces are about 50% original red, and 50% bright lilac.

Nickel PR66. Reverse of 1939. A beautifully toned iridescent toned proof striking. Nicely mirrored and problem-free.

Dime PR66. Dazzling, deep mirrors are seen in the fields on each side with an ever-so-slight cameo effect on the reverse. Lightly toned.

Quarter PR66. The fields are brightly mirrored and each side is mostly brilliant, except for the occasional speckle of color and slight peripheral toning.

Half Dollar PR66. Like the quarter above, the fields are exceptionally bright on this proof. Almost no toning is present until a magnifier is used, and then only the occasional speck of color is present. (Total: 5 coins)

4544 Six-Piece 1942 Proof Set PCGS. The coins are individually encapsulated in holders with consecutive certification numbers. The set includes: **cent PR65 Red**, an orange-gold Gem with minor reverse discoloration; **Type One nickel PR67**, fully struck, light apricot-gold toning; **Type Two nickel PR66**, iridescent sea-green and lilac patina, a small retained lamination near the chin; **dime PR67**, intricately struck and pristine; **quarter PR66**, white aside from an obverse brown freckle at 9 o'clock; and a **half dollar PR66**, attractive peripheral rose-red and sun-gold toning.

From The Twelve Oaks Collection, Part II (Total: 6 coins)

MINT SETS

- 4545 1947 Double Mint Set Uncertified.** This double Mint Set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders and the outer kraft envelope is present. The mailing envelope is missing. A majority of the coins are lightly toned, but some of the cents have spots. The coins grade between MS63 and MS65. (Total: 28 coins)
- 4546 1947 Double Mint Set Uncertified.** This double Mint Set includes 28 coins, two of each denomination issued by the three active mints in 1947 (San Francisco did not strike half dollars that year). Housed in the cardboard holders, kraft envelope, and outer mailing envelope of mint issue. The mailing envelope was postmarked in Feb. 1948 at Washington, D.C. and Manchester, Iowa. Many of the coins are richly patinated, and most are well preserved. (Total: 28 coins)
- 4547 1948 Double Mint Set Uncertified.** San Francisco did not coin Franklin halves during 1948, but the present double mint set includes two each of the other Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope is present, but the mailing envelope is absent. The coins display light peripheral toning. The average grade is MS64. (Total: 28 coins)
- 4548 1948 Double Mint Set Uncertified.** The 28-piece set remains in the cardboard holders of its Treasury shipment. With the exception of the 1948-S Franklin half dollar, which was never struck, the set contains two examples each for the five denominations from the three mints in operation that year. The outer mailing envelope was postmarked at Washington, D.C. and Minneapolis, Minnesota, in February 1949. The 1948 Philadelphia dimes and 1948-D quarters are deeply toned. The coins are generally well preserved, though one of the 1948-D halves has a vertical mark on the bell. (Total: 28 coins)
- 4549 1948 Double Mint Set Uncertified.** This original 28-piece double mint set remains in the cardboard holders, kraft envelope, and mailing envelope of Treasury issue. The outer envelope was postmarked in January 1949 at Chanute, Kansas. The coins are lightly toned, and the average example grades MS64 to MS65. (Total: 28 coins)
- 4550 1948 Double Mint Set Uncertified.** No 1948-S Franklin half dollars were struck, but the set otherwise includes two each of the five denominations from the Philadelphia, Denver, and San Francisco facilities. The coins are housed in the cardboard holders and kraft envelope of Treasury issue, but the outer mailing envelope is absent. An attractively toned and well preserved set. (Total: 28 coins)
- 4551 1949 Double Mint Set Uncertified.** With the exception of the non-existent 1949-S quarter, this 28-piece double mint set includes two examples each of the five denominations coined at the three Federal mints in operation during 1949. The set is housed in the cardboard holders of issue, but the outer mailing envelope is absent. The coins display light, attractive toning, and the grades average MS64. (Total: 28 coins)
- 4552 1949 Double Mint Set Uncertified.** Housed in the cardboard holders of Treasury issue. Since no 1949-S quarters were struck, none are included in the present set, but the set does contain two examples each of the other combinations of five denominations from the three Mint facilities. The coins exhibit various degrees of toning, and most are well preserved. (Total: 28 coins)
- 4553 1949 Double Mint Set Uncertified.** No 1949-S quarters were coined, but the set otherwise includes two examples each of the five denominations struck at the three operating Federal mints. The set is stored in the cardboard holder and mailing envelope of its Treasury release. The outer envelope was postmarked March 23, 1950, at Reading, PA. The 1949-S cents display beautiful green, red, and orange colors. The other coins are moderately toned and grade between MS63 and MS65. (Total: 28 coins)
- 4554 1951 Double Mint Set Uncertified.** The set includes two each of the five denominations struck at the Philadelphia, Denver, and San Francisco facilities, and is stored in the cardboard holders and kraft envelope of Mint issue. A majority of the coins are lightly toned, although a few display rich patina. The coins are attractive, and average MS64 in grade. (Total: 30 coins)
- 4555 1951 Double Mint Set Uncertified.** The 30-coin set includes two examples of the five denominations from the Philadelphia, Denver, and San Francisco Mints. Housed in the original cardboard holders and kraft envelope. The outer mailing envelope is also included, and was postmarked on April 1, 1952, at Washington, D.C. and on April 4, 1952, at Cando, N.D. The coins are lightly to moderately toned. Most are well preserved, although the 1951-S halves show display obverse grazes. (Total: 30 coins)
- 4556 1952 Double Mint Set Uncertified.** This double Mint Set contains 30 coins, two of each denomination issued by each of the active mints in 1952, housed in the original cardboard holders. The coins are lightly and attractively toned, and most pieces grade MS64 or finer. (Total: 30 coins)
- 4557 1952 Double Mint Set Uncertified.** The set contains two examples each of the five denominations coined at the Philadelphia, Denver, and San Francisco Mints. The coins are housed in the cardboard holders, kraft envelope, and mailing envelope of issue. The outer envelope was postmarked April 3, 1953, at Washington, D.C., and April 8, 1953, at Cando, North Dakota. The Philadelphia coins show the most extensive toning, although all are pleasing, and most are well preserved. (Total: 30 coins)
- 4558 1952 Double Mint Set Uncertified.** The 30 coins represent two examples of each denomination from the Denver, San Francisco, and Philadelphia Mints. They are housed in the somewhat tattered cardboard holders of Mint issue, and most examples display generous arcs of rich original toning. The grades of the coins average MS63 to MS65. (Total: 30 coins)

-
- The image displays two gold coins. The top coin is the obverse of a 1907 Indian Head Gold Eagle, featuring a profile of a Native American man wearing a feathered headdress. The bottom coin is the reverse of a 1907 American Eagle Gold Eagle, showing an eagle perched on a branch. The text "UNITED STATES OF AMERICA" is visible around the top edge, and "E PLURIBUS UNUM" is at the bottom. The year "1907" is on the right side.

8847 1914 Idaho Gold (1/4) MS61 NGC. Hart's Coins of the West.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000, plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.
 - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$4,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer.

Terms and Conditions of Auction

With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakeage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakeage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/ Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016
